Brandram's Genuine B.B. White Lead

pronounced the best by an independent expert

When one of the foremost chemists on the continent states that he has never seen a finer White Lead than Brandram's Genuine B. B., it speaks volumes for the superiority of our Canadian product.

During ten generations, Brandram's Genuine B. B. White Lead has maintained its world-wide reputation as the premier White Lead in oil, excelling as it does in spreading and covering qualities as well as in durability.

FACTORY ORGANIZATION AND OPERATION PAINT MANUFACTURE

January
Ninth
Nineteen-twenty-two

Brandram-Henderson, Limited,
Montreal, Canada.

Dear Sirs:

Without knowledge at the time of the identity of the samples, I have on two occasions examined samples of BRANDRAM'S GENUINE B. B. WHITE LEAD in comparison with competitive products.

The samples were submitted to both a chemical analysis and to a physical evaluation to completely determine their relative worth.

The chemical analysis showed that BRANDRAM'S GENUINE B. B. WHITE LEAD will fulfill the requirements of any recognized standard specification.

When judged from the standpoint of paste characteristics and color, and from the standpoint of the hiding power, spreading capacity, working quality and smoothness of the paint made from it, I stated, in my report, that the sample of BRANDRAM'S GENUINE B. B. WHITE LEAD was an excellent product and that no finer white lead ever has been examined by me.

Very truly yours,

Glenn H. Pickard

Whenever There's a Job For a Dry Battery to do— A Columbia Will Do it

FOR ringing door bells, firing blasts, providing ignition for gas engines, tractors, small automobiles, ringing burglar alarms, Columbia Dry Batteries give dependable service and stand up under the most exacting ignition demands with a longer than usual life.

The Columbia "Multiple" Dry Battery is especially built for marine work. It has a waterproof jacket, rain, moisture and even complete immersion does not affect it. Motor boats must be kept going—the battery must not fail in emergencies.

Columbia dry batteries are widely advertised, they have the largest sale of any dry battery in the world. The profit in each sale is satisfactorily large.

Are you taking full advantage of the profit opportunities offered by Columbia Dry Battery Sales? Your jobber can supply you with the full Columbia line.

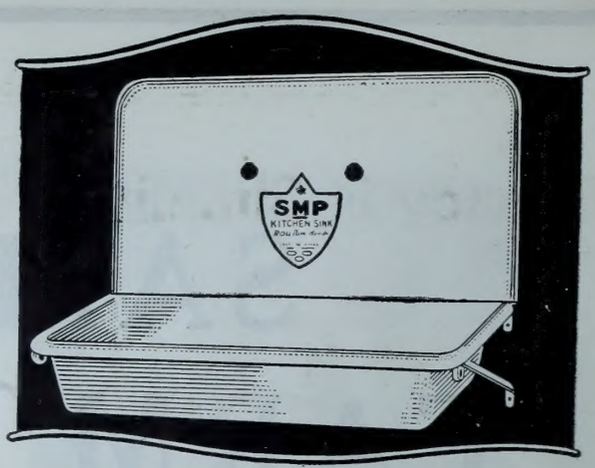
Saving Money in Sinks



Here is the golden opportunity of the year for plumbers and hardware men. This SMP White Enameled Roll Rim Sink introduced by us a few weeks ago after seven years' testing and experiment has been greeted and accepted in a most gratifying way. As we expected, the very low price, the light weight and the high quality of these sinks has won instant approval. A wide gap in the sink market has been filled by the

SMP *White Enameled* ROLL RIM SINKS

Each sink is packed complete ready for shipment including nickel-plated brass strainer, special adjustable brackets, and couplings for iron and lead pipes. It weighs only 58 pounds, less than half the weight of other sinks. Think of the money this would save in freight charges on even a short haul.

The price is $9.90 Ex Warehouse, Toronto. Compare this figure with the cost of other sinks and you will see a big difference, a difference that in one year would amount to a very large saving. It is 18 inches by 30 inches in size, with a back 16 inches high. It is made of 16 gauge Armco Rust Resisting Iron over which are fused three coats of a very special enamel. Write at once for particulars.

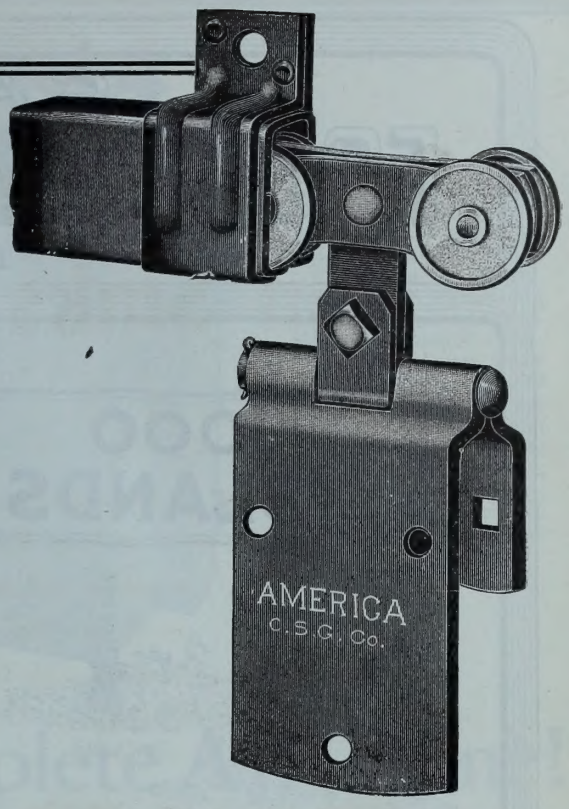
Efficiency is Simplified in the

AMERICA
TROLLEY HANGER



"One of the hardwareman's popular friends"

THE great success of the "America," giving it the largest sales of any trolley hanger in Canada, is due solely to the merit of the product.

In this hanger you get a splendid example of 100% efficiency, which makes friends for the manufacturer and wholesaler and satisfied customers for the retailer.

You can safely recommend the "America" to contractors or any other customers, and rest assured that the hangers will do all you claim for them. Hangers are carefully packed, one pair in a box complete with two end caps, bolts for hangers and lag screws for brackets.

You can secure a great amount of word-of-mouth advertising from satisfied customers if you sell them "America" hangers.

Its Uses

BARN DOORS.
GARAGE DOORS.
FACTORY DOORS.
WAREHOUSE DOORS.

Its Points

Tandem Trucks
Hardened Roller Bearings
Apron 6 in. by 3¼ in.
Anti-Friction Forged Steel Yokes
Simple Adjustments
Ability to stand hard usage.

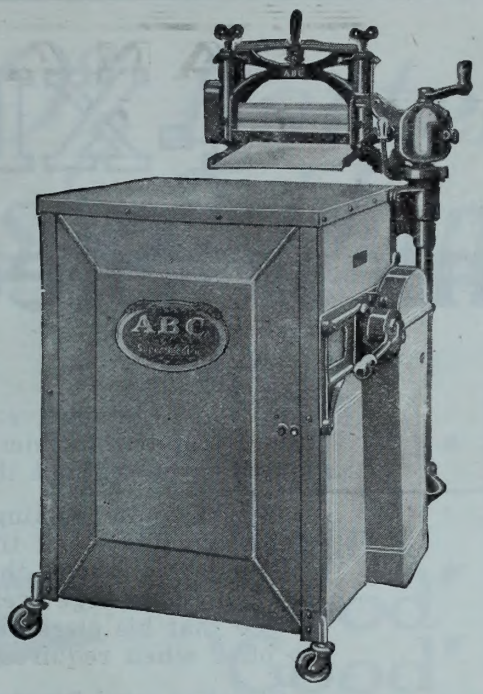
A B C

Super-Electric

$170

(*Retail Price*)

Except in B. C. and the Maritimes



Model No. 65-E. For your best trade, this A B C is ideal. It is the finest washer that money can buy or experience can produce. Wonderfully sturdy and simple. No springs. Quiet and vibrationless in operation. 50% oversize motor; aluminum wringer that locks automatically in any of 20 positions; safe, quick-acting pressure release for rolls; big, easy-rolling casters; handsome full cabinet; maple or zinc cylinders; galvanized tub. Model 66-E has copper tub; retails at $200.

The "Star" of the Complete A B C Line!

While the entire A B C Line is a genuinely high quality proposition, from the Alco's at $72 up, the stellar models are these A B C Super Electrics.

Frequently, in as high as three cases out of four, people who come in to see the lower-priced A B C's, choose Super Electrics instead.

When you consider that A B C Alco's at $110, and A B C Oscillators at $135, are unrivaled values in their respective classes, you can gain some idea as to how fine these Super Electrics at $170 and $200 must be!

If you want to make a real success and real money in the sale of washing machines, lose no time in getting all facts concerning this A B C Line.

It is a splendidly balanced, complete line—one that embraces all three of the big-selling types of electric washers, viz: dolly, oscillating and cylinder. Engine drive dolly and cylinder types are also included.

The prices grade upwards in easy stages, as you will note below. There is an A B C for every prospect's purse!

You can, therefore, profitably concentrate all your efforts upon A B C's. You can combine your orders, secure extra quantity discounts, cut your investment, simplify your sales, advertising and service work, reduce correspondence, etc.

Get in touch with us at once! Write or wire direct to the nearest A B C wholesale distributor, or to Brantford. Do it today!

A B C SUPER ELECTRIC (Semi-Cabinet)

No. 60-E, galv. tub, wood wringer	$155

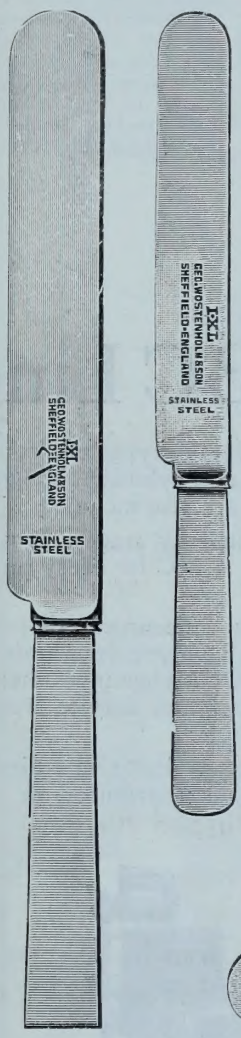
I-XL

Stainless Steel Knives



have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

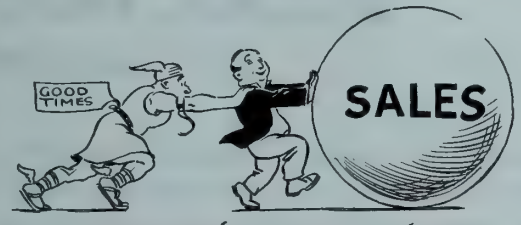
"Sales 100% Better—I Pushed Harder"

Says the Wise Old Owl

"Fair"
"Good"
"Fair"
"Good"
"Good"
"100% BETTER—
I PUSHED HARDER"



It's easy enough to keep pushing
When Good Times are at your back

But the Man who arrives
Is the Man who drives
The harder when times are slack.

These replies came to us from one town in response to our enquiry as to how present Gillette sales compared with those of 1919-20.

Were we to cover this page with type, we could not add one iota to the strength of that one line:

"100% Better—I Pushed Harder."

We will add only that we are engaged now upon the preparation of the strongest Gillette advertising campaign that has ever been put on in Canada.

Is the Sawdust Soaking Up Your Profits on Oil Sales?

With the ordinary barrel and measure "system," oil drips from the barrel faucet, oil is spilled from over-flowing measures—every drop of which is wasted.

But with Bowser tanks there is no waste of oil. You check in each amount received—it is stored in leakproof, fire-proof tanks—it is dispensed through accurate measuring pumps directly into the receptacle.

In operation, if oil is carelessly spilled it goes back into the tank through the Bowser drip pan—no sawdust is needed. Thus every drop of oil you buy is sold and pays you a profit.

The time saved by the Bowser will alone pay a handsome dividend on the investment.

And the fast, accurate, cleanly service makes every customer a friend of your business.

For specific figures as to the possible economies in your oil department ask for booklet C-16 and get the Bowser story.

Why Do Eggs Deteriorate?

One reason is some shippers use same fillers repeatedly — absolutely against the ethics of hygiene.

Even new-laid eggs will give off an odor that is absorbed by the filler. Each time the same filler is used the odor becomes intensified. Egg shells are porous, and the eggs will become tainted from this odor and spoil.

It pays your customers to use fresh fillers for each shipment—and incidentally it increases your business.

When Danger Lurks in Spasmodic Advertising

THE time is near at hand, states Printers' Ink, when general advertisers are going to recognize something about the scientific use of the principle of continuity in advertising that has been known for a considerable period by the retail mail-order people. By experiments, and also by experience that sometimes has been costly and bitter, the mail-order houses have established to their complete satisfaction the fact that it takes just about four years of continuous and cumulative effort to "make" an article in a selling way.

Through compiling and collating a long list of selling successes they are able to demonstrate by average figures that an advertising campaign yields only about 40 per cent. of its selling power during the first year. In three more years, if the advertising has been kept up unabated, the cumulative effect is such that the additional 60 per cent. efficiency is brought about, thus getting the proposition fully under way.

And the interesting thing about it is that the principle works the other way also. If there is any lessening of effort it takes four years for the full effect to be felt. It used to be that the mail-order people imagined they could safely shorten advertising outlay here and there. They thought the momentum from past efforts would carry them over. Or if it didn't, the resulting slackening of sales would be temporary. Conditions might be such that sales effort was not needed so far as present needs were concerned. There might be so much business that the effect of cutting the advertising down or out would not be noticed. It could be resumed when the need began to appear.

But they found this kind of business would not work at all for the reason that only about 40 per cent. of the result would be felt during the current year. For three more years the tearing down influence would continue, its maximum effect not appearing until the end of that time.

Advertising is not the magic thing some of its overly enthusiastic friends claim it is. If it were, then it could be turned on or shut off at will, just as steam is manipulated in a radiator, and the desired result gained each time. Advertising is an economic force that will yield proportionately to the correctness of its application. It has done wonderful things despite the abuse and manhandling it has received.

Says Lower Freight Rates Would Reduce Prices of Hardware and Prove Stimulant to Business

Freight Reduction by U.S. Railways Impairs Relative Position of Canadian Sheet Makers—Coal Strike Might Offset Influence of Lower Freight Rates in Iron and Steel Industry—Ton of Finished Steel Represents 5 Tons of Material Carried

EDITOR'S NOTE—A very involved situation has been presented in regard to the discussion of freight rates which has just been concluded in Parliament. In this discussion the offer of the railways to grant a reduction in freight rates on certain basic commodities including ore, pig iron, scrap iron, blooms and wire rods amounting to 16.66% in Western Canada and 20% east of Fort William, was considered.

The Parliamentary debate centered around the following two issues. 1. The further suspension of the Crows Nest Pass agreement with acceptance of the railway's proposals to reduce rates on certain commodities and allowing the Railway Board to deal with the rest of the situation. 2. To suspend all of the Crows Nest Pass agreement except that concerning grain and flour.

The final vote adopted the second clause as outlined. Therefore the likelihood of lower rates on those basic hardware commodities outlined is possibly a little more remote at the present time though the Dominion Railway Board may take some action. In this connection it is of interest to note that Hon. Mr. Crerar, Progressive Leader, stated that the railway's offer, including reductions on hardware lines, involved a revenue loss of $6,163,000 whereas the decision to suspend the Crows Nest Agreement on everything except grain and flour involved a loss of revenue of only $3,800,000, thus leaving two and a half million dollars for reductions on basic commodities. "I am convinced the railways can make the reductions on basic commodities and still have the Crow's Nest rates on grain and not suffer," said Mr. Crerar.

The effect which the introduction of these rates will have upon hardware prices is outlined in the following interviews:

ROBERT Hobson, president of The Steel Co. of Canada, Ltd., Hamilton, Ont., stated to Hardware and Metal, "I believe that the proposed reduction in freight rates on some of the basic materials will materially stimulate business. The rates which have been in effect for the last two or three years have been a very heavy burden."

Pointing out that for some time sheet manufacturers have been after the railways in an effort to secure better rates, particularly commodity rates to certain large consuming points on galvanized and black sheets, A. T. Enlow, president Dominion Sheet Metal Corporation Ltd., Hamilton, stated to Hardware and Metal:

"Our application was heard and the result delayed until the general freight rate matter had attention and now we find that the reductions which apparently are suggested apply only on crude and raw materials, such as pig iron, billets, etc., and will not in any way help out the situation as regarding finished sheets which is a severe disappointment.

"In view of the fact that the U. S. rates are reduced 10% beginning July 1st, our relative position will be impaired rather than improved and we therefore feel that it is the duty of the railroad at the present time to grant these reductions on sheets to the end that the Canadian customer may get the benefit thereof.

"We have found in our experience that by putting the price down to the bottom peg, a considerable volume of business may be developed but this cannot be indefinitely carried out at our own expense and while we are willing to operate for a period without any hope of profit, eventually one begins to wonder why they should go through all the efforts without any hope of material reward.

"We are therefore of the opinion that the freight reductions as shown will undoubtedly be of some benefit to the country at large but they should go further and some of the other commodities should be included and that all of this should be passed on to the customer.

"We realize that these reductions make a hard task for the railroad companies to face but it is exactly the same proposition as confronts a manufacturer who is losing money and who reduces prices to get a large volume of business so that his main item of cost, the overhead, may be cut down and eventually some hope of profit may be realized.

"We do not pose as authorities on freight commodities because they are very complicated and have many angles to consider but we do know that it is going to be a great hardship to have to meet the reduced freight rates from U. S. mills without a similar reduction on the part of the Canadian railways."

Would Lower Prices

Pointing out that lower freight rates would lower prices, G. T. Pepall, general manager Samuel & Benjamin, Ltd., Toronto, states:

"It follows naturally that the suggested reduction under ordinary circum-

stances would have an effect in lowering prices, and therefore stimulating trade, although just at present the coal strike is a large factor in the steel business, much larger than the general public is aware, and an actual shortage of steel may be the result. Trade in some of the items mentioned is restricted in the sense that there are few producers in Canada and they naturally work on the basis of competitive values having their eye particularly on the markets of the United States, although perhaps they might not like to admit this fact."

A. L. Page, president and general manager Frost Steel and Wire Co. Ltd., Hamilton, points out that as most of the reductions with the exception of wire rods, apply on materials before they reach the stage of this company's operations, it is difficult to indicate exactly what the position of wire fence manufacturers will be. Obviously the producers who are affected by the reductions on pig and scrap iron, billets, blooms, etc., would be most benefited.

Big Reduction on Steel

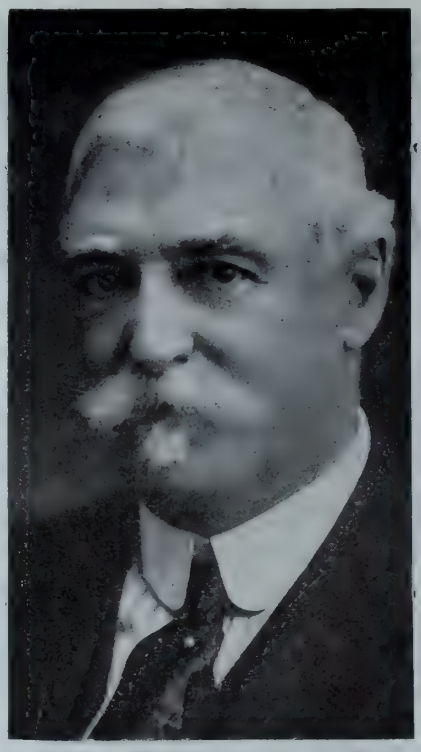
E. W. Knight, purchasing agent of Frankel Bros., Toronto, dealing with the situation from the standpoint of reductions in freight on scrap metals stated to Hardware and Metal:

"The proposed reduction should have a very material effect on the price of the finished product. Few people realize that for every ton of finished material, 4 tons of raw material have to be brought to the manufacturing plant. The freight, therefore, paid on one ton of manufactured steel amounts to almost, but not quite, 5 tons of material. If the freight on one ton of steel averages $3.00 per ton, you will realize that this proposed reduction really makes a difference of 20% of $15.00 per ton, or an actual reduction of $3.00 per ton.

"These freight rates make an infinitely greater proportionate reduction when applied to pig iron than when applied to finished steel and iron. The reduction of pig iron per ton is exactly the same as the reduction on finished iron and steel, and as the former is of less value than the latter, it will be realized that the proportionate reduction is greater."

Affect Lines Close to Basic Materials

The suggested changes on freight rates governing ores and pig iron, would if put into effect, be reflected to a corresponding extent on such hardware products as are reasonably close to the basic materials, according to the opinion of a Toronto hardware wholesaler, when discussing this subject with Hardware and Metal. "In such a class," he stated, "would come nails, wire, bolts, bar iron and similar lines, but the recent tendency towards higher price levels on many of these goods, injected an element of doubt as to the nature of future price developments. The coal strike situation is undoubtedly partly



ROBERT HOBSON

President of the Steel Co. of Canada Ltd., and a director of the Canadian National Railways who sponsors the need for lower freight rates as a stimulant to business and points out that the revisions on basic commodities as suggested by the railways would lower prices of hardware lines.

accountable for the present steel increases and upon the duration of this strike probably depends the strength of the steel markets generally, as consumers of manufactured products have exhibited a decided tendency to rush under cover by anticipating requirements because of the uncertainty attending the settlement of the miners' difficulties.

A. T. ENLOW

President Dominion Sheet Metal Corp. Ltd. Hamilton Ont., who states Canadian sheet manufactures are in an impaired position compared with U. S producers because of the recent general freight reduction across the border.

Fluctuations of the Market

"Therefore, while under ordinary circumstances, a reflection of lower transportation rates could reasonably be expected on prices of most of the hardware commodities suggested, yet under existing circumstances it is a difficult matter to determine the ultimate effect of these two opposing elements. Should the market on such steel goods weaken to any extent, future price lowering in comparison to reduced freight charges are considered quite possible, or, on the other hand, any lower rates might have the effect of offsetting contemplated further advances.

"On the other manufactured hardware lines, the extent to which freight rates would lower production costs would no doubt be the principal base for deciding future price revisions by producers, and the suggested reduction in rates would not constitute a very large factor in the cost of individual articles."

Won't Affect Stove Prices

A stove manufacturer stated to Hardware and Metal that a reduction of 20 per cent. on pig iron in Eastern Canada would affect the firm's net cost of pig iron in an amount rather less than 2 per cent. and in view of the fact that pig iron has recently advanced rather more than 10 per cent. it is obvious that little can be expected in the way of price reductions. This manufacturer located in Toronto is reasonably close to sources of supply for pig iron, but is a considerable distance from sources of supply of many other commodities which enter into the cost of manufacture of stoves. The average haul of the finished product is also to a much greater distance, thus a reduction on pig iron only, has a very slight effect on heating and cooking appliances.

Speaking of the effect of the reduction, J. F. Zimmerman, manager Whites Ltd., Collingwood, Ont., states:

Need General Introduction

"From our point of view there is no doubt that the freight rates have been a barrier to the consumption of heavy commodities. We may state, however, that in our opinion if the 20 per cent. reduction suggested in Eastern Canada applies only to the materials mentioned there will not be any benefit derived to the consumer, as we notice that manufacturers of wire rods and other basic materials are asking a higher price for the third quarter than they have asked for the second quarter of this year.

"We believe that the only thing that will bring about a lower price will be a general reduction in the freight rates."

'Mystery Window' Moves Sport Goods

Sporting Goods Offer an All-Season Line That Sells to Both Young and Old—"Freak" Display Featured in Window of Montreal Merchant Attracts Attention—Cultivating Sales Through the Younger Folk—Sold Fifty Bicycles so Far This Year

REALIZING the possibilities of bigger business in the various lines of sporting goods, particularly those of early summer, Levac & Lalonde, 1365 Wellington St., Verdun, Que., have recently put forth special efforts in this direction. Their trade in this department had always been considered fair, sales reaching encouraging proportions in the spring and summer of the year when the usual sporting season opened and again in the early winter when sleighs, skates and hockey supplies became active sellers. With the turnover increasing from year to year, the question of devoting more time and floor space to the department became uppermost in the minds of both store proprietors. By extending the lines so that each seasonal sport could be supplied seemed to them to be a good move on their part. This plan was carried out and at the present time the sporting goods section has the premier location in the store, namely, just inside the front door.

Not Confined to Young People

The sale of sporting needs is by no means confined to the young people who play the national game and enjoy themselves in other popular pastimes, according to E. Levac, a partner in the above store. True, the majority of sales are to boys and young men, for they are customers for practically every line, but there are sporting goods that interest the older as well as the younger. For those who are not in their prime there is fishing tackle, bicycles, golf supplies, guns and ammunition, etc., while for the younger boys and girls articles that appeal to them range from Kiddie Kars and tricycles to even baseball and tennis goods.

There is plenty of opportunity to keep the department always looking attractive and interesting through the numerous lines that become seasonable all through the year. Perhaps more so than in any other section of the hardware store. "Commencing with January when skates, sleighs and hockey requirements find an active sale, right through to December, we find we have to re-arrange our department almost each month to meet the demands of sport," said Mr. Levac.

A "Mystery" in the Window

Recently a sporting goods window was on display, and being full believers in having a special attraction of some kind to draw the attention of the passers-by, a mysterious flow of water from a bibb was featured in the centre of the window. Fastened on the panels of the walls at the background were baseball, tennis, football and other seasonable goods, but the floor was devoted to showing a line of fishing tackle and other fisherman's needs. To have water in the window therefore harmonized with the display.

The water bibb was suspended from the ceiling by a fine wire, and by the use of a hose from the basement, and a glass tube, it was possible to have what appeared from the outside a steady stream of water from the mouth of the bibb, but from no apparent source. On the floor of the window was placed a large tin basin covered with reeds, and in this was an overflow pipe which allowed the water to again run into the basement.

"A freak display of this kind is bound to attract attention, and faces of both young and old were almost continually pressed against the glass trying to solve the problem of how the water could keep continually flowing without any conceivable place for it to come from. In this, and in other feature attractions we put in our windows, we are able to get the people to come to the front of our store, and by having a neat arrangement of goods on display, we can see where results have been obtained," continued Mr. Levac.

From the first of the year between

Making good use of a small window for the display of seasonable lines, Baxter Hardware Co., Ltd., Windsor, Ont., here show outboard motors, baseball equipment, fishing, tennis and other requirements for early summer sports.

forty and fifty bicycles have been sold. The sale of these has greatly increased this year over last, and Mr. Levac states that this was accomplished by paying particular attention to advertising them and keeping them always before the eyes of their customers. In a section of the city like Verdun there is a good percentage of the people who work in the city proper, or in adjoining municipalities. To the working man a bicycle is convenience itself, and rather than the expense and delay in travelling to and from work on tramways it is very popular. From early summer until Fall an array of bicycles is placed on the floor, and even on the silent salesmen, just inside the front door. They are periodically featured in the windows, and with one placed in the centre in motion, the window becomes more attractive. This is accomplished by running a belt from a small motor in the basement to a small pulley on the floor of the window directly beneath each tire.

Getting the Younger Folk Interested

Many sales are made to the younger people, and special attention is paid to lines that appeal to them in the sporting goods department. Sulkies for the babies, then tricycles, wagons, etc., for those a little older, and medium priced baseballs, bats, gloves, footballs, skates, hockey sticks and numerous other articles for the boy who is old enough to understand the playing of these games as well as the grown-ups.

"If the boy sees what he wants in our store, he can do more to persuade his father to buy it for him than anyone else, and what is more appealing to a boy than a baseball, bat or wagon. When we have a window trim showing an attractive array of these goods, we are continually being asked the price, or to allow him to come in and handle the article that pleases him. Rather than give him an abrupt answer, we give him every encouragement, for we know they are good customers in sporting goods to-day, and will be for other commodities later on," concluded Mr. Levac.

CAN RETAILERS SHOW SALES TAX SEPARATELY ON THEIR INVOICES TO CONSUMERS?

The foregoing question has caused considerable division of opinion among hardware merchants. Some wholesalers have been advising retailers that this practice is contrary to regulations. Hardware and Metal has secured the following ruling on this point from R. R. Farrow, Commissioner of Customs and Excise, Ottawa:—

"If the retailer shows, on his invoice, the amount of tax he has paid on his purchase and presents it as a statement of fact—that he has so paid the same—no objection can be taken by this department even though it be shown as a separate item in the invoice. Retailers are however, not permitted to show an amount on their invoices as being a tax collectible on their sales, unless the item of tax is actually payable on their selling transactions."

Demonstration Sells Many Electric Water Heaters

McKelvey & Birch, Kingston, Ont., Have Novel Plan for Selling Electric Appliances—Big Trade Coming in Maritimes Says St. John Hardwareman

IN RECENT visits to hardwaremen throughout the country Hardware and Metal has come across some further evidences of the importance of the hardware merchant as a salesman of electrical appliances.

In order to demonstrate to the public the real value of an electrical water heater, the firm of McKelvey & Birch, Kingston, Ont., have one installed in their store and it has attracted much attention. With the warm weather comes an increasing desire for people to take frequent baths. To these a handy heater which will supply warm water almost immediately is a great boon and at this time all effort is being chiefly directed toward this class of trade. Demonstrations are being given daily to show the comfort secured at low cost by having such a heater in the home. The cost of the heater is $32, but it is figured that the operating cost is negligible and the original cost spread over the years of service is low. This is the basis on which this article is sold, and it is found to be a good basis on which to sell numerous electric appliances on which the first cost is somewhat of an obstacle at first glance. This includes electric washers, vacuum cleaners, etc.

Travelling down to the Maritime provinces, and judging by the experience of a St. John hardwareman, there is likely to be an awakening in the sale of electrical household appliances in that section. Since the recent application of the municipality of St. John for Hydro-developed current, many of the citizens are looking forward to lower power and light rates. The merchant referred to states that he was requested by a customer to demonstrate electric fireplaces, and while so doing was told that a new house had been built by the prospective purchaser of electric fireplaces, and that in view of the proposed cheap power, he had wired every room in the new house so that full advantage of the power could be taken by the tenants. Every fireplace was wired and provided with sockets, the bedrooms were wired so that electrical toilet requisites could be used, the dining room was provided with sockets where the buffet would stand, so that toasters, percolators, etc., could be used at the table, and the laundry was wired to provide for an electric wringer and washing machine. He stated that this was a good sign of a boost in this class of goods, and believed that as soon as the power distribution system was installed, there would be a good run on electrical labor saving devices.

ADDITION TO HALF-HOLIDAY LISTS

Supplementing previous lists in Hardware and Metal, are the following:

Ontario

AYLMER—Wednesday half holiday from May to September 30. Standard time.

ARNPRIOR—Wednesday half holiday July and August. Standard time.

BELLEVILLE—Wednesday half holiday June to September inclusive. Daylight saving.

CORNWALL—No half holiday. Standard time.

COBALT—Wednesday half holiday May to September. Standard time.

GALT—Wednesday half holiday all year round except December. Standard time.

GANANOQUE—Wednesday half holiday July and August. Daylight saving June, July and August.

GEORGETOWN—Thursday half holiday May to September 30. Standard time.

FORT WILLIAM—Saturday half holiday July and August. Daylight saving all year.

KINCARDINE—Thursday half holiday, May to September inclusive. Standard time.

KINGSTON—No half holiday. Daylight saving until September 3.

LEAMINGTON—Friday half holiday April 1 to Nov. 1. Standard time.

MEAFORD—Wednesday half holiday May 1 to Sept. 30. Standard time.

MIDLAND—Wednesday half holiday June, July and August. Standard time.

PARRY SOUND—Wednesday half holiday June to September inclusive except if holiday same week. Standard time.

PEMBROKE—No half holiday. Standard time. Close 5 p.m. except Saturday.

PRESCOTT—Wednesday half holiday, July and August. Standard time.

PORT ARTHUR—Wednesday half holiday June, July and August. Standard time.

PERTH—Wednesday half holiday June, July and August. Standard time.

RENFREW—Wednesday half holiday June, July and August. Standard time.

SIMCOE—Wednesday half holiday, June to September inclusive. Standard time.

TRENTON—Wednesday half holiday June to September inclusive. Standard time.

WALKERVILLE—No half holiday. Standard time.

WINDSOR—No daylight saving. No half holiday.

Saskatchewan

SASKATOON—Wednesday half holiday May to Sept. inc. Standard time.

New Brunswick

ST. JOHN—Saturday half holiday June to September inclusive. Daylight saving May 20 to September 9.

Building—Canada's Livest Industry

THE AMOUNT *of general building construction under way in Canada at present is such as to constitute a boom. Not only in new construction is such activity evident either for it extends to reconstruction and even to the smaller repair work done by the property owner himself. Hardware merchants in all parts of the country report active sales of tools following aggressive merchandising efforts along this line. Building is to-day the livest industry in Canada, as many merchants will report judging by sales of builders' hardware, tools, etc. Surprisingly little time has been lost this year in wage disputes among workers.*

With the month of June measuring up to that of May the first six months of 1922 will show over $130,000,000 worth of new building, an increase of 16 per cent., really represents an increase of 45 per cent. in actual value due to the price declines on many building lines. This figure is well ahead of the record for 1919 and is also greater in actual volume than that of 1920 which was considered a banner year.

Building activity is being well maintained at present and while such is the case it does not take much to start other prospects on the way to doing repair jobs around the house or starting on new construction. Window displays such as this help considerably in starting this activity.

Windows are also an important feature in this store in connection with tool selling. The store manager says that 50 per cent. of the sales of tools are directly responsible to the window displays. A definite increase in sales in the tool department is said to be at once noticed when a window display is devoted to this line.

This merchant, along with others, has found that the market for tools is ever widening. Educational work pointing out how much more effectively certain work around the home can be done with the employment of proper tools, has brought splendid results in this store. Housewives, property owners and others have joined the mechanic in demanding the right tool for the various needs which arise from time to time.

The store display is prominently carried at the front, a silent salesman and a wall case being occupied by some lines, while the many small articles are boxed at the front of the boxed shelving, with a sample on the front. Builders' hardware occupies one side of the store and extends well over half way to the rear. When first opened this store did not feature this department, but it was more or less scattered among the other hardware. The possibilities of growth were soon realized, however, and a special effort was put forth in this direction. In the process the stock was placed in a separate department, always neatly arranged, and in full view on entering the front door.

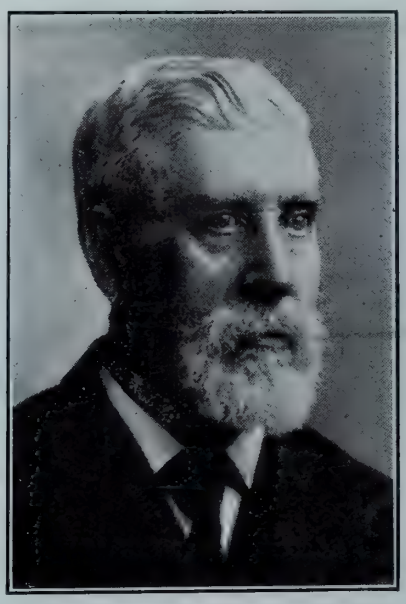
Dominion Day is the Half Century Mark in History of W. H. Lake Hardware in Toronto

Founder Commenced Five Years After Confederation—Still Actively Engaged at 80 Years of Age—Care in Granting Credit, Aggressive Collection of Accounts, Taking Cash Discounts, Accurate Accounting Factors in This Business

FIFTY years in the retail hardware business. Just think of it. Half a century actively engaged in one location. This is the proud record of W. H. Lake, hardware merchant in Toronto, who on Dominion Day, 1872, commenced a small store at 608 Queen St., W., a spot which is now marked by a thriving business. July 1, 1922, however, provides a three-fold thrill for Mr. Lake. It is a patriotic event of considerable interest to this British-Canadian, it signifies the fiftieth milestone in his retail trading activity and celebrates his birthday anniversary, this merchant having just now reached his eightieth year.

The growth and development of the retail hardware trade during the past fifty years can be attributed to the national expansion in commercial enterprises jointly assisted by the general adoption of modern merchandising methods, according to W. H. Lake.

During the fifty years' history which this retail store can boast, many radical changes have been witnessed, both in regard to the individual affairs of the firm and also the general business methods applicable from time to time in the hardware trade. From the small start of so many years ago, however, the expansion apparent to-day merely constitutes the outward growth of a healthful enterprise conducted by a sturdy pioneer, and reflects careful adherence to principles of fair dealing, a rigid system of exact book-keeping, taking full advantage of cash discounts, the limitation of speculative chances, careful buying, the stocking of those goods experiencing a current demand, and a close supervision of credit combined with a strict check on overdue accounts.



W. H. LAKE
founder of the hardware business at 608 Queen St., West, Toronto, who on Dominion Day celebrated 50 years in business and who has just turned eighty years of age.

Care in Credit Granting

"Too much credit has proved to be a handicap rather than an asset to many retailers," observed Mr. Lake, "for it encourages, to a certain extent, needless heavy buying. There is no advantage in having stock which doesn't turn over. Another important factor in all business ventures, but particularly in the retail hardware field, is the im-

Fifty Years Ago On One Of Toronto's Main Streets

The portion of Queen street west around Bathurst in which the W. H. Lake hardware business was established fifty years ago is now a very busy thoroughfare and not far from the centre of the city. There were no street cars in those days and the road was not even paved. This picture was taken forty-eight years ago. Standing by the horse is shown W. H. Lake as he appeared two years after the founding of this business and his two children W. J. Lake and the daughter (now Mrs. Fenny). The other son A. H. Lake, now identified with the business had not been born at this time.

perative necessity for having an efficient system of accountancy, one that will enable the merchant to tell just exactly where he stands in business relationship at any time."

Drawing a comparison with the early days in the hardware business, Mr. Lake stated that there is a difference in the methods of conducting affairs then and now. Fifty years ago, the local wholesale houses had no city travellers and purchases needed in a hurry had to be called for by the merchant. There were no such things as retail merchants' associations or hardware clubs in the city at that time, and Mr. Lake also remarked that hardware merchants did not have the advantage of such trade newspapers as Hardware and Metal, when he commenced business in his present location. It is estimated that there were only about 25 hardware stores in Toronto at that time. There has also been much variation in the size of stocks carried since those days, and in the number of commodities classed among hardware items. The size of stock was necessarily small as purchases were generally of minor character, although when building activities commenced on a larger scale and Toronto began to "grow up," builders' requirements naturally became more extensive. An increase in the number of hardware specialities during recent years was also pointed out by Mr. Lake in his review of conditions, this factor alone adding considerably to the numerous articles carried by the average hardware store.

That a better grade of goods was also obtainable to-day, was another point brought out by this pioneer merchant, who attributed this development to the higher sphere of civilization in which people of to-day were accustomed to living, combined with the improvement in property generally and the better class of houses in particular. The demand for home improvements or accessories was reflected in the call of hardware, and the introduction of electricity, sanitation and other modern conveniences brought in their wake a wider knowledge of hardware requirements and opened new fields for retail opportunities.

The W. H. Lake hardware store at 60 Queen Street West as in more modern times is shown herewith. Some changes have taken place in the interior arrangement as compared with when the upper photo was taken eighteen years ago but the lower picture shows the store front as it appears to-day. In the upper picture W. J. A. Lake appears on the left with a christie hat. The other brother A. H. Lake is on the right behind the counter and the father is shown in the centre.

Handicaps of Pioneer Merchants

As an example of this, Mr. Lake observed that fifty years ago in the locality where his store is situated there was no water system and consequently no baths and sanitary fixtures, which are looked upon to-day as elementary principles in home comforts. Thus the institution of improvements in this direction added to the gradual expansion recorded in the hardware business from a retail standpoint, with similar movements repeated through the development attained in other branches of industry, such as stoves, furnaces, paints, and other household and electrical lines. Another item of interest was introduced when the subject of advertising was touched by W. H. Lake.

"In the early days. there was no such thing as retail advertising, as each merchant considered that he was well-known in his district and those people requiring goods which he sold would naturally come to his store for them. Now, it is distinctly different, as competition forces us to advertise the goods we have for sale and not only try to induce the people to trade at our particular store, but if possible to create their interest in many lines which they might otherwise have overlooked."

When asked if competition did not enter into the hardware trade fifty years ago to the same extent as at the present time, Mr. Lake replied that as far as his district was concerned, when he first opened up business, there was no opposition, his being the only retail store for some distance. The growth of the city brought new problems to solve and this was considered as one of the later developments.

"Never buy more than you can pay for," and "Settle all accounts at least regularly once a month," were other gems of advice dropped by Mr. Lake when suggesting that all retailers should be specially careful to follow up each day an efficient system of bookkeeping. Not only does this method enable the merchant to profit by cash discounts offered, but a close survey is also kept thereby on credit customers.

As Keen as Ever

A personal glimpse of W. H. Lake affords an interesting study of various

What Has Been Done With Freight Rates

IN CONNECTION with the discussion last week and the first part of this week in Parliament of various proposals in regard to freight rates, the question of reduced freight rates on certain basic commodities including pig iron, scrap iron, wire rods, billets, blooms, etc., was considered. As the week drew to a close Parliament voted on the subject and has now prorogued and few people are aware of what has transpired.

The debate after dealing at length with the authority of Parliament to interfere with the Dominion Railway Board in connection with freight rates, finally simmered down to a consideration of two issues, firstly, the offer of the railways for reductions on grain and the basic commodities aforementioned in return for total suspension of the Crow's Nest Pass agreement and secondly, the suspension of the latter agreement for one year except on grain and flour.

The vote which took place shortly before prorogation was in favor of the second proposal as outlined, therefore there will be no immediate reduction on the basic materials listed. The question of future action on these basic materials is being left with the Dominion Railway Board and the fact that the proposal of the railways would have involved a revenue loss of about two and one half million dollars more than the plan which has finally been adopted would seem to indicate that the railways have contemplated some such action. Mr Crerar, leader of the Progressive Party, stated at the conclusion of the debate that he felt sure the railways could carry out the reduction in rates on those basic materials as well as giving the reductions on grain and flour without impairing their position.

The Crow's Nest Pass agreement which has figured so prominently in the discussion has to do with an agreement made in 1897 between the government of Canada and the Canadian Pacific Railway in which the latter was subsidized for the construction of a railway line from Lethbridge to a point in eastern British Columbia. The subsidy amounted to $11,000 per mile or a total of $3,400,000. Concurrently an agreement was made concerning freight charges on certain commodities, including the following reductions from rates then existing: Coal oil, 20 per cent; cordage and binder twine, 10 per cent; iron, including bar, band, Canada plates, 10 per cent; all kinds of wire, 10 per cent; window glass, building paper, roofing felt, paints, woodenware, all 10 per cent. These reductions were applicable to these articles westbound from and including Fort William and all points east of Fort William. In 1918 wage increases on the railways were authorized by the government and simultaneously the Board of Railway Commissioners was authorized to disregard rate controlling agreements including the Crow's Nest rate. Various increases in rates were granted after that and now that the question of retracing these steps and effecting reductions is being considered, it is easy to be seen why the former agreement made in connection with the Crow's Nest Pass line is receiving so much consideration.

Making Hardware History

HARDWARE HISTORY is being made these days and those merchants who think prices have settled down to a more even stride compared with the hectic fluctuations of 1920 had better be careful that they do not misjudge the situation to their own disadvantage. Prices are changing rapidly these days, moving in both directions. Turpentine prices have been advancing steadily and the opinion was just gaining ground that they had about reached the limit for the time when this week an advance of thirty-five cents per gallon is made in one jump. This is said to be the biggest individual price revision made in the history of the turpentine market.

A number of factors are responsible for this situation, many of these having been outlined in recent issues of Hardware and Metal. Current offerings of turpentine are comparatively small and this at a time when a uniformly brisk demand is usually evident may indicate a speculative influence. On the other hand there is apparently a great scarcity of turpentine and both domestic and European consumers are in the market. Sales in recent months have exceeded fresh receipts and the shortage is due to the fact that very little turpentine was held when the new crop commenced and a period of inclement weather delayed the flow from the woods. This in view of large domestic requirements and the unexpected call for supplies from European sources is at the root of the big increase in price and while a firm market will likely continue, the extent to which the present high levels will be maintained depends largely on the extent of the speculative element involved.

Signs of General Improvement in Business

THAT THERE has been a marked improvement in the hardware business during the past two or three months is the general opinion of many manufacturers, wholesalers, and retailers. March, April and May business has been particularly good with many firms. One of the largest retail hardware firms in Ontario, conducting two large retail stores, states that their sales for March, April and May show a splendid increase over the corresponding period of last year.

A manufacturer of tools who complained six months ago about business being exceedingly quiet, now states that the factory is running full time and the company is about one month behind with orders.

A large manufacturer of washing machines, wringers, etc., states that the plant is now busy and there has been a most decided improvement during the past few months. The outlook for Fall is exceedingly good and orders are coming in much more freely than formerly.

A manufacturer of silver-plated ware states that business is showing great improvement in the hardware trade, but is exceedingly quiet in the jewellery trade. This manufacturer states that the jewellers appear to be getting a slump now whereas the hardware trade is rapidly recovering from a quiet period. According to this manufacturer the hardware trade has been buying much more freely during the past two or three months and the outlook for Fall business is exceedingly good.

With continued optimistic reports regarding the crops in various parts of Canada, and with many manufacturing firms getting under way for the first time in some months the outlook for the hardware trade is much brighter than it was a few months ago. Stocks in both the wholesalers' and retailers' hands are still light and any pronounced buying movement is quickly noted, and is reflected in manufacturing circles.

The Problems of Modern Marketing

The marketing of products is the big problem of the future—A phase of business which necessity is pushing rapidly to the forefront

Address by HARRY TIPPER, of Automotive Industries (business publication), at convention of Kiwanis Clubs, International, held at Toronto, Ont.

"IN CONSIDERING the industrial situation of today, we are confronted with the spectacle of a vast mechanical fabric of productive equipment employing millions of people capable of manufacturing more product than the domestic market has been willing to consume, and demanding constant movement of product in order that stoppage may be avoided and financial prosperity maintained. Up to a few years ago, the century of productive endeavor which has passed was devoted to the improvement of mechanical equipment and methods of manufacturing, transportation, and communication. The chemist, the engineer, the mechanical inventor, the explorer, the prospector, and the organizer found ample opportunity for constant development of their scientific attainments in the possibilities involved in the use of steam, electricity and other forces capable of supplying the motive power. As the production capacity grew, and the knowledge of production possibilities received a constant impetus from the energy, study and experience of the applied brains of industry exercised in this direction—the volume of goods produced through these increased facilities demanded a search for wider markets, a more extensive and constant pressure upon the markets, so that people would consume more goods and more people could be induced to use them.

Opening New Markets

"Intensively, for the twenty years preceding the great war, the industrial nations of the earth cultivated the available markets in the hope of seizing a larger and larger share of these markets for their own production operations, and in order to occupy the facilities and the population fully. This accumulation of production facilities and this search for wider and wider markets was furthered by the growth in rapid communication and transportation. The ends of the earth have been brought together so that for business purposes it is as easy to ship goods across the globe as it is to transport them to the next city. Markets which were previously inaccessible because of the difficulty of reaching them were opened up to a larger degree by the increased facilities for communicating and transporting. Discoveries of raw materials in various parts of the world led to the extension of industry from the limited quarters, which it occupied at the beginning of this era, until mills and factories are to be found to-day in all quarters of the globe. The industrial capacity has grown during the latter part of the century in mechanical production more rapidly than new markets can be discovered, and the time is approaching when the markets of the world, as they exist, will be charted and known wherever they are, while the tendency to put the increasing wealth of the world into new production facilities will add to the manufacturing capacity already existing.

Costs of Marketing Increase

"During the last 20 or 30 years a larger and larger percentage of the energy of business has been absorbed in the establishment, maintenance and supplying of products to the markets available for that production. Also, a larger and larger share of the energy of the individual business has been devoted to increasing the pressure of competitive effort on the market, so that the position of the individual industry or company can be maintained in spite of the increased manufacturing facilities and in spite of the larger number of units endeavoring to maintain their place. For these reasons the amount of energy and time spent in reaching, maintaining and supplying the market has absorbed a larger and larger proportion of the total cost of the product at the point of use. Selling, advertising and sales promotion, distributing, warehousing and all other costs of marketing have increased in their percentage proportion to the total price exacted from the consumer. Furthermore, while the costs of manufacturing decrease, or tend to decrease more slowly, the costs of marketing tend to increase more rapidly because of the surplus of manufacturing facility and the larger cost of reaching the wider market. A great deal is said regarding the cost of productive labor and many efforts are being made to reduce the wage scales of this productive labor because of their effect upon the cost. In most instances, the direct labor cost is not more than 15 or 20 per cent. of the cost exacted by the manufacturer, and if the product passes through several hands on its journey to the consumer, the direct labor cost in proportion to the price to be paid by the consumer frequently represents only 5%. Sometimes the total manufacturing cost of an article is only one third or one fourth of the price which must be exacted from the user when the product reaches that point.

Efficiency in Manufacturing

"A vast amount of attention has been given to the problem of efficiency in manufacturing. In this respect, the history of the mechanical system of business shows greater progress than any other. Great strides have been made in the mechanical system of transportation, in the facilities for speedy communication, and in the appliances for handling and warehousing. With all that, the marketing of products has not received the attention which has been bestowed upon manufacturing, and the best efforts of study, experience and analysis have been directed to the production and not the marketing of goods. This is well illustrated by the small number of books devoted to marketing and the comparative unimportance of these books as fundamental studies.

"Thousands of books have been written upon the single branch of manufacturing upon the various mechanical systems of transportation; the mechanical development in warehousing; port terminals, etc., but very little has been done to consider the efficiency of marketing operations and the tendency of their development. Modern marketing must take a larger percentage of the student's attention. It must be the subject of a greater degree of research and analysis, and its operations must be performed without so large a measure of speculative impression and so indefinite a knowledge of tendency. Sales organization and the work of the individual selling force are capable of a development arranged no less scientifically than the developing of manufacturing operations. Mass selling or advertising, as it is called, requires a much closer study as one of the factors of sound marketing, and in accordance with the character of all the factors involved in the marketing problem. Turnover must be studied not merely from the standpoint of its volume, but from the standpoint of the speed, and the individual item of turnover, so that the largest profit may be made on the smallest net percentage of the products turned over. It is significant that it requires a larger number of people to move $1,000 worth of goods than it did twenty years ago, and that, individually, these people receive more money for their work.

Cost Accounting in Marketing

"It is significant that while cost accounting and the analysis of cost has received great attention in respect to manufac-

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Improved Buying of Hardware in B.C.

Increasing Activity in Lumber Logging and Shingle Camps Combined With Improved Crop Conditions Give Much Better Tone — Iron Ore Deposits Being Developed — Price Changes on Hardware Lines

VANCOUVER, B. C.—Continued improvement is noted in B. C. coast hardware circles this week. Buying is on a slightly increased level due to more activity in lumber logging and shingle camps and steadily gaining crop conditions in the Okanagan. Along the Grand Trunk Pacific, trade goes on on a hand-to-mouth basis and in the Cariboo good buying is reported. Collections, too, are on the mend.

Much attention is being given to the "Buy B. C. Products" campaign in which hardware manufacturers on the coast are taking keen interest. Much fruit has already been borne and with a strong organization, it is believed that B. C. goods which are standing up well under comparison with eastern manufactures will be much benefited through the activities of the committee. Fifty towns and cities in the province have signified their intention of participating in the campaign and to that end, are making attractive window displays. In addition, special films have been taken and they will be shown through the cooperation of the moving picture houses.

Steel interests on the coasts are greatly pleased with the report issued this week, of tests carried out by the provincial government on rich iron ore deposits in the Sarita River district, near Alberni, on the west coast of Vancouver Island. Samples had been sent the Vancouver Engineering Works, ten tons of which were given a thorough trial which was eminently satisfactory. Speaking of the experiments, E. Davies, superintendent of the Vancouver Engineering Works has this to say:

"The iron ore from Sarita River is perfectly all right. We utilize it to the same extent as other ores. As a matter of fact, we find it as good as any ores at our works and we believe that when the deposits at Sarita River have been fully developed, they will prove of the utmost value in the development of the iron and steel industry in this province."

Price changes this week have been of little import. Twenty per cent. reduction in Laco lamps is announced and building paper is down ten per cent. Dominion Spring clothes pins are reduced ten per cent. and cement is a cent a pound cheaper this week.

Due to the action of the flax market, local dealers predict a further advance in linseed oil. This is responsible in a large measure to increased orders during the week. White lead is up fractionally and shellac is also rising sharply.

One of the local retailers is featuring a three days' sale of a special new brand of paint. Quarts are offered at $1.15, half gallons at a dollar more and gallons at $4.15. A brand of shingle stain is made a special at $1.60 a gallon.

There is also an aluminum sale at which coffee percoclators are selling at $1.44, double boilers at $1.24 and round roasters at $1.19.

WESTERN CANADA NOTES

The Dominion Battery Co., Ltd., Toronto, has opened branch warehouses at Vancouver and Calgary.

R. L. Mitchell of Ninga, Man., has sold out his hardware business to Campbell Bros., formerly of Minto, Man..

George P. McLauchin, sales manager of the Marshall Wells Company, Winnipeg, is on a business trip to Eastern Cities.

Visitors to Winnipeg included, John Colquhoun of A. R. Colquhoun & Son of Broadview, Sask., who reports crop situation looks encouraging. Mr. Popham of Johnson & Co., Brandon; Mr. Campbell of Campbell, Bros., Ninga Man.

George Peacock, who has been with Grant & Sons hardware store at Galahad, Alta., during the past three years has resigned his position and intends to enter the hardware business again at some other point. Mr. Peacock carries with him every wish for success.

Taylor Webb, Jr., of the firm of Messrs. Bissett & Webb, Ltd., Winnipeg, wholesale hardware brokers, is leaving for an extended trip to Great Britain, France and Belgium, where he will interview some of the company's European connections. It is also his intention to call on several of the firms in Eastern Canada now represented by Bissett & Webb, Ltd. He will be accompanied on his tour by Colburn Ryan of Winnipeg and expects to be away from Winnipeg three months.

WESTERN CANADA NOTES

E. W. Sparrow, who conducts a sporting goods store at Moose Jaw, Sask., was a business visitor to Winnipeg.

Elmer Oleson is taking charge of the branch store of the Whyte and Orr hardware company, recently opened at Millet, Alta.

The Granville Grocery and Hardware Co., has been formed in Vancouver. Seven Chinese are the principals in the company.

G. F. Stephens & Company, Ltd., paint and varnish manufacturers, Winnipeg, have secured new premises at Edmonton. It is just about three weeks ago that this firm's premises at Edmonton were totally destroyed by fire.

Winnipeg—A. M. McQueen, vice-president of the Imperial Oil company, is registered at the Fort Garry hotel, having arived from Toronto. Mr. McQueen is on one of his regular tours of inspection, and in a few days expects to continue his trip west. He is accompanied by Victor Ross, director of the company and F. J. Wolfe, secretary.

Manitoba R.M.A. Holds Its Annual Session In Winnipeg

Winnipeg, Man.—(Special)—T. A. Connell, Winnipeg, was elected president and H. M. Dunham, Portage la Prairie, vice-president of the Manitoba board of the Retail Merchants of Canada, at the ninth annual meeting of the board held last week.

Other officers elected for the ensuing year were: W. J. Creelman, Brandon; 2nd vice-president, R. J. McLean, Winnipeg; 3rd vice-president; J. W. Kelly, Winnipeg, treasurer, the executive to appoint a secretary. Delegates from Manitoba to the meeting of the Dominion board to be held in Halifax, Aug. 8 to 11, will be: J. A. Banfield, T. A. Connell, H. M. Dunham, W. E. Humphries and C. F. Rannard.

The establishment of a school of commerce in connection with the university and the introduction of a merchandising course in Manitoba schools will be sought by the association.

More rigid enforcement of the Lord's Day Act was recommended and guessing contests condemned in other resolutions. Action was deferred in the matter of the stamp tax on cheques, pending its consideration by the Dominion executive council of the association.

Saskatoon Hardware Co. Plans Expansion

Much Greater Display Space in New Retail Premises—Up-to-date Sportings Goods Dept.—Feature Auto Accessories and Builders' Supplies

SASKATOON, Sask.—The Saskatoon Hardware Company, formed thirteen years ago by J. L. S. Hutchinson is now making a series of alterations for the purpose of securing additional accommodation. With the changes being made the display space will be 50 feet by 140 feet and will give room to show many lines which to-day are seldom displayed for lack of room. They intend to utilize much of the additional space available for a series of display tables. The company intends to put in an up-to-date sporting goods department, handling every line of sporting goods, which will occupy the space of an ordinary sporting goods store, and will be situated near the front.

Auto Accessories

On the opposite side near the front will be the silverware and cut glass department, which will be remodelled. There will be a complete stock and up-to-date department for automobile accessories.

The stove department will be at the back of the store under the mezzanine floor. This department will also include washing machines and other household necessities which will be efficiently displayed with plenty of sunlight.

The paint department including varnishes, window glass, etc., commonly known as the "Save the Surface Department," will be prominently situated so as to give the best possible service and display to painters, contractors and householders. This has always been one of the largest departments in the hardware company's business, in which a wholesale and retail business is done.

Builders' Supply

The builders' supply department will be situated in the north wing of the building and a complete stock such as was carried in pre-war days will be added. Farmers' supplies will also be in the north wing.

The shelf and small hardware will be carried on in its present location but the department will be extended. A fireproof boiler room is being installed in rear of the basement to take care of the new heating plant and fuel. The present and the new basement will be used exclusively for the storage. The office will be moved from the second floor and installed on the mezzanine floor and be of easy access to everyone.

Service

This company has always placed service in the foreground and in keeping with this idea are devoting a large space for an up-to-date shipping room. The new addition will be lighted by large roof lights and with additional windows built in to the old building the store will be much lighter and brighter than at present.

These extensive alterations which are now in full swing will be completed in the early fall and meantime the company is carrying on under inconveniences which are inseparable from building operations. The rear end and greater part of the north side of the building have been completely torn out.

THE PROBLEMS OF MARKETING

(Continued from page 39)

turing operations so that hundreds of books have been written upon it and thousands of men have spent their best years in order to improve possibilities—on the other hand, cost accounting in marketing is scarcely known. In the practice of one industry, each individual concern will arbitrarily include or exclude certain functional costs without regard to the analysis of their requirements. Little is known, therefore, about the cost of marketing products except in a general way. In an analysis made two or three years ago for a large company selling a number of products, it was found that 40% of the products billed out were billed at a loss and were being carried by the extra profit on the other 60%. Modern marketing must contend with the intense competitive effort for the securing and maintenance for the proper flow of product from the factory to the user. This competitive effort will cost more than the conditions of business will warrant, unless the efficiency of the marketing effort is increased so that the cost per individual unit is decreased and larger pressure can be secured without placing a further burden upon the user of the product.

"Experience without analysis, impression without investigation, and records of cost without any cost finding, are responsible for the large amount of avoidable waste in the marketing methods usually employed. These methods must be made to yield to analysis so that the work may be done with less waste and, consequently, without a corresponding increase in the cost of the individual product. Modern marketing is just beginning its work. The proper values of advertising, the limitations of its uses, the purposes and limitations of individual selling, the economies of warehousing and the effect of turnover, are just beginning to suggest themselves to the average business man as important elements in his problem.

"Modern marketing demands the student and practical analyst; the careful investigator; and the man who can determine costs properly in their relation to function, because the problem of modern business is the problem of the market and not of the factory."

DOMINION DAY IS THE HALF CENTURY MARK

(Continued from Page 37)

characteristics whose grasp of the business details in his hardware store to-day is as bright and keen as ever. Every week day finds him still at his desk, in spite of inclement weather and some slight indispositions. His eighty years prove no handicap to him in reading while his penmanship could easily serve as an example for some of the younger generation. He comes of a hardware family, being born in Devonshire, England, where his father was engaged in what was termed the ironmonger's business. After various adventures in hardware, painting, plumbing and glazing trades, Mr. Lake migrated to Canada at the age of 29, and for almost one year cast around in Toronto in search of a suitable business location. He purchased the present site and erected a store of moderate dimensions which was duly opened on Dominion Day, 1872. This also marked the thirtieth milestone of his life, the major portion of which has been devoted to the hardware trade. Mr. Lake describes the initial stock as worth something around $2,000, as he found thirty days' credit was then somewhat difficult to obtain. However, after paying cash for a few weeks, his reputation in this direction was established but he firmly adheres to the principle of settling accounts regularly each month. Builders' hardware and household lines, comprised the majority of the stock, with the building contract work later on becoming one of the main features of the business. Another interesting reminiscence revealed by Mr. Lake was the fact that as high as five and six per cent. discount for cash was sometimes offered in those days by wholesale houses. As a contrast in real estate values in the city, it is worthy of note that the site of the present store only cost $34.00 per foot fifty years ago. While Mr. Lake did not divulge its current value, it is known to be worth many times the original quotation.

The growth of the business has been somewhat gradual but nevertheless sure. For some eighteen years, the Lake family lived at the back of the store, when demands for increased store space found them compelled to purchase a separate home. It is also noticeable that Mr. Lake's business activities are not confined alone to hardware, many profitable deals in real estate having been conducted by him during this time, the expansion of the city having opened the way for such diversions. Two sons, W. J. A. and A. H., are actively engaged with their father in the business.

W. J. Wilson, Sales Manager of the Western Steel Products Limited, Winnipeg at a meeting of the Grand Lodge of Manitoba A. F. and A. M. was elected District Deputy Grand Master for the coming year.

Events in the Trade

NEW FIRM

A new hardware store is scheduled to commence the first week in July at Colborne street, Brantford, Ont. This new business will be known as the West Brant Hardware, with Messrs. A. T. Briggs, formerly with John Bishop & Son, Ltd., and A. A. Sinclair, of Paisley and Mount Pleasant, being the two principals. The firm will carry a general line of hardware, tools, builders' supplies, paint, oils and poultry supplies.

PERSONAL

Walter H. Cottingham, president, Sherwin-Williams Co., of Canada, Ltd., sailed from New York on Saturday for England for the summer.

W. Beverley Robinson, president B. & S. H. Thompson Co. sailed this week for England and other European countries, where he will spend the summer months.

OBITUARY

The death occurred in Montreal of William Mosley, works manager and director of the Canadian Tube & Steel Products, Ltd. Mr. Mosley was taken suddenly ill the week previous and was removed to the hospital where he underwent an operation. From this he never fully recovered and passed away on Saturday following. Coming to Montreal in 1898 as superintendent of the Page Hersey Tube and Iron Co. he remained here for three years then returned to the United States with the same concern. In 1907 he returned to Montreal, this time to assume the position of superintendent of the Montreal Rolling Mills.

DOMINION INCORPORATIONS

Monarch Wire Products, Ltd., head office Montreal, capital $80,000 to manufacture wire and steel products.

EXPLOSIVES BILL IS DROPPED

The Explosives Bill, which was introduced in the Senate a short time ago and which would locate all factories or magazines for storing explosives, at least two miles from any other building, has been dropped. This bill, had it been put on the statute books would have seriously affected new merchants or retailers stocking explosives for the first time. The bill was withdrawn when it came up for second reading owing to considerable opposition from many quarters.

SYDNEY MILLS ENTER FOREIGN TRADE

Montreal.—According to a statement given by the British Empire Steel headquarters the steel plant at Sydney, Nova Scotia, has successfully entered the foreign market for finished steel products. Orders are on hand for nails, barbed wire and galvanized wire for Buenos Aires, South Africa, New Zealand, Costa Rica, Columbia, India and the British West Indies. The largest order is for 700 tons for Australia, and the smallest 100 tons for South America and India. Owing to this new activity the plant will at once go on double shift, and the number employed will be increased by over 2,300 men. The mills will roll billets from cold ingots to furnish material for the rod and billet trade.

WINDSOR RETAILERS HAVE GAY TIME

Windsor, Ont.—What was described by C. A. Lanspeary, president of the organization, as a "red letter event," took place in the Prince Edward Hotel when more than 100 persons enjoyed the first Ladies' Night Dinner-Dance given by the Border Cities Retail Merchants' Association in the spacious ball room of the new hostelry. Dinner was served shortly after 7.30 o'clock over which President Lanspeary presided and acted as toastmaster.

Dancing was enjoyed during and after the dinner. The evening's entertainment apart from the dancing, was made up of an exceedingly select musical program composed of some of the finest local talent to be secured.

Contest on Weight of Sheets

Dominion Sheet Metal Corporation, Limited of Hamilton, have announced a contest for wholesalers, traveling salesmen, sheet metal workers, bosses, employes, retailers and clerks.

Three prizes are offered for the nearest guesses to the total number of tons of "Premier" galvanized steel sheets produced by the company from August 1915 to July 1, 1922.

The first prize is a $50 gold watch, second prize $25 leather traveling bag, third prize steel carving set in case. Contestants are allowed to make one guess only. Letters are to be sent to editor, Hardware and Metal, Toronto, and must reach the editor not later than July 15.

MUST HAVE ADVICE ON PARCELS IN PRINT

Sealed parcels of merchandise will now be accepted at parcel post rates within Canada, the Postoffice Department advises, provided the senders place thereon printed labels stating in a general way the nature of the contents. The label may, if desired, be combined with the address label, the label to be wholly in print other than the name and address of the addressee, and have printed thereon the contents, such as "merchandise, this parcel may be opened for postal inspection, if necessary." The endorsement of these words in writing or by means of a hand stamp will not meet the postal requirements. When desired, these words may be printed on with gum paper tape, which is sometimes used for sealing parcels.

The public is cautioned against placing unauthorized enclosures in sealed parcels mailed at parcel post rate of postage. Violation in this respect will not only lead to withdrawal of privilege of sending sealed parcels, but will result in the sender being fined for infraction of the postal regulations.

HALF HOLIDAYS AND EARLY CLOSING

Auburn, Ont.—Wednesday half holiday from 1 p. m. May 1st to Oct. 1st. Close all year round, Monday, Wednesday and Friday nights 6.30. No daylight saving.

COMPLAINT OVER LATE MAIL DELIVERY IN KINGSTON

Kingston, Ont. merchants are feeling a great drawback to their business as a result of the mail service on the steamer Waubic between here and Cape Vincent being cancelled. Letters are now two days old before they reach the business men. There is general complaint over the loss of the service, and the antiquated system of carrying the mail around by Ogdensburg.

The Retail Merchants' Association has taken the matter up and will impress on the government the urgent necessity of having the mail routed as heretofore. It is understood that the reason the mail is not being routed via Cape Vincent, is that the Rockport Navigation Company declined to renew its contract for carrying the mails on the old terms, and the government consequently cancelled the contract.

Difficulty Over Valuation of Imports

Canadian Manufacturers' Association in Convention Discuss Difficulties of Securing Intelligent Valuation of Imports Under New Regulations—Danger in 500 "Ports"—Less Unemployment in B.C.—Prospects in Prairies Very Bright

THE ANNUAL convention of the Canadian Manufacturers' Association, was concluded this week at St. Andrew's-by-the-Sea with the election of John R. Shaw of Woodstock, Ont., to the presidency of the association for the forthcoming year. C. H. Smith, Montreal, is first vice-president; Henry Bertram, Dundas, Ont., second vice-president; Thos. Roden, Toronto, is re-elected treasurer. Among the chairmen of committees is W. C. Coulter, Toronto, Chairman Industrial Relations.

A strong protest against the combined burden of existing systems of taxation in Canada was the feature of the opening session.

The point was raised by H. J. Waddie, president of the Canada Drawn Steel Co. of Hamilton, who announced that a few weeks ago shareholders of his company had been surprised to receive demands from Ottawa for the payment of a tax on a stock dividend that had been declared in 1919, whereas the Federal legislation had not been passed until 1920.

Duty on Imports

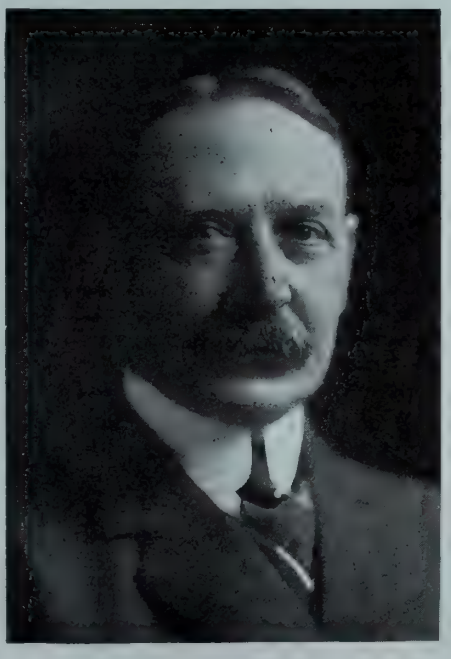
Concerning the budget changes regarding valuation for duty of imports it was pointed out that on June 12 the Minister of Finance provided a safeguard under which Customs officers are required to charge duty on a basis of valuaton—not of a mark at 1/3 of a cent—but the value of corresponding lines of English goods.

This, in theory at least, appeared to be a safeguard against the dumping of German goods—such as cutlery, enamelware, etc.—but the manufacturers foresee a very practical difficulty in the figuring out of the valuation. Who is to do it? At probably not more than half a dozen centres—such as Montreal, Toronto, Winnipeg, for three—are there specialists as appraisers, who like department buyers in large retail stores, are capable of setting a value as on the "English" basis. How can they? They have not had a sufficiently wide or intimate training. The actual result, it is feared, will be that the local Customs officer in most cases will accept the valuation assigned by the local importer, which may be in effect a "dumping" price. The uncertainty in Canada due to a lack of thorough training in local Customs officials will be appreciated when it is realized that there are more than 500 different "ports of entry," far more than are located in the whole of the United States.

Take a Few Samples, Then Make Rule

The suggestion is made here by a Customs expert that the Department would take a few main lines in the different industries, as in cotton, woollen and steel goods, and work out corresponding English valuations accurately, and figure how much the invoiced German price (at the current value of the mark) is below this English value, and hence, how much the German valuation must be advanced to approximate the English price. This advance, say, 50 per cent., 75 per cent., 150 per cent. or whatever it turns out to be on the average, could be applied to all German goods in the same class. Instructions to this effect should be issued to the 500 Customs officers in Canada, and in conforming to this plan the dangers of the destruction of the domestic market for Canadians through a virtual "dumping" of German and other foreign goods through the depreciated currency would be averted. In the absence of some such safeguard manufacturers view the new regulation with a considerable degree of apprehension, for hundreds of them are involved personally.

The British Columbia report said there was less unemployment in Vancouver than in 1912-1913. Much of what there was, was wilful. In other towns and districts of the province unemployment was practically unknown.



W. S. FISHER

Of the Enterprise Foundry Co., St. John, N.B., who has been succeeded in the presidency of the Canadian Manufacturers' Association by J. R. Shaw, of Woodstock, Ont. Mr. Fisher was the presiding officer of the sessions of the convention just concluded at St. Andrews-by-the-Sea, N.B. He has done much during the past year to promote better commercial relations between Canada and the West Indies.

Referring to prospects for steamship trade between the Canadian Atlantic and Pacific ports, following the British Columbia report, it was pointed out that, while cargoes of lumber were available from the Pacific to the Atlantic, there had been a scarcity of Westbound goods. Ships were running from New York to British Columbia, it was said. Efforts had been made to secure bonding privileges on these for Canadian goods, but without success, and the opinion was that the request would never be granted. Canadian goods traveling between Canadian points, by the route, therefore, had to pay duty.

Prairie Divisions

Major J. O. Thorne, Metallic Roofing Co., Winnipeg, read the report for the Prairie division, including Manitoba, Saskatchewan and Alberta. He said in part:

"Due to the unavoidable period of deflation following the war period manufacturing and other business interests had very difficult experiences. Even yet the costs of labor and transportation were at a very high level. General operating costs and particularly taxes, were higher than ever before. However, with the exception of two small areas, which had suffered from high water in the spring, the Prairie crops had been seeded and were growing under most ideal conditions. Given good return from this crop, the prospects for renewed business activities throughout Western Canada were exceedingly bright."

General Manager J. E. Walsh, following the presentation of the British Columbia report, said he understood that the Canadian government was prepared to open a steamship service between the Atlantic and the Pacific whenever traffic justified.

W. C. Coulter, Booth, Coulter Brass Co., Toronto, reporting for the Ontario division, said that "class consciousness" had put industry on the defensive.

T. W. Simms, T. S. Simms Brush Co., St. John, N. B., for the Maritime division commended the Manufacturers' Association for the aid they had given to the Maritimes in the fight for restoration of the Inter-colonial arbitrary rates, abolished in 1918. He hoped the delegates would become acquainted with the Maritimes on their trip. These provinces were trying, with the others, to build for a bigger Canada.

(Continued on page 58)

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"SELFBLO" BLOW TORCH

A blow torch with a unique principle of operation is being placed on the hardware markets by the Hunt-Lasher Co., Inc., of Lynn, Mass. This product is called the "Selfblo," the name being derived from the methods employed in using this torch. Attention is called to the two barrels by the manufacturers, and in describing the operation of this blow torch, it is stated that both these barrels are filled with denatured alcohol, and the touch of a lighted match to the wick end will result in the torch "blowing itself." The makers further claim that this torch will, in twenty seconds, give a 1,400 deg. flame that will run any solder. A counter display containing six torches is supplied by the above company. The Walkley Moncour Co., 416 St. James street, Montreal, are the Canadian representatives.

IMPROVED TOY SWEEPERS

Some improvements in their line of toy carpet sweepers have been announced by the Bissell Carpet Sweeper Co., of Canada, Niagara Falls, Ont. Chief among these is the adoption of a metal handle socket in which to screw the handle similar to that of the regular domestic sized sweeper. This is applied to all three of the toy models. The "Little Queen," will not only have the new handle fastening device, but will also be equipped with rubber tires on the wheels. The "Little Jewel" is described by the manufacturers as something more than a mere toy, being an effective little sweeper. This machine has the necessary mechanical equipment to make it give useful service, such as self adjusting bristle brush, steel pan with regular dumping device, and furniture protectors.

SURESTEP LADDER

A safety model step ladder is being placed on the market by the Surestep Ladder Corporation, of Long Island City, N. Y. The principal features of the Surestep ladder is the two additional side props, swinging outward which support the ladder in place, eliminating the danger of tipping and falling. This is made in two types, known as A and B. Model "A" is a household ladder and model "B" is a mechanic ladder. Both types are made in sizes from three to twelve feet. The manufacturers point out that the mechanic type "B," does not require a second person to hold the ladder while the worker is on it.

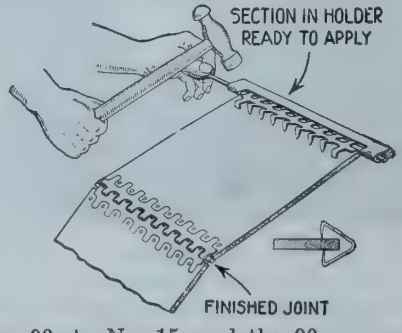
S. M. P. ROLL RIM SINK

A new white enameled roll rim sink has been announced by the Sheet Metal Products Co., of Canada, Toronto. The manufacturers point out that this product combines strength with moderate weight. It is made from 16-gauge Armco iron, with two coats of a special grade enamel on the outside and three

coverings of same on the inside. Connections for 1-½ inch lead pipe, and 1-½ iron pipes are supplied with each sink. The measurement is eighteen inches by thirty inches, while the back is sixteen inches high. The makers further claim to have spent many years of effort to perfect this article before offering same to the trade.

ALLIGATOR BELT LACING

A new size of alligator steel belt lacing is being put on the market by the Flexible Steel Lacing Co., Chicago, Ill. It is known as No. 1, and is designed specially for belts of 1-16 to 3-32 inches thick. Formerly the sizes jumped from



No. 00, to No. 15, and the 00 was considered a little too light, while the No. 15 was too heavy to care for the sizes for which No. 1 is designed. A novel holder frame has been added to the standard equipment for sizes No. 00 and No. 1 to facilitate application for these two miniature sizes.

RADIO TOOL KIT

A tool kit for radio enthusiasts, is being placed on the market by the Mathias Klein & Sons Co., of Chicago, Ill. This kit is put up in a full leather wax-stitched folding pocket case, and includes one 5-inch long-nose plier, one 6-inch side cutting plier, small screw driver, electrician's knife, a high grade file and electrician's tweezers. The manufacturers expect the universal enthusiasm for radio-telephony to reflect in a suitable need for tools of this class.

EMPIRE BRASS ENAMEL

The Empire Brass Enamel Co., are introducing to the trade an enamel for renewing brass beds, brass fixtures, radiators, door knobs, mouldings, picture frames and such materials where a brush brass finish is desired. The manufacturers point out that this enamel gives a hard permanent surface, drys quickly, and will also stand washing. It is made in Canada by the above firm at Kingston, Ont.

HOLIDAY GIFT BOXES

The Aluminum Goods Manufacturing Co., Manitowoc, Wis., have arranged for a new holiday design to be used on boxes for packing their Viko line of aluminum kitchen utensils. This design is lithographed in four colors, and the manufacturers point out these boxes should make a strong appeal, for Christmas, wedding, birthday, and general gift purposes. It also enables the dealer to add a touch of color to window displays, by showing the utensils together with individual gift packing. The makers of Viko, also state that they are offering a special proposition on holiday business.

UNIVERSAL RADIO-PHONE RECEIVERS

A new Universal type of radio-telephone receiver has recently been introduced on the market by the Roller-Smith Co., 233 Broadway, N. Y. These products are supplied in types "A" and "B," the former set being 2,700 ohms per pair and the type "B" have a resistance of 2,000 ohms. Both are supplied in single or double receiver head sets, as desired, also with or without cord and head band. These Universal radio-phone receivers are claimed to be adaptable to either the crystal or vacuum tube sets, the manufacturers stating that a high-class product which will give satisfactory results has been their object in placing them before the trade.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

BOLTS and nuts, both carriage and machine, coach or lag screws, stove and tire bolts, turpentine, linseed oil, sledge and blacksmiths' hammers, certain makes of electric irons, the Storm King line of barn door hangers, steel thumb latches and all chalk lines and similar cotton goods, comprise the budget of price increases announced on the current hardware markets. In addition, persistent rumors regarding a pending advance in wood screws are noted, while, due to higher costs of raw materials such as coke and pig iron, the possibility of future advanced quotations on furnaces is admitted in certain production circles. On the other hand, minor reductions continue in evidence, thus reflecting a double trend in the markets, due to the dual elements of rising production costs in steel items combined with keen competition on other products. Certain grades of moto roils, B and BB Gargoyle Mobiloil, are lower in price, while a similar downward change is apparent on Three-in-One machine oil, the Millers-Falls line of breast and hand drills, and some makes of mirrors.

The sudden advance in turpentine quotations provides a feature of the paint markets, and crowns a succession of price increases during recent weeks. The scarcity of this product and the difficulty of securing adequate fresh supplies are factors that have been recently in evidence, but the current jump was not in the calculations of either distributors or consumers. Turpentine is experiencing a universal brisk demand which thus places receipts at a premium.

Eastern centres also record a slight revision in lapweld boiler tubes, these quotations, however, being nominal under the circumstances as shading continues for what moderate business prevails. Scrap materials are also slightly quieter in tone, the keen interest having subsided somewhat. A recession in ingot metals is not unexpected, this being styled as merely the downward swing of the pendulum, a movement which has been more or less in evidence after each brief session of improvement. Current trade in such products as corrugated sheets, eavestrough and conductor pipe, and builders' supplies generally, are registering notable activity, with seasonal trade reported good in wholesale hardware circles. One feature is the recent improvement in collections, an indication that retail trade is also on the expansion.

Montreal Markets

MONTREAL, June 29.—Of particular interest to the trade this week are the advanced quotations on bolts and nuts. On the new list all kinds of both bolts and nuts show a price advance of varying extent. Stove and sink bolt prices are also increased through a revision in discounts. Blacksmiths' and sledge hammers, five pounds and over, appear with higher quotations. The larger sized lapweld boiler tubes show further price adjustments, the market for these products still unsettled and trade very quiet. Slight revisions are again made on scrap metal quotations, this market remaining in an improved position although business is reported a little quieter this week. Corrugated sheets continue active, with the undertone of the market firm, while compression goods are still reported in a strong position. The recent strength in the cotton market has not yet reflected in quotations on cotton wastes but present price levels are steady. Solder is a little easier following the firmer tone in recent weeks, and iron and steel, although a little quieter remains firm. Tin and antimony are slightly easier on the ingot markets while other lines are holding fairly steady.

FURTHER SLIGHT CHANGES IN SCRAP QUOTATIONS

Montreal.

Further minor revisions are announced in the waste material markets, rubber scrap showing a slight reduction, these lines remaining very dull. Non-ferrous metals continue fairly firm, although the strength of copper is not as marked as a few weeks ago. This condition is attributed to a slight recession in demand, the undertone remaining in a satisfactory position. Iron and steel scrap generally again shows an improvement, and the quotations on heavy melting steel are slightly increased, offerings of this material being reported a little lighter than in recent weeks. A little quieter period is now reported by dealers, but they look to future business with a fair amount of optimism. Action taken with regard to lower freight rates will offer a stimulant to trade, high transportation costs being a big obstacle to scrap dealers in the past. Average dealers buying prices are as follows:

WASTE MATERIALS—

Automobile tires	0 50
Rubber shoes	0 02½
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04½
Lead, tea	3 00
Light copper	0 08½ to 0 09
Heavy copper	0 11
Wrought iron R. rd., No. 1, per gr. ton	10 00
Malleable scrap (ton)	9 00 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	3 00
Boiler plate	8 00 9 00
No. 1 machinery cast	20 00 to 21 00

NEW HIGHER LIST ON BOLTS AND NUTS

Montreal

Superseding list of January last, a

new list on bolts and nuts is now issued to the trade, and an advance in quotations of varying extent is recorded on the different lines listed. Carriage bolts are increased approximately 15 per cent., machine bolts from 11 to 13 per cent., coach and lag screws about 20 per cent. and plow bolts 7½ per cent. The net quotations off list on all nuts is reduced thus also advancing prices. This revision did not come as a surprise as the undertone of the market has been very firm for some weeks past.

ACTIVE TRADE CONTINUES IN CORRUGATED SHEETS

Montreal.

Current trade in corrugated sheets is described by manufacturers and distributors as good, "we are very busy," "trade is exceptionally good," being the descriptive phrases used. Deliveries of flat galvanized sheets are somewhat slower but no scarcity is yet felt in corrugated, although this condition, coupled with increased price levels, still tend to stiffen the market. In discussing the firmer trend now evident, one local manufacturer stated that while the undertone warranted higher levels, there was no direct indication of a revision up to the present. It was thought that much would depend on trade during the ensuing weeks as this factor has already greatly assisted the stronger tendency. Following are unchanged quotations:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Lighter than 24 gauge and wider than 27 ins., Less 10 per cent.

SLIGHT REVISION MADE IN LAPWELD TUBES

Montreal.

Conditions in the local boiler tube market fail to show any improvement, and prices are still being shaded to secure business, what little there is to be obtained. For this reason an easier tone is still apparent and quotations on the larger sizes of lapweld tubes are again revised, the 3½ inch being further reduced while the 3 and 4 inch slightly increased. In making these adjustments distributors state that present quotations are also governed by stocks on hand in view of the usual quieter period during the summer months. Trade is described as quiet and following are nominal quotations :

BOILER TUBES—	Seamless	Lapweld
1 inch	18 00	.....
1¼ inch	20 00	.....
1½ inch	19 00	.....
1¾ inch	20 00	.....
2 inch	19 00	16 00
2¼ inch	22 00	19 00
2½ inch	25 00	19 00
3 inch	29 00	24 50
3½ inch	34 00	25 00
4 inch	43 00	36 00

FIRMER TONE IN COMPRESSION GOODS

Montreal.

The movement of the various lines of valves and bibbs continues in fair proportions with the progress made in construction work. The strength of copper for some time past has a strengthening tendency in the undertone of the market, and improved trade also assisted toward a firmer basis for these goods. Quotations remain at former discounts, as follows:

COMPRESSSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N.P. "P" and "S" traps	40%

RECESSION IN TIN EASES SOLDER PRICES

Montreal.

After continuing on a firmer trend in recent weeks the undertone of solders is now described as a little easier owing to the easier tone of tin on primary markets. This metal after making gains in previous weeks has declined during the past two weeks. Other lines of lead and zinc products remain in a steady position with lead and spelter reported as fairly firm. Demand for these products has shown a slight slackening during the past week or two, but dealers consider this as only a temporary condition maintaining that construction work during the summer should require a fair amount of supplies. Unchanged quotations are the following:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 2½ lbs. sq. ft., lb.	0 10
Do., 4 to 8 lbs. sq. ft. lb.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

GALVANIZED SHEETS FIRM AT RECENT REVISIONS

Montreal.

Activity in galvanized sheets still features the local, sheet markets with stocks, while none too heavy, sufficient to take care of immediate requirements. Arrivals from overseas are coming to hand in good quantities, although mills to the south are handicapped in deliveries. Local quotations remain at recent revised levels with a range still noted among distributors. There is however practically no sign of price-shading such as was evident in past weeks, stocks at present not permitting this practice. Canada plate bookings for fall requirements will soon commence causing an extra buying movement in sheets, and stocks of these are now arriving. Following are unchanged quotations:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	6 75	7 25
26 gauge	6 50	7 00
24 gauge	5 90	6 40
22 gauge	5 55	6 05
18—20	4 85	5 35
Other Brands—		
10¾ oz.	6 50	7 00
28 U. S. gauge	6 10	6 60
26 U. S. gauge	5 80	6 30
24 gauge	5 65	6 15
22 gauge	5 65	6 15
18—20 gauge	5 50	6 00
16 gauge	5 35	5 85

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	13 50
20 x 28 IC, 112s	14 00
20 x 28 IX, 112s	16 00
20 x 28 IXX, 56s.	9 25
20 x 28 IXXX, 56s	10 00

Welsh, polished, 60s.	7 50
Galvanizel, 52s	7 50
Galvanized, 52s	7 50

COTTON WASTES FIRM BUT PRICES UNCHANGED

Montreal

Although the recent rise in the cotton market has resulted in higher prices on practically every line of cotton goods, the reflection on wastes has only been to the extent of maintaining a very firm undertone. Quotations are as yet unchanged, but dealers point out that every indication points in an upward direction. Unchanged quotations are as follows:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

STOVE AND SINK BOLTS NOW 70 PER CENT. OFF

Montreal.

Accompanying the revision on other bolts are higher prices on stove and sink bolts. These are now quoted at less 70 per cent., former discount being 72½ per cent.

SOIL PIPE MARKET STEADY TO FIRM

Montreal

Soil pipe and fittings continue in seasonal demand with the extensive building operations demanding supplies. Quotations remain at former discounts with the tone of the market described as steady to firm, owing to the strength of pig iron and other raw materials. The trend of the market for these products, as pointed out by a local manufacturer, has not shown the advance that has been evident in many other lines of iron and steel. The revision of last month brought current quotations to a higher level, but previous to this prices were at a very low level not warranted by market conditions. However, for the present there is said to be no indication of a further price revision and following are prevailing discounts:

SOIL PIPE—	
2 and 3 inch	40%
4 inch	45%
5 and 6 inch	40%
8 inch	20%
Fittings—	
2 and 6 inch	50%
8 inch	20%

ADVANCED QUOTATIONS ON SLEDGE HAMMERS

Montreal.

Sledge and blacksmiths' hammers, five pounds and over, are now increased from $12.50 to $15.00 per 100 lbs. This applies to such manufacturers' numbers as 45, 46, 48, 37 and 37½.

STEEL SITUATION STILL REPORTED STRONG

Montreal.

Underlying factors in the steel industry are still reported firm and locally quotations are generally firmly held at $2.95 base. A quotation five cents less is given for ordinary business by a few firms, these having not yet increased prices to take care of sales tax such as was mostly done a few weeks ago. Although at this season a usual slackening in trade becomes apparent, thus causing an easier tendency, chances of this are thought more remote this year owing to the effects of the coal strike which is now more keenly felt in markets to the south. Domestic trade, too, has been of a sorting character for the most part during past months, and any easing in demand because of the absence of larger construction work will not be as noticeable. Unchanged price levels are as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

INGOT METAL PRICES ARE MARKING TIME

Montreal.

Ingot metals are now reported quiet with prices generally marking time, or in one or two cases slightly easier. There is said to be no weakness to this situation, but merely a dull period which is not unusual at this time of year.

TIN.—The variation in this metal has been so slight as to be almost negligible and London is evidently waiting for a further movement from this side. Demand continues light and with stocks as large as they are there seems little prospect of any advance in price. Local quotation, 35½ cents.

COPPER.—This metal has been slightly easier in New York although there is said to be no pressure to sell and producers are apparently confident of better prices later on. Export business is well maintained and domestic consumption continues at a good rate. It is considered probable that the market will be able to absorb what new production is available during the year. Consumption is slightly better locally, but there is still room for improvement. Electro is quoted at 17¾ cts., castings at 17½ cts.

LEAD.—The American market is reported quiet with prices slightly below the top figure touched several weeks ago. London is fairly firm but the situation i gradually becoming easier there and lower prices would not be surprising. Locally the market is fairly firm with refined lead catching a price as high as virgin. Market quoted at 6¾ cts.

SPELTER.—Spelter is quoted slightly lower at East St. Louis but mostly by second hands as producers are still quite firm in their ideas. This metal is probably in as strong a position as any, as Europe has none too much available and supplies are barely up to normal in the U. S. A. Locally demand is fairly good with the market steady at 8 cents.

ANTIMONY.—This metal is somewhat easier in New York owing to heavier supplies and the local market is weaker in sympathy at 7½ cts. for high grade English and 6½ cts. for Chinese.

ALUMINUM.—There is practically n change in aluminum which remains dull on the local market at 24 cents.

Toronto Markets

TORONTO, June 29.—A complexity of price changes is again apparent on the current hardware markets, revisions in both directions being recorded. The issuing of a new discount sheet with consequent higher quotations on carriage and machine bolts and nuts all through the list, provides one of the principal advances, while other lines with increased prices are stove bolts, the Storm King make of barn door hangers, steel thumb latches, all chalk lines and similar cotton goods, also certain makes of electric irons. Rumors of another pending advance in wood screws are persistent on the local market, while a possible advance in furnace quotations owing to higher raw material costs has also been rumored. Minor reductions appear on the Millers-Falls line of breast and hand drills, with similar downward changes on certain grades of Gargoyle Mobiloil motor oils and "3-in-1" machine oil. Cement producers admit that the institution of any proposed reduction in freight rates would most likely be reflected in a proportionate lowering of prices on this product.

BARN DOOR HANGERS INCREASED IN PRICE

Toronto.

A slight increase in price has been announced on the Storm King make of barn door hangers. These are now quoted at $11.80 per dozen.

THUMB LATCH PRICES TEN PER CENT. HIGHER

Toronto.

Steel thumb latches are also slightly higher in price this week, the No. 2 latch being quoted at $2.20 per doz., and increase of approximately ten per cent.

FREIGHT RATE CUT TO LOWER CEMENT PRICES

Toronto.

Chief interest in the cement markets at this time centres around the proposed reduction in freight rates on Canadian railroads, a development which, if materialized, would undoubtedly tend to ease quotations on cement in the near future. One market report indicated a reduction of ten cents per barrel, but in discussing this situation with manufacturers, Hardware and Metal was informed that no definite decision had yef been made in this regard. It was admitted however, that the announcement of actual reductions in transportation costs should result in a consequent proportionate decline in cement prices. Prevailing demand for this product is stated to be fairly good, construction activities in the city being up to expectations, but the call for cement in the country is just moderate. Prevailing unchanged levels follow:

CEMENT—Carload Lots—	
Per barrel	$ 3 75
Less Carload Lots—	
Per barrel, f.o.b. yard	4 40
Per barrel, delivered	4 60

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

SUBSTANTIAL DROP IN IRONING TABLE PRICES

Toronto.

Quotations on the "Canadian Maid" ironing table have been reduced approximately twenty per cent., according to an announcement made this week by the manufacturers. The new prices are $3.- and $5.85 respectively.

REVISED QUOTATIONS ON THREE-IN-ONE OIL

Toronto.

A revision has also been announced in quotations on Three-in-One machine oil. Prices on this product are now at the following level:

"3 IN 1" OIL—

	Per Doz.
Small	$ 1 25
Large	2 55
Handy	2 55
Factory	5 00

PRICES ON MIRRORS NOW SLIGHTLY LOWER

Toronto.

A slight reduction has been announced this week in prices on certain makes of mirrors. Following are revised quotations:

MIRRORS—

Louise Style—

	Per Doz.
Sizes 5 x 7	$ 3 00
Sizes 6 x 9	3 50
Sizes 7 x 9	4 10
Sizes 8 x 10	4 70
Sizes 9 x 12	5 60
Sizes 10 x 14	6 65

I. X. L. MAKE—

	Per Doz.
Size 5 x 7	$ 2 25
Size 6 x 9	3 15
Size 7 x 9	3 50
Size 8 x 10	4 35
Size 9 x 12	5 15
Size 10 x 14	6 65

ANOTHER ADVANCE PENDING IN WOOD SCREW PRICES

Toronto.

Rumors of a pending advance in quotations on wood screws are more or less persistent on the local market this week, the general impression being that such a development will be recorded in the next few days. This tendency reflects the strength of manufactured steel lines in general, and the brisk demand for such manufactured products caused by the seasonal demand, combined with the anxiety of consumers to get under cover owing to the uncertainty surrounding future developments in the steel industry and the adjacent coal strike situation.

ELECTRIC IRON PRICES BACK AT HIGHER LEVEL

Toronto.

An advance in prices averaging around 25 per cent. but reaching as high as thirty per cent. in some cases, has been made on electric irons. These products have recently been the subject of price shading between certain distributors, and the current revision places quotations practically back at the previous quotations. The average increase is between $3.00 and $4.00 per dozen.

Steel Prices Reflect Coal Strike Developments

Local Quotations on Bar Products Continue to Firm Up—Further Advances Predicted in Some Quarters Providing Business During Following Weeks Remains Up to Expectations—Coal Stocks In Mill Areas Becoming Depleted

FUNDAMENTAL strength continues to mark practically all sections of the iron and steel market, and the trend of local quotations on bar products affords an interesting feature of this industry. As noted in these reports a couple of weeks ago, the base price on bar iron advanced to $3.00, but it was admitted that some shading of this quotation to the previous level of $2.90 was undoubtedly obtainable on attractive orders. This situation is now stated to have firmed up, and the $3.00 base has become generally uniform. That another advance of from ten to fifteen cents per 100 lbs. will be adopted in the next few weeks is described as probable by certain distributors who claim that the current mill costs to the warehouse warrant this increase in addition to the continued strength at primary centres. It was pointed out on the other hand that July and August constitute the dull periods in the trade, but while the demand is somewhat spasmodic, the general movement is well up to expectations and in comparison with other seasons, unusual conditions are evidenced. Should the volume of trade in bar products therefore, be sufficient to satisfy distributors during the ensuing weeks, it is stated that higher prices will not be surprising.

Recent reports from southern steel centres indicate that while the steel market continues to grow a little quieter each week as regards the quantity of turnover, yet this is attributed to the season of the year, and steel has not grown more plentiful, while deliveries remain in strong request. The labor situation is described as becoming more acute in some mill sections, unskilled labor now going into other fields where higher wages are obtainable during the summer months. Chief interest throughout the steel industry, however, and also in practically all manufacturing circles where iron and steel constitute the raw product, is centered on the problem of how long the coal strike will last and the ultimate effects on steel deliveries and prices. Developments during the last week or so were not considered favorable to an early termination. This uncertain outlook for settlement of the strike, is having the effect of greatly strengthening quotations on all kinds of semi-finished and manufactured steel, products. How far this movement will be reflected, is considered problematic, but it is noted that all coal mined since the commencement of the strike has been steadily absorbed by consumers, while in addition stocks have been drawn upon to such an extent that they are now getting close to the danger point in some quarters. These conditions are credited with creating some uneasiness among large producers as to the future supply of coal in the event of the miners' strike lasting indefinitely. Thus it is that mills in southern territory are evidently getting more conservative in respect to taking orders for delivery beyond a certain point.

Following are prevailing quotations on the local market on bar products:

IRON AND STEEL—

Mild steel bars, base	$ 3 00
Mild steel bands, 3-16 in. base	3 50
Bar iron, base	3 00
Angle iron, base	3 00 — 3 10
Horseshoe iron	3 75
Tire steel	3 25
Spring steel	7 00 — 8 00
Sleigh shoe steel	3 00
Hoop steel	4 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

MILLERS FALLS DRILLS AT LOWER PRICE LEVELS

Toronto.

A slight reduction is announced this week in prices on the Millers-Falls line of breast and hand drills. Revised quotations on these products follow:

BREAST DRILLS—

	Per Doz.
No. 12	$ 64 20
No. 13,	81 00
No. 118	72 00

HAND DRILLS—

	Per Doz.
No. 2	48 00

PRICES ON CORRUGATED SHEETS CONTNUE FIRM

Toronto.

The firmness in corrugated sheets which has been outlined in recent market reports, continues to remain strongly in evidence. A brisk call is experienced for these products at this season of the year, and with the higher prices now effective on flat galvanized sheets, current quotations on corrugated are described as very firm with a decided tendency to higher levels. As a matter of fact, the gradual elimination of price shading in this market was stated by one local distributor as technically amounting to an advance. This is generally in keeping with the trend on other manufactured steel lines. Following are unchanged prevailing quotations:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 26 U. S. gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

CALL FOR GALVANIZED SHEETS REMAINS BRISK

Toronto.

The firmness of the sheet market has not been disturbed by the slackening in demand for black sheets, as galvanized products continue as strong as ever. While fresh demands are not in the same volume as during past weeks, yet the mills report that their production is booked for weeks ahead and find themselves unable to accept additional tonnage beyond a certain point. Local quotations remain firm at the higher levels recently announced, with some distributors claiming that the $5.00 base on black sheets is the ruling price, while others admit that this is shaded a few cents on any large consignment. Small buyers, however, find $5.00 the ruling quotation. The threat of a railroad strike in the United States has not entered very strongly into the calculations of steel producers and consumers as yet, but should the present situation continue, it will undoubtedly receive due consideration. It is generally recognized that such an event would tend to even further delay deliveries from southern quarters. At the present time, however, developments in the coal strike absorb chief interest in the steel industry, speculation as to its duration now being noted as stocks of coal in producing areas are described as low. Average local current price levels follow:

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10
16 gauge	4 15

BLACK SHEETS—

18-20 gauge	4 60	4 80
22-24 gauge	4 65	4 85
26 gauge	4 70	4 90
28 gauge	4 80	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6 35
22 gauge	6 05	5 90
18 and 20 gauge	5 85	5 75

	Premier and Apollo
10¾ oz.	6 40
U. S. 28 base	6 00
U. S. 26 base	5 70
22 and 24	5 55
18 and 20	5 40
16	5 25
12 and 14	5 10

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

POSSIBLE ADVANCE IN FURNACE COSTS RUMORED

Toronto.

Certain rumors have recently been in evidence regarding advanced prices on furnaces for the Fall and Winter trade. While no authentic confirmation or denial of such a change has been received yet it is noticeable that the general tendency in all metal goods has been to increase prices, and with the cost of pig iron, and sheets and plates recording two or three advances, a similar development in furnace quotations would not be surprising, according to opinions espressed on the subject to Hardware and Metal. A local furnace manufacturer stated that nothing definite in this respect has been decided upon, although it was pointed out that certain raw material costs were now on a higher level than formerly. The natural outcome of this situation was to create firm market conditions for future trade.

Higher Prices Effective On Bolts And Nuts

Issuing of New Discount Sheet Shows Revised Quotations All Through the List—Average Advance Ten Per Cent.—Change Reflects Recent Gains in Steel Industry and Accords With Developments in Manufactured Products of this Class

As OUTLINED in a recent market report appearing in Hardware and Metal, higher prices are now recorded on bolts and nuts through the announcement of a revised discount list, The tendency in this upward direction was observed many weeks ago and an advance in price of this nature was also predicted in these columns. This change reflects the trend of the primary steel markets, and is in line with recent price developments appearing on practically all manufactured steel products, this being one of the results of the coal strike combined with the strength generally apparent throughout the steel industry.

All carriage and machine bolts are affected by this latest price change, the new quotations being effective from June 22, thus automatically cancelling the previous discount sheet issued under date of January 3, 1922. The increase amounts to approximately ten per cent. on the various products in this class all through the list. Thus similar changes are recorded on stove bolts, tire bolts, coach or lag screws, plow and other miscellaneous types of bolts.

Square and hexagon nuts, under two inches in size, including both blank and tapped, also register a corresponding advance. The new discount list follows:

BOLTS AND NUTS—

Discounts apply to standard list. Carriage Bolts ($1 list) ⅜ in. dia. and smaller, 6 in. and shorter, 40 per cent.

Carriage Bolts ($1 list), ⅜ in. dia. and smaller, long lengths 30 per cent.

Carriage Bolts ($1 list, 7-16 in. dia., and larger, 40 per cent.

Machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 50 per cent.

Machine bolts, ⅜ in. dia. and smaller, longer lengths, 35 per cent.

Machine bolts, 7-16 inch dia. and larger, 35 per cent.)

Sleigh shoe bolts, all sizes, 25 per cent.

Coach or lag screws, 45 per cent. Bolt ends, 35 per cent.

Square head blank bolts, 35 per cent.

Plow bolts, 1, 2, 3, head 30 per cent.

Plow bolts, all other numbers, (List, plus 20 per cent.

Elevator bolts, large head, 25 per cent.

Elevator bolts, corrugated heads, 55 per cent.

Fancy head bolts, 25 per cent.

Shaft bolts, ($3 list), 25 per cent.

Step bolts, large head ($3 list), 25 per cent.

Whiffletree bolts, 25 per cent.

Tire bolts, 50 per cent.

Stove bolts, 70 per cent.

Nuts, 2 in. and smaller, square, blank off net list, $1.00.

Nuts, 2 in., and smaller, square, tapped, off net list, $0.50.

Nuts, 2 in. and smaller, hexagon, blank off net list, $0.50.

Nuts, 2 in. and smaller, hexagon—tapped, net list.

HIGHER PRICES APPEAR ON ALL CHALK LINES

Toronto.

An advance of aproximately fifteen per cent. has been made in quotations covering all chalk lines and similar cotton goods, such as lawn tennis nets. This trend reflects the recent rise in raw cotton markets, a development noted last week when cotton cordage lines were advanced.

LOWER PRICES ON SOME GRADES OF MOTOR OILS

Toronto.

A reduction has been announced in current list prices on Gargoyle Mobiloil, both "B" and "B B" grades being reduced to $1.55 per gallon, a decline of fifteen cents. "A", "E" and Arctic grades remain unchanged in price, with the former discount of 25 per cent. still in effect.

SIGNS OF DEPRESSION IN SCRAP MATERIALS

Toronto.

In sympathy with the general downward tendency, the local scrap markets have shown signs of depression, with a consequent decline in price. Copper wire is weak and unsettled, and producers are more inclined to accept market quotations than was the case a week ago. Dealers, on the other hand, seem to think that the depression is not likely to last, and prefer to hold stocks. Red brass also is weak, with prices down from a quarter to half a cent per pound.

Pig iron has shown some strength during the past week, but this condition is thought to be the result of the coal strike, and the uncertainty that exists as to when it will be settled.

The following are usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	14 00	15 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 50	11 50
Light copper	9 00	9 50
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 25
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50

DOWNWARD SWING OF PENDULUM IN INGOTS

Toronto.

Slight recessions in price have been generally evident on ingot metals in primary market centres, but little variation is recorded locally. The tone of practically all non-ferrous metals is slightly weaker, a re-action having been recorded from the improvement of recent weeks. This condition is described in some quarters as merely another swing in the pendulum, it having been noted that any attempt towards betterment has usually been followed with a natural recession in both interest and price levels.

COPPER.—The copper market is marking time, a recession in consumer interest now being apparent in both primary and domestic centres. Prices on American and European quarters receded from the higher asking levels recently announced, but no variation was recorded locally. The situation was summed up briefly in the following phases: Europe has no money, but needs copper. The U. S. keeps copper supplies as they offer no credit. Result, dullness all around. Local quotations remain at 17 cents.

TIN.—A fair demand is evident for tin, but buying is stated to be in small quantities. Dealings in primary tin markets have also been extremely quiet, and little change in the situation is looked for owing to the fact that consumers are reported fairly well covered for immediate requirements. The price of 31 cents continues on the local market.

LEAD.—Lead has re-acted from the firm position noted in recent weeks, this being due to the fact that the demand was unable to keep pace with the offerings. It is described as the natural swing of the pendulum, but although the markets are dull, prices are being fairly well maintained under the circumstances. Local levels unchanged at $7.00.

SPELTER.—This metal is in fair demand at present, but commitments are mostly in small lots. However, local prices are unchanged at $7.25, with producers not very active at present.

ANTIMONY.—Locally, antimony remains dull, with corresponding reports from primary centres recording the market as quiet without feature. Domestic quotations remain at 6½ to 7 cents.

ALUMINUM.—This market is also quiet locally, and while some slight improvement was recorded on southern circles due to the call for aluminum from the automobile trades, conditions are again quiet. Prices locally, continue to hover between 20 and 21 cents.

London Markets

LONDON, June 29.—Several important price revisions have been announced, the premier development being the unusual rise in turpentine quotations. Higher levels are also recorded on carriage and machine bolts and nuts, as well as tire, stove and miscellaneous bolts. Small iron rivets and burrs, linseed oil, and dry arsenate of lead, are other products recording increased prices Reductions are evident on certain grades of rim locks and tin lanterns. Collections are reported good, and current business in this district is very fair. A steady sale is being experienced in seasonal lines.

ANOTHER BIG JUMP IN TURPENTINE PRICE

London, Ont.

Another large increase has been announced this week on turpentine, prices locally being thirty cents per gallon higher than the quotation previously recorded. This unexpected advance reflects the unusual conditions now apparent in this industry, prices at producing centres recording sudden jumps owing to scarcity and a brisk demand. New price levels follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 90
2 to 4 bbl. lots	1 89
5 gal. lots	2 05

LINSEED OIL SHOWS FIVE CENT ADVANCE

London, Ont.

Linseed oil prices recorded another five cent increase during the week, local quotations reflecting the rise in flax seed markets. Revised quotations are as follows:

LINSEED OIL	Raw	Boiled
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

HIGHER PRICE LEVELS ON BOLTS AND NUTS

London, Ont.

Through the issuing of a new discount sheet, quotations on carriage and machine bolts and nuts are advanced approximately ten per cent. all through the list. The revised quotations on these products are included elsewhere in this section.

STOVE BOLTS RECORD ADVANCE IN PRICE

London, Ont.

In conjunction with similar advanced prices on bolt products generally, a corresponding increase has been announced on stove bolts. The revised discount level is 70 per cent.

QUOTATION ON TIRE BOLTS AT INCREASED LEVEL

London, Ont.

Tire bolts are now approximately five per cent. higher in price through a revision in the discount. The new quotation is list less 50 per cent. compared with the previous level of 52½ per cent.

ADVANCED QUOTATIONS ON RIVETS AND BURRS

London, Ont.

Iron rivets and burrs have also been advanced in price, the revision in discounts amounting to an increase of around ten per cent. Quotations are now at list less 47½ per cent. with the usual extras.

NEW NET RIVET PRICES ON ASSORTED PACKAGES

London, Ont.

Following are new net prices on five lb. packages coppered rivets and burrs assorted, figured at the discount level of 47½ per cent. off list.

RIVETS AND BURRS—

No. 8, x ½ lb., assorted, $1.16 per pkt. No. 8, x ¼. lb., assorted, $1.26 per pkt. No. 10, x ½ lb., assorted, $1.24 per pkt.

THREE CENT ADVANCE IN DRY ARSENATE OF LEAD

London, Ont.

Owing to the shortage of Paris green, an increased demand for dry arsenate of lead has been experienced, with the result that some distributors have taken advantage of this situation and increased their quotations three cents per lb. all through the list. These higher prices follow:

DRY ARSENATE OF LEAD—	
In ½ lb. pkts., per lb.	0 35
In 1 lb. pkts.	0 33
In 5 lb. tins	0 32
In 10 lb. tins	0 31
In 25 lb. drums	0 28
In 50 lb. drums	0 27
In 100 lb. barrels	0 25

REDUCED PRICE ON LOWER GRADE RIM LOCKS

London, Ont.

The easier-priced class of rim locks now register a reduction in price of fifty cents, the cast grade being quoted at $3.00 per dozen.

TIN LANTERN PRICES CONSIDERABLY REDUCED

London, Ont.

New prices recently announced show a considerable reduction on tin lanterns for present and fall delivery. Following are revised levels on these products:

LANTERNS—

Tin Lanterns, short or long pattern, $9.00 doz. Reflector Lanterns, No. 25, $12.50 doz. Copper well lanterns, with japanned canopy, $12.00 doz. Copper well lanterns, with plain canopy, $10.80 doz. Packing charges extra.

BRISK CALL EVIDENT FOR PARIS GREEN

London, Ont.

While there is a good demand for Paris green, and stocks are reported very low in some quarters, no general change has been announced in local prices. Owing to the scarcity it is reported that an advance of two cents per lb. has been made effective on certain markets but the following quotations remain in effect.

Winnipeg Markets

WINNIPEG, June 29.—Several developments have been recorded on the current hardware markets, the general price trend being in an upward direction. Practically all cotton cordage lines reflect the recent advances in raw cotton markets, while turpentine also takes a sudden rise, quotations being fifteen cents per gallon higher, with strong possibilities of further increases. Reports covering trade conditions are generally more optimistic, seasonal lines moving in fair volume.

TURPENTINE SCARCE WITH SUDDEN PRICE ADVANCE

Winnipeg.

After recording a decline of five cents per gallon, turpentine prices suddenly jumped to the extent of fifteen cents thus bringing local quotations from $1.50 to $1.65 per imperial gallon in one barrel lots. This level is extremely firm, with strong posibilities of still further advances being tabulated in the near future owing to the scarcity of this product, both on domestic and southern producing centres.

COTTON PRODUCTS SHOW UPWARD PRICE TREND

Winnipeg.

Owing to the recent increases tabulated on the raw cotton markets, local prices on awning cord now register a ten per cent. advance. A rise to similar higher levels also appears on sash cord, cotton clothes lines and sisal line cord.

GOOD CALL EVIDENT FOR PAINT PRODUCTS

Winnipeg.

The season's demand for paint products has been good in all lines, and fully in keeping with the records of previous years. There has been no changes announced in prices, prevailing quotations being steady .

COTTON ROPE PRICES ALSO SHOW INCREASE

Winnipeg.

Quotations on cotton rope have also been advanced three cents per lb., but the current demand for this product is not described as heavy. Following are new prices; size, 3/16 ins., $0.50 per lb: ¼ inch and up, $0.48 per lb.

THREE CENT ADVANCE IN COTTON TWINE

Winnipeg.

Cotton twine prices have been advanced three cents per lb., owing to the recent developments in the raw cotton markets. The new levels are described as firm, with some possibility of further advances also being suggested. Following are the revised quotations:

COTTON TWINE—

Three ply cones, $0.51; three ply balls, $0.55; Four ply cones, $0.53; Four ply balls, $0.54.

GOOD BOOKINGS NOTED IN WINDOW GLASS

Winnipeg.

There has been no radical changes announced in the window glass markets, although an easier tendency has been recorded in some quarters. Bookings for fall have come in very fair quantities, which indicate a general revival of building activity throughout the West.

Hamilton Markets

HAMILTON, June 29—Prevailing hardware trade is good. The steady improvement that has been noted from time to time continues, and the volume of business is now such that some of the jobbing houses are compelled to employ shipping and order departments overtime in order to get out merchandise. Retailers now seem to have confidence in the market and in the stability of prices and are ordering goods in larger lots than for some time past. A moderate volume of business is being booked in seasonable goods for fall delivery. For the first time this year the money value of sales is beginning to run ahead of the same period last year. Considering that prices have been reduced all the way from 10 to 50 per cent. this means that the amount of merchandise which has been shipped this year is considerably in excess of last year.

Hardware prices continue to undergo wide fluctuation thus rendering very necessary a close study of the market items from week to week. Following upon the prolonged period of hand to mouth buyings, with restricted stocks in the hands of distributors and many industries working at greatly reduced output, has come another stage in the period of readjustment which is a decidedly difficult one for retailers. Prices to-day are moving in both directions. This condition reflects a two-fold cause. On the one hand is the movement in primary markets and raw materials, and on the other is noted the development of keen competition in trade circles.

The strength of the steel industry is being reflected in advancing prices on various finished steel lines. The question of delivery still dominates the sheet markets, the demand for galvanized being strong, but the call for black sheets is quieter with base prices varying. Canada plate prices are considerably easier, this gradual trend being attributed to competition from Welsh plate mills. Simultaneously, the bar product trade is reported coming in flurries, every few days being a period to be judged by itself. Prices continue firm, however, with some warehouses looking for further advances in the near future if the present volume of trade is maintained. July and August, however, are usually dull periods in this industry. Trade in scrap materials is less promising, and recent higher quotations remain in effect. The tone in ingot metals has shown no appreciable change, the general attitude being somewhat quieter. Bright reports continue to come to hand from wholesale houses, while current trade in retail circles is generally described as of a satisfactory nature.

It has been no secret that a part, and probably a considerable part, of the strength of the steel market in the past few months has been due to the coal strike making buyers of steel fearful that they might not secure all the deliveries they would need. The record of production to date, and the continuance of a high rate of output now, suggest that there is no occasion for uneasiness on this score. Steel prices are very strong at base rates, while there is reported to be some paying of premiums to secure early delivery.

Another significant feature about the present trend of conditions in the hardware market is the almost unanimous expression of opinion on the part of jobbers throughout this district that collections have materially improved during the past few weeks. Seasonable goods of all kinds are in active demand and a good consistent interest is being maintained for staples generally. The attitude of the retail trade is regarded by observers as showing more encouragement now than at any time since the period of deflation started.

Pittsburg Markets

PITTSBURG, June 29—Production of steel continues at a rate of about 39,000,000, gross tons per year, against rates of about 35,000,000 tons on April 1, when the coal strike started, and 20,000,000 tons last December. While production is almost stationary, the trend is upwards rather than downwards, a very significant thing, seeing that the coal strike has now lasted almost three months and the steel industry can still function. Indeed, one observes no signs of uneasiness among steel manufacturers as to their ability to continue operating and complete their orders, even though they are on the whole, pretty well booked up for the next couple of months or more.

The strike at the union coal mines had been fully expected for many months, while the non-union strikes, in the Connellsville and other districts, were unexpected. Hence if there were any restriction of production on account of the strikes in general, it should be

(Continued on page 54)

Sells House Paint by Covering Capacity

Decision to Quit Letting Customers Hunt out the Paint Department, and go After Them Aggressively for Business Had Big Results—House Paint Prospects Can be Developed Along Specific Lines—Figure Cost Per Square Yard—Keep Photos of Jobs Done

A WESTERN hardware merchant who has been very succesful in developing sales of house paint recently told Hardware and Metal that his success has been due to a realization of the fact that business could not be developed by letting customers hunt out the department for themselves, but by going actively after them and letting them know where their paint needs could best be taken care of. Once introduced to the paint department all effort was then concentrated on having them continue to regard it as headquarters for paint. Possibilities for sales of house paint are great and as this plan applies probably more so to this line than others the details of how it has worked out will be quoted fully. This merchant's advice on conducting a department in this manner is dealt with herein. He says:—

A complete paint department is necessary, not a side line proposition. Put a man in charge who knows paint and how to sell it, which also means how to instruct people on its application and directions for use. Repeat customers must come from a service of this kind.

Note Shabby Houses

House paint-sales cannot be developed by waiting for them to come into the store. Prospects must be sought out. Houses that look shabby must be noted and their owners called on. Often the owners do not realize the loss on their investments by lack of paint, or the enhancement that is possible by the right use of the right paint. This is a selling opportunity and duty that the live paint dealer will not neglect nor pass up.

Farm and town prospects must be called on. Certain days should be devoted to that kind of work and many dealers have found it pays to have outside men calling on farm after farm, street after street, ringing door bells. In this way the surface can be sized up right there and it forms the basis for a good selling talk, founded on neecssity and economy.

People must be brought into your store. There is no better way than through a Saturday paint demonstration. Feature a leader and send out handbills, coupons, letters and newspaper ads. Trim the windows with real sales ideas. Show a miniature house well painted. Show a pile of paint cans so much money would buy a year ago. Show how many more cans the same amount will buy to-day, in another pile. Ideas like this will stop people and bring them in. Show cards help make an effective window.

At your demonstration, have a trained representative from the factory on hand. Let him get things ready and prepare the way with letters and other plans on schedule. The salespeople must be trained and prepared with the right selling arguments. Put a sales estimate on them and on the store those days. Give house paint a chance.

Demonstrations

Have this expert demonstrating the paint by actually painting it out on wood strips or panels or siding. Let him have competitive mail order paints to demonstrate against, with a pair of scales handy. Let the people do some painting themselves and get the "feel" of the brush. Let them see how much space a brushful will cover under actual painting conditions.

Have plenty of color cards and be prepared to suggest correct color schemes. Let the people ask questions. Educate them to paint. Have some painters on hand, too, and ask the farmers. You will find these paint days highly profitable.

Keep up steady property owner promoting by means of strong, well-written letters. Mailing cards and literature help to do this. Follow these names and letters up with personal calls. Be sure your list is well selected and not too big or too general. One dealer sends letters to every house number where the property needs painting, and he gets results.

Use the newspapers. Big space is not necessary except on the Friday before a Saturday demonstration. Friday is the best day to advertise, as a rule, where there is a daily paper. Saturday then proves to be a big sales day.

Make your windows and counters serve. Display the house paint up front.

Get the painters using and boosting. Send them jobs when you have a chance.

Advertise distinctly so people will think of you when they need paint.

Follow Lumber Wagons

Follow the lumber wagons. Follow building permits. Follow repair jobs. Follow spring house cleaning signs. Identify yourself with local clubs and organizations. Make yourself known as The Paint Man. Then deliver the goods, and your success is certain.

Many house paint sales are lost because someone blurts out the price of a

Biggest Price Boost In Turpentine History

New High Price Levels Reached for Present Season as Result of Thirty-five Cents Per Gallon Increase This Week and Five Cent Increase Last Week—Many Factors Involved

THE BIGGEST single price increase in the history of the turpentine markets has been announced in southern producing centres, thus placing both primary and domestic quotations at new high price levels for the present season. This recently established record shows some variation between domestic distributing points, and also exhibits a slight range in the different prices registered by individual distributors. The general advance in quotations, however, since last week has been in the neighborhood of 35 cents per gallon, this being made up of two separate increases of twenty-five and ten cents respectively, following closely within a couple of days.

Such a development, coming on top of the many recent price increases on this product occasioned a good deal of surprise in many consuming channels, and in some quarters the health of the prevailing situation is questioned, in spite of apparent strength in producing fields. It is noted, however, that current offerings are relatively small, and this is suggested as a speculative element scheduled at a time when a brisk uniform demand for turpentine is evident.

Chief reasons for the extraordinary advance are found in recent market reports indicating a scarcity of the product owing to lack of stocks on practically all sides, combined with a brisk seasonal call being experienced for turpentine both from domestic consumers as well as European sources. Distributors state that the volume of consumption is in fair proportion to previous records covering this period of the year, but that adequate supplies to keep demands satisfied cannot be procured from Savannah and other producing fields, because the sales have generally been in excess of the fresh receipts during recent months.

Very little turpentine was held when the new crop commenced, and with tanked supplies at a dangerously low ebb came the inclement weather which somewhat delayed the flow from the woods. This situation, coupled with the unexpected call from London, finds current supplies of this product at a premium and producers are naturally taking full advantage of these circumstances.

Reports last week from the south indicated that there was not sufficient barrels of turpentine on hand at that time, to make one decent cargo for export to London, and with the call for that shipment materializing, supplies have been almost exhausted and the trend of quotations reveals a runaway market. The fact that prices have been rising during recent weeks and that distributors and consumers are alike surprised at the present trend of events, indicates a development of an unusual nature. Domestic sources point out that quotations are merely a reflection of the remarkable increases announced by producers, a condition which is directly opposite to the feeling evident in the trade a few weeks ago that prices would most likely register a recession in the near future when the fresh season's crop arrives in larger volume. Demands, however, are apparently taking all offerings, and the season is now so well advanced that fears of a universal shortage of turpentine are being freely expressed in some quarters.

SELLS HOUSE PAINT BY COVERING CAPACITY

(Continued from Page 52)

gallon before finding out anything about the customer's wants. The price per gallon may sound high, and the sale is lost, but another store may turn that same person into a profitable purchaser and get the same gallon price, simply by handling him differently.

Sell Covering Capacity

Find out the surface to be painted, the kind of house, approximate dimensions, or go with the prospect to the house if you can. Give him some real information about the covering capacity of a gallon, and figure out a little diagram on a piece of paper for him. Then give him an idea of the color combination. Get him interested from that angle. Have some color combinations handy for different types of homes, so he can visualize how his place will look. Enthuse him over the way his home will look.

After he is well sold on the fact that he wants to paint and likes certain colors, and insists on knowing and talking cost, then find out what condition the surface is in, so you can intelligently recommend the proper procedure, the right number of coats, right priming treatment, etc. This gives you a chance to talk preservation and protection, two mighty important arguments to strengthen the appearance of enthusiasm.

When you get this worked out, you can show him and tell him that you can furnish him the house paint (mention the name of the brand and a few strong points) for so much per square foot or square yard. It will not stagger him and will probably work out at 2½c., 3c., or somewhere near that figure, depending on the quality and covering capacity of the paint you sell.

Then figure it out in total according to the number of gallons of body color, trim, porches, oil, turps, etc., and the chances are he will not argue cost, but will be well and satisfactorily sold. If he reverts to the cost of a gallon, you can then demonstrate to him that per square foot of covering, your paint is mighty reasonable and the gallon is worth what you ask because it covers what you claim for it.

Recommend and work with good painters, but if a party wants to do the work himself, use particular pains to see that he is well informed with literature, color cards and directions.

If your prospect is a lead and oil admirer, try to sell him prepared paint, because if you handle the right line, he will get a good job and you will make a better transaction for yourself. Lead and oil are all right and should be handled and sold, but there is a wide demand for prepared goods of well-known makes. Their sale enables you to build up steady customers on shelf goods and other products of the same brand, whereas the lead is more or less staple and does not offer the variety of merchandising possibilities. The dealer must size up his prospect, and not lose him—that is the main point. Prepared paint has the advantage of convenience, uniformity and machine mixing.

The scales often enable you to show up your paint favorably. If it weighs more, it's usually worth more.

Panels and boards painted out, help to convince as to gloss, covering, color and other points about your goods.

Photos of homes painted with your paints help to convince; also a list of satisfied property owners. Keep dates when painted, and use the information as a sales help.

Some of the strong sales points of a good house paint are: (1) Name, label, reputation; (2) quality—ingredients, formula; (3) weight per gallon; (4) covering capacity; (5) spreading power; (6) economy or cost per job or year; (7) ease of application; (8) durability or wear; (9) satisfaction to local users.

PITTSBURG MARKETS

(Continued from page 51)

looked for among consumers who were depending on non-union production, as the consumers of union coal knew perfectly well that their supplies were going to be shut off and that they must have stocks. There was, in fact, much stocking. Now the Carnegie Steel Co. normally operates its blast furnaces almost exclusively on Connellsville coke and by-product coke made from Connellsville coal, hence its experience is crucial. The Carnegie company has just blown in a third blast furnace at the Farrell works, furnishing the steel department enough pig iron to operate in full. This makes 38 Carnegie furnaces in blast, against 35 at the middle of May and 34 on April 1, when the coal strike started. Of course unusual expedients have been resorted to in accomplishing these results.

Barrett Roofings, Cements Industrial Paints etc.

Powerful Advertising for Quality Products

THROUGH 1922 all over Canada —millions of advertisements will point out the economy, the reliability, the superiority of Barrett Roofings, Cements and Specialties.

Such a powerful sales-making force is bound to bring new customers to Barrett dealers everywhere.

Weekly Paint Markets

Montreal

MONTREAL, June 29.—Turpentine again features the paint markets, and this product has now reached a price level from thirty-five to fifty cents per gallon higher than one week ago. Although the undertone of the market has been very strong in recent weeks owing to unusual demand and small offerings in the South, the present rapid rise was least expected, and the health of the market is thought questionable by many. Quotations locally now vary to the extent of fifteen cents per gallon because of available stocks and prospects of further supplies. There is also a variation among the local distributors of linseed oil although in most quarters the quotation of last week is unchanged. The undertone of flaxseed continues firm, but in the past few days fluctuations have occurred and at the moment a slightly easier tendency is apparent. This is considered a temporary condition, and those well informed state that a steady to firm condition will in all probability continue in linseed oil during the remainder of the present season. There is still a fair amount of activity in paint manufacturing circles, although the end of the present month is expected to bring a slackening for the ensuing summer months. White lead booking dates have not been altered as yet, but it is expected that these will be extended until September 1st within the next few days.

RUNAWAY MARKET ON TURPENTINE

Montreal.

The local turpentine market can now be described as running away, quotations advancing from $1.48 one week ago to the present level of from $1.83 to $2.00. There is now a distinct variation in quotations among distributors, doubtless governed by stocks on hand and prospects of further arrivals from the South. Some firms report fair supplies on hand while others have very little available. The movement of turpentine has slackened to an extent; the season advancing, higher prices; and the gradual replenishing of stocks in the past few weeks being factors given as responsible for this.

Southern reports indicate that with continued small offerings and a gold demand from domestic buyers, also an active interest on the part of foreign interests, the market is in a very strong position. It is pointed out that if demand continues at its present ratio further advances may be expected, but the gain has been so rapid that many now question the health of the market. Following are only nominal quotations.

TURPENTINE—	Imp. Gal.
1 barrel lots	1 83 to 2 00
2 to 4 barrel lots per gal.	1 82 to 1 99
Broken lots	1 93 to 2 10

STEADY TONE IN LINSEED MARKETS

Montreal.

As in the case of its allied product, linseed oil quotations also show a variation on the local market. The following price levels are given by most distributors, but a quotation of 6 cents is quoted. The seed market remains firm, although slight fluctuations have occurred during the past few days and a slightly easier tendency prevails at the moment. This, however, is considered as only temporary, underlying factors still having a strong grip on the market. Just what action will be taken to bring local prices to a more uniform basis is hard to determine, but it would appear to largely depend on the trend of the flaxseed market within the next few days. There has been quite a heavy buying movement for oil during the week, and this condition, with local seed supplies still at a comparatively low level, maintains a firm attitude in the present situation.

LINSEED OIL—		
1 to 2 barrel lots, per gal.....	1 13	1 15
5 to 8 barrel lots, per gal.....	1 11	1 13

Less barrels, add 10 cents per gallon.

EXTENDED WHITE LEAD BOOKING DATE EXPECTED

Montreal.

There still remains a firm undertone in white lead in oil owing to the continued strength of lead and linseed oil. The unsettlement, however, in the local market during the present season will in all probability offset any tendency toward higher prices for the remainder of the season, according to local corroders The booking dates remain until June 30th, but it is expected that this will be extended until September 1st, within the very near future.

LOCAL WINDOW GLASS QUOTATIONS UNCHANGED

Montreal.

Current quotations on window glass locally remain unchanged, a discount of fifteen per cent. being quoted off the $6.00 list for ordinary business, with a further slightly lower quotation given for quantity buying. The Belgian market continues to govern the local market to a great extent, and arrival from this source, where the situation is by no means firm, is maintaining a more or less unsettled feeling locally. Competition is still very keen, although prevailing price levels are said to offer very little margin for distributors. There is a fair buying movement for building requirements in the city, but demand from outsde districts is only of moderate proportions.

Toronto

TORONTO, June 29.—The sensation of the paint markets this week is the sudden and somewhat unexpected jump in turpentine prices, a further advance of thirty-five cents per gallon from the higher level noted in last week's market, having been recorded locally. This exceptional increase reflects the trend of quotations in southern producing centres where costs have risen around forty cents per gallon within a few days, owing to the brisk call for turpentine from domestic and European consuming channels, combined with low stocks and small offerings. The movement of the new crop is smaller in volume than expected, while the demand from London injected a premium value on supplies, a situation of which producers have evidently taken full advantage.

Another upward movement in price is recorded on linseed oil, many distributors quoting a rise of ten cents per gallon, while prices a few cents below these new higher levels are still obtainable in some cases. This movement is described as dependent upon the trend of flax seed, some fluctuations having occurred in this market. Other paint products remain unchanged in price, with a brisk call for ready-mixed paints and kindred lines generally in evidence. No new development has been recorded in the glass markets, but the tone is slightly easier due to the discount offerings in certain eastern quarters, combined with rumors of special shading for attractive glass orders on the local centres. White lead in oil remains firm, while it is expected that some extension in the booking date will be shortly announced.

SUDDEN TURPENTINE RISE SETS SEASON'S RECORD

Toronto.

Another rapid advance of thirty-five cents per gallon supplies the surprise of the turpentine markets and places present quotations at a new high record for the season. Local prices are gener-

TORONTO PAINT MARKETS

(Continued from page 56)

ally around the $2.00 level, which constitutes a remarkable advance from the prices noted a few weeks ago. However, a variation exists between quotations of the different distributors, a situation which is not surprising in view of the run-a-way market. Another startling element noted in connection with the prevailing trend of prices on this product is that several weeks ago, practically all sources of the trade were looking for a recession to occur within the following weeks when the new crop came on the market in larger volume. Fresh receipts however, have been in such demand, that stocks have become almost depleted, both on domestic and primary centres. However, there are of course, some who question the health of the markets at the recent jump in prices, whatever the cause or however urgent the situation. Recent reports from producing centres indicates that a brisk demand has been experienced from London and other European quarters, with the result that supplies are at a premium and producers are taking advantage of this fact accordingly. Local distributors point out that the increases this week are a direct reflection of the trend in the south, a development which is uniform on practically all distributing centres. The rising prices quoted at London, where turpentine is extremely scarce, also sets a precedent and reacts in quotations on this side. Following are local prices with a range indicating the spread between distributors; a gap which it is claimed may be closed up in the near future:

TURPENTINE—	Imp. gal.
1 barrel lots	1 90 2 00
2 to 4 barrel lots	1 89 1 99
5 gallon lots	2 05 2 15

Less than one barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

LINSEED OIL PRICES REGISTER ANOTHER RISE

Toronto.

Linseed oil also provides a special attraction this week, but not in comparison with the sensation in turpentine markets. Oil prices are advanced all along the line, but the extent of such a rise is not uniform and quotations now show a range of around five cents per gallon between the various local distributors. The increase in some quarters is ten cents per gallon, and it is stated that this higher level will most likely become more general in the near future if the flax seed markets maintain any degree of strength. The undertone of seed has been fairly firm, but some fluctuations continue in evidence. Such recessions, however, are being looked upon as temporary, and steady quotations on oil are outlined in several quarters. The movement of linseed is described as moderate, the general opinion being that consumers are pretty well covered for immediate requirements. Following are average current prices:

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 15—1 20	1 18—1 23
3 to 4 barrel lots	1 14—1 19	1 17—1 22
6 to 9 barrel lots	1 12—1 17	1 15—1 20

WEATHER CONDITIONS DELAY PAINTING IN CITY

Toronto

The storms and rain experienced during the last week or two has somewhat handicapped building activities in and around the city, with similar conditions more or less evident in country districts also. The painting trade has suffered somewhat in this respect, but in spite of the inclement factors, business in ready-mixed colors is described as surprisingly good, with improved weather conditions generally looked for in order to carry this momentum over the summer months. Prices show practically no change. A slight revision has been made in quotations on dry colors, certain lines being slightly higher and a few others offsetting this trend in the opposite direction. Other contributing cost elements are described as steady in price.

SHELLAC MARKET STILL IN UNSETTLED STATE

Toronto.

In view of recent arrivals of shellac reported at primary circles, the shellac market is now more or less nominal with a moderate demand in evidence. Unsettled conditions have been evident for some time, due to the uncertainty of fresh shipments, and while local stocks were of an average nature, no price developments were recorded. Current demand for shellac, however, is described as on the increase by domestic distributors, and the variation in reports from prevailing market conditions, and opinion has been expressed that stocks are none too large, combined with some advices from India indicating a short crop this season.

MODERATE TRADE IS RECORDED IN PUTTY

Toronto

Putty is naturally included among the paint products at present registering a seasonal movement. Distributors generally report that the demand for putty has been expanding during recent weeks, and the current tone is described as satisfactory. Quotations remain unchanged at the levels recorded at the opening of the season, which are locally as follows:

PUTTY—

Standard, per 100 lbs.	5-ton lots.	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70
1 lb. tins	11 70	12 20	12 45

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

SEASONAL TRADE NOTED IN BRUSH MARKETS

Toronto

A seasonal volume of trade in brushes is reported by manufacturers and distributors of the bristle products. Business this season is generally stated to compare very well with that recorded last year, and reports are mainly optimistic. No variations in price have yet been announced, and while some revision in brush quotations is more or less looked for in the near future, distributors state that no drastic changes are being contemplated, any developments which may occur in this direction being more in the nature of a general evening up in prices, rather than any applied reduction. It is pointed out that some classes of bristles are now slightly higher in price, and coupled with very little change in production and distribution costs, producers claim that conditions in the industry hardly warrant marked price developments.

DIFFICULTY OVER DUTY VALUATION COSTS

(Continued from page 43)

Strong support was given to the proposal by Mr. Simms, who spoke against the "inertia" of employers and urged them to capitalize sentiment in favor of the idea of works councils in the next decade.

F. W. Stewart, Chairman of the Quebec division, said in his report that labor relations in his province in the past year had been very satisfactory. The people of Canada were getting the best value obtainable in the work in their manufactures. Canadians must be educated from the idea that they were being charged the protective tariff rate in addition to the normal cost of their goods, he said.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

NEW DREW CATALOG

Catalog No. 35, issued by C. Drew & Co., Kingston, is now being distributed to the trade. This book contains full description of such manufactured hardware lines as ship treenail, set and boom augers, calking irons of various types, hawsing mallets, hawsing and reaming irons, different kinds of marlin spikes, coppering hammers, and punches, many different kinds of chisels and drills, a variety of model box scrapers, masons brick hammers, rivet and chain punches, together with freight and hay hooks. Each item is very carefully illustrated, with description and figures, also list number, style and manufacturers list price. The manufacturers point out that using the figure number as well as the name and size of each tool simplifies matters when ordering tools from this catalog.

CARTER'S GENUINE DRY RED LEAD

Keep Carter's Always in Stock

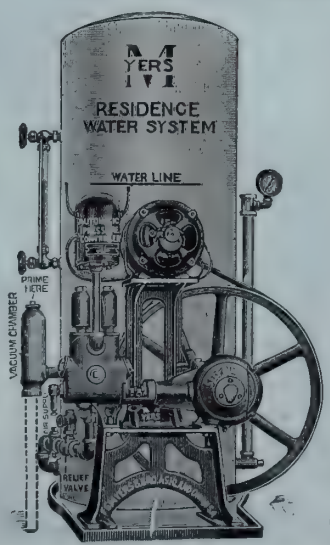
PNEUMATIC WATER SUPPLY SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep.



The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices. Now is the time to interest your customers.

The Save the Surface

ARE YOU CASHING IN?

THE Save the Surface slogan was launched a little more than three years ago. Since then it has been reproduced millions of times and has become known to millions of people as a symbol of property preservation.

The Save the Surface slogan is used in all advertising of the Save the Surface Campaign, and in more and more of the advertising of manufacturers, jobbers, dealers and master painters. The great value of the slogan lies in the fact that it sells *the painting idea*—which must always precede every sale of paint or varnish. Don't forget that.

The slogan, although used extensively by many companies, is not their property any more than yours, Mr. Dealer. *It will be more theirs than yours if they use it and you don't.* Whether or not you are getting the full benefit of the Save the Surface Campaign depends a great deal on the extent to which the public associates this slogan with your store, your service and your products.

Adopt the policy of including the Save the Surface slogan in every piece of advertising copy. No space is too small—none is too large—for you to reap benefit every time this slogan is put to work *for you.* Today it is recognized as the greatest single selling force in the industry.

For electros of the Save the Surface slogan to use in your advertising and in your literature, address:

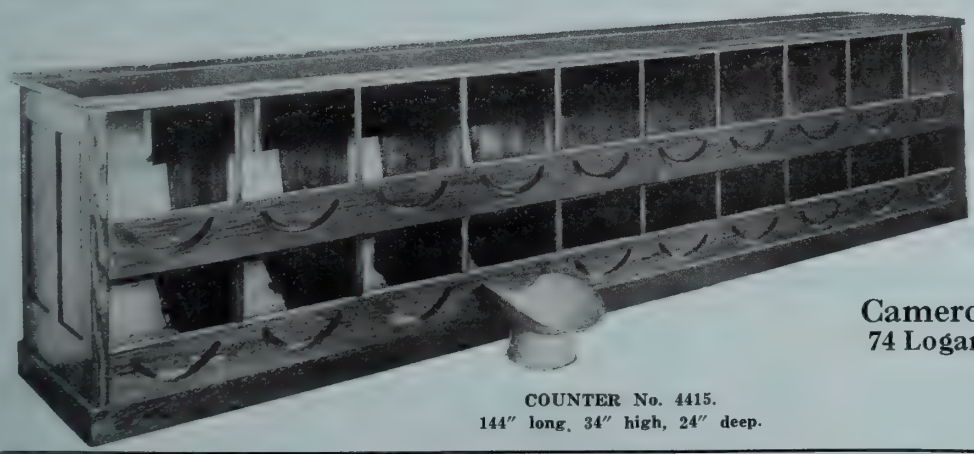
A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*



COUNTER No. 4415.
144″ long, 34″ high, 24″ deep.

The Handy Nail Bin Counter

that keeps your assortment readily accessible all the time.
It is fitted with galvanized metal lined bins.
The scoop as shown and a loader are supplied with counter.
The loader enables you to fill the bins without the usual spilling and undue exertion.

LION BRAND CORDAGE

Established 1825

—satisfies and increases business

It is the cordage for you to sell. Made from high-grade Manila Hemp, *Lion Brand* excels in yardage and strength.

Your customers all know quality cordage so *Lion Brand* makes a quick turnover—very profitable for dealers.

The superiority of this cordage will be testified in the volume of sales it brings—and repeat business.

TINKER TOM'S TALKS.

No. 365

Celebrating Ten Million Sheets

Since starting to make "Premier" Galvanized Steel Sheets in August, 1915, we have kept plugging along—good times and bad—and up to this date have turned out a lot of good sheets.
To stimulate your interest we offer a few prizes for the best estimates of how many tons we have made to date.

TERMS OF CONTEST

1. The contest is open to anyone engaged in buying, selling or using galvanized steel sheets, including wholesalers, travelling salesmen, sheet metal workers, bosses, employees, retailers, clerks.
2. Send one estimate only.
3. Address your letter to "Editor, Hardware and Metal, Toronto."
4. Estimate must be in Editor's hands by July 15th.
5. Three prizes will be given to the three nearest estimates, as follows:—

TO THE NEAREST CORRECT—$50 Gold Watch, Men's or Ladies' Model—open or hunting case.

TO THE SECOND NEAREST CORRECT—$25 Grain Leather Travelling Bag—best quality.

TO THE THIRD NEAREST CORRECT—Stainless Steel Carving Set in case.

You are to estimate the total number of tons (2,000 lbs. each) of "Premier" Galvanized Steel Sheets produced by us from August, 1915, to July 1, 1922.
Send in your guess. Help us in this way to celebrate our "365th talk."

TINKER TOM.

P.S.—The Correct Total, with winners' names, will appear in our regular space Hardware and Metal, July 22nd.

If interested tear out this page and place with letters to be answered

Paints, Oils, Etc.

Something Different In Wagons

"A Money Maker"
"A Time Saver"

Selling Points in the *Trans-Canada*

No cotter pins to tear the boy's clothes, outside of wheel is flush.

One-piece malleable unbreakable wheel.

Box all solid oak.

Sprayed with varnish, trimmed with red and black.

No repair parts needed, thus saving time and annoyance.

The wheel comes set up. The Trans-Canada is equipped with a patented self-contained roller bearing hub and all metal unbreakable wheels. All you have to do is to place one bolt for each wheel.

This new wagon has made a big hit with the boys. It is strong, well finished and is practically unbreakable. If your jobber cannot supply you, write us direct for prices.

Butterfield Tools Help Increase Outputs

Every successful buyer will recognize the efficiency of Butterfield's Tools after they have once used them.

Don't let the possible consistent business get away from you. Keep your customers and all passers-by acquainted with what lines you handle by making attractive window displays. It invites them into your store and this is a profitable medium of advertising. One thing you must do is—be sure it is Butterfield's tools you show.

These products can be easily displayed—and it will pay you in sales.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

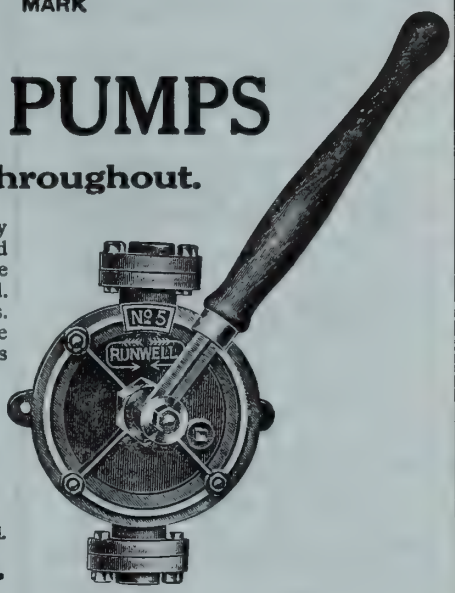
TRADE RUNWELL MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.



The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture,** and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

A Few Words About Hardware & Metal

HARDWARE AND METAL is the only weekly hardware paper in Canada.

* * * *

HARDWARE AND METAL is the only hardware paper in Canada with membership in the Audit Bureau of Circulations.

* * * *

HARDWARE AND METAL is one of the sixteen papers published by the MacLean Publishing Company, the largest business of its kind in the British Empire.

* * * *

HARDWARE AND METAL has been published every Saturday for the past 33 years, and is subscribed to by every wholesale hardware firm, and practically every worth-while retail hardware buyer in Canada, as well as by purchasing agents of many of our largest railways, mines, Government purchasing depts., and industrial concerns.

Hand Forged Tools

The day is past when mechanics bought cheap tools. They realize good tools mean good work.

Dealers can profit by this demand. Quality Tools are recognized everywhere as good tools—they are hard, tough and beautifully finished.

We stand behind the quality —your jobber will supply you.

Quality Tool Works Limited.

480 Rielle St. **Montreal**

SELLING REPRESENTATIVES: Ontario, A. H. Moore, 74 Rusholme Rd., Toronto. Western Provinces, S. H. White Mfg. Co., Ltd., Winnipeg. Maritime Provinces: Richardson & Bureau, Montreal.

HARDWARE AND METAL'S electro catalog shows upwards of 400 hardware electros. These are supplied, mounted on wood blocks, at 30c each. Write for free booklet showing assortment.

HARDWARE AND METAL

Electro Service Dept.
143 University Ave., Toronto, Can.

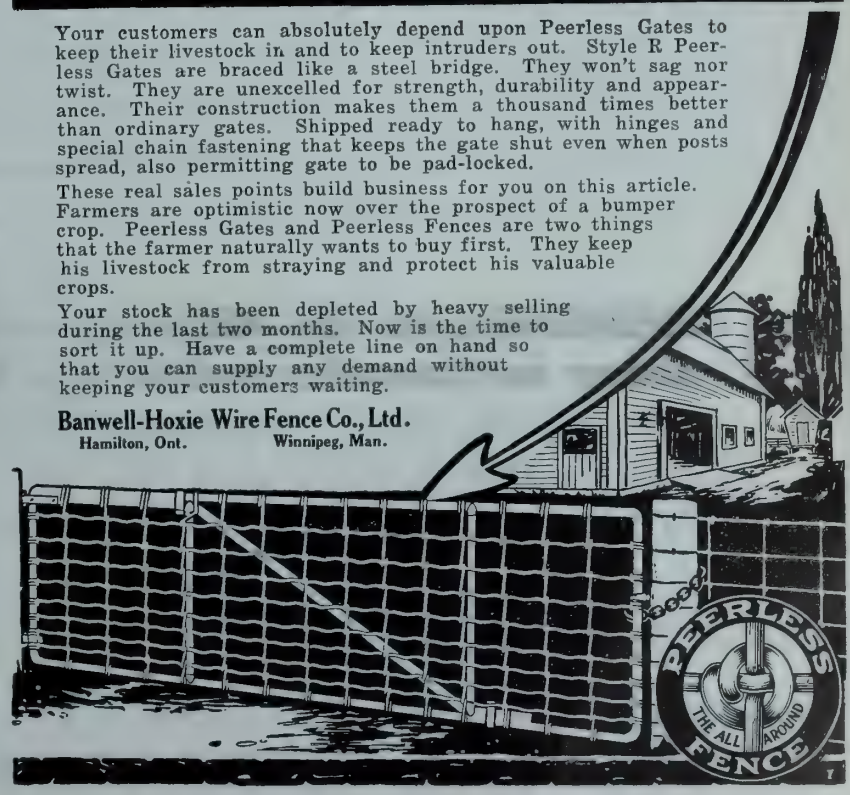
PEERLESS LONG SPAN GATES

Your customers can absolutely depend upon Peerless Gates to keep their livestock in and to keep intruders out. Style R Peerless Gates are braced like a steel bridge. They won't sag nor twist. They are unexcelled for strength, durability and appearance. Their construction makes them a thousand times better than ordinary gates. Shipped ready to hang, with hinges and special chain fastening that keeps the gate shut even when posts spread, also permitting gate to be pad-locked.

These real sales points build business for you on this article. Farmers are optimistic now over the prospect of a bumper crop. Peerless Gates and Peerless Fences are two things that the farmer naturally wants to buy first. They keep his livestock from straying and protect his valuable crops.

Your stock has been depleted by heavy selling during the last two months. Now is the time to sort it up. Have a complete line on hand so that you can supply any demand without keeping your customers waiting.

Banwell-Hoxie Wire Fence Co., Ltd.
Hamilton, Ont. Winnipeg, Man.



WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

Look through these you may find what you want

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Subscription price for HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

Attend to this Before You Go On Vacation

THERE is real gratification in feeling that a duty has been well done. It will add much to the enjoyment of your vacation to feel that you have left things working profitably for you even while you are gone.

Reserve space before you go and approve copy to be run in HARDWARE AND METAL, and particularly in the 34th Annual Fall Buying and Directory Number, so that wherever you may be, and whatever you may be doing, the whole Canadian hardware trade will be made more familiar with your product, your trademark or your name through your weekly message in HARDWARE AND METAL, the hardware trade weekly to which the trade turns for business information on hardware.

The trade purchases invariably those products with which they have become familiar in the pages of Hardware and Metal—make yours one of them! Be sure to reserve space now for the 34th Annual Fall Buying and Directory Number appearing August 19, 1922. It is kept by the trade and ordered from for many months.

"Reaches practically every worth-while buyer of hardware from coast to coast."

Are YOU Using a Modern Scale like this——

or are you using a Scale that has not been improved upon in the last 200 years.

THE TIME has come when the Hardware Merchant must look after his profits with the same care and efficiency as any other retail merchant. Old-fashioned methods will not stand the test of modern competition.

Dayton Hardware Scales

give the Hardware Merchant the protection he needs against profit leaks. They speed up his service—enable him to handle more customers in less time. Hundreds of Hardware Merchants can testify to the value of Dayton Scales in their business.

When you are in Toronto, visit our handsome new downtown city Show Rooms, 32 King Street West.

Dayton Hardware Scales are sold on attractive monthly instalments without interest. Discount for cash. Write us for literature and prices.

BADEN

THIS is the name of an ideal. In 1864 the founder of this organization conceived this ideal. Conceived the idea of making a linseed oil so perfect that it would become a synonym for excellence in oil. He set out, before the days of the Confederation to make this perfect oil that would be the standard of comparison for oils.

Now, to-day, the idea has been perfected. Buyers say, "Baden," knowing that they are perfectly understood as wanting this incomparable brand of Linseed Oil.

When you want the best—say Baden.

The Dominion Linseed Oil Company

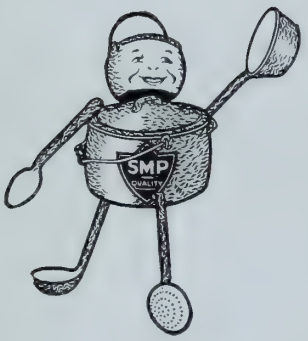
Baden Toronto Montreal Winnipeg

SMP "QUALITY" TRADE MARK



A Good Trade Mark on Good Goods

Through our great all-year-round campaign of national advertising, Canadian women have come to know, respect and admire all goods carrying the SMP Shield trade-mark. Our trade-mark means something to them. They look on it as a guarantee.

Do the women of your town know where they can buy SMP wares? Do they think of you as the merchant who handles these splendid goods?

We are creating the demand for SMP lines. Are you cashing in on it? Or are you passing it by, letting the other fellow reap all the benefits?

Link up with our great campaign. Send for our strikingly attractive window trims, our giant ads for window use, our free "Manual of Selling Points," our free cuts for use in your local paper, our free price tags, marking pencils, individual window cards, etc.

Tell the world you carry SMP goods, and your profits will satisfy your greatest expectations.

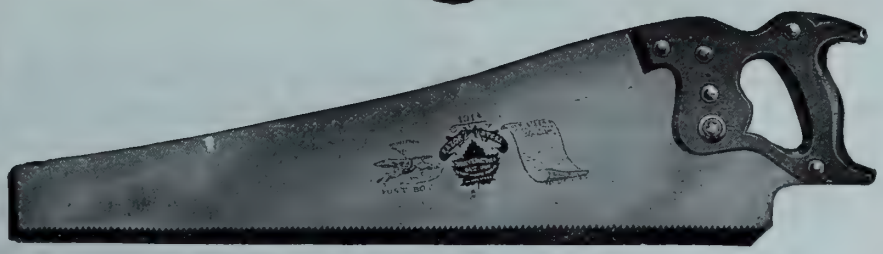
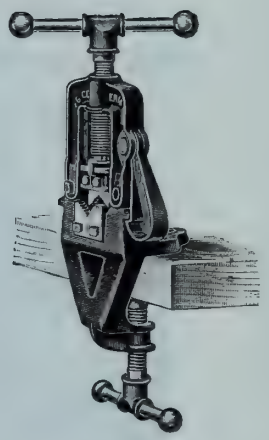
'RICE LEWIS' NEWS





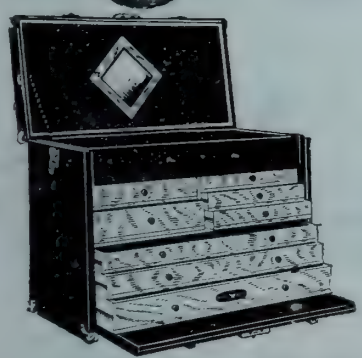
Cash In on the Demand for Good Tools

The most successful workman is the one who is properly equipped with the most scientific and up-to-date tools for plying his trade.

It is up to the hardware man to carry in stock such tools as are needed by the carpenter, mason, bricklayer, plumber, steamfitter, lather, plasterer, roofer and paper hanger.

This year with such extensive building going on, you will find a great number of people jumping into these trades.

How much of their business can you get?



RICE LEWIS & SON

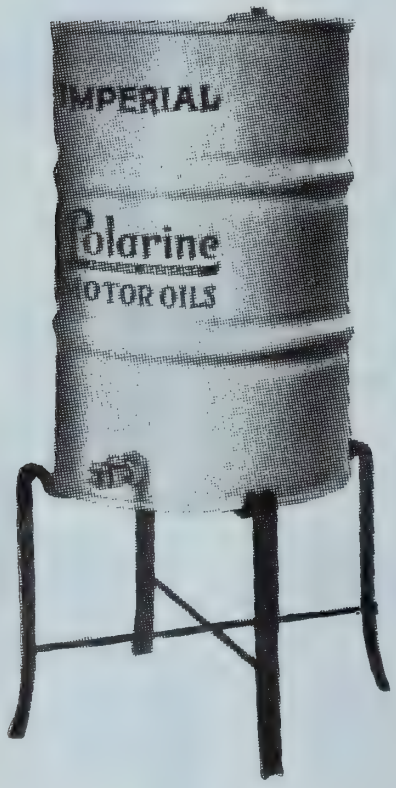
For Your Customers' Home Supply—

15-GALLON
IMPERIAL POLARINE
STEEL DRUM



The 15-gallon Imperial Polarine Steel Drum is an ideal package which multiplies the amount of your oil sales to every customer.

Think of the time, effort and expense you can save yourself by selling your trade a *season's* supply of the right grade of Imperial Polarine Motor Oils in this clean, neat, leak-proof package.

Think, too, of the convenience and saving which you can offer your customers as an inducement to buy.

Practically every automobile and tractor owner in your territory is a prospect for one or more of these drums in the course of a year. It's to your profit and theirs to educate them to buy for their requirements *by the season.*

In cases where is it impracticable to sell to customers in quantity you can, of course, still offer them Imperial Polarine in the well-known litho-sealed cans in various sizes. The dealer who works a combination of both doesn't let any possible sales slip away.

Ask our salesman for particulars regarding the profitable 15-gallon Imperial Polarine Steel Drum.

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil

The 15-gallon Imperial Polarine Steel Drum shown above is sold with or without the rack. It stands on end and occupies a minimum of floor space. Drum and stand are well made and nicely painted and will last for years. Can be furnished with a special leak-proof, automatic faucet if desired. Complete unit supplied to dealers at less than factory cost.

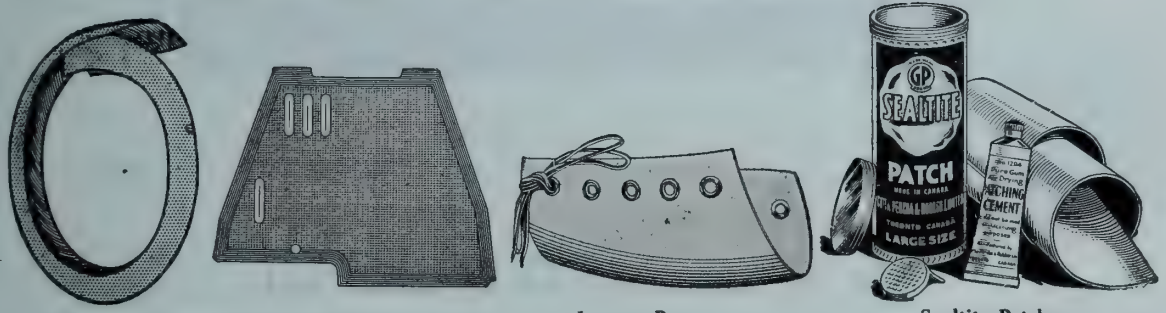
Make Your Accessory Department Grow With

"GUTTA PERCHA"

Accessories



Reliners — Wind Proof Mats (For Fords) — Lace-on Boots — Sealtite Patches

Here are some worthwhile helpers in your Accessory Department. You know the success that accessories have proved in the average hardware store in Canada? Well, the "Gutta Percha" line of Accessories will do that for you "and then some!"

This is a line you can bank on to build good-will through the reliable service that they give your customers. Take Sealtite Patches, for instance; the man who has been helped out of a puncture delay by these needs no long argument to induce him to re-order. It is so with the others. Your business multiplies on merit.

Spark-C

Ignition Tester

Does your car make a hill of a level road? It does if the ignition system is faulty.

This is the question we are asking every car owner. Motorists everywhere are answering by buying "Spark-C" Ignition Testers.

The sales possibilities in "Spark-C" are almost unlimited. Every user of an internal combustion engine has real need for a "Spark-C" Ignition Tester. For "Spark-C" is the only sure way to test ignition.

Consider the number of cars, motor boats, tractors and stationary gas engines right around you. Then you know what you can do with "Spark-C." Few articles compare with "Spark-C" Ignition Testers for quick turnover and high percentage of profits.

Let your jobber supply you to-day.

This is the
"Neglected Inch"
—the inch between the furniture and the floor

The public has commenced to think and know about the "Neglected Inch"

FORTY years ago no one knew of appendicitis. And, because this disease was undiscovered, thousands of people yearly fell victim to its toll.

Two years ago, the "NEGLECTED INCH" was ruining floors, floor coverings and furniture the country over, because the public did not know that there were casters which moved furniture safely and without damage to rugs and hardwood floors.

Now Bassick Casters, with their improved top bearing construction which makes for perfect swiveling, are rapidly replacing old style casters of inferior design.

The public has become caster wise and because it has, hundreds of progressive hardware dealers, who have taken advantage of the Bassick Franchise, have found that Bassick Casters are a fast selling, profit making line to carry.

Bassick Casters are popularly priced, properly packaged and backed by all the selling help you need.

Your jobber can get you Bassick Casters. Ask his salesman the next time he calls.

MICROMETER CALIPER HEADS

Nos. 463 and 464

Starrett Micrometer Caliper Heads are designed to facilitate the taking of fine measurements in connection with tools or machines to which they are attachable. Recent additions to the Starrett line of these micrometer heads are No. 463, a half inch micrometer head graduated to thousandths of an inch, and No. 464 which is similar to No. 463 except that it is graduated for measurement by ten-thousandths of an inch. Both No. 463 and No. 464 Starrett micrometer caliper heads are furnished with or without the Starrett ratchet stop. Consult your copy of the new Starrett catalog No. 22 "MA," page 162, for full description and illustration of these new tools. If you haven't a copy of this catalog handy, write for it—and also ask for the Starrett booklet—"The Tools Mechanics Buy." Both books will be sent promptly on request.

A PIECE OF TABLEWARE

may be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

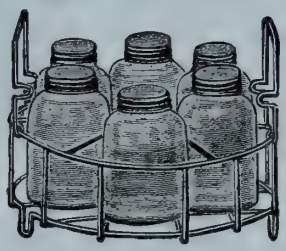
A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A.B.C. Hardware and Metal is the only publication of its kind in Canada that will supply an A. B. C. Audit.

The "Cold Pack" Home-Preserving and Canning Outfit



HERE is another good seller to add to the already popular Davidson lines—a practical yet very simple canning outfit suitable for the average home.

Tell your customers that by preserving the "Cold Pack" way it is possible to preserve more of the fresh garden flavors than by any other method. This outfit permits fruits, jams, jellies, vegetables or meats to be steam-boiled in the actual stone jars which are suspended in a specially constructed wire rack which fits our No. 18 cook pot.

The complete outfit comprises

an 18 qt. Enameledware Cook Pot and a Wire Rack (to Hold 6—1 qt. Jars)

The pot measures 13 inches diameter by 9¾ inches deep with cover. Rack is made of strong steel wire with lifting handles and feet which keep the jars clear of pot bottom when boiling. Jars can be removed separately and when not in use for canning, the pot can be used for general kitchen requirements.

Each outfit contains full cooking instructions with time chart for various fruits and vegetables.

Already we have received substantial orders for this new line. Have we yours?

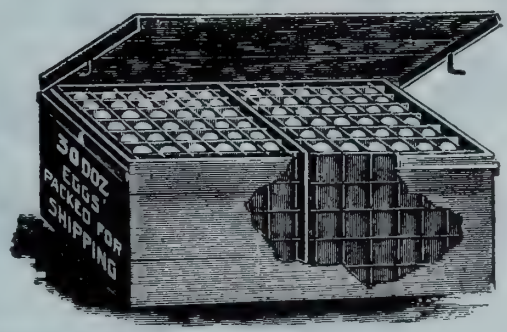
THE FLAG BRAND

How to avoid Egg breakage



One broken egg in a crate will destroy others—and no one wants to receive a crate with any broken eggs.

For extra long hauls recommend **Special No. 1 Fillers.** They are calendered to a hard, smooth surface. This makes the outside tips answer the purpose of a buffer for any shocks, jars or impacts, transmitting the force from point of impact to the opposite end of the case. This eliminates the strain on the cells and prevents telescoping. Invaluable for ocean shipments.

No. 1 Filler. Very high grade and good for long hauls, but not as strong as the Special.

No. 2 Filler. Should be used for local use only. Help your customers to buy the right filler to minimize egg breakage.

They Are a Cold-Blooded Lot

A SUCCESSFUL retail merchant, who has worked up a large business and is substantially rated in mercantile rating books, was telling the writer a few days ago of the difference between some of the firms with whom he does business. Referring to two firms in particular he said:

"Firm No. 1 is a fine firm with whom to do business. They make you feel that they want your business, and we give them a lot of our business. The sales-manager makes it a point to drop in and see us at least once a year. We receive letters from them occasionally thanking us for our business, or for big orders which we frequently place with them. We read their ads in your paper giving us reminders of seasonable lines and talking points on many lines which they sell. There is an atmosphere about their business methods which makes you feel that they want your business, and that they will try to give you good service and a fair deal."

"Firm No. 2 seem to me to be a cold-blooded lot. Perhaps they do not mean to seem cold, but the only time they seem to think of us is when they want our order. At one time we gave them a considerable amount of business, but never could warm up to them. They always gave you the impression that they were doing you a favor by allowing their traveller to call on you. Except for the travellers' calls we never heard from them, other than receiving an invoice or draft covering our purchases. The prices of this firm are just about the same as the other, but we prefer to place our business with the company that shows an interest in us, and apparently in the retail trade generally."

Moral—"It does not pay to neglect customers these days. Think it over."

Winchester Arms Co. Amalgamate With Simmons Hardware Company

Holding Company to be Known as the Winchester-Simmons Company—Stock to be Owned by Present Winchester & Simmons Interests—A Big Move

EDITOR'S NOTE:—The announcement herewith of the amalgamation of the Winchester Arms Company with the Simmons Hardware Company, of St. Louis, will come as a distinct surprise to the Canadian trade. Affecting, as it does, two of the world's largest hardware concerns, the future of the new organization will be watched with interest by the hardware trade of the entire world. When the new Winchester merchandising plan was announced in Hardware and Metal two years ago, letters poured in from all parts of Canada, asking if the plan was to be adopted in Canada. As a result of the interest stirred up at that time the sales manager of the Winchester organization was invited to come to Canada and address the hardware convention at Hamilton. The complete address, along with details of an interview by Mr. Maycumber with Hardware and Metal, appeared in our paper at that time. It was intimated that the question of the Canadian field was under consideration, but that no immediate entry into Canada was contemplated.

It is understood that the new combination of the Winchester and Simmons interests will be under the control of the Winchester management. The announcement of the Winchester merchandising plan at its birth created somewhat of a sensation. Predictions followed quickly. Some predicted an early downfall of the plan, others thought it a good idea and one in line with the rapid changes which are taking place in modern merchandising. Whether this latest step is an indication of the success of the plan, or an indication of the necessity of a jobbing house in connection with the successful working out of the plan, one cannot say at present. It is significant, however, that over 1,000 merchants attended the Winchester convention last week, which Winchester officials claim is a greater number than attend the National Hardware Convention of the United States. The Winchester Company also claim to have over 3,000 Winchester stores in the United States on a dealer-business and profit-sharing basis. After reading the official statements which follow, the question arises, "Has it been found that the manufacturer-to-retailer idea will not work successfully without a jobbing house, when applied to the distribution of hardware lines generally?"

ALTHOUGH all the details of the plan have not yet been worked out, the Winchester and Simmons organizations have formed a combination which will be under the control of the Winchester management. J. E. Otterson president of the Winchester Company has made an official announcement as follows:—

"The majority interests of the Wincester Company and the Associated Simmons Hardware Companies beg to announce that they have entered into a contract to combine the two interests under a common management and they will hereafter be operated jointly.

"The Winchester Company will operate as the manufacturing organization and the Associated Simmons Hardware Companies will operate as the distributing organization.

"The Associated Simmons Hardware Companies will continue the operation of their hardware jobbing business as heretofore and in addition will act as distributors of Winchester products to the Winchester stockholding agents, and for this purpose the sales, warehousing and distributing organizations of Winchester and Simmons will be combined and hereafter be operated as one.

"The combined interests will be operated through a holding company to be known as the Winchester-Simmons Company, the stock of which will be owned by the present Winchester and Simmons interests and both interests will have representation on the board of directors."

The Simmons Company operate warehouses at St. Louis, Wichita, Sioux city, Minneapolis, Toledo, Los Angeles, Boston, and carry a force of about 500 salesmen. Until war conditions created difficulties, the Simmons Company also operated in Canada.

The Winchester Company and its subsidiaries have warhouses at New Haven San Francisco, Los Angeles, Kansas City, Atlanta, and Chicago.

Simmons have factories at Waldon, N. Y., Philadelphia, St. Louis and elsewhere. Winchester in addition to its plant at New Haven, operates the Barney and Berry plant in Springfield, Mass. and the Mack Axe Company at Beaver Falls, Pa.

Has Come Through Adversities

President Otterson in his address to the Winchester dealers dealt with the problem of the organization during the past two years. He said in part:—

"We undertook some two years ago an effort that was revolutionary in the hardware trade and I think, in the business world. We thoroughly believed in it at that time. We undertook it well knowing that we had a tremendous job ahead. We did not expect quite so serious a business depression and we did not expect some of the complications that have arisen. But they have arisen and the organization has come through in fine shape. I believe that we have made progress. I believe that we are going to win out and I am glad for the sake of the organization that the business depression did come, because it brought to the organization that kind of test that could not have come to it otherwise."

Referring to the Home Organization, some of whose representatives had previously been introduced to the Convention by Mr. Maycumber, Mr. Otterson said:

"Every member of this organization

that you have not met this morning is a stronger and better man by reason of the adversities of the last two years. And so I want you to feel that the Winchester movement is now planted on firmer foundations than would have been possible if we had not had the business depression. When you consider that we here undertook a great new thing, that we got all spread out in our effort when we were hit by the business depression and that we were able to come through it safely, I think you must realize something of the strength of this institution of Winchester.

"You are here to judge of these things for yourself and I would like your observations to be based on that which you see rather than that which I tell you about. We believe that you will find the evidence here before you that progress has been made, that we are successfully on our way, that we have a fine line of new products. And we believe that we have gotten into them that magic thing we struggled for in the beginning—Winchester Quality."

Continuing Mr. Otterson reviewed Winchester's progress in setting up warehouses to provide better service for Winchester Dealers and stated that the warehouses established are making rapid headway and should be very profitable indeed. The San Francisco Warehouse, which on January 1st of this year was incorporated under the name of The Winchester Company of the Pacific, has shown a profit since its inception and is regarded as a sure success.

New Principle in Hardware Field

"When we started on this plan," said Mr. Otterson, "we initiated a great new principle in the hardware field. We conceived that future business required that the cost and expense of distribution be reduced. We sought to tie the consumer closer to the manufacturer, and as an initial step in the work we sought to tie the retailer closer to the manufacturer.

"We believe that the course of business in the future is in the direction upon which we have started. We believe that the cost of distribution is ultimately going to be cut down. It costs as much to distribute to-day as it does to manufacture, and half of what the consumer pays for an article is paid for the distribution of that article from the factory to his hands. We believe that somehow or other in the course of the next fifteen or twenty years there is going to be an evolution in this respect that will bring about changes."

Predicts More Combinations

"Some twenty years ago the great fear in this country was the growth of corporations and combinations and at that time there was a tendency for corporations of one kind to draw together. Two manufacturers of one class of article would come together for the purpose of creating a larger manufacturing plant. I believe that there are going to be consolidations and combinations in the business world in future and that these consolidations and combinations instead of being in parallel like the two manufacturing plants doing the same thing, coming together, they are going to be in series, the manufacturers and the distributor getting closer together. Instead of being in team they are going to be in tandem and we believe that the greatest economies in distribution are going to be effected by the co-operative combined effort of the manufacturer and the distributor.

Strength Rests With Retailer

"We believe that the strength of distribution ultimately rests with the retailer who sells the goods directly to the consumer and represents the manufacturer in that transaction and so we want to build up our distribution strength upon you and your effort. But at the same time we want to bring to you the finest distributing warehousing service in the world in order that you may not be at a disadvantage as compared with other retailers. And so we are trying to build up a warehousing organization and a distributing organization that will be worthy of the Winchester Plan and will serve your purposes as well as ours.

"During the process of building up our branch warehouses we have been urged constantly by our agents in many parts of the country to go into the general jobbing business in some form, to go into co-operative buying, to provide buying facilities in order that you might receive the benefits of buying in large quantities and buying directly from factories. We have seen the advantages that might grow out of such an arrangement, but we have been reluctant to undertake anything of the kind, first because we had our hands full with the things that we were already attempting to do and we did not seek to take on other work that might involve the success of that work which we had already started. We have sought a method of accomplishing these purposes that would bring us immediate results without all of the tedious processes of development that we have had to go through in bringing this Winchester Plan to its present state.

"As a result of this thought and consideration we have entered into a contract for the combination of The Winchester Company and the Associated Simmons Hardware Companies. This combination will be formed by joining the interests of Simmons and their stockholders with Winchester and their stockholders in one company which will hereafter be operated as one, the Simmons Company performing the work of distribution and the Winchester Company performing the work of manufacture. This combination will be under the control of the Winchester management so that the Simmons Hardware Company as well as the Winchester Company will in future be operated in your interests."

After giving in round figures the production capacity of the Winchester plant, and the distributing strength of the Simmons Company, Mr. Otterson continued:

"By this action we are joining together the largest single manufacturing establishment manufacturing and distributing to the hardware trade, and the largest hardware jobber in the world. We believe that it is an unbeatable combination. We intend to direct it to the further and complete development of the Winchester agency plan. We believe that it will facilitate the development of this plan and that it will bring to you and to us results that we could not get so quickly in any other way. I ask of you to give this the same support, the same loyalty in future as you have given the Winchester Plan in the past. I believe that this is the most forward movement in the whole business world."

ANOTHER FRAUD AGAINST RETAILERS IS CHECKED

Fraudulent representations to retailers through misuse of the names of prominent national advertisers enabled a certain private advertising corporation in the United States, engaged in the sale of electric flash signs for advertising purposes, to make headway in a nation-wide membership campaign until checked by the warnings of the National Vigilance Committee of the Associated Ad Clubs of the world.

This advertising association sold membership contracts to retailers under which they agreed to display in their stores electric flash signs advertising national products for which the retailer was to receive a monthly payment of one dollar per sign. In most cases the national advertisers know nothing of their names being used for this purpose and many of the company's representatives became trained "gyp" artists selling memberships and collecting money from retailers and giving no record whatever of them. Thanks to the protective service this fraud has been checked.

RAIL ORDER FOR ALGOMA STEEL CORP.

Sault Ste. Marie, Ont.—W. C. Franz, president of the Algoma Steel Corporation, has been advised that the Canadian Pacific Railway has accepted his figures for a rail contract for 48,000 tons.

Two of the blast furnaces have been in operation and a third will be blown in as soon as docks are up in readiness to handle the necessary ore. It is expected that the rail mill will be able to start operations immediately.

TO MAKE RADIO SETS

Complete radio sets and parts are to be manufactured in the McLean Holt Co.'s plant on Albion Street, St. John, N.B.

The new manufacturing company will be known as the New Brunswick Radio Corporation, of which J. L. McAvity will be president. It will manufacture complete receiving sets of different types. The first sets will be equipped with crystal detectors.

Rapidly Increasing Steel Prices Offset Effect of Slight Freight Rate Reduction Made This Week

According to the Opinion of Numerous Metal Merchants—Steel Now Quoted as High as $1.80 Base Compared With $1.30 a Few Months Ago—Freight Reduction of 3 Cents Per Cwt Will Be Offset By Increase in Exchange

EDITOR'S NOTE:—In last week's issue of Hardware and Metal the question of possible freight rate changes was taken up. The action of the Parliamentary Committee in suspending the Crow's Nest Pass agreement except on grain and flour was outlined and while no action was taken at that time to put into effect the lowered rates on basic commodities as offered by the railways, it was pointed out that the plan finally decided upon left a sufficient margin between the revenue loss to the railways by the plan suggested by themselves and that of the plan finally adopted by the committee, to justify the railways in lowering the rates on certain basic commodities. This week this reduction has been made amounting to 7½% from existing freight rates on forest products, building material, brick, cement, lime and plaster, ores, pig iron, blooms, billets, wire rods and scrap iron. The reduction is not as much as that contemplated last week, but the comments of various authorities in the hardware trade as outlined in last week's issue of Hardware and Metal are of much interest in view of the action now taken. Added to these are some further comments of various manufacturers as to the effect of this change upon hardware commodities.

"THE SLIGHT freight reduction comes along at a time when the basic price of steel is mounting rapidly," said J. G. Near, manager Peckover's Ltd. Steel merchants of Toronto, in discussing the subject with Hardware and Metal. "The freight rate reduc is so slight that it is lost track of in the upward shuffle of prices.

"Some very few months ago, steel could be bought in large quantities at Pittsburg at $1.30 base, and many firms this country filled up their stocks at that low level. This week we were quoted in carload quantities $1.70 base and the mill has quoted even as high as $1.80. This simply means that Canadian producers of steel are re-figuring their price schedules based more on the actual prices obta ning and conditions ruling at Pittsburg.

"The freight reduction amounts to slightly less than 3c. per cwt. and to be entirely frank, we do not think that the trade here will take cognizance of that slight reduction. True the tendency is the right way, and will in time have that effect but as pointed out, for the time being it is such a slight reduction and the advance in basic values so marked that it is lost sight of.

Exchange Increasing

"Then there is the indication of a slightly worse exchange situation, it being freely predicted that exchange will very shortly go to at least 3 per cent., and probably remain at that figure for some considerable time. This in itself offsets the freight reduction so far as Canadian distributors of steel are concerned."

G. Hood, sales manager, The D. F. Jones Mfg., Co., Ltd., Gananoque, Ont., shovel manufacturers, states:

"We have no great hope that the reduction will have any marked effect in lowering costs for 1922. In fact actual transactions in steel and fuel oil (always dominant factors in our costs) have been at advanced prices, and it is our prediction that neither the 7 1/2 per cent. reduction in Canadian freight rates nor the 10 per cent. reduction in the U. S. rate will have ay effect in reducing high cost conditions this year."

Have Good Effect

Pointing out that the reduction of 7½ per cent. on pig iron, billets and wire rods which goes into effect on August 1 will have a good effect, G. Spence, sales manager Steel Co of Canada, Ltd., Hamilton, adds that the reduction is small and consequently will have a similarly small effect on manufactured articles. Many manufacturers expected a greater reduction.

"The coal strike has no doubt affected the steel maker both in Canada and the United States, but production of steel has been on a very fair basis and whether the coal supply will permit it to continue is something which time alone can tell. Business conditions are good in steel products generally, particularly so in Ontario and the Northwest. Local conditions are favorable, there is considerable business and most factories are enjoying good business."

Lowers Production Costs

F. B. Leslie, of A. C. Leslie & Co., Ltd., iron, steel and metals, points out that the freight rate reduction will mean somewhat lower costs on production of commodities but this is unlikely to have any decided effect on business generally. The reduction in cost is said to be hardly likely to change prices on finished material.

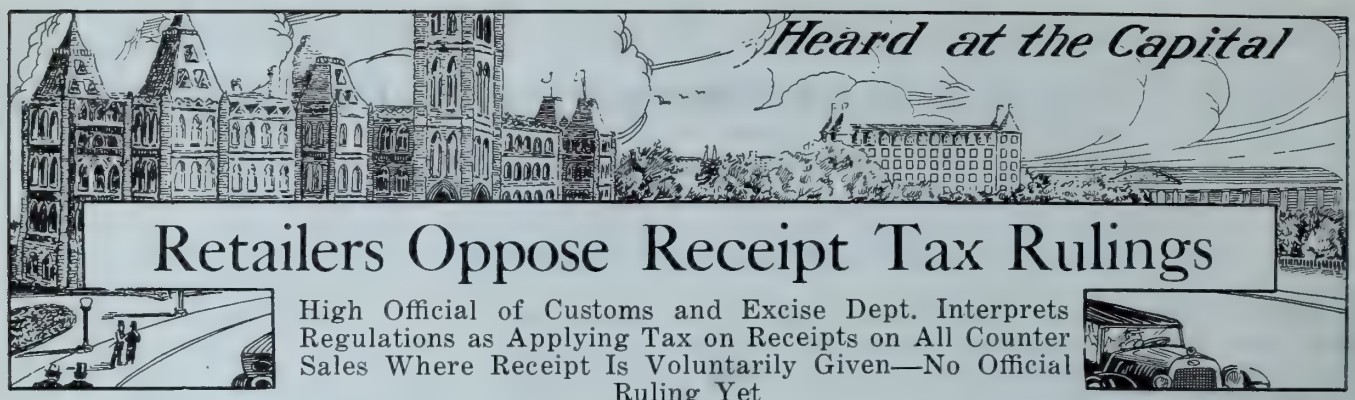
A consideration of the situation indicates that the freight charges on those commodities which were raised by the judgment of September 13, 1920 to 140 per cent. of their former level in Eastern Canada and 135 per cent. in Western Canada, which receded to 135 per cent. in Eastern and 130 per cent. in Western Canada on Jan. 1, 1921 and further to 125 per cent. in the East and 120 per cent. in the West on December 1, last. are taking another drop. Those rates after August 1 next will still be 17½ per cent. higher in Eastern Canada and 12½ per cent. higher in Western Canada than they were prior to September 13, 1920. The judgment also reduces the rates on coal other than anthracite and coal moving westward from the head of the Great Lakes, to the basis which prevailed prior to September 13, 1920. The board also orders that schedule A rates, which means the general rate basis throughout Ontario and Quebec be extended to include the territory between North Bay and Saulte Ste. Marie. The rates on excess baggage provided for in September, 1920 have been eliminated.

Lower Rate on Class Shipments

The board further proposes some reductions in class rates on shipments between the Maritime Provinces and points west of Pt. Arthur and Ft. William. It does not concede all that British Columbia asked, namely, a reduction in mountain rates. Those have hitherto been calculated at one mile in B. C. to 1½ miles on the prairies. They are hereafter to be on the basis of 1 mile in B. C. to 1¼ miles on the prairies.

The differential against British Columbia has been halved and rate reductions on freight traffic in the province to the extent of about 15 per cent. from existing charges have been accorded.

The rate reductions granted by the board, plus the decrease in rates on grain and flour eastbound from the prairies, made by the legislation passed during the session of parliament and the cuts in international rates, would result, on the basis of last year's traffic, in a revenue loss of $22,000,000 to railways.



Retailers Oppose Receipt Tax Rulings

High Official of Customs and Excise Dept. Interprets Regulations as Applying Tax on Receipts on All Counter Sales Where Receipt Is Voluntarily Given—No Official Ruling Yet

By Ottawa Representative of Hardware and Metal

OTTAWA, Ont.—"I would be inclined to think that the tax on receipts would have to apply to all counter sales where receipts are voluntarily given," said a high official of the Department of Customs and Excise at Ottawa.

It was in an effort to secure a definite ruling on this point that the Ottawa representative of Hardware and Metal called at the departemnt The official expressed his opinion, as above and then added: "Nothing definite, however, has been decided. We are still considering the matter and it will probably be some time before we have drawn up any regulations."

The section of the Act dealing with this matter was gone over carefully by the official and Hardware and Metal. When the former had finished reading it, the writer enquired:

"And what would that seem to you to imply?"

"I would interpret it as meaning that all counter sale receipts would be affected; but you cannot take that as the department's definite interpretation of the Act."

What "Receipt" Means

A memorandum by the department points out that for the purposes of the act, the expression "receipts" includes any note, memorandum or writing whereby any money amounting to $10 or upwards, is acknowledged or expressed to have been received.

The receipts which do not come under the provisions of this section are outlined as follows:—

(d) A receipt for or upon the payment in any bank as defined in section twelve of this Act to be accounted for to the person to whose credit the money is deposited.

(b) A receipt or document in the nature of a receipt which is taxable under any other section of this Act.

c) An acknowledgment by a bank of the receipt of a bill of exchange or promissory note for the purpose of being presented for acceptance or payment.

(d) A receipt for or upon the payment of money paid for any purpose to or by His Majesty for or out of the Consolidated Revenue Fund or for or out of the Consolidated or General Revenue Fund of any province of Canada.

(e) A receipt endorsed or otherwise written upon or contained in any instrument liable to stamp duty and duly stamped acknowledging the receipt of the consideration money therein expressed.

Cancellation of Stamps

The Act is clear on the method of stamp cancellation. It reads: "Cancellation shall be effected by the person who cancels the stamp, writing or impressing his name or initials on or across the stamp together with the true date of such writing or impressing."

The Act, nor the department's memorandum nor the department officials themselves do not make it clear who is to pay the tax in the event of it applying to counter sales.

"That is one phase of the question that we must decline to discuss at present. All the regulations governing this section of the Act, will be made public in due time," said the official.

Retailers Antagonistic

The attitude of retail merchants to this piece of legislation is one of bitter antagonism. "It is a clumsy piece of legislation, and if it goes into effect, it won't be our fault," said E. M. Trowern, secretary of the Dominion Board, Retail Merchants' Association of Canada, who announced that the board was making plans to fight the matter to a finish. "Our case is being prepared at present and we will have something very interesting to report before long," said Mr. Trowern. He added that he firmly believed the provisions would never be enforced.

AN AUTO IN CANADA FOR EVERY 19 PEOPLE

Ottawa, Ont.—Canada's registration of motor vehicles for 1921 shows an increase of more than 50,000 over the previous year, according to official figures issued by the highways branch of the department of railways and canals. Last year there were 463,484 motor vehicles registered in the Dominion as against 415,268 the previous year. Total revenues from registrations were $7,669,493.

On the 1921 census of 8,782,422 persons in the Dominion, there was one motor vehicle for every 19 persons in Canada.

SALE OF UTENSILS FOR PRESERVING TIME

(Continued from page 39)

more than two feet in width. Sometimes a circular stand can be used to very good advantage. Such a stand, mounted on casters, is sufficient to show any housewares and it can be moved to various parts of the store quite easily.

This merchant constructed such a display stand using one inch gas pipe screwed into four inch pipe flanges. On the top of the shelf these flanges are fastened directly to the shelf while underneath they are fastened to wood cleats one inch thick and five inches wide, the cleats in turn being screwed to the shelf to prevent warping and sagging. Only two braces are needed with this construction. They are made of five-sixteenths inch round iron and support the second half of the stand. The stand consists of four shelves each six feet long, the bottom one and the second one being 2 feet wide, the third shelf being 20 in. wide and the top shelf 16 in. wide.

Group Housewares

The two pieces of inch gas pipe used in making this table are placed 12 in. from each end of the bottom shelf and equal distance from each side of the shelf. Each of the three upper shelves is supported by wooden cleats in flanges on the gas pipe, the first shelf 18 in. above the bottom one, the second shelf 14 in. above the first and the third 12 in. above the second. The brace is between the bottom and first shelves opposite the gas pipe. Casters are used on the bottom of the lower shelf. The corners of the shelves may be rounded and it is well to put a 1¼ in. nosing on each shelf end to prevent stock from sliding over the end.

When the display stand is ready various lines of hardwares should be grouped according to needs. This one stand might be devoted to preserving requirements. Care should be taken that these stands are not used as storehouses for stock, they are a valuable means of moving seasonable stock and their chief value will lie in educating customers to the fact that they are the logical place to look for "specials."

Sale of Utensils for Preserving Time

Retailer Has Active Week's Business by Displaying Four Types of Utensils at Special Price and Giving a Saucepan Free With each Purchase—Take Housewares Off the Shelves and Show Them on Display Racks Where Customer Can Handle Them Says Another Merchant

A full range of enamel kitchen utensils is generally difficult to display exclusively in the windows without giving an impression of monotony, but in this arrangement by Alex Ordronneau of Ashdowns (retail) hardware store in Winnipeg, a maximum effectiveness has been secured by giving attention to the placing of the utensils, the use of various stands and the working in of some foliage to give the whole a summer atmosphere. Price tickets are shown on each line. This display helped bring a splendid week's business and might be copied by other merchants now that preserving time is here.

PRESERVING time is now beginning and before long it will be in full swing as the native fruits ripen and in turn come to market. Many lines of hardware can be featured in connection with preserving and the housewife will appreciate many of the helpful suggestions which the hardware merchant can give to save time and labor and get better results. Preserving in mid-summer is a tedious job but it can be made much less onerous by the use of correct utensils.

Elsewhere on this page is shown a window display used by A. H. Ashdown Hardware (retail) Winnipeg recently. This display is restricted to blue and white enamel ware and represents four types of utensils featured at the special price of 95 cents. These include double boilers, dish pans, potato pots, and kettles. Each article bears a price ticket. Every purchaser of enamelware during the week in which a campaign was carried on, was given a saucepan, free of charge. The advertising was linked up with the display and the combination resulted in a splendid week's business which attracted considerable attention on the part of housewives looking to the replenishment of their stock of household utensils. Some housewives lay in a new stock of utensils at Spring housecleaning time but undoubtedly many of them neglected to do this. If they are still using the old pots carried over from a severe winter's usage, it would be well for them to replace several utensils before embarking on the summer's preserving season or several pots of fruit may be spoiled.

More Ambition for Preserving

Retailers' ads are featuring kitchen utensils for preserving at present. James S. Fraser, of New Glasgow, N. S. in a recent ad says, "Prepare for Preserving. Mother has much more ambition to preserve when she has a brand new preserving kettle of shiny aluminum ware or granite ware. You can almost see the look of pride on her face when you bring one home to her. And after the berries are cooked she will put them up in——preserving jars in pint, quart and half gallon sizes. They will keep sweet because no air can reach them. And last, but not least, don't forget to order a box of rubber rings for your old preserving jars. Look over our stock of preserving supplies."

One hardware merchant who is now actively engaged upon a campaign for the sale of kitchen utensils in connection with preserving time stated to Hardware and Metal this week that he has taken note of the methods which have successfully developed business in housewares and is applying them to his store with good results. He points out that it seems to have been a time honored custom for hardware stores to fill the shelving on one side of the store with kitchen utensils. The department store recognized the fact that women like to handle clean samples, that they like to see and handle merchandise without asking a salesman to show it, that they like to know the price without asking a salesman, and that they like neat orderly displays. Acting on these facts this merchant makes a place for housewares on tables in the centre of the store and also uses wall shelving but no higher than can be reached by the average woman and there is no counter to keep customers from handling the merchandise so shown.

A Useful Display Stand

For the information of other merchants who contemplate adopting this plan, this merchant points out that any kind of table will not do. Very often a disorderly display of housewares is found on an ordinary table and underneath it is an assortment of odds and ends which are out of the customer's sight and which became dusty and dirty. Display stands should be used, not tables. In building a display stand care should be taken that it is not too big, a common fault. It need not be more than six feet long and it should be just high enough that when it is trimmed with merchandise the average person can see over it without effort. It should not be

(Continued on page 38)

"Price Cutter is a Good Business Man"

Says Paul Findlay Pointing Out That the Price Cutter Merely Takes Advantage of Opportunity Which Other Merchants Provide —How Price Cutting Can be Eliminated by Other Merchants.

SOMEONE has recently written Paul Findlay for an opinion as to what constitutes a price cutter and his answer is very "pat."

"If you stop to give it serious, careful, sober consideration," says Mr. Findlay, "unbiased by some condition which may hurt you personally maybe you will find it difficult to define price cutting.

"If by 'humping around' you can buy anything on such a basis as to enable you to sell it below regular figures and yet make your normal margin, surely that proves that others might do likewise. That probably means that the

'regular' retail price is too high and should be reduced. I should say this is good merchandising from both the standpoint of the retailer who thereby attracts trade and the public which thereby gets better service and a more equitable deal.

Advertising Popular Brands

"As to the man who advertises popular brands at cost or below to attract trade—that depends. Suppose that man figures that he can spend 2½ per cent. of his sales for advertising. On $100,000 sales that is $2,500 a year, $208.33 per month. Suppose he has the habit, so long continued as to be known by the people of his town, of using a single column, five inch space every Monday night in the local paper, and that said space, costs him $25 each week. That space, then, consumes approximately $100 each month and he has over $100 surplus.

"Now what is advertising? Is it not any paid-for means to attract business? If so, then any medium used to bring people to your store is advertising, and so long as it is legitimate, on the level, fair and not against public policy, any merchant has a right to use it. Further if this means is open to all, nobody can find fault with its use.

"So let us suppose that this man decides to consume his extra $100 per month in especially reduced prices, thereby giving his customers $100 in price concessions, who shall say this is not legitimate?

"Go further. Assume that this policy results in an increase of business so that our merchant sells $125,000 with only the added expense of an extra boy, other expenses remaining constant so that expense ratio is reduced by a sixth—say from 18 to 15 per cent.—why cannot that man divide this advantage with his customers, or give it all to them?

Giving Customers the Benefit

"Such increase would yield him $625 a year more advertising money, plus savings of $675 on expenses. He might very easily, therefore, turn back to his customers through special prices, an additional aggregate of anywhere between $650 and $1,300, and proceed to build his business further by geometrical progression.

"So what shall we say? Can we think of any way in which this freedom of action shall be curtailed? Can we honestly say that its curtailment would be for the public good? And let us remember that, however we may feel about it, the public good must set the limits everywhere.

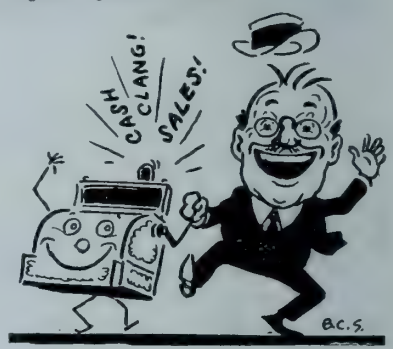
"Let us have in mind that the play of individual initiative must not be circumscribed, that the liberty of each to serve for less or serve better must not be curtailed, for from these, springs the true life of trade through wholesome competition. Thus the law of supply and demand works unhampered. What we should not want to give up ourselves we must not seek to take from others. So, what is price cutting?

"One kind is where a concern having many branches and large distribution depresses prices below the point where the business is self-sustaining to squeeze out competition. Such cutting has been subject to injunction in more than one instance. That is true piracy, illegitimate and should be stamped out everywhere.

Provides Its Own Remedy

"Another kind is where goods are sold at a general level that does not admit of earnings sufficient to carry the business. That kind is very common. It provides its own ultimate remedy through the bankruptcy courts. Trouble is, it is slow.

"The remedy I give has been used, so it is not mere theory. It is for each merchant to meet the cut prices of any merchant who makes a practice of attracting trade through prices so low as to impress you as 'cut.'



"Let every one of you, or as many as may be interested together, watch every advertisement of the man you are after and meet his prices on the specials he uses. Note that I say meet. I do not say beat. Just set out in your store, prominently, but not too prominently, every item he advertises and mark it with exactly his advertised price. Never mind how close his figure is—whether it pays or not is immaterial. Just meet his figures.

"The effect of such action as I suggest is not only prompt, but the cost to anyone is trifling. You put the cutter into the position of fighting all the rest of you."

HALF HOLIDAY BOOKLETS AVAILABLE

Hardware and Metal has prepared a handy booklet setting forth information regarding retailers' half holidays, early closings and the observance of Daylight Saving or Standard time in the cities and larger towns throughout Canada. Quite a number of these booklets have already been distributed but requests for them will be taken care of as long as the supply lasts.

TO MAKE SASH WEIGHTS

Electro Castings Ltd., Collingwood, Ont., have taken over the building and plant formerly occupied by Wm. Kennedy & Sons. This plant is equipped with a modern two-ton electric furnace, having a melting capacity of twenty-five tons per day. Turntables and cranes are all electrically operated. The company will manufacture sash weights, cast washers, coal chutes, man-hole plates, sewer grates and dome dampers.

Advertising Summer Hardware Lines

MANY HARDWARE lines which lend themselves to effective advertising in local papers in the summer months are shown herewith. Bridge Bros., Thessalon, Ont., illustrate oil stoves for summer cooking the use of which they state "means a cool kitchen with heat to cook, boil or bake at a moment's notice." Refrigerators to protect the health of the family through the medium of the food they eat are also shown. Summer sport goooods are dealt with in the ad by Ashdown's, Calgary, Alta., showing hammocks, golf clubs, bicycles, etc.

Automobile accessories always form an important part of summer advertising as indicated by the ad of J. S. Neill & Sons, Ltd., Fredericton, N.B., which says "Come to us for your motor needs. We specialize on good quality accessories and have a most complete assortment of fittings for repair work or for improving the conveniences and appearance of your auto. We will be glad to talk auto accessories with you and show you the many new improved devices we have here for motorists." In the ad by Geo. A. McMurtry Co., St. Thomas, Ont., some automobile accessory lines are also shown included among a number of other summer hardware lines.

Creeper & Griffin, Ltd., Owen Sound, show aluminum cooking utensils for preserving time along with fencing, ironing boards, screen doors and windows, tennis goods, lawn mowers, refrigerators, etc. In connection with the latter it states "hot weather without a refrigerator means waste, means money lost. You cannot afford to waste food and a refrigerator will pay for itself."

Ingram & Davey, St. Thomas, show a well laid out ad of various lines for the summer sportsmen including baseball, football, tennis, basket ball, croquet, golf supplies, and fishermen's equipment. Each line is well illustrated.

An ad on ice cream freezers by W. H. Thorne & Co., St. John, states "Kiddies love home-made ice cream. It has the delicious flavor and rich nutritive value so much needed by the growing boy and girl." Tennis supplies are also shown by this firm.

In a recent ad on refrigerators, Elliott's Hardware state "No more running down cellar. The moment one of our refrigerators goes into your home the task of preparing meals is greatly lessened. At best the ordinary cellar is damp and musty; food must be covered—the air certainly is germ laden. Apart from that look at the drudgery of taking down and bringing up perishable food at every meal. Thrifty housewives no longer consider the cellar an economy—a refrigerator is the thing to have now. No work, no worry, saves food, stands anywhere, always fresh, clean and sanitary."

Dealing with hammocks an ad by Emerson and Fisher, Ltd., St. John, N. B., says "Relax a bit these summer days. Throw yourself into a hammock in some cool, shady nook, with your favorite magazine, or simply lie there and enjoy the goodness of the great outdoors. Hammocks should form part of the comforts of the country home and no city lawn is complete without them."

SATURDAY, JULY 8, 1922

Many Factors in Freight Rate Situation

THE ANTICIPATED announcement of a reduction in freight rates on basic commodities, as mentioned in last week's issue of Hardware and Metal, has been made this week. This action came somewhat sooner than was generally expected but the fact that the estimated revenue loss to the railways by the rate reduction suggested by themselves was much greater than the loss represented by the plan finally adopted by the Parliamentary Committee, was sufficient indication that the balance of the revenue loss which the railways were prepared to face would be accounted for by a decrease in freight rates on other commodities. This week a 7½% general reduction on a number of basic commodities is made including pig iron, scrap iron, billets, blooms, wire rods, etc. Insofar as the steel industry is concerned the fact that prices are now mounting rapidly may offset any small effect which this minor reduction might have. However it is appreciated as a step in the right direction and it may not be very long until considerably lower rates are in effect. In this connection it will be recalled that the judgment of September 13, 1920, raised freight rates to 140 per cent. of their former level in Eastern Canada and 135 per cent. in the West. These receded to 135 per cent. in the East and 130 per cent. in the West on Jan. 1, 1921, and further to 125 per cent. in the East and 120 per cent. in the West on December 1 last. After August 1 next those rates will still be 17½ per cent. higher in the East and 12½ per cent. higher in the West than they were prior to Sept. 13, 1920.

The reduction of 10 per cent. in U. S. freight rates may have some small effect on the movement of merchandise into Canada from that country though the fact that exchange is again increasing between the two countries and now threatens to stand at about 3 per cent. for some time rather offsets this effect. For instance on the freight charge on bar iron and steel from Pittsburg to Toronto the saving of the freight reductions would amount to about 3 cents per cwt. A 3 per cent. exchange between the two countries would obviously offset the effect of this reduction.

White Lead Has Had a Varied Career

THE QUESTION of abolishing white lead in paint, due to alleged danger of lead poisoning to those handling it, has had a great deal of consideration at the hands of various bodies all the way from labor unions at various centres in this country to the Labor Conference at Geneva held in connection with the League of Nations conferences. In time the report of the Canadian representatives has been presented to the Canadian government and in an Order in Council issued this week, a draft convention interprets the question as one of regulation rather than prohibition and is therefore a matter for Provincial action. This may be the final action in a matter which seems to have little foundation in fact, but if any of the provincial governments get meddlesome and in their eagerness for legislation decide to take up this question there are dangerous possibilities involved. The paint manufacturers do business on a national scale and varying provincial regulations would be a severe handicap to all involved.

Paint Prices Join the Upward Swing

IN VIEW of the fact that other recent changes in prices on paint, varnish, enamels, etc., have been in the shape of declines, it is interesting to note that this week an increase is made on a wide range of these products, details of which are given elsewhere in this issue. It has been known that prices of materials entering into these products have been increasing for some time and therefore this action is not altogether unexpected in many quarters. Pig lead, linseed oil and certain chemicals have been advancing steadily of late. An interesting announcement is that paint manufacturers who have announced this revision state that in future they will absorb half of the Sales Tax charging the retailers only 2¼ per cent. This will probably be taken care of in the price changes due to the fact that the government according to a ruling made to Hardware and Metal this week, demands that manufacturers show the whole amount of the Sales Tax applicable to the sale, on the invoice as a separate item.

Millions to Keep Workers Idle

EMPLOYEES of printing establishments in Canada and the United States to the number of 9,000 went on strike a year ago for shorter hours and a "living wage." Yet other printers who were not called out have been able to pay to the strike fund ten per cent. out of the wages they have been getting—the same wages which were regarded as below the "living" standard by the union officials. Nearly $9,000,000 has been spent in strike pay which does not take into account loss of wages to employees, loss to employers and loss to business generally dependent upon the printing industry.

Union officials made the mistake of ignoring the economic problem and the fact that conditions were such that the public would not pay increased prices for printed products.

Why Business is "Spotty"

A NUMBER of hardware merchants in Ontario points have advised Hardware and Metal this week that business is good and becoming more active. In some cases figures for last year show a bigger turnover than during any of the war years. One retail firm reports an increase of $20,000 in turnover last year compared with the previous year despite the decline in prices. In practically each case where such improvement is reported it is not due to any local boom, but to energetic sales methods of the merchants and a more optimistic mental condition among buyers. It has been said that the depression was largely psychological, but whatever part psychology played in the matter it is but an indication of what can be achieved by merchants who take a lead in directing business into such channels where it is not easily deflected or stampeded by radicals.

Springfield, Ont.— J. A. Chambers has sold his hardware business to Robert Willis.

NEW FIRMS

A. W. Rose is now in business with a first-class store at 329 Ottawa St., Hamilton, Ont.

OBITUARY

The death took place in Toronto of George W. Weston. Mr. Weston, who was in his sixty-ninth year, was born in Simcoe, Ont., and had been associated with the Aikenhead Hardware Company, Ltd., for over 37 years.

PERSONAL

J. Fennell, sr., head of the firm of J. Fennell & Son, wholesale and retail hardware, Kitchener, Ont., is withdrawing from this business. Mr. Fennell is 85 years of age and has been identified with this business for sixty years though in recent years he has not been taking an active part in its direction.

D. B. McCoy, has arrived this week at the Toronto office of the Steel Co., of Canada, Ltd., having been transferred from Vancouver, where he was formerly sales representative for the past three years. M. McCoy will assume duties on the Toronto sales staff in succession to C. G. Knott.

Chas. Harrison, assistant sales manager, Steel Co., of Canada, Ltd., Hamilton, has returned from a summer holiday which was also a honeymoon trip; Mr. Harrison having married Miss May Pebbles while away from the Hamilton office.

HAMILTON FIRMS HOLD PICNICS

Hamilton, Ont.—The employees of the Canadian Drawn Steel Co., Ltd., and of the automatic department of the Canadian Westinghouse Co., held their annual picnics the end of last week, the former to Wabasso Park and the latter to Mountain Park.

NEW FIRM TO MAKE ELECTRIC REFRIGERATORS

Welland, Ont.—Zero-Zone, Ltd., has been incorporated with capital of $500,000 to manufacture an electrical refrigerator unit which may be applied to any refrigerator, new or already in use and is said to be adapted both to the home and for commercial use. B. A. Bascue formerly of Buffalo and now resident in Welland, is president.

BRITISH EMPIRE STEEL EXPANSION

Montreal.—It is reported that it is the intention of the British Empire Steel Corporation to spend the sum of $19,000,000 in additions and repairs to the steel plant. It is stated that engineers employed by the corporation are now engaged preparing plans for new open hearths and a blooming mill which are to cost about $10,000,000. One blast furnace is to be rebuilt and a second one extensively repaired. Other additions and improvements are to be made in the plant, it is said, the whole to cost in the vicinity of the amount above mentioned.

The money to pay for these improvements, it is reported, is to come from a large loan to be made to the British Empire Steel Corporation by two prominent American financial houses. The negotiations for loan are nearly completed.

TRADE ASSOCIATION PICNIC

The Queen St., West, Business Men's Association of Toronto, which includes J. Caslor, W. H. Lake and some other hardwaremen, held their annual picnic at Exhibition Park on Wednesday of this week. A sixteen page booklet was printed containing the program and advertisements of district retailers. A number of races were run and other sports indulged in. A. N. Lake was a member of the Picnic Committee. J. Caslor donated some prizes for the contestants.

EXPLANATION

In the advertisement of the Canadian National Carbon Co., Limited, in the June 3 issue of Hardware and Metal the word "Canada" appeared in the signature instead of the correct word "Canadian." The correct address is the Canadian National Carbon Co., Limited.

Sudden Death of John M. Taylor, Jr.

John McPherson Taylor, Assistant-General Manager Taylor-Forbes Co., Ltd., Guelph, and Director Everlasting Valve Co. Dies Suddenly—Eldest Son of President J. M. Taylor

LATE J. M. TAYLOR, JR.

GUELPH, Ont.—The sudden death is announced of John McPherson Taylor, eldest son of John M. Taylor, president and general manager of the Taylor Forbes Co., Ltd. While Mr. Taylor had not been well for some time hopes were entertained that he was well on the way to recovery. He had been at the office up to the day previous to his death and had been unusually cheerful in anticipation of a holiday at his summer home at Grimsby, Ont. In the evening he took a turn for the worse and passed away shortly after midnight, succumbing to a disease wh originated in an attack of influenza about two years ago.

There remain to mourn his loss his parents Mr. and Mrs. John M. Taylor, his wife, Lila Bernice Rupay, four sons, two brothers, Milton and Homer and two sisters.

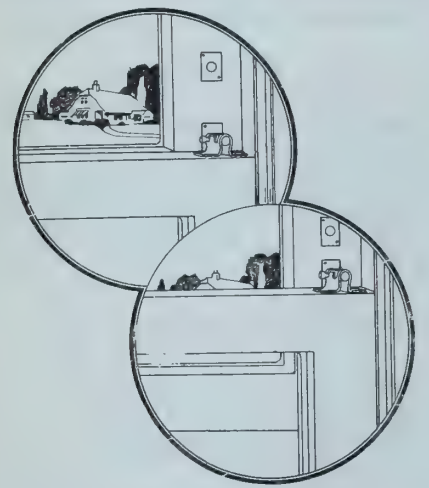
J. M. Taylor, jr., was born in Toronto on December 14, 1889, where his early education was received. Since coming to Guelph he had been active in the Taylor-Forbes Co., and at the time of his death was assistant general manager. Among the employees he was looked upon as an exemplary character and greatest tribute is paid by his business associates as to the credit and distinction with which he filled his position. In addition to his connection with the Taylor Forbes Co., Mr. Taylor was a director of the Everlasting Valve Co., Toronto. He was an active church worker and a member of various lodges and clubs, among the members of which he was held in high esteem.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW WINDOW LOCK

A window lock called the L. & G. lock is now being marketed by the L. & G. Lock Co., 392 St. James St., Montreal. Although a simple appliance, it is claimed to afford increased protection from burglary with the window either closed or partially open. Constructed on much the same principle as a barrel bolt, it is fastened on the top of the bottom sash. Two keepers are supplied



with each lock, one on the face of the upper sash, at a position which allows locking when window is closed, and the other keeper six or eight inches above, to securely hold the window when opened to this extent. It is easily adjusted and the makers point out that there are no springs or other intricate parts to get out of order.

WINDOW DISPLAY CARDS

The Stanley Works of New Britain Conn. are distributing to the trade a new garage hardware window display cut-out, measuring 28x38 inches, lithographed in ten attractive colors. It is pointed out that unique window displays may be arranged by using the cut-out as a background for the products themselves.

This company is also issuing three new garage hardware window cards, measuring 11x14 inches, printed in three different colors. These new window cards are being forwarded with the window cut out.

COVERS FOR LAWN CHAIRS

By the addition of slip covers, the No. 35, arm chair made by the Gold Medal Camp Furniture Co., of Racine, Wis., has been given an extra touch, according to the manufacturers, thus adapting this product as porch and lawn furniture. These slip covers of awning striped material in tan and green, are furnished as extra equipment.

HEAVY DUTY SWEEPER

A new heavy duty model electric carpet sweeper has been placed on the market by the Hoover Suction Sweeper Co., of Canada, Ltd., Hamilton. This model No. 961 is primarily intended for use in offices, institutions, hotels, clubs, and larger homes.

This machine, according to the makers' description, has the salient features of the other Hoover models. Also it contains a number of new refinements designed to fit it especially for heavy duty work. One feature is that it requires no lubrication. The motor is equipped with ball bearings throughout and is protected by a dust proof enclosure. It can be operated on 110 volt direct or alternating current without change. Due to its four pole compensated

series winding, it runs at a uniform speed on either.

A new nozzle adjustment enables this big Hoover to be adapted to any thickness of floor covering without turning it over. A ball-bearing beating-sweeping brush, a wider cleaning mouth, and a non-marring fibre handle grip are other features of this model. Newly designed air cleaning attachments are made for use with model 961. These tools are attached by an improved type of converter, which is connected directly with the fan inlet.

ROYAL THERMIC BOTTLE

A thermic bottle made in half gallon and one gallon capacities intended for tourists, farmers, sportsmen and picnic parties has been introduced by the Royal Manufacturing Co., of Toledo, Ohio. The makers point out that the Thermic renders available cold drinks on hot days, or warm drinks on cold days, wherever the location. Its equivalent of eight or sixteen cups, makes it ideal for large parties or for extended trips. Another feature is the fact that having the large neck opening the bottle can

also be used for soups or solid foods. This Royal Thermic has been constructed with the object of making it last considerable time. The jacket is made of heavy metal, and the insulation is the result of years of experience in making these products. The inside water container is of heavy glass, and the bottle can be replaced at any time by removing the plug at the bottom of the outside jacket, and a new one can be installed. Any parts of this nature can be furnished by the above manufacturers.

STARRETT PISTOL GRIP HACK SAW FRAME

The L. S. Starrett Co., Athol, Mass. are placing on the market a new pistol grip hack saw frame, No. 169, that combines appearance, balance and several improved features of design. The handle is designed to give more finger room, the pawl of the adjusting mechanism, is set down inside the frame. The back is constructed of steel tubing, while all steel parts are nickel plated. Constant spring tension on the bolts holding the blade makes changing them a simple matter. Note that the depth of the frame from the cutting edge of he blade is 3⅝ inhhes. The blade may be set to cut in any one of four directions by means of the wing nut.

INCREASED PRICES ON MIXED PAINTS, VARNISHES, STAINS AND ENAMELS

Due to rising costs of linseed oil, pig lead and other raw materials, coupled with the recent rivisions in sales tax regulations, paint manufacturers have advanced quotations on ready-mixed colors and various other products this week.

A ten cent per gallon increase has been established on all house paints, marine, flat oil and floor paints, and enamels.

Barn, dory, and roof paints, also shingle stains are advanced five cents per gallon.

All varnishes, varnish sundries and enamels selling above $3.00 per gal., show a rise of ten cents per gallon, while those priced below the $3.00 level, are only five cents per gallon higher.

White lead in oil is now twenty-five cents per 100 lbs. higher.

Paint manufacturers have announced a decision to absorb half the sales tax, which means that retailers will only be charged 2¼ per cent. on invoice totals, instead of 4½ per cent. Detailed price information is given in the paint market pages.

TO ABSORB SALES TAX UP TO 2¼ PER CENT.

In announcing the new higher scale of prices on certain paint products, such as enamels varnishes, shingle stains, ready-mixed paints, etc., manufacturers have also stated their decision to absorb half the sales tax, amounting to 2¼ per cent. Retailers will therefore, only be billed at 2¼ per cent. on the total cost of invoices, instead of the total sales tax of 4½ per cent.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER extensive budget of price developments attracts specific attention to the current hardware markets. Increases have been announced on bar iron and steel, black sheets, gasoline, coal oils, lead pipe and waste, lead traps and bends, ready-mixed paints, varnishes, enamels, shingle stains, floor and porch paints, barn and dory paints and other sundries. The full extent of this rise in quotations on paint products and the primary causes are outlined elsewhere in this issue. Other price developments include easier levels on certain makes of mop stocks and mop cloths, while a downward revision is recorded in the list prices on horse shoe nails, No's 5 to 9 inclusive. Turpentine also registers a reaction from the high levels of recent days, and a range several cents lower has developed in domestic quotations on this product.

As has been the case for several weeks, the number of advances continues in excess of the reductions, and while an upward tendency is reflected in many market sources, quotations on different products are moving in both directions, thus making the present period a difficult one to follow from a market viewpoint and again emphasizing the necessity for keeping in close touch with basic elements.

The advance on bar iron and steel has not been uniformly adopted on domestic centres, but the announcement of this upward move in certain quarters is cited as indicating the trend of steel production costs. In this connection, the reduction in freight rates, however, both on U.S. and Canadian railways as effective on such basic materials as pig iron and ores, was calculated to offset to some extent the rising tendency in other directions. The demand for sheets is maintained in fair volume, especially on galvanized, with a general higher revision on black sheets to the $5.00 level. Scrap materials are dull but prices remain unchanged at levels in effect during recent weeks. The tone of ingot metals is again marking time, trading generally lacking animation. However, spelter is now slightly firmer and attracting some attention.

Seasonal weather now being experienced has revived the movement of warm weather lines such as refrigerators, fly oil, electric fans, screen wire cloth, and other summer products. Western crop conditions are generally reported as seasonably satisfactory and while buying still continues in small lots, the feeling is apparently growing that Fall trade will reach a good volume. Merchants are usually restricting purchases until the new crops are assured, but in the meanwhile wholesalers and manufacturers are preparing for a more optimistic future.

Montreal Markets

MONTREAL, July 6.—Price variations on the current hardware markets include an advance in quotations on bit stock drills, these products now being quoted at fifty per cent off list, instead of at the former discount of sixty per cent. List prices on M.R.M. and Peerless horse shoe nails are reduced, the new level being $4.50 per box on sizes No's 5 to 9 inclusive. An approximate reduction of ten per cent. also appears on certain grades of mirrors.

The warmer weather experienced during recent days has revised the movement of summer lines, and wholesale circles report brisk activity. Corrugated sheets remain very active, with other seasonal goods attracting similar interest. A quiet condition is evident in ingot metals, a reaction having been recorded from the recent firmness.

CORRUGATED SHEETS REMAIN VERY ACTIVE

Montreal.

The shortage in deliveries of flat galvanized sheets is making itself felt in this market. This coupled with the exceptionally strong demand for corrugated sheets is stiffening the market to a point that has not been evident for a long time past. The prices are, however, unchanged.

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00

HORSE SHOE NAILS REDUCED IN PRICE

Montreal.

The list price of "M. R. M." and "Peerless" horse shoe nails has been reduced. The new list price is $4.50 per box, less the regular trade discounts.

ADVANCE RECORDED IN BIT STOCK DRILLS

Montreal

The price on bit stock drills has advanced; they are now quoted at 50 per cent. off the list instead of 60 per cent. off as formerly.

STRONG DEMAND FOR GALVANIZED SHEETS

Montreal

The demand continues very strong for galvanized sheets, and there is a scarcity that is being noticeably felt. The mills are behind in their orders both in the United States and in England. One distributor pointing out that they were now in the position of splitting up their supplies among all their customers to help them out. Prices remain unchanged.

There is no change in Canada plate, as shipments of bookings are arriving now, and there is ample supply for the demand.

LOCAL BAR PRODUCT PRICES REMAIN FIRM

Montreal

Prices in the steel industry are unchanged, and are holding firm at $2.95 base. There is only a moderate degree of activity in steel buying locally, as it usually slackens down at this time of the year. Price levels are as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

TEN PER CENT. REDUCTION IN MIRROR PRICES

Montreal.

Following are the revised prices on two grades of mirrors showing a decline of approximately ten per cent .

	5 x 7	7 x 9	8 x 10	9 x 12	10x14
X L	2 60	3 65	4 45	5 30	6 90
White Frame	3 40	4 50	5 00	6 00	7 00

COTTON WASTE TREND REFLECTS FIRM MARKET

Montreal.

Quotations on cotton wastes remain the same and appear to be very firm. The demand is not heavy though the sales up to date for 1922 are reported to be about 25 per cent. greater than they were for the corresponding period of 1921. Quotations are as follows:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½

Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

QUOTATIONS ON SCRAP MATERIALS UNCHANGED

Montreal.

There have been no changes in prices announced this week in the waste material markets. There is a fairly firm demand for non-ferrous metals and scrap copper is on a par with last week. Average dealer quotations are as follows:

WASTE MATERIALS—		
Automobile tires		0 50
Rubber shoes		0 02½
Yellow brass	0 05 to	0 06
Red brass		0 08¾
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04½
Lead, tea		3 00
Light copper	0 08½ to	0 09
Heavy copper		0 11
Wrought iron R. rd., No. 1, per gr. ton		10 00
Malleable scrap (ton)	9 00	10 00
Pipe scrap (ton)		7 00
Heavy melting steel	9 50 to	10 00
No. 2 busheling		3 00
Boiler plate	8 00	9 00
No. 1 machinery cast	20 00 to	21 00

QUIET CONDITION EVIDENT IN INGOT METALS

Montreal.

Ingot metals are reported quiet. The holiday season is affecting business, and there is a little quietness that is not unusual at this time of the year. The railway strike is causing a feeling of hesitation, that will be more pronounced if the strike should spread to the other branches of the trades.

TIN.—The market remains very quiet with changes in prices entirely nominal, and the demand is very easy. The market is also overshadowed by the railway strike. Local quotation 35½c.

COPPER.—Local consumption is quiet, and there is so much scrap copper available the demand for new copper is very limited. Events in Germany are being watched very closely, as this is the chief market for American export. Electro is quoted at 17¾c.; castings at 17½c.

LEAD.—Is somewhat easier in tone, and the buyers are not so anxious to cover their requirements. The London market is somewhat firmer where the supply of spot metal is still limited. The local market is steady. Local price 6¾c.

SPELTER.—Is the firmest metal on the list this week, and producers are not selling at to-day's prices. The local demand is steady. Local market price is 8c.

ANTIMONY.—This metal is easier in New York, owing to supplies being heavier from China.The local prices are 7½c. for high grade English and 6½c. for Chinese.

ALUMINUM.—There is no change at all in this metal. The demand is very dull, and the local price is 24c.

Toronto Markets

TORONTO, July 6.—Bar iron and steel, gasoline, kerosene, lead traps and bends, lead pipe and waste, comprise the budget of hardware price advances this week. The reductions include certain makes of mop sticks and mop cloths, while a downward revision in the list on M.R.M. and Peerless horse shoe nails brings quotations on No's 5 to 9 inclusive to $4.50 per box of 25 lbs. The advance on bar products reflects the upward trend of steel production costs, but the rise of fifteen cents per cwt. is not yet general on the local market, other distributors maintaining the previous base level of $3.00. Increases in gasoline of one and a half cents per gallon are attributed to the rising price of crude oil, while coal oil grades are similarly higher by one cent. List prices on lead pipe and waste appear with an increase of one cent per lb., and through a revision in the discount traps and bends are also higher in price. Booking levels have also been announced for next season on Clarke's heaters.

BAR PRODUCT PRICES ADVANCE FIFTEEN CENTS

Toronto.

Advanced prices of fifteen cents per 100 lbs. are announced in certain quarters on bar iron and bar steel, this upward trend having been outlined in last week's report contained in Hardware and Metal. The change in this direction, however, has not been uniformly adopted on the local market, and until the higher levels become general, therefore, a range is noted in the list quotations given below. This increase is attributed to the unsettled conditions in the steel industry in general and especially on southern primary markets where the coal strike situation is now being more keenly felt in production circles. Although the reduction in freight rates is expected to offset the upward tendency in costs to some extent, distributors state that this is not expected to be immediately reflected in lower prices. Ores, pig iron and similar basic materials are affected in the revised ruling on

transportation charges, and this movement may reflect in future quotations on bar products. At present, however, prevailing average prices follow:

IRON AND STEEL—

Mild steel bars, base	3 00	3 15
Mild steel bands 3-16 in. base	3 50	3 65
Bar iron, base	3 00	3 15
Angle iron, base	3 10	3 25
Horseshoe iron		3 75
Tire steel	3 25	3 35
Spring steel	7 00	— 8 00
Scroll shoe steel	3 00	3 15
Hoop steel		4 00
Norway iron		12 50
Toe caulk iron		4 00
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

BOOKING PRICES ON CLARKE'S FOOT HEATERS

Toronto.

Booking prices for next season have been announced on Clarke's foot heaters. The list quotations follow:

CLARKE'S HEATERS—

No. 5B, list, $3.75; No. 7C, list, $5.25; No. 7D, list, $5.75.

Brisk or charcoal, $1.30 per dozen. All less 25 per cent.

REVISION IN LIST ON HORSE SHOE NAILS

Toronto.

New list prices have been announced on M. R. M. and Peerless horse shoe nails, showing a reduction on No.'s 5 to 9 inclusive. The revised quotation is $4.50 per box of 25 lbs. The complete list appears in the current market quotation pages.

EASIER PRICES ON MOP STICKS AND CLOTHS

Toronto.

Some revisions in prices on mop sticks have been announced, the self-wringing mop complete now being quoted at $4.00 per doz., net, a reduction of fifteen cents; while No. 6 is now priced at $1.85, and No. 10 at the $2.00 level. Crank-wringing mops have been lowered to $6.75, while new quotations on cloths for self-wringing mops are as follows: No. 1, $1.95 per dozen; No. 2, $1.60; No. 1, special, $2.50 per dozen.

FIRM UNDERTONE IN SOIL PIPE AND FITTINGS

Toronto.

The increased demand for soil pipe and fittings which has been experienced during recent weeks has brought the condition of current stocks to a point where supplies are described as "none too ample." A firm undertone in this market is noted, which is attributed to the recent higher costs of certain raw materials, but while an upward revision has been established in eastern markets, no price change has been announced locally. The prevailing levels are described as steady, and are as follows:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

Increase in Gasoline and Kerosene Prices

Coal Oil Grades Advanced One Cent Per Gallon—Gasoline Price Moves Up Another 1½ Cents, Due to Rising Costs of Crude Oil—Seasonal Consumption of Gasoline Reaching Record Volume—Call for Fuel Oil Also Increasing

ANOTHER increase of one and a half cents per gallon has been announced in gasoline prices, this advance being attributed to the rising costs of crude oil in production fields. This change brings the current domestic quotation to 35½ cents, thus reflecting a total increase of three cents since the large seasonal demand for gasoline became evident. Consumption of this product, according to official reports, has been on a commensurate scale in keeping with the noticeable increase in the automobile industry, and is also a condition considered more or less usual during the summer months.

Coal oil prices also register a rise of one cent per gallon, Royalite now being 24 cents and Palacine grade 24 cents per gal. The very firm market in crude oil is described as the primary cause for these higher prices, and while fuel oil and other refined lubricating products are unchanged at present, quotations remain steady to firm all along the line. Domestic price advances on gasoline and kerosene were preceded by announcements of higher levels in the United States markets, a condition which followed the increased demand and higher prices for crude oil.

In discussing this situation with oil refiners, Hardware and Metal was informed that while the current demand for gasoline was consuming stocks at a rapid rate, this condition was not the primary cause of the latest price advance, the current change reflecting the higher costs of petroleum. Such prices were pointed to as governing quotations on the refined products generally, and the instance was cited when prices on gasoline declined last winter. The recession in crude oil at that time, resulted in a corresponding drop on gas and other lubricating products.

Recent reports from production fields indicate that while petroleum stocks are looked upon as normal for this season of the year, there is a very firm tone to the market due to the extended calls for fuel and refined oils. Large distributors also state that a number of the southern coal consumers have recently undertaken preparations to install oil-burning apparatus in preference to using coal owing to the attendant difficulties of the miners' strike. While fuel oil stocks are considered ample, therefore, this condition tends to speed up the demand. Some speculation is also evident regarding the probable effect of an extended railroad strike on the call for gasoline. It has been pointed out that should American rail transportation be restricted to any degree, such a development would most likely result in a large increase in the movement of freight over highways, with an accompanying increase in the consumption of gasoline. This situation would be reflected on domestic centres to some extent as supplies were primarily secured from oil fields in Mexico and the southern States.

The consumption of lubricating oils appears to be gaining in volume. Coal oil requirements are considered as moderate, with fuel oil firm and gasoline experiencing a brisk seasonal movement.

LEAD PIPE, TRAPS AND BENDS HIGHER IN PRICE

Toronto.

Reflecting the firmness in the market of lead products generally is the current advance of one cent per lb. in the list prices on lead pipe and waste. Through a revision in the discount, a similar upward price change has been made effective on lead traps and bends, the new level being fifteen off, compared with the previous discount of 17½ per cent. Other products in this class generally remain unchanged, although it is noted that certain jobbing houses have also increased solder prices one to one and a half cents per lb. all through the list. This development, however, has not been generally recorded on the local markets. The prevailing demand for these goods is described as good, and seasonal activity prevails at the following average quotations:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb.	0 09
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

IMPROVED TRADING NOTED IN COMPRESSION GOODS

Toronto

Current trading in compression goods is stated to be somewhat upon an improved scale and while certain distributors describe the present situation as just fair, others report the volume of trade in these products to be up to expectations. Little variation in price levels has been recorded during recent weeks, quotations remaining practically steady at the last revisions. Virgin metals showed a distinct firming up a few weeks ago owing to increased interest, but it is noted that a re-action in this respect has now been recorded. These

movements, however, are stated as being of a minor character as far as the finished products are concerned, manufacturers buying in large quantities and a certain period in advance. Prevailing discounts follow:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25-10%

Webber gate valves	33%

BASIN COCKS:—

No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

LULL IN DEMAND FOR TIN PLATES

Toronto.

While the tin plate markets are reported quite steady at the recent new price levels, the demand for these products is described as experiencing a lull, as it is considered that most large consumers are comfortably taken care of for the time being. Many buyers of tin plate are stated to have anticipated their requirements in this direction, chiefly on account of the coal strike, and the fear of delayed deliveries. On the other hand, it is pointed out that there is usually a lull at this season of the year. Competition from the Welsh tin plate mills is becoming a more important factor in this market, and in this connection it is noted that quotations are now considerably easier than the levels which prevailed during the Spring. Average local prices follow:

PLATES, CANADA—	
Ordinary, 52 sheets	4 75
Do. 60 sheets	4 85
Blued and oiled, boxes, 52's	5 00
Do., Do., 60's	5 10
PLATES, COKE TIN—

IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	11 50

BRISK SEASONAL CALL FOR TROUGH AND PIPE

Toronto.

Eavestrough, conductor pipe and conductor elbows are recorded among products experiencing a brisk seasonal demand, with prices on these lines now very firm. As is the present case in practically all steel products, the tendency is towards higher quotations in view of the strength apparent in all sections of the steel industry. Coupled with the volume of trade now recorded, the viewpoint has been expressed in some quarters that advance in price on eavestrough and piping in the near future would not occasion much surprise. Up to the present, however, no uniform changes in prices have been announced, although certain distributors are slightly revising their prices upward to take care of the sales tax. Average price levels prevail as follows:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

	Per 100 ft.
8 in.	$ 15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 80
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

CONDUCTOR ELBOWS—

Plain round or round corrugated:

2 inch, list	$ 5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

DEMAND FOR SHEETS MAINTAINED IN VOLUME

Toronto.

The current demand for both black and galvanized sheets is reported as keeping up very well, and compares favorably with the movement established during recent weeks. Black sheets have now generally firmed up at the $5.00 base price, and while some rumors of $4.80 are heard as regards large commitments, the higher level is generally quoted. Just what effect the reductions in freight rates on basic materials will have on the semi-finished steel product prices is difficult to determine, but as the revision in transportation charges is considered of minor extent, the reflection of such a change on individual lines will naturally be of a limited nature. Further efforts to end the coal strike in the south have been made in recent days, but apparently without immediate results. It is stated that a number of American blast furnaces may be forced to go out unless coal conditions are materially changed soon. This situation has created an improved domestic demand for English galvanized sheet products.

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10

Steel Product Prices Reflects Rising Costs

Upward Tendency in Quotations on Finished Steel Goods Shows no Sign of Abatement—Producers Claim that Production Costs Continue to Rise—Reflection of Coal Strike Situation.

As a result of the rising costs of steel production, asking prices on finished steel products are more or less steadily advancing as the season progresses. An instance of this tendency is the strength noted in wire products, with quotations on wire rods having been advanced by certain producers in the south. The market in nails and wire goods generally, however, is described as very firm, with the leading interests being somewhat later than usual in formally opening its books for the third period, probably due to the fact that deliveries of second quarter orders were in arrears. Owing to the coal strike, production of these lines has been somewhat restricted, more attention having been paid to heavy goods. This has given the market an appearance of exceptional snap.

Wrought iron piping is also in a firm position and while the recent downward revision in domestic freight rates on certain basic materials may tend to offset contemplated price advances, yet the general situation reflects the growing strength of manufactured steel goods.

While the summer months are usually quiet periods in the steel industry, it is a noticeable fact this year the mills report to be comfortably filled with business for July and August, and as far as their order books are concerned, should be able to maintain the current ratio of production without the incentive of additional sales of consequence. As far as the selling market is concerned, however, consumption may show a recession but replenishment of stocks continues to be a prominent factor, therefore, new business in iron and steel is less impressive. There is much pressure upon mills by steel buyers for better deliveries and this pressure seems to have increased somewhat up to date but it looks as if buyers simply want to be on the safe side, fearing a curtailment in production later on account of the coal strike.

With regard to the coal strike, it is noticeable that production of steel continues at a larger ratio than when the strike was first commenced on April 1. This is a significant fact and indicates the preparations that had been made in certain districts in anticipation of such an event.

While prevailing production, however, is almost stationary the trend is upwards rather than downwards, a very significant thing, seeing that the coal strike has now lasted for over three months and the steel industry can still function.

Signs of uneasiness have recently been noted among steel manufacturers as regards their ability to continue operating and complete their orders, even though they are on the whole, pretty well booked up for the next couple of months or more. In addition, however, there is a reflection of the American railroad shopmen strike, and the probable results of continued developments in this direction are now receiving consideration in certain producing circles.

16 gauge	4 15
BLACK SHEETS—	
18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6 35
22 gauge	6 05	5 90

16	5 25
12 and 14	5 10

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

AUTO ACCESSORY TRADE NOW IN BRISK VOLUME

Toronto.

The demand for touring accessories is at its height at the present time and sales are reported satisfactory. Tires are moving very well, and luggage carriers, tire carriers and camping outfits are also big sellers.

SCRAP MATERIALS DULL BUT PRICES UNCHANGED

Toronto.

The scrap metal market is still depressed. Consumers are refusing to purchase, apparently anticipating lower prices, and dealers are holding on to their stocks, hoping that the brisk trade of two or three weeks ago will return and enable them to get from under on recent purchases. Quotations are principally unchanged, but this is owing to the fact that dealers are refusing to make any concessions on their present holdings. Following are the usual averages of local dealers current buying prices for fairly large quantities:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	14 00	15 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 50
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 25
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

CORDAGE MARKET SHOWS MORE OPTIMISTIC TONE

Toronto.

Current trade in rope and cordage is described as fairly good, with a moderate volume of business reported by manufacturers and distributors. Primary conditions in this market remain the same, with the development of a more optimistic tone noted during recent weeks. Hay fork rope is not yet in demand, but requirements are expected during the ensuing season in fair quantities. Early bookings of binder twine are stated to be satisfactory for this season of the year. There has been no revision in quotations announced, the prevailing prices being included in the current market quotation pages.

INGOT METAL TONE AGAIN MARKING TIME

Toronto.

A waiting attitude is recorded in the ingot markets, many dealers and consumers apparently not being disposed to act until virgin metals become more settled. Prices are practically steady, however, although in some cases, such as tin and spelter, producers are asking slightly higher levels on primary centres. Domestic quotations are unchanged, with the movement described as dull, all trading at present lacking animation. The holiday spirit, especially in the American market, also offsets current interest to some extent.

COPPER—The copper market shows a slightly better outlook this week, owing to a little improvement in the call for export from primary centres. There is very little animation among domestic consumers, however, but prices are at the level of 17 cents.

TIN—There is very little business being reported in tin, but this is reflecting the general dullness in practically all centres. English prices are higher and U. S. quotations were also slightly advanced in accordance with outside levels, but local prices continue unchanged at 34 to 34½ cents.

LEAD—The general character of the lead situation remains unchanged, with little activity being noted. Consumption is apparently proceeding in fairly good volume, but there has been a decided lull in the amount of new business. Buyers at present are not disposed to contract freely ahead. Domestic quotations remain at $7.00.

SPELTER—This market is reported firmer with a fair amount of demand in evidence at primary centres. Certain producers are quoting sparely due to the threat of a strike on the part of some of their employees for higher wages. This has served to stiffen the U. S. situation, and more consuming activity is being looked for. Local prices continue steady at $7.25.

ANTIMONY—This market is quiet but steady. There is very little trading recorded, and local price levels remain at 6½ to 7 cents.

ALUMINUM—There is very little to be stated regarding aluminum, the market remaining quiet, with several reports describing the present conditions as dull. Domestic quotations are still around 20 to 21 cents.

London Markets

LONDON, July 6.—Linseed oil and turpentine continue to supply premier price changes on the current hardware markets. Other revisions are also generally toward higher levels. Business throughout this district continues good, with the warmer weather reviving the sale of seasonal goods such as screen wire cloth, electric fans, refrigerators, and other summer lines.

REVISED PRICE LEVELS ON MOP STICKS

London, Ont.

New lower prices are now in effect on mop sticks. Following are the revised local quotations on these products:

MOPS—

No. 6 Best $1.85 doz.; No. 10, Crescent, $2.10 doz.; No. 11, Janitor, $5.25 doz. Self Wringing, $4.00 doz; B Crank Wringin, $7.50 doz.; Cloths for Self Wringer Mop $2.10 doz.

ANOTHER FIVE CENT ADVANCE IN LINSEED

London, Ont.

Linseed oil recorded a further increase of five cents per gallon this week thus bringing the current level to $1.20 for raw. The current movement is described as good. The revised quotations follow:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

LOCAL TURPENTINE PRICE SOARS TEN CENTS HIGHER

London, Ont.

Since the new high level on turpentine recorded last season, a further increase of ten cents per gallon has been announced in some quarters. This change would bring the current level to $2.00 per Imperial gallon in one barrel lots, with five gallon quantities, fifteen cents per gallon higher. This is attributed to the sudden rise recently noted in southern producing centres, but the reflection is not generally expected to remain indefinitely as southern quotations reacted during the week from the higher levels.

NAILS CONTINUE IN SEASONAL MOVEMENT

London, Ont.

Nails, both cut and wire, continue to record a good seasonal movement, this activity being attributed to the increased demand in building circles. Prices continue locally at the following levels:

NAILS—	
Wire, base	3 65
Cut, base	4 35

ORDERS FOR ROPE AND CORDAGE IMPROVING

London, Ont.

The rope season is now commencing

in earnest and orders for rope and cordage are reported good at present. Quotations continue unchanged at the following levels:

ROPE—	lb. base
Pure Manilla	23c.
Beaver Manilla	20c.
New Zealand Hemp	20c.
Sisal	18c.

SEASONABLE BUSINESS IN WINDOW GLASS

London, Ont.

A good seasonal sorting business is reported for window glass, and while some degree of unsettlement as regards prices has been recorded on other market centres, the local quotations continue unchanged at the following levels:

WINDOW GLASS—

Single Diamond, net list.
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

FIELD HOES AND HAY FORKS NOW POPULAR

London, Ont.

Harvest tools now record a brisk sale, and activity in these products is generally reported. Field hoes, hay forks and similar products are experiencing seasonal demand. Quotations remain unchanged at list less sixty per cent.

GOOD SALE FOR SCREEN WIRE CLOTH CONTINUES

London, Ont.

Screen wire cloth continues to experience a brisk seasonal call, current sales of this product registering a satisfactory volume. Quotations remain steady at the following levels:

SCREEN WIRE CLOTH—

Painted Black $3.00 per 100 sq. feet.
Galvanized. $3.60 per 100 sq. ft.
Bronze $10.00 per 100 sq. ft.

REFRIGERATORS MOVING IN SEASONAL VOLUME

London Ont.

Recent reports from both wholesalers and merchants indicate that refrigerators are now selling well. No further variation has been announced in quotations, the following levels prevailing on the Sanderson-Harold make:

Household, list less 40 per cent.
Tradesmens, list less 35 per cent.

INCREASE APPEARS IN PAINT PRODUCT PRICES

London, Ont.

Various increases of between five and ten cents per gallon have been announced this week in quotations on ready-mixed paints, varnishes, enamels, shingle stains and sundry paint lines such as dory, barn, and bridge paints. Flat wall colors and similar lines are increased ten cents, while the five cent advance is effective only on certain products which previously sold below the net level of $3.00 per gallon. Higher production costs on such elements as pig lead, linseed oil. and chemicals from which dry colors are made, have been credited as the primary causes for the rise in paint prices.

LIGHT SALE RECORDED FOR ELECTRIC FANS

London, Ont.

On account of the cool weather recently experienced, the call for electric fans has been somewhat light. The following are current prices on these products:

Polar Cub, 6 ins., ...$5.75 each.
Polar Cub, 8 ins., ...$8.00 each.

BRISK CALL EVIDENT FOR PARIS GREEN

London, Ont

Paris green is enjoying a brisk sale at present, in common with insecticides in general. Following are current average price levels, although some quotations two cents in advance of these were reported in markets where a scarcity of these products existed:

PARIS GREEN—

½-lb. pkgs., 40c. lb.; 1 lb. pkgs., 38c.; 25 lb. drums, 36c.; 50 lb. drums, 34c; 100 lbs. 34c; 250 lb kegs, 32½; 600 lb bbls., 32c, lb.

HIGHER PRICES IN EFFECT ON WHITE LEAD

London, Ont.

An increase of 25 cents per 100 lbs. has been announced in prices on white lead in oil. This places the new local level at $13.55 per 100 lbs. in ton lots for pure and $13.90 for less than ton lots. Elephant white lead in oil, is now quoted at $14.05 and $14.40 per cwt., in ton lots and less quantities respectively.

SEASONAL TRADE IN FLASHLIGHTS AND BATTERIES

London, Ont.

A good summer holiday trade is now recorded for flashlights and batteries. Quotations on the Ever-Ready Daylo line remain at list less 33 1/3 per cent.

LAWN HOSE REGISTERS FAIR SALES VOLUME

London, Ont.

A fair volume of sales is reported for rubber lawn hose, these products experiencing a seasonal movement during the past few weeks. Unchanged prices follow:

RUBBER HOSE—

3 ply—½ in. 9½c per ft.; ⅝ in. 11 cents per ft.; ¾ in. 13 cents per ft.
4 ply—½ in. 10½c.; ⅝ in. 12c ft.; ¾ in. 14c per ft.
5 ply—½ in. 12c per ft.; ⅝ in. 13½c per foot.; ¾ in. 15½c per ft.
Corrugated—½ in. 13¼c ft.; ⅝ in. 15¼c per ft.; ¾ in. 18c per ft.
Less 5 per cent. for 500 ft. reels.

Winnipeg Markets

WINNIPEG, July 6.—Crop conditions are very satisfactory and business is reported fair by both wholesalers and retailers. Merchants, however, continue to buy in small quantities in order to meet their necessary requirements until the present crop is assured. The feature of the market has been the advance of linseed oil and turpentine. The demand for barbed wire and screen cloth has been good and manufacturers are running their plants to full capacity in order to fill contracts which have been placed by wholesalers. Bolt and nut prices have been revised and show an advance of practically ten per cent. Paris green is in limited supply and has advanced six cents per pound.

TURPENTINE IN STRONG POSITION: PRICES FIRM

Winnipeg.

Locally turpentine prices are regarded as very strong, and while quotations remain at the recent advanced level of $1.65 per Imperial gallon in one barrel lots, it is felt in some quarters that owing to the higher costs in southern producing centres coupled with the scarcity of this product on domestic markets, the possibility of further advances should not be overlooked.

QUOTATIONS ON NUTS SHOW AN ADVANCE

Winnipeg.

Higher prices are announced on square and hexagon nuts. There has been an advance of 25 cents on list.

RIVETS AND BURRS SHOW AN INCREASE

Winnipeg.

Iron rivets and burrs record an advance in price of approximately ten per cent. The new discount on these products is list forty per cent. This advance is caused by the firmer tone shown on all steel products. Copper rivets however remain unchanged.

PARIS GREEN ADVANCES AS STOCKS ARE LIMITED

Winnipeg.

Stocks of paris green are getting into small compass and prices have been advanced six cents all through the list. Dealers report a brisk demand with stocks at a low ebb and new supplies difficult to obtain. The following quotations govern the local market:

PARIS GREEN—	
½-lb. per lb.	44½
1 lb. per lb.	42½
25 lb. drums, per lb.	40½

COLD BLAST LANTERN PRICES NOW REDUCED

Winnipeg.

There has been a reduction on cold blast lanterns. Number two Japanned is ten dollars and fifty-eight cents with the same size plain at ten dollars and seven cents.

LOWER PRICES ON SHOVELS AND SPADES

Winnipeg.

There has been a decline in quotations on shovels and spades. Square and round point which were selling at $14.75 are now quoted at $12.25.

BOLT AND NUT PRICES REVISED UPWARD

Winnipeg.

Some price advances on bolts and nuts have been announced. Carriage ⅜-inch and smaller up to 6 inches are quoted at 27½ per cent. and 5 per cent.—over 6 inch and larger 20 per cent. Machine bolts the small sizes up to 4 inches are quoted at 42½ per cent and larger sizes at 25 per cent. Machine set screws are 50 per cent. off the list, plough bolts 17½ per cent., stove bolts 70 per cent., shaft bolts 10 per cent. tire bolts 45 per cent. and sleigh shoe bolts 10 per cent.

LINSEED OIL PRICES ADVANCE FIVE CENTS

Winnipeg.

There has been an advance of five cents per gallon on linseed oil. Boiled linseed oil is quoted at $1.28 per gallon with raw at $1.25.

HEAVY DEMAND NOTED FOR BARBED WIRE

Winnipeg.

There has been a heavy demand for barbed wire, and stocks at the head of the lakes are practically exhausted. Eastern manufacturers are running their plants at full capacity so as to be able to meet the increased call for these products.

SCREEN WIRE CLOTH IS REPORTED SCARCE

Winnipeg.

Owing to the shortage of screen cloth which occurred during the season 1921, Eastern manufacturers are running their plants to full capacity in order to take care of contracts which have been placed by the wholesaler. With the increased demand manufacturers are turning out their orders in a large measure very promptly.

Hamilton Markets

HAMILTON, July 6.—The many recent price revisions that have been announced in the hardware markets constitute a most interesting phase of history, while the complexity of such movements also attracts the close attention of keen students in the trade. Hardware prices continue to change more or less rapidly, and although many merchants evidently believe that quotations have settled down to a more even stride when compared with the fluctuations recorded during the past two years, there are signs that many future changes are in store before an even keel will again be established in the hardware industry.

Reports from manufacturing circles indicate that the trade have been buying much more freely during the past two or three months, and the outlook for Fall business is exceedingly good. A manufacturer of tools who complained six months ago about business being exceedingly quiet, now states that the factory is running full time and the company is about one month behind with orders.

A large manufacturer of washing machines, wringers, etc., states that the plant is now busy and there has been a most decided improvement during the past few months. The outlook for Fall is exceedingly good and orders are coming in much more freely than formerly. Stocks in both the wholesalers' and retailers' hands are still light and any pronounced buying movement is quickly noted, and is reflected in manufacturing circles.

In the steel industry the enforced use of high-priced coal due to the coal strike has caused a strengthening of prices. Some uncertainty is now hovering over the market in Canada until the effect of proposed reductions in freight rates on ore, pig iron, billets, blooms, wire rods and scrap iron is known. This suggested reduction amounts to 16.66 per cent. west of the Great Lakes and 20 per cent. east of the lakes. For a long time freight rates have been pointed to as the one barrier to lower iron and steel prices so the effect of any such reductions on hardware line would be watched with interest.

The steel market still controls the prices of a large percentage of hardware lines and due to the unusual demands on the mills, the coal strike and slowness of production, it is not believed than any dull period will be experienced in any of the hardware items which are fabricated from steel and iron. The demand for these lines has been heavy, and considering the large structural and railroad orders which have been placed with the mills, the smaller items have not been obtained in as large quantities as the trade desired.

The output of pig iron and finished steel products have both been affected. The possible results from the U. S. railroad strike are also having some effect, making steel mills and other manufacturing plants more careful in selling ahead, for fear there may be further restrictions in output. Costs of making pig iron and steel have gone up.

A continued steady improvement in hardware, both city and country, is the substance of opinion expressed by the trade this week. It is becoming the general view that the lowest point in the hardware trade has been safely passed and that with stocks at normal for the time, experiences learned in the last a firm footing for the future. It is worthy of notice that the percentage of hardware firms forced to the wall in this province, has probably been lower than in any other line of trade.

Pittsburg Markets

PITTSBURG, July 6.—The turnover in the steel market, in point of tonnage, has decreased farther in the past week, there having been indeed a more or less steady decrease for several weeks, the most active market having been in April. While the tonnage turnover is relatively light it would hardly be entirely accurate to describe the market as "quiet" for the reason that there is considerable pressure for early deliveries. The tonnage thus bought is not large, but the market is kept from appearing actually dull.

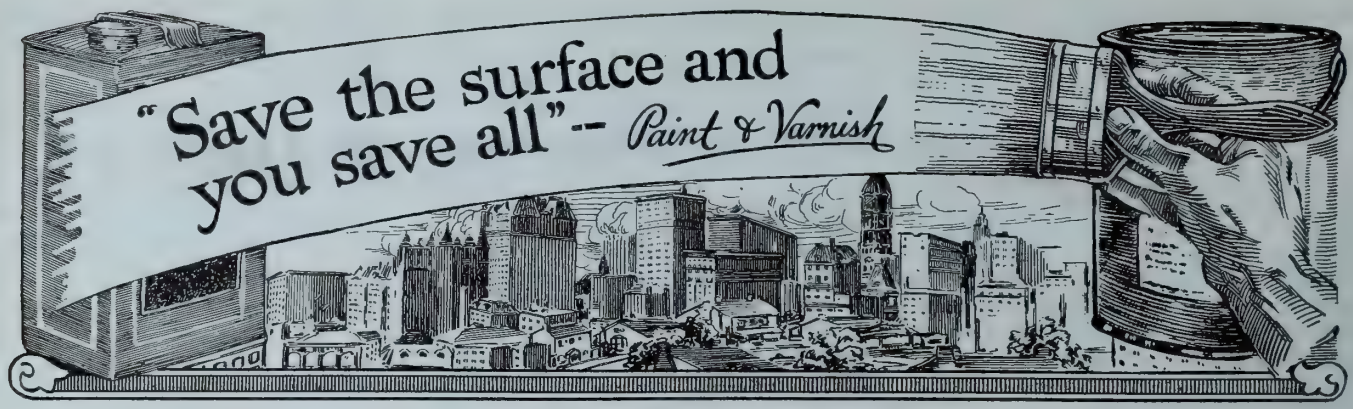
The mills say that the lighter turnover at present is due to their indisposition to sell, and assert that they could dispose of large tonnages if they were willing to accept the business offered them by customers. This, however, would be chiefly in the form of contracts for delivery late in the year, and the mills are no doubt just as well off without such business, as the buyers would specify freely if the market should prove strong late in the year, and otherwise would be indisposed to specify.

July and August are almost invariably very dull months in the steel market and this year will furnish no exception, as the stage has practically been reached already. This does not make the market any less strong, for the mills are well sold up through the two months, and in some lines, particularly in merchant bars, they are sold for a longer time. Whether all buyers are covered to an equal extent is a question, the present buying for prompt delivery indicating that they are not.

Now that the usual midsummer period is entered upon, the question is how the market will shape itself up afterwards, say in September, when regular buying for the early Autumn should begin.

This question does not hinge to as great an extent as usual upon the prospects for consumption, relative to present consumption, for the reason that it is fairly well established that consumption is likely to continue increasing, at least for a time. Apart from the regular consumption of manufacturing consumers, there are freight cars and structural steel jobs, contracts for which have been made while most of the steel involved is still to be consumed. In the first half of the year about 92,000 freight cars were ordered, while only a small fraction of the number have actually been made.

The more important question hinges upon the relation between production and consumption in the past three or four months. It might be that buyers had gone too far, buying more steel than currently needed, but laying in stocks in fear of the coal strike making trouble. If consumption of late has been much under production, then a good sized increase in consumption might still make a tonnage less than the current production, which accordingly could not be maintained indefinitely.



Why Paint is Needed to "Save the Surface"

A House Is As Pretty As the Paint and Varnish That Are On It But Enduring Strength of Bridges Is the Strength of Paint That Covers the Steel—Two Kinds of Oxidation—Lower Repair Cost Vouches for Value of Paint—Some Good Pointers to Use on Prospects

THE FAME of "Save the Surface" is spreading. News of its importance, its accomplishments and what it stands for, is being transmitted by radio-telephony. In a recent address on this subject, broadcasted over the radio, L. C. Stuckrath, Chairman of the Pittsburgh Save the Surface Committee, outlines a number of interesting points concerning this campaign. The points brought out in his talk to prospective paint users might well be copied by the hardware merchant in his sales effort in the various communities throughout Canada. Excerpts could be used in advertising or in personal talks with prospects. Following is the address:

"I wonder how many people ever give thought to the real purpose of paint and varnish. Our first impressions of paint and varnish are as ornamental materials but, much more than that, they are indispensable agents to prevent decay and loss, and to lengthen life.

"It is true that paint and varnish are beauty remedies—the chrysalis of the butterfly is representative of the transformation wrought by a coat of paint or varnish, and the transition from the horrid to the beautiful is no less pronounced. However, paint and varnish are not alone beauty remedies. A very important, if not the most important function is to protect, preserve and restore property values, and it is this economic side of paint that is not always so readily observed and appreciated as the decorative.

Only as Strong as the Paint

"Certainly the house you live in is as pretty as the paint and varnish that are in it, but the enduring strength of the bridges that span our rivers depends alone on the strength of the paint that covers the steel. The life and beauty of structures would be short if these two wonder products—paint and varnish—did not exist. It is said that 'self preservation is the first law of nature.' Self is dual. Yourself consists of your physical body first and your property and possessions second. Paint and varnish as preservers of property therefore embrace the primitive or first law of man or animal law of self preservation.

"Few people stop to think that the natural enemies of property are sun, rain, snow, wind, sleet and cold. These elements are constantly and perpetually working, night and day, attacking property. This constant deterioration is caused by oxidation, of which there are two kinds, quick oxidation and slow oxidation.

"Quick oxidation is fire—fire which occurs occasionally. While in 1920 fire caused the tremendous loss to the American people of $350,000,000, it is estimated by the government that the loss due to deterioration exceeded a $1,000,000,000 yet the public paid fire insurance premiums to the amount of $451,000,000 for insurance protection.

Compare Fire and Deterioration

"Statistics show that only one out of every two hundred buildings insured burn, while two hundred out of every two hundred buildings are subject to constant deterioration. Slow oxidation caused by the elements is the reason why paint and varnish are needed to protect property. Nature protects its own by giving trees a bark. When trees are cut into lumber, they need protection.

"A striking example of deterioration was the steamship 'Leviathan,' formerly known as the 'Vaterland,' which stood at its dock in the Hudson River, unpainted and neglected for a short period of seven years, and as a result it required several hundred thousands of dollars to put her again into condition. Contrasted with this is the oldest ship afloat, the British convict ship 'Success,' which has been protected for 131 years by frequent re-painting. Another example is shown by the Government light ships along the Atlantic coast. These ships are anchored at points where it is not practical to build lighthouses. These lightships never weigh anchor to go into port, except for repairs and to be repainted. All fuel, food and supplies are brought to them.

"Engineers and men in charge of large industrial projects, builders of bridges and railroads, of steamships and public buildings have long realized that if the structures they design and build and have in their care are to withstand the destructive agencies of wind and weather, and the elements, they must be given surface protection, and surface protection means but one thing—paint and varnish.

Lower Repair Cost

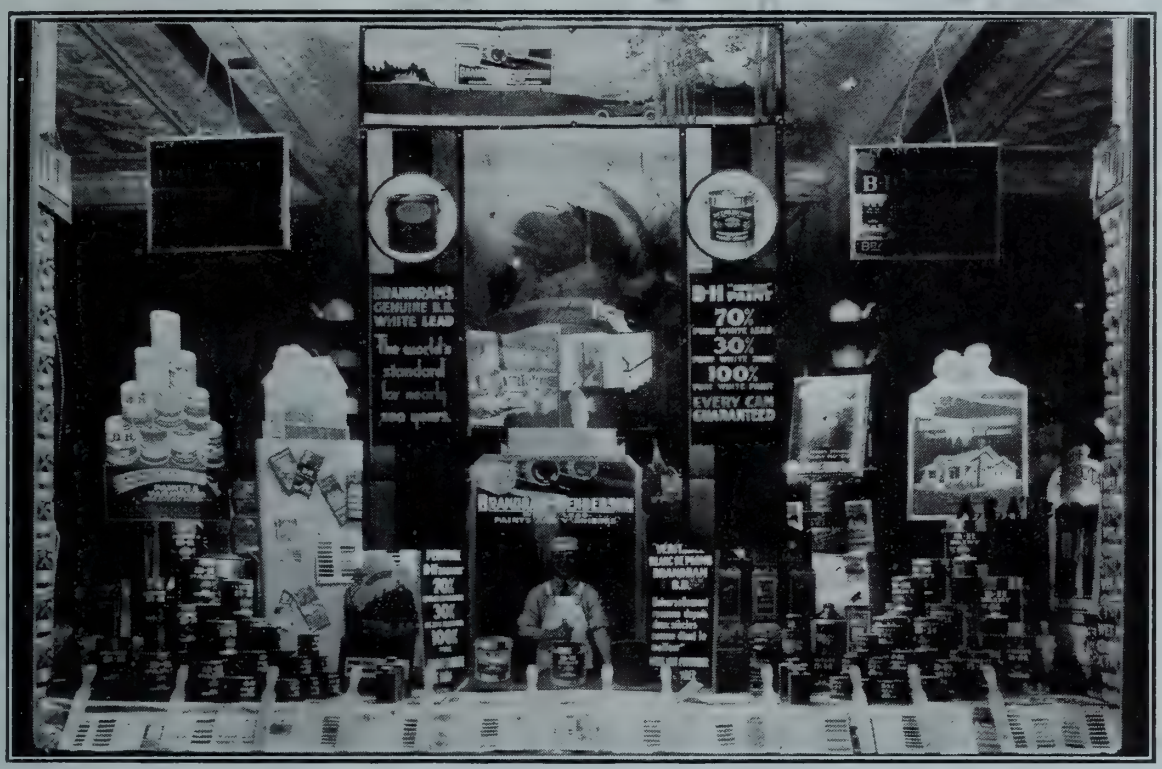
"To fill this need, paint technologists and chemists have perfected definite specifications for paints and varnishes to meet every requirement for use on wood, steel and concrete. They are constantly experimenting with materials and methods to make their protective elements better and more durable, and there is not a great industry today that does not give very careful consideration to the kind of paints and varnishes that are used.

"They know that the systematic use of paint and varnish means lower repair costs, less depreciation in property value and greater safety.

"It is logical to assume that these conclusions so generally accepted by large users, can also be applied to the retail sale of paint to home owners and individual buyers.

"Nothing adds so much to the appearance of a building as a coat of paint and every dollar spent for paint saves many

Emphasize "Save The Surface" in Paint Displays



An attractive arrangement of paint and varnish is seen in this display by A. R. A'Bear, hardware merchant of Montreal. Note how the pyramids are built up at each end and the centre reserved for literature dealing with the importance of using paint to "Save the Surface." Paint cards and paddles are arranged in the foreground where they carry a direct appeal to the onlooker.

more dollars of value in the increased worth of the building painted. It is an evidence of thrift and pride and you help make your city more attractive. Painting is easily done by practical workmen without much inconvenience and is probably the cheapest and best investment of the Home Owner."

WHITE LEAD REGULATION A PROVINCIAL MATTER

Ottawa, Ont.—The draft conventions with which an Order-in-Council just issued by the government deals, include one in regard to the use of white lead in paint. This is as a result of the Geneva Labor Conference under the League of Nations, at which the question of abolishing white lead in paint due to alleged danger of lead poisoning to painters, was considered. The draft convention on this point is interpreted as being directed at regulation rather than prohibition and is therefore stated to be within provincial jurisdiction.

LIGHTS WHICH VEHICLES MUST CARRY AFTER DARK

Vehicles of all sorts using the city streets of Toronto after sundown will require to carry lights, in conformity with a by-law passed by the City Council last January. The enforcement of the law has been entrusted to the Police Commissioners, and police orders have been issued to the following effect:

All horse-drawn vehicles will carry a white light in front and a red light in rear, on the left-hand side.

Cyclists will be required to carry a white light in front, and a light or red disc, 1¾ inches in diameter, in the rear, so that it may be seen by any vehicle approaching from behind.

Motorists, as usual, will require to carry three lights, two in front and one in rear.

It is not the intention to make the observance of the law onerous at first. Some time probably will be given for educating the public, and police officers, no doubt, will be told to use discretion in enforcing the by-law.

Creed of "Save The Surface" Salesmen

The U. S. National Association of Save the Surface Salesmen was represented at the Buffalo Sales Managers Conference by Mr. Maston, the acting president, who spoke on the subject of "The Place of the Salesman in 1923."

The Creed of the Save the Surface Salesman, which is printed on the back of the membership card sent each member of the National Salesmen's Association, is as follows:

I believe in the goods I am selling, in the firm I am working for, and my ability to get results.

I believe that honest goods can be sold to honest men by honest methods.

I believe in working, not waiting; in laughing, not weeping; in boosting, not knocking, and in the pleasure of selling goods.

I believe that a man gets what he goes after; that one order to-day is worth two orders to-morrow, and that no man is down and out until he has lost faith in himself.

I believe in to-day and the work I am doing, in to-morrow and the work I hope to do, and in the sure reward the future holds.

I believe in courtesy, in kindness, in generosity, in good cheer, in friendship and in honest competition.

I believe there is an order somewhere for every man with the courage to go and get it.

I believe I have that courage—right now.

Weekly Paint Markets

Montreal

MONTREAL, July 6.—The advances announced in ready-mixed paint and varnish prices, overshadow other developments in the paint markets this week. A ten cent per gallon increase is now in effect on all house paints, porch, marine, flat oil paints, and enamels. Barn, dory and roof paints, also shingle stains are advanced five cents per gallon, while varnishes, varnish stains and enamels selling above the $3.00 level are increased by ten cents per gallon, and those lines in this class previously selling below the $3.00 level are only higher by five cents.

This upward movement is attributed by paint manufacturers to the recent higher costs of such raw products as pig lead and linseed oil, and they also state that various chemicals from which dry colors are made have also recently attained higher price levels. The addition of the sales tax revisions has been a factor in reaching the decision to conform with rising production costs. White lead in oil has registered an increase of 25 cents per 100 lbs., while the booking date has been extended to Sept. 15.

Turpentine has receded considerably from the high-water mark recorded last week, and both primary and domestic quotations show a marked decline. This is attributed to the refusal of consumers to purchase at the record levels, while offerings also became of much larger volume, no doubt attracted by the high prices. This situation bears out the prediction that tanked turpentine is not quite so scarce at the south as recent market conditions indicated, and fresh supplies are now somewhat in excess of shipments. Locally, a range is still evident in the different quotations reported by various distributors.

There has been no change in linseed oil prices this week, flax seed being described as fairly strong owing to the limited supply available, while the new crop will not become a market factor until another three months.

HIGHER QUOTATIONS ON PAINTS AND VARNISHES

Montreal.

All house paints of all qualities; porch paints, marine paints, flat oil paints, floor paints and enamels and all other liquid oil paints are advanced 10c per gal.

Barn paints, dory paints, roof paints and shingle paints are advanced 5c per gal.

All varnishes, varnish paints and enamels selling above $3.00 per gal. net are advanced 10c per gal. Those selling below $3.00 per gal. net are advanced 5c per gal.

This apparently is a sympathetic movement on the part of the paint industry in keeping with the general upward trend of the raw material markets, and is a measure of protection.

Pig lead and linseed oil are both up over what they cost a year ago, and other classes of raw materials are higher to-day than they have been for a long time. Chemicals from which dry colors are made have all advanced. The price of 'Blue' for instance, which is one of the basic colors in colored paints, has gone up 19c per pound, and similarly every other color employing lead salts, such as chromes, has advanced.

One manufacturer stated that the general situation has reached a point where it has become very difficult to maintain prices, and as a consequence prices have been advanced as indicated above. He also added that the manufacturers have been slow to take advantage of the stiffening in prices of the raw materials, and the present advances are only nominal.

WHITE LEAD IN OIL PRICE ALSO ADVANCED

Montreal.

Manufacturers of white lead have announced an increase in the price of this product of 25c and the booking date to September 15th. In justification of this they state that both pig lead and linseed oil are much higher in price than they were a year ago and there is little prospect of declines in the costs of these raw materials.

BRISK DEMAND RECORDED FOR WINDOW GLASS

Montreal.

Belgium prices are somewhat firmer, owing to some of the factories closing down for the summer. The local quotations remain unchanged, however, being quoted at 15% off the $6.00 list for ordinary business with a slightly lower quotation being given for quantities. Owing to the amount of building going on in the city there is a moderate demand, with country business being reported as only fair.

REACTION EVIDENT IN TURPENTINE QUOTATION

Montreal.

There has been a settling down of the turpentine market undoubtedly due to its sky-rockety advance when it rose 60c. in one week. Prices have receded from the peak of last week, and as one distributor stated "the price is about right now." There continues to be a distinct variation in prices among the distributors and turpentine can be secured as low as $1.55 per gal. Stocks, however, are comparatively low and the supply from the south is still scarce.

TURPENTINE—	Imp. Gal.
1 barrel lots	1 60 to 1 85
2 to 4 barrel lots, per gal.	1 59 to 1 84
Broken lots	1 70 to 1 95

LINSEED OIL PRICE LEVELS REMAIN FIRM

Montreal.

There has been no change this week in the price of linseed oil, but the undertone of the market is firmer. Flax seed is quite scarce ,and this year's crop will not come on the market until September. The demand continues to be quite strong, and it would not be surprising, therefore, if prices were to advance still further.

LINSEED OIL—		
1 to 2 barrel lots, per gal.	1 13	1 15
5 to 8 barrel lots, per gal.	1 11	1 13

Less barrels, add 10 cents per gallon.

Toronto

TORONTO, July 6—Effective July 4, an advance of ten cents per gallon has been announced by paint manufacturers on all ready-mixed paints, floor, marine, porch floor, inside floor, flat wall colors and other oil paints. All shingle stains are also increased five cents per gallon, while dory, barn, roof and bridge paints, record a similar upward change of five cents. All enamels, gloss paints, varnishes, varnish stains, and sundries such as wagon and buggy paints previously selling at $3.00 per gallon or over are increased ten cents, and those lines selling at less than the $3.00 levels are higher by five cents per gallon. In addition, pure and compound white lead registers an advance of 25 cents per 100 lbs.

These changes supply the premier developments in the current weekly paint markets, but the recession in turpentine prices is another feature of interest. A considerable range in quotations has appeared in the price levels given by the different local distributors, such a variation being attributed to the condition of available supplies. Offerings in southern producing centres became much more plentiful with the appearance of the recent high-water levels, holders of tanked turpentine no doubt being attracted by the season's record prices. Consumer's, however, placed commitments very sparingly with the natural

(Continued on page 58)

Make Your Paint Department Your Biggest Asset

"Muresco" is making a big hit with the housewife for a wall covering because it is so easy to apply that any amateur can get excellent results.

You can also recommend "Muresco" as an inexpensive and sanitary covering for walls and ceilings of schools and public buildings.

If you are well stocked up with a good variety of the different shades of "Muresco" you will have no difficulty in selling them.

"Quality Forever Moore"

Benjamin Moore & Co.
LIMITED

Paints, Varnishes and Muresco

Halifax Toronto Winnipeg

TORONTO PAINT MARKETS

(Continued from page 56)

result of an easier tendency, a reaction from the run-away market which was more or less expected in certain quarters.

MANY PAINT LINES AT HIGHER PRICES

Toronto

Current increases in various paint products are detailed as follows: all enamels, varnish and varnish stains, also sundries such as wagon and buggy paints which have been previously selling at $3.00 net or over, are now ten cents per gallon higher, while similar lines under that price are only advanced five cents. All ready mixed paints including porch, floor, marine, flat wall and other liquid oil paints of all qualities, have been advanced ten cents per gallon. Shingle stains, barn, bridge, roof and dory paints are quoted five cents per gallon higher than formerly.

The rise is attributed by paint manufacturers and distributors to the higher costs of certain raw materials entering into production, such as pig lead, linseed oil, and certain chemicals from which dry colors are made. In addition, there are the recent sales tax revisions, and one factor of particular interest is that under the new scale of prices, manufacturers have arranged to absorb half the sales tax. Retailers will therefore, only be billed with sales tax at 2¼ per cent. on the invoice price, instead of 4 1/2 per cent. As an example of this, one manufacturer pointed out that their products are distributed in certain portions of the country through jobbing houses, while in other sections they maintain selling agents. These concerns were distributing sources who in turn also had to sell to jobbers in that territory. Under these circumstances, the 2¼ per cent. became an important factor in cost elements, and definite arrangements regarding same have therefore been established.

CONSIDERABLE RANGE IN LINSEED OIL PRICES

Toronto

Linseed oil quotations have also developed a range on the local market, a difference of ten cents per gallon being noticeable in the price levels announced by the different distributing sources. In many quarters the price recorded last week of $1.20 per gallon in barrel lots is still maintained, but from other sources comes advice that $1.10 and $1.13, are the prevailing figures. Sellers claim that the latter quotations are too low in comparison with the current cost of flax seed, and with a fair demand for oil in evidence, the undertone has lost none of its firmness.

The outlook in the flax seed markets continues to improve, and while crop conditions are considered favorable for this time of the year, it is pointed out that this year's seed will not appear on the market for another two or three months. Therefore, while the fluctuations in seed prices have reflected similar movements in linseed, the position of the latter market is technically considered as strong, in view of prevailing seed conditions.

ADVANCED QUOTATIONS ON WHITE LEAD IN OIL

Toronto

White lead in oil quotations have been advanced twenty-five cents per 100 lbs., and the forward booking date has been extended until Sept. 15. This development reflects the firm undertone in this product which has been pointed out in recent market reports contained in Hardware and Metal. Paint manufacturers state that pig lead and linseed oil are contributory elements which are now much higher in price. Lead has shown considerable market strength during the past month or two, and while ingot lead recorded a slightly easier tone just recently due to a lull in consumer interest, the position of virgin metal is considered statistically firm. The probable extension of the booking date was outlined in last week's issue. Following are the revised local quotations:

WHITE LEAD IN OIL—

In 5-ton lots	12 70
In 1-ton lots	13 45
Less quantities	13 80

NATURAL REACTION IN TURPENTINE MARKETS

Toronto

As realized in many quarters last week, the recent boost in turpentine prices was of a transient nature, and a reaction is now evident. Quotations at southern primary markets receded sharply from the season's record levels, owing to the meagre commitments on the part of the consumers, combined with the fact that the higher levels brought out offerings on a larger scale. Local prices, however, continue to register a considerable range in the quotation received from the different distributors, and this factor is more or less accounted for by the condition of current stocks. While prices are easier at Savannah, it is pointed out by certain local authorities that some time must elapse before fresh shipments can arrive which were purchased since the drop in quotations has been established. Other distributors also claim that no profit can be made in handling turpentine at levels which are very much lower than those recorded last week, as present supplies represent the record costs. The demand for turpentine, however, during the past week or two has naturally been of smaller volume, this being partially attributed to the sudden boost in prices. Local quotations, therefore, have declined in proportion, the highest current price announced being $1.90 per Imperial gallon in one barrel lots, which is ten cents below the high level established a few days ago, while the lowest prevailing price quoted to Hardware and Metal was $1.75, a fifteen per cent. range which tends to further complicate a market which has reflected uncertain elements during recent weeks.

The Customer Who Wants "Just A Brush"

Bigger Percentage of Profit on Brushes Than on Paints and Varnishes Makes It Imperative to Make Use of Every Opportunity to Sell Them to Paint Customers—Educating the Amateur Painter

THE BRUSH has so many uses that it has become an essential part of life's equipment. When we think of cleaning, freshening, polishing, smoothing, shining, making attractive, renewing, passing along gracefully without colliding, and kindred things we unconsciously speak of "brushing."

The brush has been a home maker and a health builder. A home maker because of its service in making things more congenial and attractive. A health builder because of its sanitary service and genius for making life happier.

The brush has entered every mechanical art and has been made of various materials and of different shapes but always the principle is the same and just as our language has brushed itself up and incorporated the brush as one of our most expressive and ever ready words, so also the brush itself has become an essential part of human life. We have learned to think brush and will always brush.

Do not underestimate the value of your brush sales. The percentage of profit to you on brushes is considerably larger than that on paints or varnishes, so when a customer enters your store to purchase paint or varnish the occasion offers a natural opportunity to sell a brush.

If the customer is an amateur painter and wants "just a brush," be sure to sell the correct brush for the use to which he intends to put it. Sell a brush of a quality in keeping with that of the paint or varnish which has been purchased. In other words, help the customer in his choice, so that when he leaves your store you will feel satisfied that he has purchased the right preservative and the right brush with which to apply it.

If your brush sales are a small item with you now, do not overlook the unlimited opportunity which they offer. If this branch of your business already forms a considerable part of your sales, it can be made larger by educating your customers or prospective customers to the great value to be derived from applying the right preservative with the best brush.

Boeckh's Brush News

The Show Board—An Active Salesman

The Show Board has proven itself a silent but active salesman. For this reason we have gone to considerable trouble and expense in order to provide our merchants with boards such as the one illustrated. Merchants already using this board have noted a considerable speeding up in brush sales. But a Show Board kept in the back shop will not sell brushes. It must be attractively displayed in a conspicuous place. Give it encouragement from time to time as you do your clerks. Change its place in the store. Along with the Show Board, use real live window displays. Keep attractive counter cards on the case. More than this, every person who sells goods over your counter should have a thorough knowledge of Boeckh's Brushes. They should be instructed to give all prospective brush customers, pamphlets (such as we supply free on application) when they are shopping in your store. These things keep up your customers' interest. It makes them realize their need of good brushes.

Use a Show Board, encourage it along a bit—and it will prove active in selling not only Boeckh's Brushes, but paints, oils, floor brooms, kalsomine and many other lines that are closely associated with brushes.

This Show Board is supplied free of charge. You pay only for the stock displayed on it. If you are not already using one, write us at once for particulars. Do not delay in this important matter. Delay means lost profits.

EASY MONEY!

If you haven't sent in your estimate in our

"PREMIER" Galvanized Sheet Guessing Contest

do so at once.

Turn to page 69 in Hardware and Metal issue July 1st for full details. Everyone has a good chance. It's the same way with the users of "FREMIER" GALVANIZED STEEL SHEETS and the woods are full of them these fine days.

TINKER TOM

MADE IN PREMIER CANADA

Type No. 6007

TRADE CSB CO MARK

TRADE **CHICAGO** MARK

SPRING HINGES

This type of hinge is for office gates. It is known as the Chicago "Sagless" Gate Spring Pivot Hinge.
It has Ball Bearings.
No matter if the gate is heavy or **wide**, it will swing it **easily**, without **sagging.**
The spring does not carry the weight of the gate and a very light tension is applied—a desirable feature on office gates.
Backed by a world-wide reputation.

Chicago Spring Butt Company.

"Crown" Metal Shingles

You Can Safely Recommend them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece.

They are easy to apply and are very attractive in design.

For details and any information on any sheet metal problem, write

M'Tarlane-Douglas Co.
Limited
Ottawa, Canada

No. 1 Fire Pot, List Price, Each $27.20. Ask for Discount.

INTENSE HEAT

The No. 1 Fire Pot is made with Improved Double Blunt Needle Burner having wonderful generating power. Produces 300 degrees more heat and burns gasoline or kerosene. It overcomes 60 per cent. of all burner troubles caused by the old style sharp pointed needle. Upper needle has wire tip that cleans the orifice, lower needle regulates. Time and fuel is saved and the cost of upkeep is less than other makes. Jobbers supply at factory prices.

Ask for a catalogue.

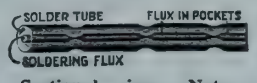
Clayton & Lambert Mfg. Co.
10615 Knodell Ave.
Detroit, Mich., U.S.A.

The British office of HARDWARE AND METAL is located at the office of the MacLean Publishing Co. of Great Britain, Limited, 88 Fleet Street, London, E.C., E. J. Dodd, director.

KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Chicago Solder Co.
225 Wrightwood Ave., Chicago, U.S.A.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

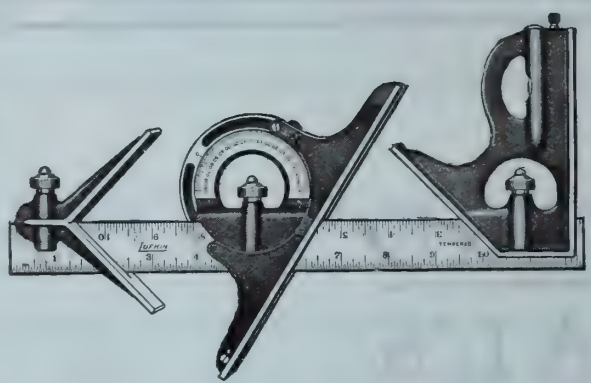
COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.
On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

SEND FOR CATALOGUE — LUFKIN — MECHANICS' TOOLS

COMBINATION SQUARES, STEEL SCALES, HOOK SCALES, DEPTH GAGES, THICKNESS GAGES, CENTER GAGES, STEEL REFERENCE TABLES, FOLDING STEEL RULES, THE "UNIVERSAL" TRY AND MITRE SQUARES FOR WOODWORKERS (with and without level).

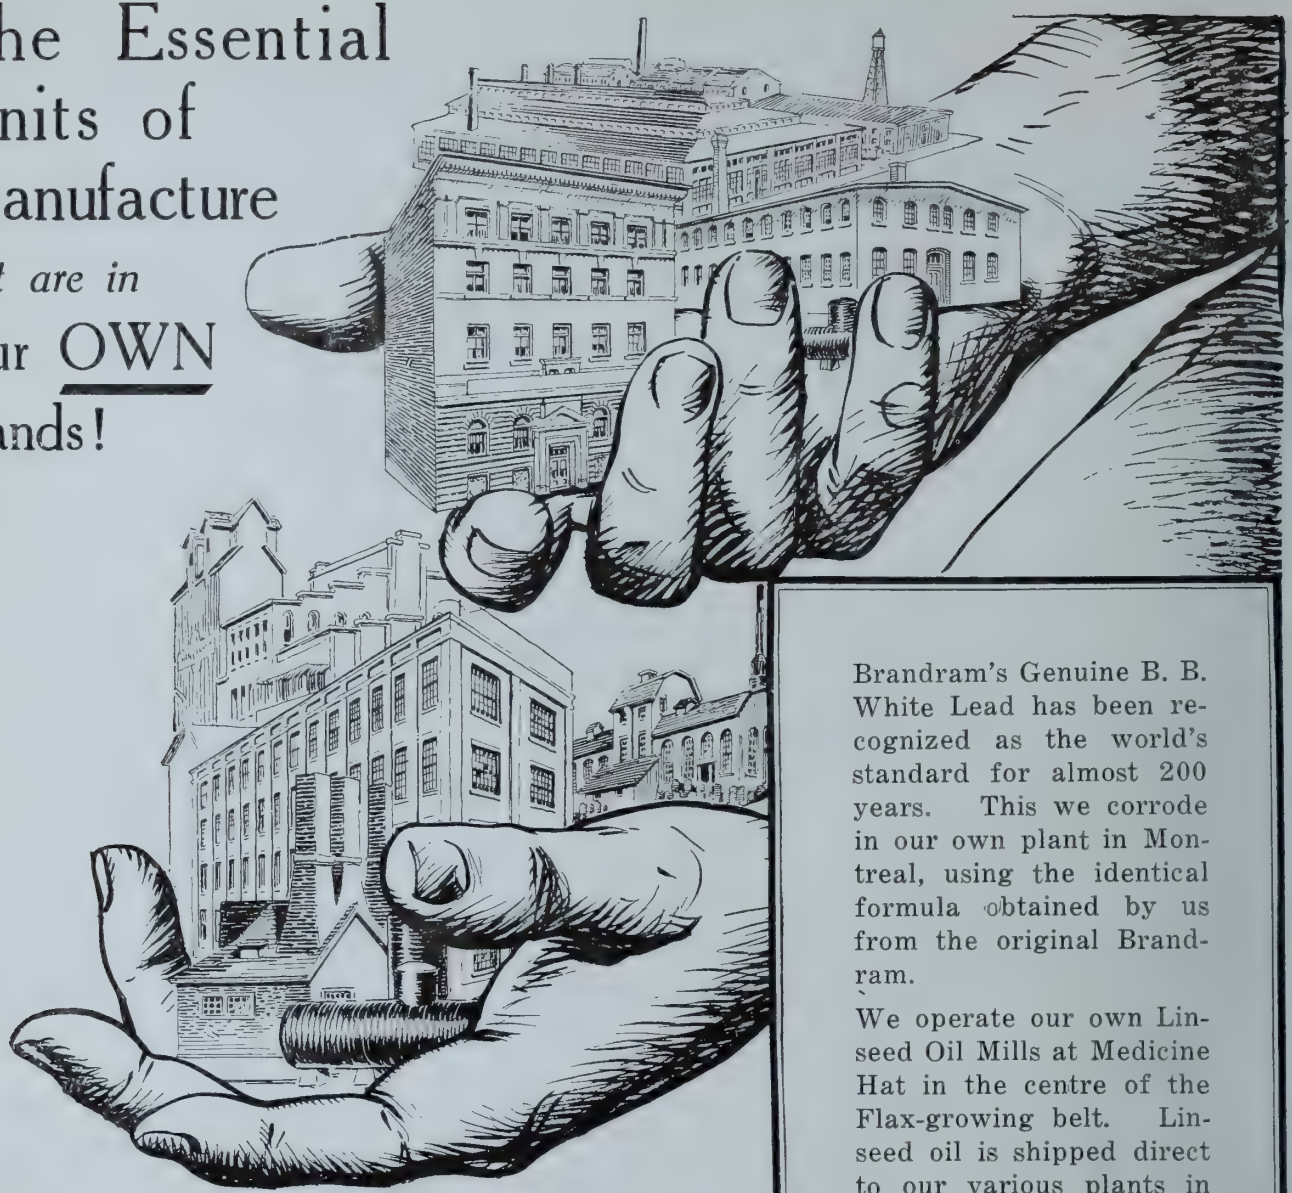
The Essential Units of Manufacture *that are in* Our OWN Hands!



One of the attractive features of the Brandram-Henderson line is the fact that we control the manufacture of the basic materials, which makes it possible for us to supply our agents throughout Canada a high quality product for every purpose in which a brush is used.

"Save the surface and you save all" *Paint & Varnish*

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

Brandram's Genuine B. B. White Lead has been recognized as the world's standard for almost 200 years. This we corrode in our own plant in Montreal, using the identical formula obtained by us from the original Brandram.

We operate our own Linseed Oil Mills at Medicine Hat in the centre of the Flax-growing belt. Linseed oil is shipped direct to our various plants in our own tank cars. Our Alberta Linseed Oil Mills provide sufficient quantity to meet our paint manufacturing requirements.

In Montreal we manufacture our own Dry Colors. We are not, therefore, compelled to depend upon outside sources for these important ingredients.

These manufacturing facilities enable us to offer our Agents throughout Canada a better all-round dealer proposition.

A new and better way of selling Shotgun Ammunition

When a customer asks you what load he should use — don't worry over a hundred or more combinations. Ask him what game he is going after. Turn to your Remington Game Loads — and hand him the correct shells at once.

GROUSE LOAD
Also for Partridge Prairie Chicken, Pheasant
In 12, 16 and 20 Gauge

The New Remington Game Loads

The new Remington Game Loads are 24 special loads in 12, 16 and 20 gauge—practically designed and scientifically made for the best results in shot-gun shooting. On each carton, there is a life-like, full-color picture of the game for which the load is intended—as well as the gauge of the shells and the size of the shot.

There is no guess work. Your customer is pleased—and doubly pleased when he uses the load. Satisfied customers mean increased sales.

GOOSE LOAD
Also for Fox, Turkey and Raccoon
In 12 Gauge.

SUMMER VACATION—
YOUR GREAT OPPORTUNITY

NO other season offers so many opportunities for selling Eveready Flashlights and Batteries as the Summer Vacation period.

More thousands of people are planning auto trips, camping and canoe trips, living in summer cottages and spending their time out-of-doors this year than ever before.

These people are open for suggestions which will make their holiday more enjoyable and safer. What an opportunity to sell Eveready Flashlights and Batteries! There is no article that is of greater use than a good flashlight.

Eveready is not only the best flashlight made, but it is the only flashlight consistently advertised in a big national way. This is the time to sell Evereadys and gather in the profit.

How to Cash in on our Advertising

Our great advertising campaign for Diamond Ware and Pearl Ware is pulling splendidly all over Canada. In those sections where merchants are co-operating the best results are seen.

By "co-operating" we mean making use of the various helps which we have produced since the beginning of the year. All you have to do to secure these free accessories is write to us or tell our traveller.

Mr. SMP

Copyright in Canada by the SMP of Canada Ltd.

These Will Help You Sell

(a) Twenty-six cuts of most popular utensils for use in your local advertising.
(b) Diamond Ware Window Trim; three back panels, twelve small cut-out figures, packed in carton.
(c) Pearl Ware Window Trim; three back panels, twelve small cut-out figures, packed in carton.
(d) Diamond Ware Window Trim, packed in carton; three back panels, eight small cards each to hold specified article.
(e) Pearl Ware Window Trim, packed in carton; three back panels, eight small cards each to hold specified article.
(f) Two Diamond Ware Window Cards.
(g) Two Pearl Ware Window Cards.
(h) Booklet; a Manual of Selling Points—"Helping You to Make More Money." Every hardware merchant should read this book.
(i) Price tags; 100 free to every merchant handling SMP Wares.
(j) Marking pencils for marking Diamond Ware or Pearl Ware.
(k) Giant ads. to hang in window or store interior.
(l) Window transfers, shape of SMP Shield—"SMP Quality Goods Sold Here."

With the aid of these helps hundreds of Canadian merchants are co-operating with our splendid advertising to such good effect that they have in many cases doubled and tripled their average turnover. How about you?

The Building Season Creates Opportunities For You

THE great increase in motor sales, the construction of new garages and the general building boom, is creating great opportunities for the sale of **"Hatch Garage Outfits."**

There is no searching or fussing around for suitable parts, when you sell Hatch outfits. Each set is complete to the last detail, thus saving your time and preventing the too frequent annoyance of missing parts when you sell unknown and incomplete lines.

"Hatch Garage Outfits" are ideal for the Canadian climate, because ice and snow cannot interfere with the easy working of the garage doors. Incidentally there is a good profit for you when you sell this line.

Hatch Garage Outfit consists of

3 Special Swivel Door Rollers.

3 Paris Special Garage Door Hinges.

3 Stay Rollers (floor guides).

2 Extra heavy garage Door Handles.

1 Safety Hasp (for fastening doors outside).

1 Hook and Eye (for hooking back swinging section inside).

Also 22 ft. of track in separate bundles —two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

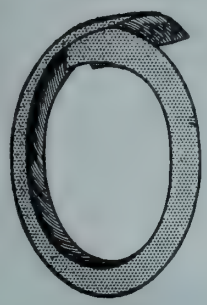
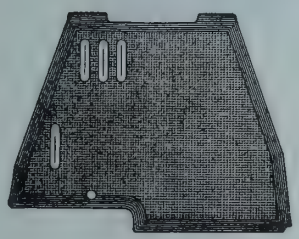
Many Factors Help The Merchant Who Sells "GUTTA PERCHA" ACCESSORIES



Reliners



Heat Proof Mats (for Fords)

Lace-on Boots

Sealtite Patches

First of all, there is the proven merit of "Gutta Percha" accessories. Knowledge of this merit is rapidly spread by the satisfied customers themselves. Then there is the prestige of the name "Gutta Percha;" many of your customers have had agreeable experience with "Gutta Percha" Tires, Rubbers, Outing Shoes, Belting and various other products. And there is the tremendous power of "Gutta Percha" publicity always pulling with the hardware merchant who sells "Gutta Percha" Accessories. This advertising of the "Gutta Percha" name and trade mark to consumers helps you with G. P. Accessories just as it makes a "Simmons" or "Atkins" Saw easier to sell than the obscure, little-known line.

WHO'S FOR A HOLIDAY?

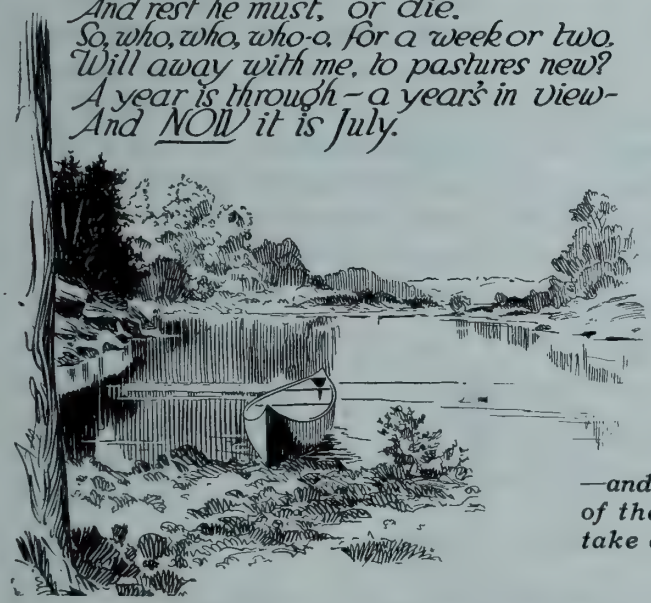
MADE IN CANADA

TRADE Gillette MARK

KNOWN THE WORLD OVER

Says the Wise Old Owl

That man works best who best can rest;
Of but one brain is man possessed;
With certain years has he been blessed,
And rest he must, or die.
So, who, who, who-o, for a week or two,
Will away with me, to pastures new?
A year is through—a year's in view—
And NOW it is July.



The owl's argument is good.

The year has been a trying one for the hardware men.

Vacations have been earned and are a good investment.

And as you feel, so does the man over the way—the garage man, the doctor and the bank clerk.

A vacation window is the answer—fishing rods, camping outfits and Gillette Safety Razors.

Nothing more than the NEW IMPROVED and BROWNIE Gillettes is deserving of prominence and productive of profits at this time of the year. Just naturally, they belong to the vacations—summer hotel, no hot water; perhaps without a mirror; the summer camp with no facilities at all; on the train and EVERYWHERE.

—and the profits on your Gillette blade business of the past year have likely been sufficient to take care of the entire cost of your holidays.

How do you make MONEY?

You can make money by using the cheapest sheet metal you can buy, and by charging the highest price you can get. But that's a poor way to make a lot of money and build a real business.

There is something in every man that makes him do a job to the best of his ability. Many a man who doesn't mind using poor materials puts the best of himself into the work.

How unwise this is. There is no suitable material in the world too good for the hands and brains of a man who knows his job. Of course, you are not going to make gold gutters. It isn't economical even if people would pay for it. Most people can't afford copper.

But we claim that any man in the sheet metal business should work with "Armco" Ingot Iron. This is commercially pure iron, soft enough to work well, tough enough to stand the gaff of being formed and shaped.

It is a crime against yourself to put your heart and soul into work with inferior metals except under absolute compulsion.

Tell your customers why you prefer to use "Armco" Ingot Iron—the rust-resisting iron. Show them that the trifling extra cost at first is swallowed up in the years of extra service. Explain that you do good work and can do your best work only with proper materials. Then most of them will allow you to use "Armco" Ingot Iron.

And to use good materials, to do your work to the best of your ability, to charge a fair price that will give a just profit —*that* is the way to make money.

Concentrating Purchases

Many a purchasing agent will be surprised at the saving and convenience he can effect in buying our various products and having them shipped in mixed cars. The advantage between carload and less than carload rates is considerable and the service is quicker.

The saving commences with a reduction in freight and cartage bills. It extends all the way through the clerical departments by eliminating duplication in checking, payment of invoices and tracing shipments.

Turn to our catalogue and you will find among the Steel and Iron Products of every description listed there, material to meet your every requirement. Should you be without a copy of our new Catalogue—your request will bring a copy immediately.

THREE OF A KIND

They're three of a kind, in that all are screw wrenches and all are made by "The Wrench People." But then, again, they're different because they serve different purposes.

"W. & B." Knife Handle and "Railroad Special" Wrenches are quality tools. The latter is fitted with indestructible iron handle—otherwise they're the same. Both are absolutely dependable and are strongly recommended for heavy duty.

"W. & B." Agricultural Wrenches meet the demand for good tools at moderate price.

Screw Wrench Book on request.

You Pay Rent to Catch Trade—Be Sure You Get it

To be sure of maximum trade, you locate where the trade is. And then you must tell your trade that you want business. The simplest, as well as the most economical, way is to install a Bowser Chief Sentry, now advertised nationally as being the most reliable gasoline pump for the motorist to patronize.

You can ride on this Bowser publicity only by installing Bowser equipment. Motorists are being taught to look for and find Bowser pumps to be sure of most miles per gasoline dollar.

With a Bowser, it is only a step from the curb to larger profits. Install a Chief Sentry at once. Cash in on the Bowser publicity and make your bank account grow.

Ask for booklet C-16 which describes the Chief Sentry's many points of superior mechanical excellence and tells how it insures accurate service—how the sight glass shows the customer the pump is full—how the tally bell announces delivery of each gallon of gasoline—how the dial indicators show the total amount purchased—how the water separator insures gasoline as dry and pure as when fresh from the refinery.

These five points of Bowser superiority will sell more gasoline for you and insure larger profits. Get the Booklet at once!

Bowser Equipment is MADE IN CANADA by S. F. BOWSER & CO., LTD.

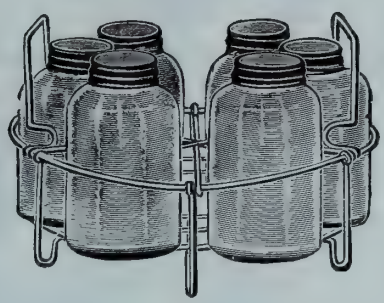
The "Cold Pack" Home-Preserving and Canning Outfit



HERE is another good seller to add to the already popular Davidson lines—a practical yet very simple canning outfit suitable for the average home.

Tell your customers that by preserving the "Cold Pack" way it is possible to preserve more of the fresh garden flavors than by any other method. This outfit permits fruits, jams, jellies, vegetables or meats to be steam-boiled in the actual store jars which are suspended in a specially constructed wire rack which fits our No. 18 cook pot.

The complete outfit comprises

an 18 qt. Enameledware Cook Pot and a Wire Rack (to Hold 6—1 qt. Jars)

The pot measures 13 inches diameter by 9¾ inches deep with cover. Rack is made of strong steel wire with lifting handles and feet which keep the jars clear of pot bottom when boiling. Jars can be removed separately and when not in use for canning, the pot can be used for general kitchen requirements.

Each outfit contains full cooking instructions with time chart for various fruits and vegetables.

Already we have received substantial orders for this new line. Have we yours?

Guns to push now!—The most accurate, best built, most widely advertised, and fastest selling small caliber rifles are the

Marlin

.22 Repeating Rifles

You sell .22 caliber rifles! This means profits for you —we are advertising to millions of shooters these features of superiority in all Marlin .22 caliber repeaters:

Side Ejection—we discarded all old style top-ejecting guns 30 years ago; **Standard 24-inch Barrels**—we make no guns with stubby, sawed-off barrels; **Standard Length Buttstocks**—no short length, cheap-looking buttstocks on any Marlin guns; **Ivory Bead Sights are standard equipment!**—they cost extra on any other make; **Ballard Rifling**—that has made Marlin accuracy famous.

All Marlin .22 Repeaters use in the same rifle .22 Short, .22 Long and .22 Long-Rifle Cartridges.

Model 20

Model 38

Model 39

Model No. 20—a modern side-ejecting gun—not an old style, top-ejector. Has the fast-handling slide action, with visible hammer, for the shooters who prefer a visible hammer rifle, and has a full magazine that gives 25 shots at one loading. Standard length barrel and buttstock. Has Marlin accuracy and Ivory Bead sight. Ask about new lower price.

Model No. 38—is the wonderful new slide action Marlin repeater; hammerless, with instantaneous take-down—the cleanest and sweetest little rifle ever made. Has Marlin accuracy and Ivory Bead sight. Made with Round and octagon barrel. Ask about new lower prices.

Model No. 39—made with lever action, is the choice of expert and professional shooters and all others who like to use the lever action in a small game and target rifle as well as in their big game rifles. Side ejection, Marlin accuracy, Ivory Bead sight—the best made .22 rifle in the world! Ask about new lower price.

Send to us to-day for supply of catalogs and other interesting descriptive matter on the complete Marlin line for distribution to your trade.

A remarkable combination! Guns that set the pace in design, accuracy and workmanship—and the most widely advertised—sold at new prices that set the pace in fast and profitable sales.

Marlin

Repeating Shotguns

Made with every up-to-date feature and exclusive advantages not found in other shotguns.

Model No. 28, 12 Gauge Hammerless—the gun that won the World's Championship at the Olympic Games. The safest breech-loading shotgun ever built. **Solid Steel Breech**—solid top, side ejection; **barrel matted on top entire length**—a feature that costs $9.00 extra on other makes; **press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; the most practical and convenient **take-down;** quick acting **trigger safety.** This Marlin has better lines and more style than any other similar construction, and is a wonderful gun for ducks, geese, foxes, trap-shooting and all long-range shooting. Ask about new lower price.

Model 28

Model 42

Model 31

Model No. 31, 20 Gauge Hammerless—the only real 20 Gauge repeater—Handles the new powerful duck loads in 2¾-inch shells; also all ordinary 2½-inch loads. **Barrel matted on top entire length**—this desirable feature costs extra on other makes. **Solid Steel Breech**—not a shell of wood; **solid top; side ejection; press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; **quick take-down feature** for convenient cleaning and packing; quick acting trigger safety. There's no other "20" like this gun. Ask about new lower price.

Model No. 42, 12 Gauge Visible Hammer—A quick handling, hard-hitting, long-range gun—it makes kills far beyond the range of the average 12 gauge gun. **Solid top receiver;** closed-in breech-bolt that sheds all the rain, snow and sleet of good wildfowling weather; **side ejection**—ejected shells do not cross the line of sight; **double extractors; improved automatic safety device** that guards against hang-fires and defective cartridges; **chambered to handle 2¾ and 2⅝-inch shells; compensating device**—barrel always fits up tight on receiver. Has **matted barrel**—the matted barrel alone costs $9.00 extra on other guns. Ask about new lower price.

Those Inaccessible Soldering Jobs—

The kind that make you squirm and swear until they're done—those jobs are made *easy* and *simple* with Kester Acid Core Wire Solder. All you do is to apply a touch of heat and Kester Solder and the job is finished—*quickly, economically* and *permanently.*

The reason? Kester Solder has an *acid core* that feeds the proper amount of flux as the solder is melted, and in this way eliminates the troublesome pot of acid or paste and the messy swabs, sticks and brushes; besides the job is done in half the usual time.

Kester Solder comes coiled in one-pound cartons or on one-pound spools, but for quantity users it is more economical to buy it on five and ten pound spools.

Dealers everywhere stock Kester because it is a *clean, fast seller,* and brands their store as an establishment that caters to the modern mechanic.

A Tip for Advertisers

WHY do so many well-written advertisements fail to make a profit? asks Herbert N. Casson, in Forbes Magazine, and answers the question by pointing out that the advertisements were not used to the full by the advertiser himself. Often, an advertisement standing alone and without follow-up, will do wonders; but it is too much to expect an advertisement to carry the whole burden of salesmanship.

Too often, a firm makes up its mind to spend $5,000 on a big bang of an advertisement. It does so. There is a sudden loud noise and then—dead silence. Nothing much has happened. And ever afterwards that firm says "Advertising is a failure."

This is not fair to advertising. The firm itself was to blame, not the principle of publicity.

Many firms make this mistake for the simple reason that it is easier to spend than to plan.

They use their advertisement as a rocket, not as a lighthouse.

If you want advertising to do its best for you, you must treat it fairly. You must do it well. You must prepare for the advertising and you must complete the job—and make the most of it.

After all, advertising is only sowing the seed. After the soil and sun and the rain have done their best, there is still the harvesting. You must reap and stack and thresh and bag and sell. Also you must chase the birds off.

Retailers Perturbed Over Sales Tax

Many Enquiries As Result of Various Policies Adopted by Manufacturers and Wholesalers—Government Allows Sales Tax to be Absorbed in Prices But Not in Costs—Transactions With Distributors—Tax Is Pyramided—Hardware Prices Increased

EDITOR'S NOTE:—Judging from enquiries which have been made of Hardware and Metal by hardware merchants in various parts of Canada, many retailers are somewhat at sea in regard to the application of the Sales Tax by manufacturers and wholesalers. An investigation of the situation made this week reveals the fact that various policies are in effect, some manufacturers and jobbers absorbing the whole tax, others absorbing part of it and still others passing on the whole amount. On the other hand in some cases manufacturers are advancing prices to cover the "absorption" of the tax so that the final result to the retailer is about the same. The following article gives rulings received by the Ottawa representative of Hardware and Metal, it gives also some interviews with various manufacturers concerning their interpretation of the rulings and policies followed:

OTTAWA, Ont.—Officials of the Department of Customs and Excise at Ottawa are kept busy these days answering questions concerning the operation of the sales tax. Various interpretations are being placed on recent amendments to the Inland Revenue and Special War Revenue Acts and the deluge of enquiries being received go to show that there is still considerable misunderstanding.

Hardware and Metal's Ottawa representative visited the department this week and secured rulings in connection with several contentious points.

Must Show Total Sales Tax on Invoice

One of these rulings was to the effect that it is absolutely necessary that manufacturers and wholesalers in billing retailers for purchases, show the total amount of the sales tax applicable to the sale, as a separate item on the invoice. If a manufacturer wanted to absorb part of the tax, say 2¼ per cent. on a sale direct to the retailer which ordinarily would carry a 4½ per cent. tax, it would be contrary to the provisions of the act for him to show only the 2¼ per cent. on the invoice. He must show the full amount of the sales tax as a separate item.

Sec. 19 B. B. B. of the Special War Revenue Act, as amended at the last session of parliament, provides that: "The purchaser shall be furnished with a written invoice of any sale which invoice shall state separately the amount of such tax."

The above ruling will affect manufacturers, notably paint manufacturers who, in connection with a revision of prices, have announced that in future they will absorb half the sales tax on sales to retailers and only show half the tax on the invoice. The paint and other manufacturers may be willing to absorb part of the tax, but they will have to do this by revising prices, or in some other such manner. Whatever they do in this respect they must show the full amount of the sales tax applicable to the transaction, stating "above amount includes Sales Tax paid by us amounting to $———"

Another interesting point raised by Hardware and Metal was whether manufacturers on transactions of semi-finished products had to pay the sales tax on these transactions as between themselves.

How Tax is Pyramided

This enquiry was answered in the affirmative.

It was pointed out to the department that if a manufacturer of hardware who purchased articles from another manufacturer to incorporate into his product before it was ready to be marketed, had to pay a sales tax on these articles before they went through the regular channels of distribution, it meant that the tax would be greatly pyramided and would work much hardship in a number of cases.

"That may be so," said the official, "but the transaction constitutes a sale by a manufacturer and every manufacturer must collect a tax on each sale. That is clearly specified in the act and there is no getting away from it."

Transactions with Distributing Agencies

A third question taken up was whether the tax was applicable to transactions between a manufacturer and his distributing agencies. The answer to this was given as follows:

"If the distributing agent is a salaried employee of the manufacturer, the tax is not applicable. But if he is conducting a separate business and ating merely on a commission basis, then he must pay the tax to the manufacturer.

Cannot Absorb in Costs

Discussing the subject with a large Toronto manufacturer who has made a close study of the regulations, Hardware and Metal was informed that the manufacturer is allowed to absorb the Sales Tax insofar as relieving the retailer from paying it is concerned, but that he is not allowed to absorb it in his costs. At the end of the year when profits are being figured for other taxation the amount of money which it has cost the manufacturer to absorb the Sales Tax cannot be figured in operating costs. His profit is figured exclusive of that so not only is his actual profit reduced by this process but he is actually taxed on money already paid to the government in the shape of Sales Tax.

It was pointed out that the tax must be shown as a separate item on the invoice. If part of the tax or the whole tax is absorbed by the manufacturer it is either adjusted in a lowering of prices on the commodities listed or a clause appears in the invoice stating "above amount includes Sales Tax paid by us of $———"

"The government intended that this tax should be passed on to the consumer, but apart from this the average manufacturer and wholesaler operates on a very small margin of profit these days and absorbing a tax of 2¼ per cent. or 4½ per cent. would seriously cut into his revenue where a big turnover is made," said this manufacturer pointing out that his firm have widely advertised

prices to retailers and consumers on their products and that prices cannot be easily advanced to take care of Sales Tax absorption by the manufacturer. He pointed out that the Sales Tax has been increased over 100 per cent. since it was introduced and a further increase in years to come would render it difficult for those manufacturers who set the precedent of absorbing part of the tax. It was thought that there was no need for manufacturers to absorb any part of the Sales Tax unless in the case of goods on which re-sale prices are more or less established, and in these cases special arrangements have been made.

Eliminate Fractional Taxes

This manufacturer suggests a sales tax with no collection on transactions from manufacturer to jobber. This tax would be passed on and collected on every sale, eliminating transactions from manufacturer to jobber would eliminate much of the detail work now made necessary by two fractional taxes. As it stands to-day if the manufacturer decides to absorb all the Sales Tax on sales direct to the retailer it means the jobber is forced to adopt the same policy or his prices will be 2¼ per cent. higher to the retailer than the manufacturers' price.

In conclusion this manufacturer pointed out that his raw material costs were still over 100 per cent. above pre-war prices but that the prices on his finished product were only 66-2/3 per cent. higher than pre-war prices. Under these circumstances and in view of the small margin on which business was being done it was stated to be financially impossible to absorb the Sales Tax and maintain present prices to the trade. Attention was drawn to the fact that retailers should not discriminate against the manufacturer whose prices remain constant and who passes on the Sales Tax, in favor of the manufacturer who increases his prices and announces that he will absorb the Sales Tax. In some such cases as the latter recently announced, the product of the increase in price was said to be considerably more than was required to take care of the Sales Tax.

How Jobbers Will be Affected

Just how the sales tax will be eventually handled as between paint manufacturers, wholesalers and retailers, is still the subject of much discussion in trade circles. One distributor pointed out to Hardware and Metal that in spite of the recent announcement to the effect that paint manufacturers were now prepared to absorb half of the sales tax and thus only charge the retailer 2¼ per cent., they, as wholesalers were still being charged a similar amount of 2¼ per cent. on their purchases from producers of paint products. Thus, it was stated, under the latest decision they will be at a disadvantage for if they pass on the 2¼ per cent. to the retailer and charge 4½ per cent., this will clash with manufacturers who are absorbing half of this amount On the other hand, if the wholesalers have to pay 2¼ per cent. sales tax to the manufacturers, and only collect a similar amount from the retailers—which in turn is collected by the government—wholesalers will in this way be in the unenviable position of paying the sales tax amounting to 2¼ per cent. on two occasions and only collecting same once. That manufacturers may arrive at the decision not to charge wholesalers any sales tax, but merely to show on the invoices as required by law "the above sum includes sales tax of 2¼ per cent amounting to ———," was suggested as the possible remedy to this situation. It was explained that makers of certain other products are adopting this method in conforming to their previous policy of absorbing half of the much-debated sales tax. However, as the full amount of the tax, chargeable on the invoice, must be stated thereon under the government ruling, the result has been in cases of this kind to make a statement to this effect on the bottom of the invoice, as outlined above.

How Proposed U.S. Tariff Affects Hardware Trade With Canada

THE HARDWARE trade of Canada has been interested in changes likely to be made in our trade in these commodities with the United States due to recent tariff changes proposed by the latter country. The following table lists various hardware lines figuring in our trade with the United States showing the present U. S. tariff applying to imports into that country of Canadian hardware. The proposed tariff rate is shown, and the value of exports of these lines to the U. S. during the fiscal year ending March, 1921, is outlined:

	Present Rate	Proposed U. S. Tariff	Exports from Canada to U.S.A. Value
Spades and shovels	20%	35%	$116,909
Nails, brads, spikes, all kinds, n.o.p.	Free	From .4c. lb. to .6c. lb. according to size	75,745
Nails, wire	Free	From .4c. lb. to .6c. lb. according to size	938,777
Sewing machines	Free	Value up to $75, 25% Over $75, 40%	99,670

Stimulating Vacation Hardware Trade

From Middle of July Till End of September is Active Time for Sales of Electrical and Other Hardware Lines—Developing a Holiday Atmosphere Among Prospects

VACATION lines of hardware are now coming to the forefront throughout the stores in Canada. From the middle of July until September is the busiest time in vacation goods, and this includes a wide range of hardware. Some well planned window displays showing how various hardware lines can be used to enhance the comfort of the vacation period can be used to advantage, and the advertising space can be employed to show prospects that the hardware store is the centre of many of their requirements.

A glance over the vacation advertisements of various hardware merchants as shown herewith gives some indication of what lines are being pushed and how they are dealt with.

Headquarters for Holiday needs

Under the heading "Aikenhead's for Vacation Needs," the ad by this Toronto firm shows electric irons as a necessity at the summer cottage or hotel where electric current is available. Women's frocks get crushed in traveling and need to be pressed, and on a prolonged holiday there is generally some light washing and ironing to be done. Flashlights are also illustrated, these being invaluable at a summer resort for lighting the way through strange paths or for assisting in boating through unknown channels. The thermos bottle is an accessory which cannot be easily dispensed with by those going on motor tours, or picnics, or for those going to summer resorts. Window screens are frequently forgotten by those going to summer cottages, and night latches and locks find a good sale to those who want more protection on the doors of their city homes while away and also for those wishing to make their summer homes safer.

Manville Hardware Co., Ltd., Prince Albert advertises, under the heading "What about camping?" a number of lines including tents, detachable motors, camp stoves, canoe paddles, etc., each with prices mentioned.

"Just before the holidays" is the heading on the ad by Allins, Ltd., Lindsay, Ont., which states: "just before the holidays is the time to take stock of your requirements and help to make the camping or holiday trip a success. Here are a few suggestions: Oil heaters. lanterns, screen wire cloth to enclose verandahs and windows and keep out mosquitoes and bugs, to screen doors and windows. Flashlights and extra bulbs and batteries, fishing supplies, etc.

Campers requirements

Under the heading "Hardware for home and camp," Northern Hardware Co., Ltd., Edmonton, Alta., says, "Campers will find the Northern a good place to buy tents, cots, folding tables and chairs, cooking utensils, sporting goods, folding camp chairs, camper's axes. It also illustrates and describes some sporting goods lines, cook stoves, kettles, bread mixers, double boilers, mixing bowls.

Various sizes of tents are advertised by J. B. Kernaghan, Prince Albert, Sask., Sumner Co., Moncton, N. B., advertise couch hammocks. Emerson & Fisher, Ltd., St. John, N. B., advertise hammocks under the heading "Relax a bit these summer days" which states "throw yourself into a hammock in some cool, shady nook with your favorite magazine, or simply lie there and enjoy the goodness of the great outdoors." W. S. Piper, Ft. William, advertises holiday and camp goods including tents, camp cots, mattresses, folding chairs, hammocks, grass rugs, canoe paddles, packsacks, fishing baskets, rods and tackle, picnic baskets, tennis racquets, bicycles, croquet sets. Rice Lewis & Son, Co., Toronto, advertise golf clubs and other golfing equipment.

W. Bruce Campbell, manufacturers agent of Winnipeg is on a business trip throughout the West calling on the wholesale trade.

Daily Evidence of Value of Small Display Tables and Stands for Showing Hardware

Many Customers in a Day Will Pick Some Article Within Close Reach and Exclaim "Oh, Here's Something I Need. I Nearly Forgot It"—Don't Cut Salesmen's Wages to Reduce Overhead Expenses—Big Rush Necessitated Removal of Toy Dept. to Second Floor

ENTERING the hardware store of P. Hymmen & Son, Kitchener, Ont., one cannot help noticing the generous use which is made of display tables and various kinds of display racks on which various hardware lines are grouped where they are handy to customers and arranged in such a way as to invite examination.

Discussing the trend of merchandising with Hardware and Metal, Homer Hymmen drew special attention to the use made of such display tables and racks pointing out that in his opinion such tables greatly increased the sale of various lines of merchandise and that their use was one of the secrets of successful merchandising of many hardware lines.

"We would like a store large enough that we would not need to have any of the merchandise behind any counters," said Mr. Hymmen pointing out that counters kept the people away from the merchandise and made it necessary to waste a great deal more selling effort to bring them to the buying point. Not only does it take more effort but the selling effort of the salesman can be greatly increased if the merchandise is in the hands of the prospective buyer. Handling the goods increases the prospect's desire for possession.

Demonstration of Value

"We have an actual demonstration every day of the value of arranging the goods where customers may handle them and see the prices," said Mr. Hymmen pointing out that many times during the day will certain customers pick up various lines displayed on these tables and racks and bringing it to the counter to be wrapped exclaim, "Oh here's something I need, I nearly forgot about it."

Many such customers would never remember to purchase such lines if they were not reminded and the first merchant to remind that customer will get the business no matter what trade it is. This, according to Mr. Hymmen, is where the department stores and certain chain stores have been having a big advantage in selling. As a rule the salesmen or saleswomen in the latter stores are not as thoroughly acquainted with the merchandise they sell as the experienced hardware clerk. Yet they do the turnover largely because more than half their time is spent looking after customers who have been sold by the handling and examination of the goods themselves. It was the opinion that space devoted to such display tables is well worth while even if wall cabinets, counters, etc., have to be sacrificed.

Once the display tables have been arranged in the manner outlined it then becomes a question of arranging the displays according to seasonable lines and featuring those lines on which special campaigns are being waged. The racks with utensils for preserving time can be kept well to the front now, w.. some suitable card showing the various lines designed to assist in this operation. Mid-summer hardware lines, vacation goods, etc., can be grouped on prominent tables. The plan of having cards on each table stating what is featured on that table, and each of the cards higher than the one in front of it throughout the whole length of the store is used to advantage in some cases. In this way all the cards can be seen from the front of the store.

Stimulates Business

The Hymmen store has actual evidence, in the shape of stimulated business, to show that the generous use of such tables to put the merchandise in close contact with customers has been an important and valuable feature of their business.

Speaking of the subject of cutting down overhead expenses now that the trend is downward, Mr. Hymmen pointed out that he much more favored the plan of cutting the per unit overhead costs on merchandise handled by stimulating total turnover of merchandise. "It is hard to attempt to cut overhead costs by reducing salaries of retail salesmen," said Mr. Hymmen, "because when other people were getting large increases and much money was being

Here is a household hardware department where the various utensils are shown arranged on tables and low wall racks well within the reach of customers, and each line is price marked.

The small display table idea is shown here to good advantage, these tables being divided into small sections in which various lines are grouped. Small price tickets appear in each section. The customer may wander through these lines of tables at leisure and select requirements. Many of them discover new lines designed for their purpose and when allowed to examine them closely become immediate buyers whereas much talking might be of little avail. In this store specials are sometimes grouped on these tables showing seasonable lines and combining a number of articles at a certain price.

made in war production, clerk's wages did not increase proportionately and they should not now be expected to suffer a decrease. It is our opinion that a salesman who thinks he is getting a fair wage for his work, but not one who is satisfied to remain at his present income, is one who works in the best interests of his employer."

Toy Department Upstairs

This firm formerly conducted an extensive toy department on the main floor of the store, but two years ago this was moved to a separate department on the floor above. The separate department has been found a big help in selling toys and incidentally has been a big help in that it does not disturb the even tenor of business in the main store. This may seem odd to some readers, but Mr. Hymmen vouches for the statement that two years ago at Christmas, the firm found it necessary to lock the doors because of the rush of children and parent customers who came to buy toys. At that time the toy department was in the main store and the crowd was so great that many people desiring to enter the store to purchase other hardware took the line of least resistance and went to the next hardware store rather than negotiate the crowd which surged through the Hymmen store to buy toys. Now the toy department is upstairs, with entrance through a door at the front of the store. The change has not brought any diminution of interest in toys as the upstairs department is frequently crowded. At Christmas a number of novelties are introduced to stimulate business and an enthusiastic response is always made. In the Spring and Fall of the year a specialty is made of certain seasonable toys and then again there is a rush. Throughout the other months of the year there is a consistent demand for toys replacing those which become worn out or those being purchased as birthday and other gifts. Educational toys are particularly desired, especially when parents influence the purchase.

BIG FUTURE FOR ONTARIO'S IRON ORE

Government assistance in the development of a Canadian iron ore industry was urged in a resolution passed at Hon. Harry Mills' "iron" conference in Toronto, which was attended by 30 or 40 mining men, metallurgists, transportation men, engineers, etc. They also asked that the Federal and Provincial governments appoint a committee to conduct an inquiry and investigation into the commercial aspect of the situation. The opinions expressed, especially those of general manager J. D. Jones of the Algoma Steel Company, Saulte Ste. Marie, were very optimistic. Mr. Jones pointed out that the United States high-grade iron ores in the Marquette country were "petering out," and the United States government was preparing to develop low-grade ores.

In Mr. Jones' opinion, now was the time for the Canadian governments to get behind the industry and build it up. United States men, he said, were building a $4,000,000 plant to make use of their low-grade ores, which, in his opinion, demonstrated that the time was close at hand when Canadian ore would have real commercial value.

Mr. Jones, in his statement, said he had caluculated that he could produce pig iron from Canadian ores at $1.57 less per ton than he could from the United tates ores. He would use 60 per cent. cintered siderite and 40 per cent. of magnetite. Given Canadian ores at a price that would enable them to compete with United States ore, he said, the Algoma concern would use nothing but Canadian ore.

P. D. McAVITY IS PRESIDENT MARITIME WHOLESALE HARDWARE ASSN.

At a meeting held at the Algonquin hotel, St. Andrews-by-the-Sea, N. B., of the Maritime Wholesale Hardware Association, on Thursday, July 6, A. W. Morton, of Halifax, N. S., was elected president. P. D. McAvity, St. John, N. B., vice-president; the secretary to be elected by the president. The executives are: G. J. Metzler, Halifax; Fred Sutherland, New Glasgow; R. M. Bartsch, St. John, N. B.; J. F. Tilton, St. John, N. B., and John Neill, Fredericton.

Says Electrical Overhead Expense 34 Per Cent.

In Smaller Businesses and 23% in Larger Ones—Organization of Electrical Dealers Takes Place in Ottawa—Inefficient System of Accounting Characteristic of Electrical Dealers is Scored

OTTAWA, Ont.—More than thirty of the local electrical contractors and dealers met at a dinner as guests of the local branches of the Canadian General Electric Company and the Northern Electric Company. A. A. Dion, of the Ottawa Electric Company, acted as toast master and in his opening remarks following the banquet welcomed the movement which this meeting signified towards a mutual co-operation on the part of the retail branch of the electrical industry to organize for the purpose of giving better service to the public.

Laurence W. Davis, of New York, special representative of the Inte tional Association of Electrical Contractors and Dealers, then addressed the meeting.

The great trouble with electrical contractors, said Mr. Davis, has been that the men in the business with expert technical knowledge of installation problems have overlooked the fundamental principles of business which will permit their making adequate profits to develop their business and grow into greater service. This was due, he said, in large measure, to defective accounting methods, which leave out the inevitable overhead charges. This overhead is as definite a part of the cost of each job as the labor or material used in the work and must be provided for in the selling price before any profit could be made. There are such expenses as non-productive labor, salaries, rent, light, heat and power, postage, telephones, stationery and printing, advertising, depreciation on tools, autos and materials, freight and delivery, taxes and insurance, bad debts and many other items, all of which must be included in the cost of any work done. Many young men starting in business overlook these necessary features, and the inevitable failures resulting are a costly burden upon the best development of the industry.

Small Net Profits

According to the figures collected by the International Association, based upon studies of over 2,300 electrical contracting firms doing business of over $100,000,000, these overhead expenses average from 34 per cent. on the smaller business down to 23 per cent. on businesses of larger volume. Mr. Davis showed how even the knowledge of one's overhead is not sufficient in itself, but equally important is the knowledge of how to apply that overhead upon the cost of a job so that the selling price may show a real profit. Many contractors, through lack of this knowledge, are taking work which leaves them actually with a net profit of only 67c. on each job which costs them over $100.

It is not the purpose, said Mr. Davis, to eliminate competition through association work, but only to eliminate destructive competition, through a study of actual costs and an exchange of ideas on business methods. What people pay for is not so much material or labor, but service. The idea of the electrical contractors should be to give that service and so arrange their business with such elimination of competition based on ignorance of costs that both large and small electrical contractors can develop to greater usefulness and service to the public.

The meeting voted strongly to form an Ottawa branch. Sixteen of the firms represented at the meeting signed papers to organize a local association as charter members, and a dozen other firms signified their intention to affiliate with the association when it was organized.

Aluminum Reduction Stimulates Trade

Several Large Glass Shipments Arrive in St. John —Belgium Rifles and Shotguns on the Market— English Firearms Still High in Price

ST. JOHN, N. B.—This has been a record year so far, for sporting goods, and some of the hardware houses featuring this class of goods have had difficulty in keeping up their stocks in order to meet the unprecedented demand. Baseball teams are numerous, and are being well supported by the citizens. One St. John firm boasts of having completely equipped no less than fifteen teams. There is a heavy and steady demand for baseballs throughout the maritime provinces. The tennis business is pretty good, and several courts are in operation. Pogo does not seem to catch on in St. John, and one house with a sample stock has met with little success.

The very wet and unsettled weather during the past week or two has had the effect of slowing up the sale of outing goods and camper's supplies but it is felt that as soon as the weather becomes more settled there will be the usual summer's demand. Automobile accessories are selling well, and there is a good demand for tires, tubes and tire accessories. Spotlights, luggage carriers and motor-driven horns are selling well, also winged radiator caps. The paint business continues to be good both with painters and private users. Auto paints are in steady demand, and one or two painters are making a three-day service to car owners who cannot afford the loss of their car for a longer period. This painting is of the nature of a "touch up and varnish," but cars that have undergone this treatment look very good, and the cost to the owner is low.

Dealers are experiencing difficulty in meeting the heavy demand for paris green, and one house has had to order shipments by express to meet requirements, on several occasions. Goods of German manufacture are slowly finding their places on the shelves of the maritime province hardware stores, especially such goods as pliers, thermometers, punches, clippers, etc. The reduction in the price of aluminum ware has had the effect of speeding up sales in this class of goods, especially kettles and double boilers. The reduction of more than a dollar in the retail price of a kettle has brought a large demand for kettles. The St. John dealers, most of them, had low stocks at the time of the decline in price, and were able to stock up advantageously. The sale of builder's hardware is fair, only a few new buildings being erected. Two or three big jobs are under way, including two schools. There is a possibility of a skating rink being built in the near future, and also the erection of a substation for the hydro-developed power which is to be supplied to the city by the provincial government. During the past week there have been no special sales held by the hardware stores, the advertising having been devoted chiefly to such items as screen doors, windows, refrigerators, fly swatters and auto supplies. A good deal of window glass has been shipped from St. John during the last few weeks, several large shipments having arrived from Belgium and England. Belgium rifles, shotguns and pistols are again on the market, price being about the same as American lines. English firearms are still high in price, with only a limited demand.

Conditions are much brighter in Sydney, N. S. The payroll of the Sydney steel plant will amount to $10,000 a day for the first time since November 22, 1920, so it was announced at the British Empire. Steel headquarters. During the last three months business has been picking up and still further improvement is looked for. Local business conditions reflect the increased industrial activity. This is supplemented by full time at the mines, which are rushed to supply orders from upper Canada and the United States.

Wentworth Radio Supply Co., head office Hamilton, capital $100,000 to manufacture and deal in radio supplies.

Gold Medal Radio-Phonograph Corp. Ltd., head office Uxbridge, Ont., capital $300,000 to manufacture and deal in furniture, beds, phonographs, radio apparatus.

What Retail Advertising Must Do

To Be Effective Advertising Must Be of Value to the Public—Only the Truth Must Be Employed to Make Advertising Profitable—Successful Stores Have Won Through Greater Skill in Advertising

EDITOR'S NOTE; Hardware merchants will be interested in some of the ideas expressed in regard to the handling of retail advertising, as outlined at the recent convention in Milwaukee of the Associated Advertising Clubs of the World. Effective retail advertising can be of great assistance to the merchant in stimulating trade at present, and no matter how much each retailer things he knows about advertising he will find some points which he can make use of to advantage in this report.

"RETAIL advertising and therefore the people who devote their time to it, can be just as big, as important, as influential, as those engaged in the business desire," asserted Louis Blumenstock, of St. Louis, advertising manager of one of the great department stores of that city, and president of the Associated Retail Advertisers, at the convention of the Associated Advertising Clubs.

"Throughout the sessions of the retail advertisers, who are gathering from the four corners of the earth to discuss methods for improving such advertising, the fundamental thought has been that advertising, to be useful to the store that uses it, must first be of benefit to the public. It must tell the news of a store of new merchandise arrivals, of attractive prices, of the uses to which merchandise can be put to obtain the largest possible benefit from its purchase. Strong emphasis has been laid upon the fact that the best advertising of today is not that which tells merely about the goods offered, but rather, that which tells about the use of the goods.

The Truth Only

"Another deep current in these sessions has been the unanimous agreement that nothing short of the plain, simple truth, as to qualities, prices, etc., can be employed profitably in advertising, and this was especially stressed by Mr. Blumenstock. He showed that advertising does more than merely bring people into a store once—that proper advertising and sound merchandising will bring the customer back time and again.

"A business that is properly built," he said, "is not entirely dependent upon the daily advertisement. It possesses a clientele that has been culivated and has been encouraged to come, day after day, to the establishment to satisfy its wants. And this clientele, which is termed 'natural business,' should be sufficient to assure an average business. The advertising should merely give it a greater impetus, and the occasion should be carefully planned and honestly presented.

"Many things in a business have to do with its future, with its progress, with its place in the community. The establishment that interests itself in municipal affairs, advocates progress in an editorial way, is advertising itself as a progressive business and indicates to the public that it is vitally interested in the progress of the community, and that the establishment consders itself a factor within it."

The great gathering of retailers has developed the interesting fact that during the last few months when many stores have had to retrench sharply and even have shown financial losses, there have been other merchants, similarly situated, who have been distinctly prosperous; and in every case, the successful stores have won through the exercise of greater skill in advertising and merchandising shown by the successful ones.

Sharp emphasis has been given, by several speakers, to the need for better advertising copy—a better understanding of merchandise and the customer—and the use of attractive advertising illustrations. An illustration, attractive in appearance and truthfully describing the merchandise to be sold or clearly reflecting the character of the store, it has been shown, can be of the greatest importance in selling goods and building permanent good will.

"The successful retail advertising man of today must know the store through and through—the management, employees, merchandise, customers—every element and phase of the business, and moreover, he must not only reflect the spirit of the institution he is advertising, but also be in the position of helping to guide the management in the adoption of policies which will win greater good will." Such was the declaration of Edward S. LaBart, of Wilson & Co., Chicago, in addressing the retail section of the advertising convention.

What I Would Want to Know

"Were I a young man," he said, "and had an opportunity to become identified with a retail store in the advertising department, I would want to know about all that I could of the retail store business because I would consider that as long as I had to interpret the store to the public, I would have to know within myself those things I should have to consider and write about.

"If I owned a store and wanted to have an advertising department, I would first make certain that I actually had something to offer the public and then I should insist upon my advertising man knowing every employee of my establishment and to spend some time both behind and in front of the counters absorbing everything possible concerning my busness.

"As an advertising man in a retail store I would not stop in my endeavors until I had sold every employee on the value of advertising; until I was certain every one of them knew the great underlying thought or message that I was carrying along in my copy. I would not stop until I found it possible to make it easer for those higher than I to understand that advertising was the mouthpiece of the business they were building and to be open to suggestions and means for improving the store policies where needed and to permit me to carry to the public the great impelling story that surrounds every successful enterprise. Every success is a business romance and has attached to it wonderful stories, principles and ideals—splendid merchandising facts that await the touch of a human mind trained and directed towards revealing them in a way easy to be understood.

"You cannot row a boat across a river with your hands tied behind your back, any more than a retail store can hope to have its ideals and purposes dug out and properly supported by one whose hands and ideas are tied tight by the big boss, who himself does not thoroughly understand what advertising actually is.

"Every department of a retail store must understand the power of advertis-

Savors of Propaganda

A REPORT which has been given much publicity in Canada and the United States is to the effect that English linseed oil made from Canadian flaxseed is now flooding the United States. This is said to be due to the emergency tariff legislation of the U. S. which greatly increased duties on flaxseed. This statement savors very much of political propaganda as the facts do not bear it out. Canadian flaxseed is still being shipped into the U. S. but the total of Canadian shipments, amounting to about one and one half million bushels per season is but a small part of the thirty million bushels annually required by the U. S. trade. True Canadian flaxseed is being shipped to England, but this is used for seeding purposes and is not a new development by any means.

English linseed oil has been shipped into the United States in increasing quantities lately, but this is not a matter of price competition but rather a question of seed supply. Quantities of oil available in the United States are not sufficient to satisfy their domestic demand and it has been necessary to import supplies. The flaxseed for most of the oil from England and that produced in the U. S. came from the Argentine, though India has been supplying English mills with some seed recently. Thus it is seen that a situation which subsequently might have had some direct bearing on the Canadian linseed oil trade, really has no foundation in fact.

Set Dangerous Precedent

NUMEROUS enquiries have been received recently by Hardware and Metal as to the principles on which the Sales Tax is being applied. Various policies are being followed by manufacturers and wholesalers, some absorbing the whole tax, others part of it and still others collecting the whole tax from the retailer. This situation results in the retailer imagining that he is being descriminated against by the manufacturer or wholesaler who insists on collecting from him the whole amount of the Sales Tax applicable to the sale.

Investigation of the situation reveals the fact that in some cases prices on merchandise have been increased simultaneously with the announcement that part or whole of the tax is to be absorbed. This increase in price is necessary for the manufacturer in order to offset the impairment of his revenue from absorbing the Sales Tax. But the result is the same, e.g., the price to the consumer is increased and the retailer is the one who must secure the higher price. The same result would be achieved by the retailer insisting on collecting the sales tax from his customer the same as is demanded of him by the manufacturer or jobber. The principle of passing on the Sales Tax to the consumer is undoubtedly sound and practicable and would work little hardship except where suggested resale prices are in effect, and here the policy of absorbing part of the Sales Tax by manufacturers and wholesalers has been in effect for some time.

Investigation among retailers indicates that the average merchant has no objection to the manufacturer or wholesaler collecting the Sales Tax on transactions but objection is taken to the varying plans which are in effect whereby the retailer hardly knows where he is at in buying from a large number of firms.

If the Sales Tax principle is to be continued, and it looks now as if it is likely to be, some definite policies should be laid down by manufacturers and wholesalers or definite details laid down by the government stating the plan which these firms must follow. In this connection it is stated as a possibility that the Sales Tax plan may not only be continued, but increased in future to allow the curtailment of other forms of taxation which require much detail work. If this proves to be the case it would be well for all concerned to formulate definite policies now in handling this form of taxation and not set dangerous precedents which may prove to be difficult to break away from in future.

The Advantage of "Something For Nothing" Psychology

THE SERIOUSNESS of competition on this market of hardware produced at so-called small cost in certain European countries appears to be greatly diminishing. Production costs on many such lines are said to have recently increased 200 to 300 per cent. and with the restrictive duties imposed it is regarded as highly speculative to attempt to exploit this market with such merchandise designed to sell on a low price basis. The fact that domestic purchasers of such lines found difficulty in establishing just what such goods would cost laid down in this country has been a factor in restraining such trade.

It is an interesting development of this situation to note that with the curtailment of cheap hardware lines from such European countries, some quantities of similar merchandise are found on the market, supposedly emanating from the same countries but on investigation found to be produced on this side of the Atlantic.

In this connection the secretary of the National Council of American Importers states: "The Germans are rapidly losing their trade here by scaling prices too high. Every German firm seems intent on charging all the traffic will bear. Prices have increased greatly and values are rigidly charged in dollars. I also know that there are a lot of articles offered on this continent purporting to come from low-exchange countries, especially from Germany, but most of these are fakes. A good many of the knives for instance now so common in this country at low prices are made on this continent, their promoters taking advantage of the common psychology of 'getting something for nothing' by advertising that they come at a great sacrifice from abroad."

Reports from the Department of Trade and Commerce bear out the fact that trade with these low-exchange European countries is dwindling largely owing to a loss of prestige on account of inability to make deliveries and to offer more liberal financing terms.

To Cut Down Expenses--Spend More

The Strange Tragedy of Overhead the Villainous Enemy of Profits

or

How the Powerful Muscles Called Increased Volume Avert Disaster

THE cartoon shows you the exact details of a tragedy that has been frequently enacted in recent months, known as—The Weight of Overhead or The Flattened Business Man.

You observe the business man sitting at his desk crushed down by the villain Overhead, a husky looking brute, perched on the poor man's shoulders, who has seized the pie of Profits which he proceeds to devour. Not content with gorging the pie, the villain must flatten out the unfortunate wretch beneath him, in the bargain.

The business man struggles to find, underneath his papers and accounts, some scheme by which he may throw off the villain and extricate himself from the warm, desperate and unpleasant situation. He has but two chances. The villain is not so robust as he looks—he has gorged until he has become soft and flabby. The business man may make either or both of two moves that call for quick decisive action. He may suddenly slide out from under and escape into the next office called Economy where Overhead cannot follow—or he may bring into play those powerful big muscles known as Increased Volume with which he could easily knock Overhead into the middle of next week.

Personally we believe in the muscular effort. It is safer, surer, and disposes of the villain for all time. Hiding in the office of Economy, the business man must always be on guard. The villain will be always watchful for another chance—constantly seeking to again seize the pie.

There are not many business men wise enough to know just how to live in the office of Economy and keep away from Overhead. You cannot economize carelessly. It calls for shrewd and cautious judgment, else you cut down the very things that would keep a growing Overhead away. For example, it is unwise to cut down advertising appropriations, it is unwise to make drastic reductions in wages, it is dangerous to substitute inferior merchandise for good quality. The best economies are those that include a smaller working organization where it will efficiently do the work or a lesser expense for the smaller details that may safely be dispensed with in an establishment.

But when you use the muscles of Increased Volume you need not be so fearful. Be sure you are right—be certain that your plans will make volume grow—and you need have no fear of Overhead. His greatest enemy is the steady clang of the cash drawer bell. Use advertising judiciously, employ display to the best advantage, build your selling organization to its highest standard—go after business with all the vim and vigor you can bring into action—and Overhead will never find a place on your shoulders. He will become your servant to do your bidding, to bring you the pie of Profits that is essential to the life of a business.

In other words, to cut down your expenses spend more. You reduce Overhead by increasing volume which can only be done by more advertising, more display, more energetic effort to bring in the sales that make the cash that goes into the drawer that rings the bell that hypnotizes Overhead and helps you to subdue him and make him harmless.

Events in the Trade

PERSONAL

H. J. Gaisman, president of the Auto-Strop Safety Razor Company, has sailed from New York on the S. S. "Paris" for England, where he will visit the London factory of the company and some of the continental branch offices.

A. E. Gilverson and W. J. Lawson, president and manager respectively of the wholesale hardware firm of Rice Lewis & Son, Ltd., Toronto, have returned from an extended business trip to England.

John Richardson of Richardson & Bureau, manufacturers' agents, Montreal, Que., is leaving on July 16th for a trip to Europe covering a period of two months. Mr. Richardson is combining business with pleasure, and after visiting the Old Country will make a visit to different continental countries.

Maurice Ganon, representing Societe Generale De Coutellerie & Orfevrerie, 31, Rue Pastourelle, Paris, manufacturers of all kinds of cutlery and who operate six factories in France, is on a business trip throughout the West in the interest of his firm. This is Mr. Ganon's second trip to Canada as his first was with the "Made In France" exhibit shown last year. Mr. Ganon states that they make a better quality of cutlery than Germany and their employees are all veterans. Their business relations in Canada have been very satisfactory and this year they are making cutlery in Canadian designs so as to give the Canadian trade what they are looking for. H. W. Glasco is the firm's representative in Western Canada.

MOVE INTO NEW QUARTERS

The Greenside Hardware, Danforth Ave., Toronto, has moved into new and more spacious quarters two doors east of the previous location. The new number is 3276.

GURNEY FOUNDRY PROPERTY CHANGES HANDS

The transfer is announced of the foundry property valued at $329,372 of the Gurney Foundry Co., Ltd.. at 500 King St., West. The land has a frontage of 408 fet. It is transferred to a holding company known as Gurney Properties Co.

ONTARIO INCORPORATIONS

Imperial Radiator Co. Ltd., head office Toronto, capital $500,000 to manufacture and deal in iron, copper, steel, brass and other metals and manufacture boilers, radiators, and heating apparatus of all kinds.

ANACONDA AMERICA BRASS CO. AT NEW TORONTO

A recent report from New Toronto says the Anaconda American Brass Company have opened negotiations with the Town of New Toronto with the object of obtaining a site and locating there.

This is further to the report appearing in a recent issue of Hardware and Metal to the effect that this company had taken over the Brown Copper & Brass Rolling Mills at New Toronto.

NAIL MANUFACTURERS PROTEST RATE INCREASE

Ottawa.—Protests against the recent judgment of the Railway Commission in regard to freight rates have already begun to come into the board. Two industries have appealed to the commissioners to have commodities in which they deal put on the list of basic commodities on which reductions were granted. The two industries which have been heard from up to date are the nail industry of St. John, N. B., and the beet-root industry of Western Ontario.

FRENCH CONCERN MAKING CONNECTION IN CANADA

A. Boitard, representing Sabatier Pere & Fils, Paris, France, is a visitor to Montreal and is making this city his headquarters. This company manufactures cooks' knives, table cutlery, etc., and are endeavoring to build up their connection with the Canadian hardware trade which they enjoyed prior to the war. Mr. Boitard expects to visit Ontario and the Northwest, leaving Montreal during the coming week, and will visit the wholesale hardware merchants in the various centres he calls on.

CLAYTON & LAMBERT MFG., CO., CELEBRATE THIRTY-FIVE YEARS IN BUSINESS

An informal Get-Together-and-Boost-Dinner was given by the management of the Clayton & Lambert Mfg., Co., Detroit, Mich., to 125 members of their organization, including the office and factory heads of departments. The event was in celebration of their thirty-five years of business growth and in honor of several employees who had faithfully served the company for twenty years or more, to whom watches and other tokens of appreciation were presented by Otto J. Groehn, factory manager. J. E. Lambert, president of the company, acted as toast master.

DOON TWINES LIMITED WILL ENLARGE PLANT

Kitchener, Ont.—Doon Twines, Limited, have plans drawn and the specfications prepared for a large addition to their factory, on South street. They are calling for tenders and anticipate beginning building operations at an early date. The new building will adjoin their present factory at the rear, and the plans show a big basement for storage purposes and a one story superstructure. The factory is at present working full time, though not at full capacity.

COLEMAN FARE BOX CO. LTD. UNDER NEW NAME

Sheet Metal Tools and Hardware Co. is the new name of the firm formerly known as Coleman Fare Box Co. Ltd., 1191 Bathurst St., Toronto. The latter company has now passed out of existence after paying one hundred cents on the dollar and the business is now being carried on by two of its old officials under the name of the Sheet Metal Tools and Hardware Co. F. Tissington and J. E. Harvey, manager and superintendent respectively of the old plant, now own the whole of the assets of the defunct concern. The new firm will carry on the majority of the lines formerly made by Coleman Fare Box Co., particularly as regards garden sets, snow shovels, trowels, lawn rakes, sand spades, etc., and a new clothes line reel for use in the kitchen is being added.

A. L. TELFER COMMENCES IN BUSINESS FOR HIMSELF

A L. Telfer who has been connected with the J. H. Hanson Company, Limited, Montreal, for the past 14 years, and manager for the past 6 years, is taking over the agencies formerly represented by this company, including the Canada Wire and Iron Goods Company, Limited, Hamilton, Ontario, the White Frosst Company, Limited, Warrington, England, manufacturers of wire nettings, The Sussex Manufacturing Company, manufacturers of refrigerators, and the clothes pin business.

The J H. Hanson Company of Montreal have been in business since 1885 and a short time ago they decided to liquidate their stocks and go out of business.

Arrangements were therefore made whereby Mr. Telfer, who from his long association with the trade, has a very valuable connection, would take over the different agencies.

MONTREAL BOARD OF TRADE WILL VISIT THE WEST

Montreal.—Arrangements are now well completed for a Western trip of the Montreal Board of Trade in September next. The party, which will include a large number of members and their wives will leave Montreal on September 1, and proceed to Port McNicoll, taking the boat trip from there to the head of the lakes. Centres to be visited include: Kenora, Winnipeg, Regina, Moose Jaw, Bassano, Calgary and Banff. While in the Rocky Mountain district many interesting points will be touched, and Vancouver will be reached on Saturday, Sept. 16. A boat trip from there along the British Columbia coast will be taken, after which the return trip will be commenced.

STEEL COMPANY MAY ERECT PLANT IN NEWFOUNDLAND

Sydney, N. S.—In return for a nominal royalty of 25 cents per long ton, on all iron ore mined, the British Empire Steel Corporation has undertaken to construct in Newfoundland, before 1928, a plant capable of producing one hundred thousand tons of iron or pig iron annually, according to an agreement between the corporation and the Newfoundland government made public here.

The corporation undertakes to erect coke ovens and to expend three million dollars in Newfoundland before 1926. All materials used in the construction of these plants are to be admitted to the island, duty free. The companies, Dominion and Scotia, are also granted certain rights as to tax exemptions and water power grants.

PROGRAM FOR TORONTO HARDWAREMEN'S PICNIC

The seventh annual basket picnic of the Toronto Hardware Merchants and Travelers, will be held at High Park, Area No. 4 on Wednesday, July 19, 1922. A full program of sports has been arranged by the committees of which the chairmen were O. F. Morrison, John Caslor, A. Lake, F. Hutton. The starters will be N. Baden and B. Blackwell, Judges: B. Cotten, K. Brandon, A. Lake. There will be a baseball game between the East End under manager J. Vernon and the West End under manager J. Booth. A wide range of splendid prizes have been donated by a number of hardware firms.

The various contests to be staged include the following:

1. Girls' Race, 6 years and under, 25 yards. 2. Boys' Race, 6 years and under, 25 yards. 3. Girls' Race, 7 to 10 years, 25 yards. 4. Boys' Race, 7 to 10 years, 25 yards. 5. Girls' Race, 11 to 15 years, 50 yards. 6. Boys' Race, 11 to 15 years, 50 yards. 7. Balloon Race, (Ladies), 50 yards. 8. Hardware Clerks' Race, 100 yards. 9. Single Ladies' Race, 75 yards. 10. Backward Race, (Men) open, 50 yards. 11. Married Ladies' Race, 50 yards. 12. Travelers' Race, 100 yards. 13. Sack Race open, 50 yards. 14. Ball throwing Contest, (Ladies) 1st prize only. 15. Ball Throwing Contest, (Men) 1st prize only. 16. Boot and Shoe, Ladies, open. 18. Hardware Merchants' and Travelers' Race, (over 45), 75 yards. 19. Married Couples' Contest, (needle & thread) 75 yards, (prizes to Ladies only.) 20. Pipe Race. 21. Wheelbarrow Race. 22. Lucky Number Contest. Tickets 25c. each.

BUSINESS MENS' ASSOCIATION HOLD PARADE

With flags and bunting fluttering gayly from every building, shop windows decked with most attractive displays, eager faces leaning from upper windows, and the sidewalks teeming with excited children and interested spectators, Queen street west, Toronto, presented a truly gala appearance as the parade of floats, representative of that section's manifold businesses, passed along the street.

Over 200 floats and gaudily decorated vehicles were mustered by 7 o'clock —racy touring cars, ponderous trucks, and wagons drawn by prancing horses.

While the majority of the vehicles were abandoned to the usual advertisement of their owners, some contrived to attain this end by novel means. One foundry had skilled employees giving demonstrations of simple molding processes right in the truck. Another firm engaged in similar business had two imps attired in scarlet on its float working in the glare of torches. The committee included Arthur Lake, hardware, and a number of Queen St. hardwaremen took part in the pageant.

WESTERN ONTARIO NEWS

F. S. Newton of Essex, Ont., has taken a position in the hardware store of T. B. Rayl & Co. in Detroit.

H. L. Martinson and wife of Cotton, Ont., were recent visitors with relatives in Port Huron.

London Metal Products, Limited, of which D. Soper, formerly of Beatty Bros. London factory, will be manager, is getting ready to engage in the manufacture of washing machines and other lines. Machinery is now being installed in a building that has been secured in East London. The firm is capitalized at $60,000.

WHEN IS YOUR CIVIC HOLIDAY?

In the interests of bringing about a uniform observance of Civic Holiday throughout the various municipalities of Canada, and to provide information to travellers so that they can plan their trips accordingly, Hardware and Metal desires information as to when YOUR Civic Holiday is to be held this year. Please drop a card to the Editor, Hardware and Metal, 143 University Ave., giving this information. It can be used to help all concerned.

Lyle Johnston of the Cowan Hardware, London, Ont., is spending a month's holidays at Port Stanley. George Swallow, of the same firm has left on a trip to the coast and J. McTaggart is rusticating in the vicinity of Appin.

The wedding was solemnized at Leamington, Ont., recently, of Wilbur C. Lendon, son of Harry Lendon and Miss Myrn Aleine Terryberry. Following a honeymoon trip through the Adirondacks and New York City; Mr. and Mrs. Lendon will reside in Leamington.

Rapid progress is being made with the fine new store being erected at London, Ont., for the Cowan Hardware Co. The building will front on Dundas St. and run right through a block and have entrance and show windows on the market square. Both front and rear will be of red brick and the store is to be equipped with the latest fixtures and equipment.

Plans are well under way at London, Ont., for the big annual picnic of the London Retail Hardware Dealers' Association. Instead of going to Port Stanley this year the hardware merchants will go to Springbank and special electric cars are being arranged for. Arrangements are also being made to provide food for 600 people. A big program of sports will be a feature of the outing. Many hardwaremen from the district, with their wives and families are being invited.

HARDWARE CONDITIONS PROMISING IN LONDON DISTRICT

London, Ont.—The most active demand in years is reported not only in London but all through the district for builders' hardware. Building permits for the year will be well over $3,000,000 exclusive entirely of any permits for the Western University buildings. The bulk of the permits are for homes and the resultant demand for all lines of builders' hardware, for roofing and supplies and also for tools has been very satisfactory to the hardware merchants.

Tenders will be called very shortly for the new Western University buildings and the cost of these will be at least $2,000,000. In addition there are several other substantial projects developing and the entire outlook in so far as the building trade is concerned is most satisfactory.

With the best and also the earliest crop in many years now being harvested merchants see continued prosperity for the farmers and big buying in the coming months. Active replacement buying by many retailers is reflected in increased activity in the factories and the unemployment problem is practically nil just now.

Aside altogether from the building activity local and district hardware merchants report that business has been excellent and they are a unit in taking an optimistic view of the situation in the coming months.

News of Western Canada

For Comment on Winnipeg Hardware Market Tendencies see "WEEKLY HARDWARE MARKET REPORTS."
For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

MacRorie, Sask.—Chas. Evans, hardware suffered fire loss.

Nipiwin, Sask.—G. F. Agnew, hardware, has sold to Lawrence Bros.

Vegreville, Man.—The Standard Hardware Ltd., has been incorporated.

Rockhaven, Sask.—J. H. Coe, hardware, has been succeeded by Phillips Bros.

St Jean Baptiste, Man.—D. F. Asselin, tinsmith, has sold to Tessier Bros.

Harry Moulden is on a trip to Columbus, Ohio, where he is attending the U. C. T. Convention.

Dave Burnett of the J. H. Ashdown Hardware Company, who has been confined to the hospital for the past week is expected to be out very shortly.

A. H. Fraser, manufacturers' agent, Winnipeg, is on a business trip throughout the West calling on the wholesale trade.

Harry F. Moulden & Son, manufacturers' agents have moved to Room 112, Pantages Building, Market Avenue, Winnipeg.

Vancouver.—A meeting of battery and electrical service men in this city is being held this week for the purpose of organizing a trade section under the auspices of the Retail Merchants' Association.

Vancouver.—The Gregory Tire and Rubber Co., the only concern manufacturing automobile tires on the Canadian Pacific coast, anounces that early in September it will place its first cord tires on the market. The company's cord equipment is practically completed and will be ready for shipment to the plant in Coquitlam this week.

T. E. Pooley, of London, England, representing Vickers, Ltd., and thirty other British firms will reach Vancouver shortly with a view to the establishment of branch distributing and manufacturing plants on behalf of his principals. He will remain here for three weeks looking into many prospects submitted to his Old Country interests. Mr. Pooley will consider the establishment of an airplane service between Vancouver, Victoria and Seattle.

O. M. Ballantyne and H. Hacker, are opening a general hardware business at Vegreville, Alberta, under the trade name of the Standard Hardware Company Limited. Mr. Ballantyne was connected for eight years with Merrick-Anderson Company of Winnipeg and went with the Marshall-Wells Company at the time of the amalgamation. This position he held until he decided to go into business. "Bal" will sure be missed by his many friends on the road. Mr. Hacker has been in business at Vegreville with his father for the past fifteen years.

Vancouver.—B. Applegate, who for some time has been attached to the staff of Wood, Vallance & Leggat, has resigned to assume charge of the clearing house of the Canadian Credit Men's Trust Association.

Vancouver.—F. A. Owens in the employ of the Guarantee Storage Battery Company here was the lucky winner of the Lexington car donated in connection with the Potlatch staged the last week by the Gyro Club in aid of children's playgrounds.

Victoria.—Several new concerns of interest to the hardware trade have been incorporated here within the last fortnight. Among them are the following: Manville & Sons, Hardware Co., Ltd., Armstrong, capital $10,000; South Vancouver Art Metal Works, Ltd., South Vancouver, $10,000; McCandless Battery Co., Ltd., Victoria, $10,000; Spreader Sling Hooks, Vancouver $25,000; Simpson & Gowan, Ltd., Summerland, $10,000; McPherson Plumbing & Heating Co., Ltd., Vancouver, $50,000.

BUYERS WEEK IN VANCOUVER

Much attention is being given to "Buyers Week" in Vancouver which will be held during the week of the Exhibition August 21 to 26. Efforts are being made to secure the co-operation of every manufacturer and wholesaler in the city and it is anticipated a large number of buyers from all parts of the province will attend. A refund of railway and boat fare will be made on the basis of the volume of sales made. The visitors will be entertained at a luncheon at the Hotel Vancouver and in addition, there will be trips to points of interest around Vancouver.

FOUNDATION OF IRON AND STEEL INDUSTRY IN B C.

Nelson, B. C.—S. G. Blaycock, general manager of the Consolidated Mining and Smelting Company of Canada, in an address before the International mining convention here, stated that his company had made in the laboratory, high grade ore from the pyrolite gangue taken from the great lead and zinc Sullivan Mine at Kimberley, using an electrolylic process which had been suggested to the management by Nichol Thompson of Vancouver.

This product, which Mr. Blaycock called a stainless iron, could be rolled cold to the thousandth part of an inch and then folded like paper, fifty times. It resembled wrought iron in all respects except that it was apparently of the purest form known. If the company could develop this process commercially he said, it would be getting the very utmost out of the Sullivan mine.

Mr. Thompson, who was chairman of the session characterized this announcement as the greatest event of the convention. He said that even if the magnetites and hematites of the province should not prove to be of sufficient extent there were sufficient deposits of pyrolite in the province to be the foundation of an iron and steel industry.

WHAT RETAIL ADVERTISING DOES

(Continued from page 41.)

ing so that patrons of the store will be handled and treated courteously, that they might come back again and again. Stocks advertised must represent themselves as shown in the advertising, else the prestige sought after will not withstand.

"The advertising department is one of the most important departments of any store and it must be treated and considered accordingly. And by the same reasoning the advertising department manager should be one of the best known and among the most important workers in the organization; one whose duties extend from knowing how goods are received, unpacked, handled and priced through all details up to the duties and ideas of the president of the company, himself. Only in this way can every detail be possessed and only in this way can really good pulling merchandising copy be prepared and presented to the public."

Far too little attention is given to writing craftsmanship in the preparation of advertising copy by retail merchants, in the opinion of Sherley Hunter of Chicago, who has attained a national reputation as an advertising writer. He told retail advertisers attending the convention, that advertisements should be news, and he insisted that business houses are too easily contented when they go out to look for an advertising man.

Washington.—The committee tariff rate of 40 cents a bushel on flax seed was approved by the Senate, without a roll call. This is an increase of 15 cents a bushel over the House rate.

Fall Fair Dates Throughout Canada

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

RADIANT FLOOR WAXER.

Morris Phillips, Hardware, Toronto—Could you please let me know the name and address of the manufacturer of the "Radiant" floor waxer, which is a weighted brush, with self feeding wax, for polishing floors.

Answer—The Garton Mfg. Co., 62 Dundas St. E., Toronto, Ont.

OIL STOVES AND HEATERS.

Charles Caswell, Hardware Merchant, Tillsonburg, Ont.—Please give me the name of a Canadian manufacturer of an old stove or heater.

Answer—The Perfection Stove Company, Limited, Sarnia, Ont.; McClary Mfg. Co., London, Ont.; Sheet Metal Products Co., Toronto.

CHISEL HANDLES

Messrs. A. J. Walker & Son, Truro, N.S.—Please give us the address of manufacturers of Chisel Handles.

Answer—We are pleased to quote you the following list: Woodturning Products of Canada, Fenelon Falls, Ont.; Maritime Handle Co., East Wentworth, N.S.; The Danville Mfg. Co., Danville, Que.; Canada Spool and Bobbin Co., Walkerton, Que.; American Broom Works, St. Basile de Portneuf, Que.

CHAMPION OAK HEATER

The Geo. Taylor Hardware Company Ltd., Timmins, Ont.—Kindly advise us where we can procure repairs for a stove known as the "Champion Oak" Heater.

Answer.—Messrs. McIntyre & Taylor, Limited, Queen Street West, Toronto. Ont.

STEEL BLOCK PULLEYS

J. L. Demers, Thetford Mines, Que.—Kindly give us the names of Canadian manufacturers of steel block pulleys.

Answer.—The Canadian Fairbanks-Morse Company, Ltd., Montreal, Que., and the Goldie & McCullough Co. Ltd., Galt, Ont.

QUEBEC HEATER

The Geo. Taylor Hardware Co. Limited, Cobalt, Ont.—Can you give us the name of the manufacturer of the Quebec Heater?

Answer.—Messrs. Stewart & Milne Company, Limited, Hamilton, Ont.

NEW DIAMOND STOVE

The Cochrane Hardware Limited, Copper Cliff, Ont.—Could you kindly inform us who are the makers of the New Diamond Stove?

Answer.—Findlay Bros., Company, Limited, of Carlton Place, Ont.

THE WOODROW WASHER

W. C. Auld, Hardware Merchant, Youngstown, Alta.—Will you kindly advise me, who are the manufacturers of the Woodrow Washer?

Answer.—The Woodrow Manufacturing Company, of Newton, Iowa, U.S.A. This machine is handled in Western Canada by the Hoosier Cabinet Company, 368 Portage avenue, Winnipeg, Man.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THE issuing of a new wood screw list with higher prices, constitutes one of the premier changes in the current hardware markets, and is in line with the development of this nature outlined in Hardware and Metal a few weeks ago. Other increases are apparent on cotton wrapping twines, galvanized sheets, bar iron and steel, and the Daisy line of hand churns, while the advance in prices on lead pipe and waste, traps and bends, is now general.

Revisions to a lower level are again fairly numerous, changes of this nature being noted on such products as galvanized fence hooks, socket firmer chisels of both American and Canadian manufacture, Joseph Rodgers cutlery lines including table knives, butcher knives and carvers, spring clothes pins, aluminum ware specialty lines of U.S. origin, cow bells and Parowax.

A range is still noted in bar iron prices, but an upward revision to uniform levels is more or less expected to develop at any time, and with the announcement of higher prices at eastern markets, this reflects the unabated strength of the steel industry in the face of moderate trade at this season. Galvanized sheets also retain the firm position achieved during recent weeks, the loss of a cargo containing a goodly assignment of imported English sheets, coupled with the delayed deliveries from southern mills, being current market factors of some importance. Cotton waste prices are also on a stronger basis, while much unsettlement is evident regarding the future trend of quotations on ranges and furnaces for the coming season's trade, as costs of raw materials entering into the production of these goods show a decidedly upward movement.

A strong tendency is noted in lead products generally and other lines such as sheets and solders are considered likely to follow the advanced levels recorded last week on pipe and bends, if the prevailing strength is maintained in primary centres. Trading in scrap materials is still lacking in animation, but some signs of improvement are again appearing in ingot metals, notably copper and spelter.

A slight easing off in the volume of current orders is reported in wholesale circles, a condition which is not unusual during the hot months. Trade is still described as very good, however, with warm weather lines moving well and bookings for early Fall goods coming to hand.

Western wholesalers and retailers report a steady improvement in the volume of business, and while orders are still of a limited nature, the aggregate is considerably above that recorded this time last year. A cautious attitude is being generally adopted until the new crop is more or less assured. Practically all markets however, show a firmer tone.

Montreal Markets

MONTREAL, July 13.—New prices continue to appear on the current hardware markets, several advances and reductions again being recorded this week. Higher prices are announced on bar iron and steel, lead pipe and waste, traps and bends, cotton wrapping twines, while through the issuing of a new list, wood screws are also at increased quotations. Reductions appear on certain cutlery lines of the Joseph Rodgers make, such as table knives, butcher knives and carvers. Spring clothes pins are also lower. New prices on the Victor line of wooden snow shovels for next season have been announced. An acute shortage of galvanized sheets is reported, owing to the loss of a steamer with a large consignment of English imported sheets and Welsh tin plate. Sustained activity is noted in corrugated sheets, and the shortage of flat sheets reflects additional strength in these products. Trough and piping remain very active and wrought iron pipe still retains a strong tone.

WROUGHT PIPE STILL RETAINS STRONG TONE

Montreal.

There have been no changes on wrought pipe, although it is noticeable that there is a feeling that the prices are very firm. U. S. manufacturers are well booked up for some weeks in advance, but in view of the competition that they are in a position to give, it is not likely that Canadian manufacturers will risk U. S. competition by advancing prices at this time and be obliged to reduce them later.

NEW PRICE LISTS ON WOOD SCREWS

Montreal.

Entirely new price lists on wood screws, both bright and brass, have been issued by the manufacturers. The trade discounts are the same, but considerable changes are shown in the list prices. On the smaller sizes increases are very noticeable, running up as high as 25 per cent., while in many cases the larger sizes have been reduced. These price revisions have been anticipated by the trade, so it was not altogether a surprise when the new lists were received.

ANOTHER ADVANCE IN COTTON TWINE PRICES

Montreal.

Cotton wrapping twine has been advanced five per cent. and the new prices are quoted as follows:

3 ply in balls	51c per lb.
4 ply in balls	55c per lb.
3 ply in cones	49c per lb.

NEW QUOTATION ON SPRING CLOTHES PINS

Montreal.

A new lower price is announced on spring clothes pins of $1.40 per gross in two gross packages.

PRICES ON "VICTOR" WOOD SNOW SHOVELS

Montreal.

Prices have been announced on the "Victor" line of wooden snow shovels for next season. The following list quotations are subject to a discount of 25 per cent:

OILED—Plain—

No. 5, list $2.40; No. 6, $2.60; No. 7, $3.00; No. 8, $3.60; No. 9, $4.40; No. 10, 5.00, per doz.

Top Ferruled—

No. 8, $4.40; No. 9, $5.00; No. 10, $6.00; No. 11, $6.80; No. 12, 8.00; No. 13, $8.80; No. 14, $10.00; No. 15, $12.00, per doz.

Top and Bit Ferruled—

No. 9, $6.80; No. 10, $8.00; No. 11, $8.80; No. 12, $10.00; No. 13, $10.80; No. 14, $12.00; No. 15, $13.60, per doz.

PAINTED RED—Plain—

No. 5, $3.00; No. 6, $3.40, No. 7, $4.00; No. 8, $4.80 per doz.

Less 25 per cent.

SCRAP MARKET REMAINS IN QUIET CONDITION

Montreal.

There are no changes in the quotations of the scrap metal markets, and the lines are very dull. There is very little demand for scrap rubber and non-ferrous metals. Average buying prices are as follows:

WASTE MATERIALS—		
Automobile tires		0 50
Rubber shoes		0 02½
Yellow brass	0 05 to	0 06
Red brass		0 08¾
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04½
Lead, tea		3 00
Light copper	0 08½ to	0 09
Heavy copper		0 11
Wrought iron R. rd., No. 1, per gr. ton		10 00
Malleable scrap (ton)	9 00	10 00
Pipe scrap (ton)		7 00
Heavy melting steel	9 50 to	10 00
No. 2 busheling		3 00
Boiler plate	8 00	9 00
No. 1 machinery cast	20 00 to	21 00

HIGHER QUOTATIONS ON LEAD PIPE AND WASTE

Montreal.

The firm tone in the lead markets is reflected in some advances this week. The demand is steady, being maintained by the construction work that is under way during the summer months. Other lines are unchanged. Quotations are as follows:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 2½ lbs. sq. ft., lb.	0 10
Do., 4 to 8 lbs. sq. ft. lb.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

COTTON WASTE PRICES ON STRONGER BASIS

Montreal.

Prices on cotton waste are somewhat firmer, and due not so much to the local demand but to the fact that American prices have recently advanced. It would not be surprising, therefore, if Canadian prices were to be advanced in the very near future. Unchanged quotations are as follows:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

STEEL PRICES HAVE ADVANCED TEN CENTS

Montreal.

An advance on iron steel of ten cents per 100 lbs. has been announced on July 11. The indications for an advance have been evident, but manufacturers state that they have been reluctant to make any change that might discourage buyers from placing orders. Due in some respects to the coal and rail strikes in the U. S. the markets have been firming up until action was taken in the form of an increase. The demand has improved, and new quotations are as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 05
Refined iron	4 55
Irish finish machinery steel	3 10
Mild steel	3 05
Single reeled machinery steel	5 15
Band steel	3 40
Spring steel	4 65
Sleighshoe steel	3 05
Tire steel	3 25
Harrow tooth steel, per lb.	3 20
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 95
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owig to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

TROUGH AND PIPE REMAIN VERY ACTIVE

Montreal.

The demand for eavestrough, conductor pipes, elbows and sundry lines continues to be sustained, and the records show a higher buying movement. In fact any lines in which galvanized iron is used are very active, and will undoubtedly continue to be so. The prices are unchanged as follows:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in,, $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $2120; 15 in., $28.80; 18 in., $36.80.

Discount 70|10 per cent.

Conductor Pipe, Round, Plain and Corrugated, per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in. $29.60; 5 in., $4000; 6 in, $49.00.

Discount 70|10 per cent.

Plain or corrugated, price per doz.

2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in, $29.00.

Discount 60 per cent.

ACUTE SHORTAGE OF GALVANIZED SHEETS

Montreal.

The loss of the S. S. Orthea in the St. Lawrence river with a large consignment of galvanized iron, tin plates, etc., will be a severe blow to the trade as buyers were looking forward to replenishing their stocks from the cargo of this steamer. Now there is a regular famine for standard sizes, as distributors and manufacturers are actually out of some of them. It will be impossible to procure any further stocks until the next boat arrives, which will be the latter part of this month.

The situation on Canada plate is easier, as stocks are more ample and there is not the demand just now that there will be later on in the season. Prices have, however, remained unchanged, as follows:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	6 75	7 25
26 gauge	6 50	7 00
24 gauge	5 90	6 40
22 gauge	5 55	6 05
18—20	4 85	5 35
Other Brands—		
10¾ oz.	6 50	7 00
28 U. S. gauge	6 10	6 60
26 U. S. gauge	5 80	6 30
24 gauge	5 65	6 15
22 gauge	5 65	6 15
18—20 gauge	5 50	6 00
16 gauge	5 35	5 85

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	13 50
20 x 28 IC, 112s	14 00
20 x 28 IX, 112s	16 00
20 x 28 IXX, 56s.	9 25
20 x 28 IXXX, 56s	10 00
TERNE PLATE—	
20 x 28 IC, 112s	14 50
CANADA PLATE—	
Half bright 52s	5 25
Half bright 60s	5 35
Blued, 52s	5 50
Blued 60s	5 60
Welsh, Polished, 52s	7 25
Welsh, polished, 60s.	7 50
Galvanizel, 52s	7 50
Galvanized, 52s	**7 50**

LOWER PRICES ON JOS. ROGERS CUTLERY

Montreal.

New price lists have been forwarded to the trade that show lower prices on table knives, butcher knives and carvers. The average reduction is in the neighborhood of eight per cent.

SUSTAINED ACTIVITY IN CORRUGATED SHEETS

Montreal.

The trade in corrugated sheets is naturally effected very seriously by the loss of the S. S. Orthea with her cargo of galvanized sheets, tin plate, etc. As a result of the actute shortage in standard sizes, manufacturers are showing extreme caution in booking new business in view of the amount of orders already on

hand. This situation is causing prices to hold up very firm, and it would not be surprising if advances were made, although at present the prices are unchanged as follows:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

SHAVING SOAP REDUCED

Montreal.

Colgate shaving soaps have been reduced in price by ten per cent.

LITTLE CHANGE IN PIPE FITTINGS TRADE

Montreal.

The trade in pipe fittings can be reported as only fair. Small orders are being placed to take care of immediate requirements only, and there have been no changes in prices. Quotations are as follows:

PIPE FITTINGS—	
Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do, long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—
Price list effective June 1st, 1922. Discount 70-5 per cent.

FAIR DEMAND NOTED FOR RANGE BOILERS

Montreal.

The prices on range boilers remain unchanged since last reported, quotations being 50% off standard list. The amount of building that is going on in particularly the larger centres is causing a very fair demand for this time of the year. The following are the list prices and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights. 50 per cent.
Extra heavy. 40 per cent.

FIRMER TONES RECORDED IN INGOT METALS

Montreal.

The metal markets have held very well considering the disturbed condition in the United States, and also the possibilities of financial trouble in Germany. While there are no particular advances to report there is certainly no weakness in any of the lines, and if present unsettled conditions can be adjusted there is every possibility of higher prices this fall.

TIN.—This is slightly higher in London, although for reasons well known, no sustained advance is looked for just now. Consumption in the United States is naturally affected by labor troubles. Buying is comparatively light and the local market is quiet at 35 cents.

COPPER.—The tone in the United States is quite firm and producers are not pressing sales. In fact there is somewhat of a scarcity of available metal for the next month or two. Export business is very well maintained, although naturally this is susceptible to events in Europe. The local market is slightly higher at 17¼c for castings and 17¾c for electro.

SPELTER.—The American market is quite firm and it is difficult to buy at $5.50 East St. Louis basis to-day. This is the highest figure touched since 1920, and there is every indication of a further advance. London market is quiet and it remains to be seen what effect the financial difficulties will have on holders of German and Belgium spelter.

LEAD.—This is the most uncertain metal to-day, as it is undoubtedly higher than other lines in proportion, and while it is fairly firm at the moment lower prices in the next few months would not be surprising. The consumption, however, has remained pretty steady, which may act as a check to any decline in prices. The local market is quiet with the price unchanged at 7 cents.

ANTIMONY.—This has had quite a reaction in New York during the past month, and prices are now at a more attractive level, and a recovery in the near future would not be surprising. The local market is unchanged at 6½c for China and 7½ for English.

ALUMINUM.—The market remains quiet. There is little demand and the price is unchanged at 24 cents.

Toronto Markets

TORONTO, July 13.—A variety of both increases and declines again features the week's hardware market reports. Recessions have been announced on such products as socket firmer chisels of both American and Canadian make, galvanized fence hooks, cow bells and Parowax. Slight downward revisions on household specialty lines in aluminum ware of U.S. manufacture are also reported. The issuing of a new list on wood screws constitutes a premier development as this supersedes the previous list which has governed the market for almost ninetee nyears. Discounts are unchanged, but higher prices now prevail. Further increases appear on wrapping twine prices, while the Daisy line of hand churns records a similar advance. Much unsettlement is evident regarding the future trend of quotations on stoves, ranges and furnaces, the recent increases in raw material costs not only having rendered very remote any lowering of prices on these products for next season's trade, but having considerably firmed up prevailing levels with future advances considered quite possible in many quarters.

LOWER PRICE ON GALVANIZED FENCE HOOKS

Toronto.

Galvanized fence hooks have been revised downward in price, the lower quotation being $5.50 per keg.

LOWER PRICES ON SOCKET FIRMER CHISELS

Toronto.

A reduction is announced this week on socket firmer chisels, in both American and Canadian makes. The approximate decline on these lines is between 10 and 15 per cent.

ALUMINUM WARE GOODS HAVE EASIER QUOTATIONS

Toronto.

Wholesalers announce that slight downward revisions in prices are now effective on household specialty lines in aluminum ware of American manufacture. The reduction varies between five and ten per cent. on the different lines.

ADVANCE RECORDED ON DAISY HAND CHURNS

Toronto.

A slight advance has been made in quotations on the Daisy line of hand churns. Revised prices on these products follow:

DAISY CHURNS	
No. 1, each	$10.25
No. 2, each	10.90
No. 3, each	12.00
No. 4, each	14.25

f.o.b. Warehouse.

COW BELL QUOTATIONS AT LOWER LEVELS

Toronto.

Lower prices are now in effect on Holstein cow bells, these products now being quoted at the following prices:

COW BELLS	
No. 0, doz.	$9.00
No. 1, doz.	7.25
No. 2, doz.	6.00
No. 3, doz.	4.65
No. 4, doz.	4.00
No. 5, doz.	3.75
No. 6, doz.	3.10
No. 7, doz.	2.75

PRICE ON PAROWAX DOWN ONE CENT PER LB.

Toronto.

Parowax is down one cent per lb., the new price level being 10¼ cents, compared with the previous level of 11¼ cents. The preserving season is still in full swing and in conjunction with other seasonable utensils, Parowax is recorded in brisk demand.

HIGHER PRICE LEVELS ON GALVANIZED SHEETS

Toronto.

Certain jobbing houses record another advance in galvanized sheet prices, and are now quoting the higher levels of $6.65 per cwt. on 28 gauge, and $7.10 on 10¾ oz.

FURTHER INCREASE IN WRAPPING TWINE PRICES

Toronto.

Cotton wrapping twines have again been advanced, the average increase being two cents per lb. Revised prices follow:

WRAPPING TWINES

Cotton in 5-lb sacks	
Balls, 3-ply, per lb.	$0.53
Do., 2-oz., per lb.	0.55
Cones, 3-ply, per lb.	0.50
Do., 4-ply, per lb.	0.53

GOOD TRADE IN BRASS AND COPPER PRODUCTS

Toronto.

While conditions in the virgin metal markets have recently recorded a lull in both price and consumer interest, this development has not been reflected in the market for finished copper and brass products such as sheets, rods, and tubing, a firm trend being evident. The demand for these goods is stated by distributors and manufacturers to be keeping up well, and current trade conditions are described as satisfactory for this season. There has been no change in price announced, prevailing levels remaining at the higher levels quoted a few weeks ago. These quotations follow:

BRASS—	
Sheets, base, per lb.	0 22
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 19
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned 16 oz. and heavier, lb.	0 41
Tubing	0 29

BOILER TUBE BUSINESS IN MODERATE VOLUME

Toronto

While boiler tube prices continue to remain on a nominal basis as far as the local market is concerned, no change from the previous list has been announced, and distributors state that current business is fair for this season of the year. Trading, however, is in small lots, a condition which is described as usually evident at this time. Up to the present, tubes have not reflected the firmer attitude of the steel industry generally, a development which has been observed in practically all other steel lines. This factor is attributed to the quiet demand, combined with the size of stocks on hand. Following are the average nominal local price levels:

BOILER TUBES—

	Seamless	Lapweld.
1 inch	$18 00	$.....
1¼ inch	20 00	.....
1½ inch	19 00	.....
1¾ inch	20 00	.....
2 inch	19 00	16 00
2¼ inch	22 00	19 00
2½ inch	25 00	19 00
3 inch	29 00	24 00
3¼ inch	34 00	26 80
4 inch	43 00	34 25

RANGE STILL QUOTED IN BAR IRON PRICES

Toronto.

The current trend of local business in bar iron and steel is described as slow but good. Distributors generally state that trade is in satisfactory proportions and while no outstanding developments have been recorded, the fact that bar products are moving with a fair amount of activity is a good indication for July, the hot weather usually proving a quiet period in the steel industry generally. Prices on the local market continue to show a range, certain warehouses adhering to the higher levels announced last week, while other sources continue to quote at the $3.00 base.

Unsettled Market in Furnaces and Ranges

Increasing Cost of Raw Materials Overshadows Freight Rate Reduction—Prevailing Quotations Considerably Firmer—Advances for Next Season's Trade Stated as Quite Possible

IN discussing the probable trend of prices on stoves and furnaces with a prominent range and furnace manufacturer, Hardware and Metal was informed that the present upward tendency has the result of making any reductions for Fall trade more remote, and in the cost of basic materials at least stiffens the current quotations, even if advances are not made within a few months.

It was pointed out that the reduction in freight rates was very disappointing to manufacturers in point of extent, the net result of the 7½ per cent. decline being of a minor character on the finished product, and was entirely overshadowed by higher production costs on other items. These were mentioned as follows: coke, foundry iron, coal, and sheets and plates, all of which materials now cost considerably higher than was the case a few months ago, and this development will be reflected in production costs.

Some uncertainty therefore exists regarding future prices on these lines, it being apparent that such factors deserve close attention. The current movements in primary steel markets constitute an important element in stove, range and furnace manufacture, and while purchases of this nature are usually made for some time ahead, the fact that the coal strike has indirectly resulted in maintaining the strength of steel production circles, now forces manufacturing interests to a re-consideration of selling levels on the finished articles. Whether a price revision, will actually result therefore, could not be ascertained as it was stated that no decision in this respect had as yet been reached. The opinion was expressed, however, that as certain manufacturers of these products had recently been inducing their agents and dealers to place orders, an upward movement in quotations was at least being contemplated. What the probable extent would be, if any, was another fact not available, but prevailing levels on ranges and furnaces are undoubtedly much firmer under these circumstances.

Another manufacturer also pointed out that a ten or fifteen per cent. reduction in freight rates, not only on the raw materials, but also the finished articles, would have constituted a direct incentive towards easier costs, as any downward change in the charges on heavy goods of such a nature would have been reflected in proportionate extent. It was admitted that the reduction in stove and range prices made effective last year was not of a startling character, but the precedent thus established could not be automatically followed in view of the conditions outlined, and in certain quarters advanced quotations are more or less expected.

In discussing the freight reductions applicable to Canadian railroads, effective August 1, it was pointed out that coming at a time when the basic cost of steel is mounting rapidly, the slight decrease of seven and one-half per cent. in transportation charges is lost track of in the upward shuffle of steel prices. This distributor drew attention to the fact that the freight reduction amounted to around three cents per cwt., and it was thought that this minor element would hardly be noticed. While the tendency is in the right direction, it is so small at present, as to be entirely overshadowed by the advancing costs in other directions, notably exchange, pig iron and coke.

Following are the average prevailing quotations on bar products:

IRON AND STEEL—

Mild steel bars, base	3 00	3 15
Mild steel bands 3-16 in. base	3 50	3 65
Bar iron, base	3 00	3 15
Angle iron, base	3 10	3 25
Horseshoe iron		3 75
Tire steel	3 25	3 35
Spring steel	7 00 —	8 00
Sleigh shoe steel	3 00	3 15
Hoop steel		4 00
Norway iron		12 50
Toe caulk iron		4 00
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

GALVANIZED SHEETS HOLD STRONG POSITION

Toronto.

Quotations on sheets now more clearly reflect the strength accumulating from recent demands for products in this class. While new business is described as lessening in volume, there has thus far, however, been no apparent lessening of pressure on the mills for early deliveries. With costs of pig iron, coke, and other basic elements rapidly advancing, quotations on finished steel products in general remain on a firm basis, and the trend is upward. The coal strike is reported as not vitally affecting the production of steel, but the industry in southern primary quarters now has to consider the possible effects of the railroad shop employees strike should a curtailment of transportation facilities eventually be added to the present narrow margin of fuel supplies under which American producers are working. Importations of English galvanized sheets are reported in heavier volume, with prices firm at the following levels:

BLUE ANNEALED SHEETS—	
10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10
16 gauge	4 15

BLACK SHEETS—	
18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6 35
22 gauge	6 05	5 90
18 and 20 gauge	5 85	5 75
	Premier and	Apollo
10¾ oz.	6 40	7 10
U. S. 28 base	6 00	6 65
U. S. 26 base	5 70	6 35
22 and 24	5 55	6 20
18 and 20	5 40	6 05
16	5 25	5 90
12 and 14	5 10	5 75

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands, copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

STRONG TENDENCY NOTED IN LEAD PRODUCTS

Toronto.

Following the higher prices announced on certain lead products last week, the primary market tendency is described as very firm, and such lines as lead sheets and solders now reflect a similar upward trend. Some advances on these goods are looked for in certain quarters if the present strength is maintained. The current movement is stated to be brisk, with a satisfactory volume of activity for this season of the year. Following are current quotations which are supported by the improvement in primary metals:

LEAD AND ZINC GOODS—		
Lead pipe, list per lb.		0 13
Lead Waste, pipe, list, per lb.		0 14
Do., over 8 in., list per lb.		0 15
Lead pipe is subjected to a discount of		10%
Lead traps and bends		15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb.		0 09
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly, lb.		0 22½
Do., wiping, lb.		0 21
Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

New List Increases Wood Screw Prices

Average Advance Ten Per Cent. But Smaller Sizes Show Greater Increase Than Larger Screws—Previous List in Effect for Nearly Nineteen Years—Discount Quotations Unchanged

As OUTLINED in the market reports contained in the July 1 issue of Hardware and Metal, advanced price levels are now announced on wood screws. This change is particularly worthy of note as a new list has been issued which shows considerable revision in the quotations governing bright, and both brass and bronze screws. The increases average around fifteen per cent. on the smaller sizes, and decreases in proportion until the larger screws only appear with a minor upward change. The discounts remain the same in effect during the past two months.

The old price list was made effective on August 1, 1903, while the current list has been dated July 6. The previous list therefore, governed the market for almost nineteen years. Distributors point out that the present list conforms with that in use on American markets, lists on this class of product usually being identical. In announcing the higher levels, manufacturers state that for some time past it has been generally considered that the spread between small and large-sized screws failed to allow sufficient margin for producers from the viewpoint of material used and time expended. Following is the revised list, while the discounts applying to same are contained in the current market quotations pages:

TRADING IN SCRAP STILL LACKS ANIMATION

Toronto.

The demand has continued to be in fair proportion for scrap iron, and waste materials generally are moving well for the present season of the year. An improved demand is again recorded for copper-bearing scrap, but there are no marked developments to announce this week, the trading generally being of a moderate nature and lacking the animation of the earlier weeks. The scrap rubber market is practically dead, and remains in the state of depression that has been evident during recent weeks. Following are the usual average of local dealers' buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	14 00	15 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 50
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

SPELTER AND COPPER FEATURE INGOT METALS

Toronto.

A somewhat firmer tone is again developing in certain ingot metals, noticeably copper and spelter. Antimony has reacted, with prices slightly easier on both domestic and primary centres. Prices are inclined to move upward on spelter, owing to certain developments in southern production circles. Lead is somewhat uncertain, but remains fairly firm. Buying of tin is light in volume.

COPPER.—The copper market is reported to be again gaining strength and prices at primary centres are fractionally higher. There has been a recovery in the call for export while domestic requirements are also maintaining a fair volume. There is no great activity, however, consumers evidently having in mind the series of recent fluctuations. Local quotations continue at 17 cents.

TIN.—Trading in tin is described as very dull, but in spite of this the market is fairly firm. Locally there is very little doing, there only being a small demand and consumers apparently have their requirements well provided for. Prices continue to hover around 34 to 34½ cents.

LEAD.—This market is stated to be somewhat uncertain, but the current tone is fairly firm. Consumption is on a steady basis, but light trading is evidently the order of the day. Local quotation remain at the $7.00 level.

SPELTER.—Spelter is quite firm, although the primary markets are n very active at present. Some advance in wage costs at zinc production centres coupled with the coal shortage are cited as causes for the slightly higher prices now appearing in southern quarters. Local quotations have not reflected the upward move, and still continue at $7.25.

ANTIMONY.—There is not a great deal doing in antimony, and some price concessions have been noted. The reaction continues, with prices slightly easier on both primary and domestic markets. Quotations locally hover between 6 and 7 cents.

ALUMINUM.—The aluminum market remains dull, with little demand in evidence. Prices are generally unchanged, the local level still being around 20 to 21 cents.

RODGERS BUTCHER KNIVES REDUCED IN PRICE

London, Ont.

A reduction of approximately 8 per cent. has been made in quotations governing the Joseph Rodgers line of butcher knives. Following are revised prices on butcher, sticking, skinning, and farrier knives.

BUTCHER KNIVES—

No. 1707 x 5", $5.40 doz. 5½, $6.00 doz.; 6, $6.65 doz.; 6*, $7.15 doz.; 7, $7.95 doz.; 8, $9.20 doz.; 9, $11.40 doz.; 10, $13.20 doz.; 12, $21.00 doz.; 14, $31.95 doz.

STICKING KNIVES—

No. 1707 x 6", $7.30 doz.; 6½, $7.80 doz.; 7 $8.55 doz.; 8, $9.85 doz.

SKINNING KNIVES—

No. 1707 x 5, $5.65 doz.; 5½, $6.25; 6, $6.90; 6½, $7.45; 7, $8.40.

FARRIER KNIVES—

No. 3102, $6.90 doz.; No. 3103, $6.90 doz.

NATURAL REACTION IN TURPENTINE MARKETS

London, Ont.

As realized in many quarters last week, the recent boost in turpentine prices was of a transient nature, and a reaction is now evident. Quotations at southern primary markets receded sharply from the season's record levels, owing to the meagre commitments on the part of the consumers, combined with the fact that the higher levels brought out offerings on a larger scale. Local prices are reduced ten cents per gallon, with some indications of further recessions in the near future.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 90
2 to 4 bbl. lots	1 89
5 gal. lots	2 05

ADVANCE IN COTTON WRAPPING TWINE PRICE

London, Ont.

Cotton wrapping twines have again been advanced in price, the new level being two to three cents per lb. higher. Following are revised quotations.

COTTON WRAPPING TWINE—

3 ply in balls, 54c. lb. 4 ply in balls, 57c. lb. 3 ply in cones, 50c. lb. 4 ply, in cones, 53c, lb.

London Markets

LONDON, July 13.—The volume of business done during the past week has been very satisfactory and compares favorably with this season last year. Hay fork rope and harvest tools are two of the biggest selling lines at present.

Price changes are not so numerous this week. Clarkes' heaters or foot warmers, M.R.M. brand of horse shoe nails and turpentine are quoted lower, while cotton wrapping twine advanced two cents per pound. Collections are reported as good.

ORDERS BEING PLACED FOR FALL AMMUNITION

London, Ont.

Orders are now being placed for Fall delivery for shell and cartridges. Following are the season's quotations on ammunition:

AMMUNITION—

Rim and Centre Fire Cartigs, list less 55 per cent. Empty Shells, List less, 30-20 per cent.

LOADED SHELLS—

Crown, Sovereign and Regal, 50-2½ per cent. off list. Canuck and Imperial, 50-5 per cent. off list.

STOCKS OF SNATHS AND SCYTHES GETTING LOW

London, Ont.

Exceptionally good sales are recorded for scythes and snaths this season, and stocks have now reached the condition of being very low. Unchanged quotations on these products follow:

SCYTHE—

Cast Steel, $15.00 doz. Clipper, $16.00 doz. Cutlery Steel, $17.00 doz. Brush $16.00 doz.

SNATHS—

Patent, No. 1 $17.00 doz. Pat. No. 2 $16.50 doz. Pat, No. 3, $15.00 doz. Brush $18.50 doz.

BOOKING PRICES ON CLARKE'S FOOT HEATERS

London, Ont.

Booking prices for next season have been announced on Clarke's foot heaters. The list quotations follow:

CLARKE'S HEATERS—

No. 5B. list, $3.75; No. 7C, list, $5.25; No. 7D, list, $5.75.

Brisk or charcoal, $1.30 per dozen. All less 25 per cent.

SUMMER CALL FOR FLY OIL UNDER WAY

London, Ont.

Fly oil now records the usual summer call, the demand for this product gradually expanding during the past week or two. Following are the unchanged season's prices:

FLY OIL—

Dr. Williams	Per Doz.
1 gal. cans	12 00
½ gal. cans	8 00
Crenoid	
1 gal. cans	12 00
½ gal. cans	8 00

Winnipeg Markets

WINNIPEG, July 13.—Wholesalers and retailers report a steady improvement in business and although orders are placed in small quantities yet the total volume is ahead of this time last year. Seasonable goods of all kinds are in active demand. The tone of all markets is showing a firmer trend. All lines of paints have shown an advance in quotations. Pig lead has shown an advance of a half a cent a pound and lead pipe has advanced one cent. Linseed oil and turpentine are ruling steady under a good demand.

HIGHER PRICES ON ALL LINES OF PAINTS

Winnipeg.

All lines of house, floor, flat, color, coat and wagon paints and varnish stains have advanced ten cents per gallon on the local market. Barn paint and shingle stains have been advanced five cents per gallon.

PRICES ON CORRUGATED SHEETS CONTINUE FIRM

Winnipeg.

A firmness in corrugated sheets which has been outlined in recent reports continues to remain strongly in evidence. A good demand is experienced for these products, and the tone of the market is upward.

ADVANCE QUOTATIONS ON HEAVY SLEDGE HAMMERS

Winnipeg.

Heavy sledge hammers five pounds and over have advanced and are quoted from $12.50 to $15 per hundred pounds.

PARIS GREEN IS IN GOOD DEMAND

Winnipeg.

There is a good demand for paris green and stocks are reported low in some quarters. Although there has been no further price changes the tone of the market is upward.

PARIS GREEN—

½-lb. per lb.	44½
1 lb. per lb.	42½
25 lb. drums, per lb.	40½

PIG LEAD PRICES RECORD UPWARD MOVE

Winnipeg.

Pig lead has shown an advance of a half a cent per pound and is quoted at 8½c. This is due largely to the heavy demand and shortage of supplies.

COTTON WASTES FIRM WITH PRICES STEADY

Winnipeg.

The cotton market is advancing and practically all lines of cotton goods especially wastes are maintaining a firm undertone. Quotations are unchanged but dealers expect an advance shortly. Current prices are contained on the market quotation pages.

STEADY TONE TO LINSEED OIL MARKET

Winnipeg.

Linseed oil continues to show steady tone. There has been a good demand and with supplies at a low level the market maintains a firm attitude.

The prices of $1.25 for raw, and $1.28 per gallon for boiled, remain the average prevailing levels.

TURPENTINE QUOTATIONS ON STANDING BASIS

Winnipeg.

Spirits of turpentine show no outstanding feature in the local market. Southern markets are fairly active and a firm tone prevails. The current quotation is unchanged at $1.65 per gallon.

Hamilton Markets

HAMILTON, July 13.—The decision to lower transportation charges on certain basic materials is an announcement of direct interest to the hardware trade in general, this development affecting to a more or less vital extent, the production costs of numerous hardware commodities. In discussing this situation with a prominent manufacturer of steel products, Hardware and Metal was informed that:

"The reduction of seven and one-half per cent. in freight rates on pig iron, billets and wire rods, which goes into effect August 1, will have a good effect, but the reduction is small and consequently will have a similar effect on the manufactured articles. Most manufacturers expected a greater reduction.

"The coal strike has, no doubt, affected the steel maker both in United States and Canada, but production of steel has been on a very fair basis and whether the coal supply will permit it to continue, is something which time only can tell.

"Business conditions are good in steel products generally, particularly so in Ontario and Northwest. Local conditions are favorable and there is considerable building and most factories are enjoying good business."

Paint prices have now joined in the upward swing, and this development is the more interesting in view of the fact that other previous changes in quotations on paints, varnish, enamels and sundries, have been in the nature of declines. However, it is stated that prices of raw materials entering into the production of these paint products have recently been increasing. Pig lead, linseed oil, and certain chemicals used in the manufacture of dry colors, have been steadily advancing of late. In conjunction with the higher levels of five and ten cents per gallon, however, paint producers announce a decision to absorb half of the sales tax, thus charging the retailers only 2¼ per cent.

A number of hardware merchants in the surrounding district and other Ontario points have advised Hardware and Metal that current business is good and becoming more active each month. In some cases figures for last year show a bigger turnover than during any of the war years. One retail firm reports an increase of $20,000 in turnover last year compared with the previous year despite the decline in prices. In practically each case where such improvement is reported it is not due to any local boom, but to energetic sales methods of the merchants and a more optimistic mental condition among buyers. It has been said that the depression was largely psychological, but whatever part psychology played in the matter it is but an indication of what can be achieved by merchants who take a lead in directing business into such channels where it is not easily deflected or stampeded by radicals.

Pittsburgh Markets

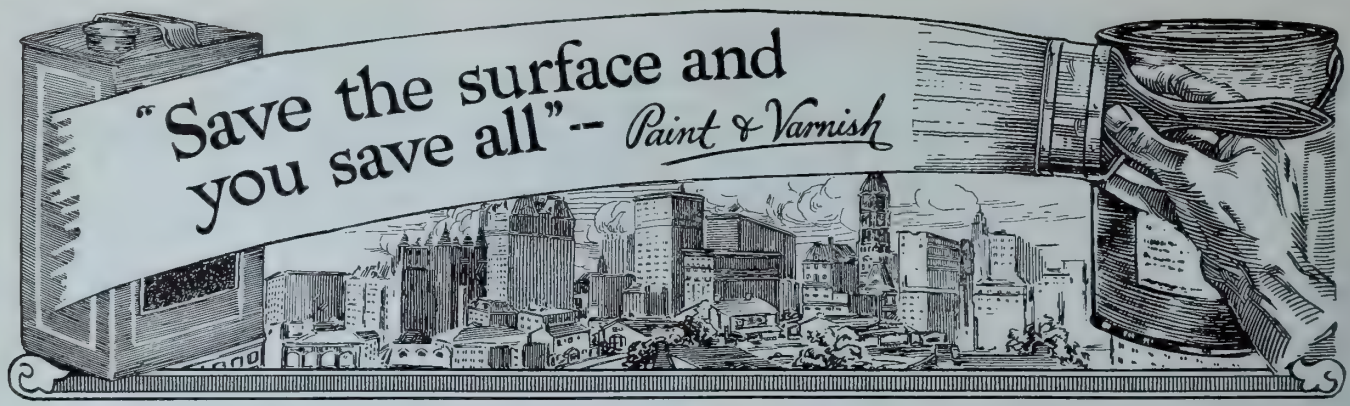
PITTSBURG, July 13.—Production of pig iron has been running at the rate of 30,000,000 tons a year since the first of this month, against rates of 25,000,000 tons on April 1, and 19,300,000 tons at the beginning of the year.

Thus, during the first three months of the coal strike, the rate of pig iron production increased 20 per cent. and the furnaces are going strong, as production has been increasing continuously up to date. It is significant that additional furnaces have been blown in during the past two or three weeks. As it costs money to blow in a stack, this is rarely done unless a run of several months is assured, hence the evidence is that those who have lately blown in furnaces feel assured of a coke supply for an indefinite period. This means also that the attendant steel works are expected to have a supply of coal.

In other words, three months of the coal strike has allowed blast furnace and steel mill operations to grow and there is no menace for the future. If a shortage of coal is looked for the search must be made elsewhere than the steel industry. Thus far, moreover, consumers of steel have exhibited no signs of being short of coal or of curtailing their consumption of steel, for if they were in such a position they would be calling upon the mills to curtail shipments of steel to them, and nothing of this sort is occurring, buyers exhibiting as much desire for good deliveries on their recent orders as formerly.

The steel market has relapsed into dullness as it invariably does at this

(Continued on page 62)



Paint and Hardware in Group Selling

Stoves and Other Hardware Products Are Generally Replacement Proposition But New Business Can Be Secured in Paint and Varnish—Listing the Various Local Buildings to Appreciate Possibilities—Suggestive Selling Helps Move Paint

EDITOR'S NOTE. The Sales Managers' conference of the Paint and Varnish Industry held in Buffalo, N. Y., was productive of a number of very interesting ideas which should be helpful to hardware merchants in conducting their business in these products.

POINTING out that there are few other general lines of merchandise which offer such a wonderful field of opportunity in such a peculiar way and such an advantageous way as the paint and varnish business, Ernest T. Trigg stated:

"Take the hardware business: Suppose a dealer handling stoves or hatchets or hammers or axes or any other thing—sells a new stove when the one Mrs. Jones or Mrs. Smith has is burned out and she can't use it any more. It is a replacement proposition. He sells an occasional new stove to the new family that comes to town or the new couple that have been married and set up house-keeping, but generally speaking it is replacement, and if the dealer sells a stove to some one he hasn't before, then he is taking that piece of business away from some other dealer that has previously sold her.

Paint is New Business

"So he just gets his increase by taking it from somebody else. The dealer does not have to do that in the paint business. All he has to do is to go out into his own community and get some of the business that nobody to-day is getting. Some of that three dollars' worth of business that is out there for every one he is getting now."

Showing how he had assisted Canadian dealers to get an idea of the possibilities for paint and varnish in their communities, Mr. Reiffenstein, Brandram-Henderson Co., stated:

"We take this viewpoint with the hardwareman, that the more hardware he can sell in the community the more paint he is likely to sell, and the more paint that he is likely to sell the more hardware he is likely to sell. Our point is this: We want to get those men to be better merchandisers in the community. I myself go to the city clerk or the assessment commissioner of the town and get some idea of the population, the number of homes and buildings, the tenant occupied houses and the owner occupied houses and then we start to figure on the possibilities. It is a revelation to both the dealers and the painters in that town to learn the extent of possible paint business. We also take in the buying power of the farmer, estimating that the farmer should buy during the course of the year at least from twenty to twenty-five dollars' worth of merchandise.

"We had a meeting in Belleville, Ontario, in which our vice-president took the opportunity of pointing out the possibilities. He said, 'If you have a man come in to buy hinges for a door, suggest to him to buy a lock or something of that sort.'

"This particular clerk left Belleville at two o'clock in the morning from his home. I dropped down there before nine o'clock the next morning. He was waiting on a farmer. He said to me, 'Do you see that farmer just going out? Do you know what the big fellow said last night about suggestive selling? I thought I would try it out. This farmer came in for two sets of strap hinges and I said, 'You are putting up a door?' He replied that he was. 'Well, how about a clasp for your door?' He said he would need one.

" 'What about a lock for this door?'

" 'I need a lock too.'

"That man only had enough money to pay for the hinges, but he has gone down to the bank to draw out money to pay for the hasp and lock."

"That shows that this personal contact and teaching the dealer to be a better merchandiser through our own personal contact with him does have an influence on him. We had a meeting in Hamilton. A few days later we got a letter from a dealer for quite a large mail order and he put down in the corner, 'You can give the credit of this order to your meeting in Hamilton on Wednesday night.' The salesman covering that particular territory came in on the following Saturday and he pulled out several acknowledgments and said, 'There is the result of the meeting that we had in Hamilton.' "

Basis for Save the Surface

Outlining the various fundamentals on which the whole ave the Surface campaign has been founded, Arthur M. East stated:—

"The backbone of the campaign has been educational advertising upon the necessity of protecting the surface of things by use of paint and varnish if they are to be preserved. This general subject has been dealt with from many points of view, such as, what neglect costs; the effects of weather; the loan value of well-kept property; the necessity of protecting not only property but lives from destruction by keeping structures like bridges well painted; the economy of keeping houses in good order and saving the expensive replacement costs; the sanitation and daylight saving resulting from interior painting and the advisability of purchasing manufactured articles, such as furniture and machinery which are properly painted and varnished by the manufacturers.

"We have a photograph of a bird's eye view of a small residential community with 1,100 homes. When you go into

"PERFECTO"—A beautiful finish for interior walls and ceilings, will not rub, peel or scale off. Manufactured in eleven subdued shades and white—Packed in neat air-tight cartons bearing an attractive label.

For Beautiful Healthful Homes

If interested tear out this page and place with letters to be answered

that village, you find out of every five houses one needs paint and it is very definite on the outside. One out of every five is well kept. The possible market is there. You can go down any street in any community and you will find that holds true. In that four out of five, the average house is a seven room house; it is the average type of home in the community. What is the possible paint market and varnish market in that home? Twelve gallons of paint for the outside of the house—two coats; eighteen gallons of flat wall finish for the walls and all rooms except kitchen and bath—two coats; three gallons of varnish for hardwood doors; one gallon for floor finish; two gallons to paint the rest of the floors; three gallons to paint the door frames and base-boards throughout the house; four gallons enamel for bathroom and kitchen; $3.00 worth of putty; $2.00 worth of sandpaper. There is a dollar and cents value to that by the dealer which can be figured out by each salesman according to his own prices. The average house means so much money for the hardware dealer and should be considered as such."

Many False Reports About Linseed Oil

Current Reports That U.S. Emergency Tariff is Sending Flaxseed From Canada to England and Oil Subsequently Entering U.S. at Prices Lower Than Domestic Product Characterized as "Fiction"

RECENT reports to the effect that owing to the U. S. emergency tariff, flax seed which was previously imported from Canada is now being diverted to England and Russia, crushed there, and the oil shipped to the United States at prices below that of the domestic product, are characterized as "pure fiction" by the head of one of the largest crushers in the Dominion.

"Canadian flax seed," it was stated, "which previously went into the U. S. market, is still being shipped. While the quantity averaging around one and a half million bushels per season appears large to the average Canadian, yet this amount is only a very small part of the total volme of flax seed required per year in the United States markets, which reaches around thirty million bushels annually.

"Although certain flax seed from this country is no doubt going to England, this condition represents nothing unusual, such shipments are required for seed purposes."

In reference to Russia, it was stated that there is practically no oil coming from that country, and there has not been for several years. Previous to the war, a very high grade of seed came from the Balkan states, but this was only distributed abroad for special purposes. On the other hand, it was suggested that the fact of English oil being recently shipped into the U. S. in larger quantities than was previously the case, may have been the primary reason for the rumors and reports refered to.

"It is not a question of price competition, but a matter of seed supply," further observed this official. "Consumers in the United States have turned to English crushers on a larger scale than was previously the case, merely because the quantities of oil available in the U. S. markets was not sufficient to satisfy the current demand. The seed for this supply came from the Argentine principally, while England also imported large quantities of flax seed from Argentine and the balance of her requirements from India."

Referring to the Canadian linseed oil situation, it was stated that prices show a firm undertone, which is attributed to consuming interest in fair volume combined with the support of the flax seed markets. Seed prices are considerably firmer, and the quotations ruling on oil at the present time were considered moderate in proportion. That a shortage of seed, and consequently restricted output of linseed oil, may be apparent before the new crop becomes available in September, was thought a possibility. While minor fluctuations may be apparent in both seed and oil prices, it was not expected that costs would recede to any appreciable extent, and during the ensuing weeks, prevailing levels on linseed should be fairly well maintained.

SIMMS 50TH ANNIVERSARY AND ANNUAL CONVENTION

The 50th anniversary and annual convention of the I. S. Simms & Co., Ltd., brush maufacturers, will be held next week at the head office, St. John, N. B. All branch managers and distributing agents will attend the sessions opening on Monday, July 17.

MANY NEW OIL AND GASOLINE SUPPLY STATIONS

London, Ont.—Hardware merchants are watching with a little more than particular interest the developments here in connection with the effort to secure the gasoline and oil supply business, not only of London, but in Western Ontario. The Imperial Oil Company is busy with a large extension to its buildings in East London and has secured the V, one of the best locations in the city for a large new gasoline station.

Work is in progress on a splendid new gasoline station on Dundas St. for the Pure Gasoline Co., and out in East London, alongside the C. P. R. tracks big receiving tanks are being constructed. The company has also secured locations in St. Thomas, Ingersoll, Brantford, Guelph, Stratford, Kitchener, Owen Sound and is arranging for others. Modern gasoline stations are to be built.

This week the Shell Oil Company has secured a site for a large new receiving station adjoining the C. P. R. on the interswitching line and will proceed at once with new receiving equipment

CUSTOMS RULING REGARDING CRUDE OIL

Ottawa.—A sub-committee of the cabinet is at present engaged in deciding an important customs ruling made against the Union Oil Company of the United States at Vancouver recently. The company in question has for some time past been shipping "crude" oil to British Columbia for refining purposes. There is no duty on crude oil coming to Canada, but there is a duty of 1½ cents per gallon upon oil which is not crude. The customs officer at Vancouver recently charged the duty upon a carload of the company's product holding that there had been extracted from the said oil, before export, certain properties and that, in short, it had been "treated." Inasmuch as there were other companies sending to Canada oil which was actually crude and untreated, he contended that the free import of the company's productions constituted an unfair competition for other concerns.

The company appealed the ruling of the customs department but the ruling was upheld. An appeal was then taken to the Canadian privy council and a subcommittee, consisting of Hon. Messrs. McKenzie, Robt. King and Sinclair, is now considering the matter. The question is one of wide importance.

TOTAL OF STEEL BOUNTIES IS OVER SIX MILLION

Ottawa.—During the fiscal years from 1895-6 to 1911-12, inclusive, a total of $6,706,990 was paid by the Dominion government in bounties on steel, and $2,868,122 on manufactures of steel, according to a statement tabled in the House of Commons by Hon. J. A. Robb, Minister of Trade and Commerce, in answer to question by G. G. Coots (Progressive, Macleod). Those totals were divided as follows:

Years ended	Bounties on Steel	Bounties on Steel manufactures
June 30, 1896 ...	$ 59,499	nil
June 30, 1897 ...	17,366	nil
June 30, 1898	67,454	nil
June 30, 1899 ...	74,644	nil
June 30, 1900 ...	64,360	nil
June 30, 1901 ...	100,058	nil
June 30, 1902 ...	71,431	nil
June 30, 1903 ...	729,102	nil
June 30, 1904 ...	347,990	$ 15,381
June 30, 1905 ...	676,318	221,324

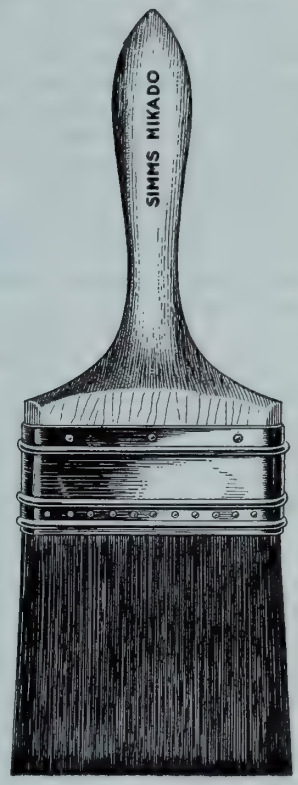
TRADE SIMMS SET IN RUBBER MARK

For 57 Years We've Been Painting This Sign



57 years ago we began to paint the name "Simms" in the public eye. It meant little to painters at that time because they had never tried the product on which it was stamped.

Year by year it has earned its recognition as the symbol of quality products until to-day it is known by painters throughout the length and breadth of Canada.

It is the embodiment of 57 years of successful manufacture of quality brushes.

It is a promise that any brush on which it is stamped will make good —or we will.

Weekly Paint Markets

Montreal

MONTREAL, July 13.—A rumor is noted on the local paint markets to still further increase the prices on paints, varnishes and white lead, and for the manufacturers to absorb the entire sales tax of 4½ per cent. Undoubtedly some unsettlement exists as to the effect of the recent decision to absorb half of the tax, and much speculation is evident regarding the possibility of this situation being further considered by paint producers in general and some revision of either sales tax ruling or paint quotations being announced. It is observed that the origin of this latter development was caused through certain increases, which, it is claimed, do not allow manufacturers to absorb any portion of the sales tax and still make a fair margin of profit. Whether this feeling is general, could not be ascertained. That wholesalers are still being charged the 2¼ per cent. by manufacturers, however, is understood to be the general practice at present, this decision placing the jobbers in the position of also absorbing half of the sales tax, in order that both wholesalers and manufacturers may be uniform in only charging the retailer 2¼ per cent. on invoices.

Other developments in the current paint market are of a minor character this week, both turpentine and linseed oil being unchanged in price, although some range is noted in the quotations between the various distributors. Window glass prices are also steady. Stocks of Paris green are reported at very low levels, and the demand for insecticides of all kinds is described as of phenomenal proportions this season.

WINDOW GLASS PRICE AT UNCHANGED LEVELS

Montreal.

Belgium manufacturers of window glass have announced an increase of five per cent. The Belgium franc, however, is down to a point where this advance will not likely effect the market here. This discount is unchanged at fifteen per cent. off the $6.00 list for ordinary business, and the demand, both in the city and outside, is about the same as last reported.

STOCKS OF PARIS GREEN AT VERY LOW LEVELS

Montreal.

Owing to the abnormal demand this year for insecticides, the amount of Paris green shipped out this year by the manufacturers has been phenominal. Most of the stocks have been depleted, but one or two of the manufacturers have been able to get out some additional tonnage, and are still receiving orders for immediate shipment.

LINSEED OIL PRICE ON STEADY BASIS

Montreal.

There is practically no change in the linseed oil situation, and prices remain unchanged from last week. The stocks continue to remain very low, with manufacturers operating full time to keep up with the demand, which has continued to be quite heavy. The indications are that the following prices will remain firm in the immediate future.

LINSEED OIL—

1 to 2 barrel lots, per gal.....	1 13	1 15
5 to 8 barrel lots, per gal......	1 11	1 13

Less barrels, add 10 cents per gallon.

EFFECT OF TAX ON PAINT PRICES

There is considerable speculation in paint circles as to the ultimate effect that the new sales tax will have on prices.

In last week's issue of HARDWARE AND METAL certain advances were reported in the prices of white lead, paint and varnishes. Manufacturers stated that this move was caused by the increased cost of raw materials, and in consequence left such a small margin of profit that it did not allow them to absorb any portion of the sales tax of 4½% to the retail trade.

Jobbers were in the position of being able to sell to merchants and only charge a sales tax of 2¼%, which created competition which was totally unsatisfactory from the manufacturers' point of view. It became incumbent, therefore, upon producers to also absorb 2¼% of the sales tax, and after the advances were put into effect last week, it was decided to charge the jobbers with the 2¼% sales tax, and the retailers were to be charged 2¼% sales tax, with the manufacturers absorbing the other 2¼%.

Probably by this time next week the paint manufacturers will have had this matter thrashed out thoroughly and arrive at a definite decision as to exactly what action they will take in regard to the charging or absorption of the entire or a portion thereof of the sales tax.

SORTING ORDERS NOTED IN PUTTY MARKETS

Montreal.

There apparently is no likelihood of any reductions in the prices of putty. owing to firm tone of the market and the recent advances in other lines. There are a few bookings reported, but at present most of the business coming in is for sorting up purposes.

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00

RANGE IN TURPENTINE PRICES: SALES QUIETER

Montreal.

While turpentine orders were accepted last week at a price as low as $1.55 the prices this week have stiffened somewhat, although there is still a variation in quotations among the distributors. The offerings from the south are more free and the demand continues to be very fair. The high prices of turpentine, however, have had the effect of stimulating the sales of "substitutes," and which naturally affect the volume of sales of turpentine to some extent. Prices are as follows:

TURPENTINE—	Imp. Gal.	
1 barrel lots	1 63	1 85
2 to 4 barrel lots, per gal. ...	1 59	1 80
Broken lots	1 70	1 85

Toronto

TORONTO, July 13.—Uncertainty regarding the future trend of paint prices constitutes the premier development in the current markets for colors, varnishes and paint products generally. This has been caused by the new sales tax developments and the announcement that paint manufacturers had decided to absorb half the amount chargeable on invoices to retailers and only pass on 2¼ per cent., instead of full 4½ per cent. Certain increases in costs of raw materials entering into the production of paint products are cited as the principal reasons for the higher quotations, and in some cases it is now stated that producers are hovering between a decision to either absorb the entire amount of the sales tax, or else pass along the total amount. This latter development is attributed to the announcement on the part of some manufacturers that the

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand we are creating for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.

It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

Comes ready for use in 1- and 5-gallon cans, ½ barrels (about 20 gals.), barrels (about 40 gals.), and steel drums (43 gals.)

TORONTO PAINT MARKETS

(Continued from page 60)

new higher quotations were not of sufficient extent to take care of the increase in raw materials and at the same time to absorb half of the tax. Whether some further decision will be announced in this respect in the near future is difficult to determine, local paint manufacturers stating that nothing of this nature has been generally considered, although one producer admitted that the situation might develop to where some arrangement may be decided upon. It is stated that the increased price levels on paints, varnishes, shingle stains, etc., have been generally adopted, although former quotations are still on the market in some instances.

Turpentine Again Recedes

Another drop of ten cents per gallon in the local quotations on turpentine, indicates the natural re-action of this product from the high levels recently recorded. Trade is somewhat quieter in volume, however, and as a consequent the situation regarding supplies is not quite so urgent. Producers maintain firm selling ideas as to the future trend of prices, however, and a considerable range is noted in domestic price levels. Linseed oil prices remain unchanged this week, and while the movement is only of moderate proportions, the firmness of flax seed has generally served to maintain the oil markets.

Meeting Glass Prices

The current situation in the window glass market attracts more than usual attention, due to the variance in price levels between eastern and local distributing centres. That many wholesale houses have been meeting the five and ten per cent. discounts quoted by eastern distributors, is now generally admitted, while owing to the price advantage of this nature, the territory where the lower scale of prices are obtainable is enlarging rapidly. That trade conditions do not warrant any lowering in price levels at the present time, is the general opinion of many glass importers and distributors who point out that Belgian glass makers have recently announced an increase of approximately five per cent. The origin of the discounts which are openly announced in the Montreal market is ascribed to the importation of Checko-Slovakian glass at quotations lower than the average domestic level, and eastern distributors were more or less forced to meet this situation. It is further stated that firm efforts are being made towards a settlement of local conditions as the strict maintainance of the $6.00 box list would result in loss of business to many wholesale houses through price competition of the nature outlined, while shading quotations to meet outside levels is described as a decidedly unsatisfactory situation. Other glass houses continue to report the strict adherence to the list given on the current market quotation pages, with the usual discount of five per cent. on lots of 25 cases or over. According to other reliable sources, however, a distinct range is noted in the quotations obtainable on the current local market.

WIDE RANGE NOTED ON LINSEED OIL PRICES

Toronto.

While some variance is noticeable in the local prices on linseed oil, no changes have been announced in current levels. The range of quotations hovers between $1.10 and $1.20, with the latter figure being more general. Flax seed is described as on a fairly firm basis and while some fluctuations have been recorded in seed prices, the quantity of seed available coupled with the fact that new crops will not be on the market for some time contributes towards the strong undertone of prevailing seed markets. This situation is reflected in oil, and the opinion prevails in certain quarters that linseed prices will hardly fall very far from their present levels, and only quietness in trading would cause declines, of any, owing to the relative position of seed. Following are the average quotations recorded on the local market:

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrel lots ...	1 15—1 20	1 18—1 23
3 to 4 barrel lots	1 14—1 19	1 17—1 22
6 to 9 barrel lots ...	1 12—1 17	1 15—1 20

TURPENTINE PRICE DROPS ANOTHER TEN CENTS

Toronto.

A recession of ten cents per gallon has been announced by local distributors in the price on turpentine. A fairly wide range, however, is still noticeable among the different distributors, quotations varying from as low as $1.65 per gallon to the average level of $1.80. Fluctuations have been recorded in prices at southern producing centres, which have resulted in a variety of opinions regarding the trend of quotations generally. Local stocks are described as still somewhat scarce, however, and while conditions are slightly easier owing to depleted volume of trading in turpentine—a natural result of the recent price developments—yet a firm undertone is noted in both domestic and primary markets. Reports from Savannah indicate that producers look for the maintenance of price levels somewhere near the current quotations and at least do not look for any marked recessions for some time. Principal reasons advanced for these opinions are the strength of the turpentine situation in view of the world's needs and the under production for 1922. Local quotations follow:

1 barrel lots	1 70	1 80
2 to 4 barrel lots	1 69	1 79
5 gallon lots	1 85	1 95

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

REPORT SOME SHADING OF BOX GLASS LIST

Toronto

While no price changes on window glass have been announced locally, the prevail ng discoun s off the box list which are being generally quoted in eastern centres, has been responsible for the development of an easier tone on the local market. Distributors continue to quote the net $6.00 list, with the usual five per cent. discount for quantities of 25 cases and over. Some shading, however, is apparently in evidence, one distributor admitting to Hardware and Metal that they had lost one or two orders through strictly adhering to the list quotations. Current trading in window glass is described as satisfactory for this season of the year, and with the marked increase in general building activities recorded this year, the outlook for Fall glass trade is considered bright.

PITTSBURG MARKETS

(Continued from page 55)

time of the year. There is some trading, particularly in tubular goods, sheets and wire products, but in general the market is dull. Mills assert that the dullness is attributable to their own position, in that they are unwilling to sell freely, and state that buyers would place contracts or shipping orders for later delivery if given the opportunity. There is some question about this however. Very likely many buyers would place blanket contracts if they could do so along the lines followed by the market before the war, when contracts were hardly more than options and when a buyer did not wish to accept deliveries he could avoid responsibility by refraining from placing specifications. As to actual orders, the probability is that consumers do not care to buy much more than they already definitely ordered.

Prices More Regular

The average manufacturing consumer has covered for steel against the orders he has actually in hand or in immediate prospects for his manufactured goods but he in turn must await the advent of autumn to see how business is going to turn out late in the year.

The steel mill position is a sound one, for the time being, in that all the mills are comfortably filled with actual business for approximately two months. In some lines, the obligations extend farther. In merchant bars, the mills appear well sold up through September. In sheets the leading interest is nearly filled for three months, while independents probably have an average of two-thirds of their prospective output sold to October 1. They could have sold more had they not quoted prices above the regular figures, adhered to by the leading interest. There has been a tendency among independents to recede from their position and quite a number are now quoting all grades of sheets except automobile sheets at the regular prices, 2.40c for

A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*

VIKO

Aluminum Ware is a line every hardware merchant can be proud to sell—it is durable, handsome in appearance, and there is a VIKO utensil for every kitchen need.

You can obtain prompt shipments from our large stocks right here in Montreal.

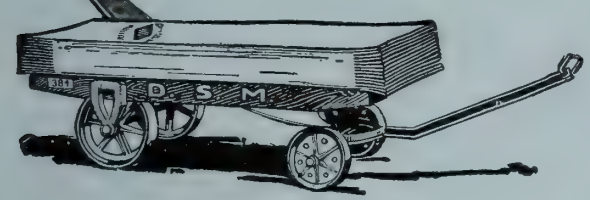
TINKER TOM'S TALKS.

No. 367

Next Week—Look in this space for the correct tonnage in the Premier Galvanized Sheet Production Contest; also the names of the three winners.

Next Quarter—If you want to be a sure winner in August, September and October order your Premier Galvanized Steel Sheets from any jobber now. The demand will be very large from present indications. Get in line early.

TINKER TOM

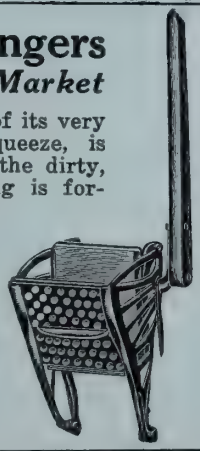


MADE IN PREMIER CANADA

White Mop Wringers

Quick Turnover-Wide Market

This wringer sells on sight because of its very evident merits. Has powerful squeeze, is built to last for many years. All the dirty, tiresome drudgery of hand wringing is forever done away with. Several family and janitor sizes. Send for catalog. Your jobber's salesman will take your order for White Mop Wringers. Write us for illustrated circular of complete line. **Made in Canada**



WHITE MOP WRINGER CO.
OF CANADA
Factory: PARIS, ONT. Office: FULTONVILLE, N.Y.

The British office of HARDWARE AND METAL is located at the office of the MacLean Publishing Co. of Great Britain, Limited, 88 Fleet Street, London, E.C., E. J. Dodd, director.

ALL OF A KIND

Our products are the best that can be made and are designed for service.

Ice Picks are made of special tool steel — hardened needle point—the bar extends through the entire length of handle, and is held secure by a rivet through the steel ferrule. Can't break it.

Brad Awls, Tinners' Awls, Scratch Awls, Claw Tack Pullers, etc., are hammer forged from tool steel, carefully tempered. Ferrules are nickel plated, and handles finely finished.

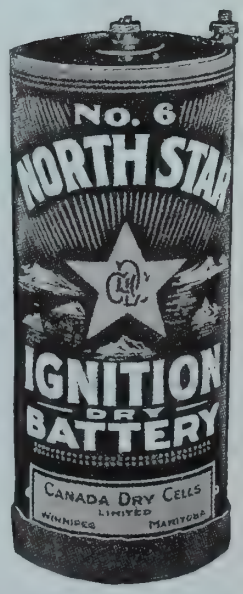
Here's the degree of faith we have in

NORTH STAR BATTERIES

Any North Star dry cell or multiple that fails to give the user entire satisfaction will be replaced by us without charge or questioning.

Every North Star battery passes our most rigid inspection before leaving the factory and is therefore full powered and dependable.



The demand for North Stars makes them profitable to sell. Experienced battery users prefer them for their superior qualities. Let your customers know that you sell North Star Batteries.

Your jobber can supply you.

Canada Dry Cells Limited

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED—TWO EXPERIENCED HARDWARE clerks, one with good paint experience, the other with sporting goods experience, who is a good mixer. We do not require specialty men, they must be good general hardware clerks as well (for Western City). Apply stating age, nationality, experience, wages required, married or single. Box 189, Hardware & Metal.

SITUATIONS WANTED

POSITION WANTED BY EXPERIENCED hardwareman. Or would consider position on road. Box 394, Hardware & Metal.

POSITION AS HARDWARE CLERK BY young man of 22. Six years' experience in both buying and selling of shelf and heavy hardware. Apply Box 118, Hardware & Metal.

WANTED

WANTED—HARDWARE BUSINESS IN LARGE village or town. Stock from eight to twelve thousand. Box 712, Hardware & Metal.

WANTED — WELL ESTABLISHED HARDWARE business stock about $12,000. Box 711, Hardware & Metal.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

MANUFACTURERS' AGENTS

FRANK RAW & COMPANY, BROKERS, HAVE by intensive missionary work established several lines in B.C. Similar service is available to one or two more manufacturers. 198 Hastings St., West, Vancouver.

FOR SALE

FOR SALE — TINSMITH AND PLUMBING business in good size village, good territory surrounding, good stock and machinery about $3,000. Box 647, Hardware & Metal.

"VISIBLE" FIVE GALLON GASOLINE PUMP with electric pump complete. Guaranteed in first-class condition. Very reasonable price. Apply, Montreal West Automobile Service, Montreal West, Quebec.

"150 ACRES, GOOD BUILDINGS. HOUSE has bath and furnace, convenient to highway. Vicinity of Hamilton. Change on good hardware business. Apply Worthington Real Estate Brokers, Sun Life Bldg., Hamilton.

THE OLDEST AND MOST THOROUGHLY established Iron and Hardware business in a flourishing City in Western Ontario. Wholesale and Retail. It is a growing business. Address 125 Queen St. North, Kitchener, Ontario.

HARDWARE FOR SALE—TOWN OF GLENcoe, 30 miles from London. Stock and fixtures about $6,000, one opposition. Sickness forces me to sell. This is an A1 opportunity. If interested get on the train and come. L. O. Charlesworth, Glencoe, Ont.

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

If interested tear out this page and place with letters to be answered

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

A Trim That Trims All Others

"Your window trims are the most strikingly colored, attractive and effective trims I have ever seen." That is the frank opinion of a man who has spent his whole life studying merchandising.

Have you seen one of these Diamond Ware or Pearl Ware trims? There are four—two Diamond, two Pearl. They are going very fast, these trims. To make sure of getting one write at once or place your order with our traveler.

Send For Free Price Tags

Our stock of free price tags is also getting alarmingly low, the chief reason being that merchants all over Canada are finding them most useful and effective not only in the store but for use in window displays. We believe that the effectiveness of a window trim is increased 50% by having a price tag with price clearly marked on every utensil in the display.

Some very valuable pointers on window and store dressing with several diagrams of good window lay-outs are contained in our little Manual of Selling Points—"Helping You to Make More Money." Free, of course! Send for it right away.

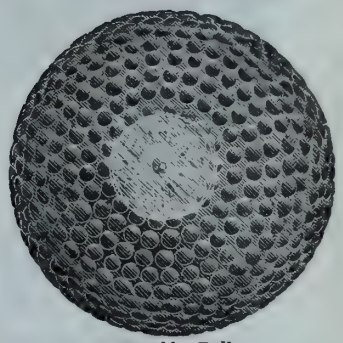
'RICE LEWIS' NEWS

Forgan Clubs

Act Quick to Get In on These Exceptional Values



Bramble Ball

IN GOLF BALLS—We have a real leader in an all-round good ball, **Martin's Birmingham Z.B.Z., Zodiac Bramble Ball,** at $3.60 to the trade. This is really an exceptional buy and these prices can only be quoted as long as the stock lasts.

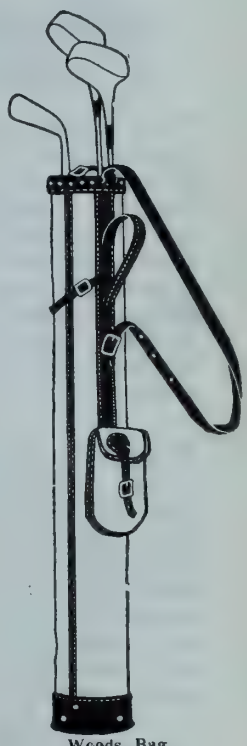
IN GOLF CLUBS—We have been fortunate in securing the output of an English factory of golf clubs at a price considerably below any price quoted in the past few years. We can supply this club in the driver, brassie, midiron, mashie and putter at $2.60 each.

Our stock of **Forgan Golf Clubs** has arrived, consisting of drivers, brassies, driving irons, midirons, driving mashies, cleeks, jiggers, mashies, mashie niblicks, wood putters, regular steel putters in three types, the heavy end, the goose neck and the straight putter. Write us for quotations.

IN GOLF BAGS—Our Sunday bag is a 4″ bag, brown canvas, leatherette trimmed, iron ring with a good substantial canvas strap and a good size golf ball pocket at $1.10 each.

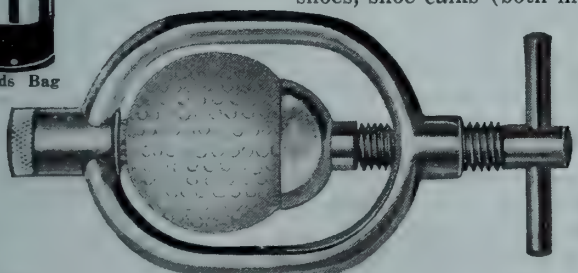
Our other bags run in prices up to $10.00. They are the **Burhke** patent aluminum bottoms, steel stayed golf bag which is to-day so much in demand. We carry them in 4½″ and 5″ with and without hood, white, brown and olive colored.

In our golf department, you will find the Captive Golf Ball, golf shoes, shoe calks (both in rubber and steel), golf ball enamel, golf stockings, game of clock golf, etc.



Woods Bag

Woods Bag



Fisher Golf Ball Marker.

THE FISHER GOLF BALL MARKER answers the cry of the golfer for some way in which he can identify his own golf balls. Each marker is supplied with three initials. It has just been placed on the market and is going to be a real seller. Every golfer in Canada should have one of these at $1.50 each.

No Guess Work Here—

Recommendations the Result of Exacting Tests by Lubrication Engineers of Recognized Ability.

Every recommendation on the Gargoyle Mobiloil Chart is arrived at by a most careful and searching engineering investigation. Throughout the year, the Gargoyle Mobiloil Board of Automotive Engineers are gathering data and statistics about the new models of automobiles which are being designed, and are experimenting with present and past models.

These men meet each year and jointly consider and discuss the data and engineering facts which have been secured through their investigations. At this annual meeting of the Board, the correct grades of Gargoyle Mobiloil for new makes of cars are decided and recommendations for old models checked up and verified.

A striking single proof of the recognized ability of these Lubrication Engineers: They are repeatedly consulted by automobile manufacturers in regard to engine design. Important engine features and improvements have often resulted.

Using the grade of Gargoyle Mobiloil recommended by the Chart will insure:

(1) Free distribution to every frictional surface.
(2) Full compression.
(3) Fuel economy.
(4) Oil economy.
(5) Greatest freedom from carbon.

Lubrication requirements of each engine are scientifically met by the quality, the body and the character of the oil recommended. There is no guess work permitted in making it up and all guess work is eliminated for dealers who are guided by the Chart of Recommendations in selling oil.

Let this Chart help you to build up your lubricating business. It is the recognized guide to scientific automotive engine lubrication.

GARGOYLE

Mobiloil

Make the chart your guide

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

NAMES OF AUTOMOBILES AND MOTOR TRUCKS	1922		1921		1920		1919		1918

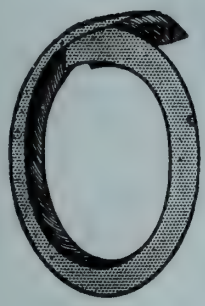
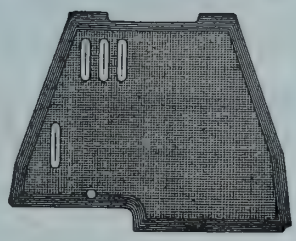
He told us, "YES!"

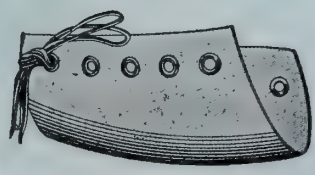
"'Gutta Percha' Accessories are not only the 'Line of Least Sales-Resistance'—but the 'Line in Greatest Public Demand!'"



Reliners



Heatproof Mats (for Fords)



Lace-on Boots

Sealtite Patches

"We can't afford obscure lines in our store. Even if our salesmen did argue customers into accepting them, it would consume valuable time and so increase our selling costs too much. That was good enough salesmanship in old times, but in these days of cost-accounting, we know that the quick, easy sales of 'Gutta-Percha' Products speed up the turnover of our invested capital and give us a big, annual net profit. Customers ask for 'G.P.' Products by name and it is quickest, most economical and profitable to give them what they want. 'Gutta Percha' merit backed by 'Gutta Percha' advertising is a paying combination for any merchant to sell."

And They Are Back to Stay

Recall the iron frying pans hanging by the range in the old days, and your mother often said no pans could equal the iron ones and she proved it too before dinner was over.

Pans of other metals have had their brief life, but the modern housewife is now insisting on grey iron.

Are You Profiting by this Demand ?

The Smart people in Brockville are the largest Canadian manufacturers of grey iron cooking utensils.

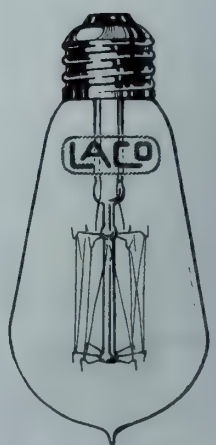
Better Lamps mean Better Business

You can easily interest your customers in LACO LAMPS—even while you're wrapping up the articles they have just bought. For every householder is interested in better light at less cost, and the LACO LAMP provides you with an opportunity to talk about just this point. When you state that the cost of maintenance of

LACO TUNGSTEN LAMPS

or of any lamp, depends on the **actual,** rather than the **marked** wattage or electrical power, you might explain that the wattage increases as the diameter of the filament increases and that it is necessary, therefore, that the utmost care be taken in drawing the filament to an even thickness, which should not exceed that of a hair. An uneven filament produces an uneven light. LACO LAMPS are manufactured with the most perfect accuracy and the purchaser may be assured that they are not made merely to burn current but to give a maximum of light.



LACO LAMPS LIVE THE LONGEST

Our Salesman will gladly show you the entire proposition. Write to-day.

Show Your Customers the Type H Electric Iron's Points of Leadership

Westinghouse Type H Iron

Feature the Type H. Iron—It is every inch a leader from the tip of its shiny beveled point to its handy grip plug.

The beveled edge, an exclusive feature, permits the user to look directly down on the work; the broad ironing surface enables a greater volume of ironing to be handled more quickly; the ironing surface heats quickly and evenly; the plug and handle are specially designed for greatest convenience. You will find that these are features women are looking for in irons.

Point them out to-day and you will reap the benefits in an increasing volume of sales.

The Ansonia *Sunwatch*

The Ansonia Sunwatch is a combination Compass and Sun-Dial, in a thin, satin-finished brass case, with longitude, latitude and variation tables on inside of cover, giving corrections for all parts of Canada. (The American Sunwatch is not adjusted for Canadian longitude and latitude.) The Compass is accurate and reliable, and the Sun-Dial tells the correct time anywhere in Canada.

Invaluable to motorists, hunters, fishermen, canoeists, Boy and Girl Scouts, guides and all outdoor people.

It sells for $1.50, and is so attractively made that it is bought on sight.

Strathcona Pattern

Teaspoons
$6.00 per dozen

STRATHCONA is a new Rogers Anchor brand pattern of unusual beauty and distinction that will quickly appeal to your discriminating trade.

Rogers Anchor brand is priced midway between the costly extra heavy plate and the low priced ware.

It has a base of fine nickel silver; it is heavily plated and staples are reinforced with still heavier plate at all points subject to hard usage.

Strathcona has a beauty and dignity of line rarely found in anything but sterling silver. And this combined with the long wearing quality and reasonable price of Rogers Anchor brand makes Strathcona the most attractive value you can offer your trade today.

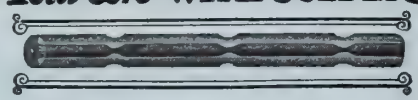
KESTER
Acid Core WIRE SOLDER



THE daily need for solder is apparent the year 'round on the average farm, but its neglected use is due to the messy method of using ordinary solder and flux, which has little appeal for the busy farmer.

Your next call for either solder or flux is your chance to make a satisfied and permanent customer. Take a spool or carton of Kester Acid Core Wire Solder and say to him, "this solder requires only heat to do *neat, rapid* and *permanent work.*"

Explain also, how the extensive use of solder prolongs the utility of various equipment.

Then *show him* how this solder contains tiny pockets, which supply the flux at the proper time.

Tell him, "Kester comes coiled in one-pound cartons or on one-pound spools, but it is more economical to buy it on the five or ten pound spools."

When he has indicated his choice, then you've made a "Kester Sale"—*clean, quick and profitable.*

Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

THERE'S FOUND MONEY IN DOMINION WALL BURLAPS

Do you know that there is an enormous increase in the demand for Dominion Wall Burlaps? This attractive, strong wall covering has been found so practical, so enduring and is now so moderately priced that it is regarded as a necessity—not only in the better residences—but modest homes as well.

Decorative Wall Burlaps have come into their own, as they were bound to do—they are such a complete finish to a room, besides being sanitary, comfortable looking and easy to apply.

It is therefore an actual loss of found money if you do not keep a goodly supply on hand. In fact, no manager of an up-to-date department would consider his stock complete without a merchandise so essential as Decorative Wall Burlaps.

Decorative Wall Burlaps have gone down in price—hence they are quick sellers. Easy to handle, they require but little space. Burlaps allow you a good margin of profit.

If you are out of Decorative Wall Burlaps get in a fresh supply without delay.

Write us for selling helps, complete information as to prices, etc.

Far Reaching Taxation Changes Likely To Be Made in the Very Near Future

An Authority Close to the Administration at Ottawa Gives Hardware and Metal Insight Into Probable Governmental Action on Taxation Matters—Burden on Certain Trades May Be Relieved By Abolishing Some Taxes and Increasing Sales Tax

A CONSIDERABLE change in the present system of taxation, of interest to all branches of the hardware trade in Canada, is imminent according to information secured by Hardware and Metal from a source usually well informed which in the past has correctly forecast pending governmental action some time in advance, due to a close association with the administration.

The probable changes are not likely to be so much an alteration of principle as an extension of certain prevailing policies and the abolition of some other forms of taxation which do not raise sufficient revenue in proportion to the expense of their administration.

Best Principle

After experimenting with various taxes such as those on luxuries, business profits, etc., it has generally been agreed that the Sales Tax is the best from the standpoint of principle, though there is admittedly much confusion in the application of this tax which may be avoided by subsequent changes. Thus, Hardware and Metal is advised that it is the intention to extend the Sales Tax and have it raise sufficient revenue to allow the discontinuance of certain other minor tax impositions now in force. Attention is drawn to the fact that since the Sales Tax principle was enforced two years ago it has been increased 125 per cent.; starting at 1 per cent. on sales from manufacturers to wholesalers and again on sales from the latter to retailers. This was shortly increased to 1½ per cent. on each of these transactions and is now up to 2¼ per cent. Another increase of 125 per cent., which is said to be quite within the realm of possibility in future, would bring this tax to approximately 5 per cent. on each stage of the transaction or a total of 10 per cent. on the movement of merchandise from manufacturer to retailer.

May be Bad Precedent

It was pointed out that should this forecast be borne out, those firms which are absorbing part of the present taxes may have difficulty in continuing to do so, or in breaking away from this policy in future. It is noteworthy that with the last comparatively small increase in the Sales Tax a number of hardware manufacturers and wholesalers found it necessary to discontinue absorbing any part of the tax. Many others are still doing so.

Some other changes are also likely to be made in connection with the application of the Sales Tax. It was stated that with Parliament now prorogued and members away on summer holidays no immediate action could be looked for but that within three months some questions would probably be asked of the government concerning the amount of revenue raised by the Sales Tax from various sources; and the extent of the burden on different branches of trade would be investigated. Changes which would probably subsequently follow would eliminate many of the hardships which are now attendant on this tax.

Eliminate Sale Manufacturer to Jobber

One of the possible changes was likely to be the elimination of the Sales Tax on sales from manufacturers to jobber. Under this plan the whole amount of the Sales Tax which would ordinarily apply on the movement of merchandise from manufacturer to retailer through the wholesaler, would appear on the invoice of a sale of goods to the retailer either from the manufacturer or the wholesaler, and each would make his return separately to the government. It would be made compulsory for the Sales Tax to be shown in full as a separate item and collected on each sale. It was pointed out that this plan would avoid many of the difficulties now encountered which force either manufacturer or wholesaler to absorb all or part of this tax in order to equalize prices to the trade. It would also offset prejudice against those firms which find they cannot afford to absorb this tax.

A definite ruling in the matter and each firm compelled to follow the same policy would be desirable, but it would have to be considered in detail and no loophole left. For instance, the question immediately arises: Who is a jobber? Much difficulty has been encountered in endeavoring to establish a status for various merchants in the past. For example there are some manufacturers who sell on jobbers' terms to firms which are not recognized as jobbers by the Canadian Wholesale Hardware Association. Who is competent to make a ruling applying to these cases? The government will have to show more adaptability for defining the status of various merchants than they have shown in the past if they are going to give a satisfactory answer to this question. The lack of judgment which has been displayed by certain government officials in defining the status of tinsmiths and other retailers for taxation purposes has brought untold confusion in this branch of trade resulting in numerous court cases and as many different rulings as there are Customs Collectors in the Dominion.

There are many interesting possibilities involved in these changes which may be made within the near future. In view of the pending developments it therefore behooves all branches of trade and government officials to have an intelligent understanding of each other's problems and be prepared to plan future administration with some respect to the difficulties involved.

"Present Taxation Measures in Practice Are Glaringly Discriminating Against Retailers"

Says E. M. Trowern, Secretary Dominion Board R.M.A. After Making a Thorough Study of Application of Present Taxes—Blacksmiths and Tinsmiths Both Now Regarded As Manufacturers—Retailers' Suggestions Spurned As the Act Was Put on

By Ottawa Representative Hardware and Metal

EDITOR'S NOTE—From the moment that Parliament placed its stamp of approval upon Hon. W. S. Fielding's 1922 budget, E. M. Trowern, secretary of the Dominion Board, Retail Merchants Association of Canada, and his associaties, have been busy endeavoring to interpret the Sales Tax as it applies to the retailer. In a statement setting forth his observations, prepared for Hardware and Metal, Mr. Trowern among other things finds that:

A perusal of the Sales Tax Act shows a number of glaring evidences of discrimination against the retailer.

Among other things an attempt is being made to make such retailers as are designated as manufacturers pay the tax on the retail selling price of their goods; whereas manufacturers pay only when the goods are sold.

The Retail Merchants Association and other retailers' organizations offered the government all assistance in their power to enable them to avoid any errors or difficulties as far as the application of the act to the retail trade was concerned. These offers were accepted early in the life of the last session but were spurned just before the Sales Tax Act was placed on the Statute book.

Mr. Trowern's summing up of the situation follows:

"OUR CONTENTION has always been that the sales tax should be collected at the source of supply, viz. from the manufacturer and the importer, and from as few channels as possible, so as to save annoyance and expense in the collection of the same. When the sales tax was placed on the Statute Books by the late government in 1921, it was surrounded with a great many annoying difficulties, as far as the retail trade was concerned. The Act itself was poorly drafted, and full of confusion and contradictions. In order to ascertain our position as retail merchants it was necessary to undertake a number of lawsuits, as will be remembered by a large number of retail merchants, in order to have the courts determine the meaning of the Act. We have always frankly admitted that although manufacturers and importers were asked to collect the tax, that in reality all taxes they pay they pass on to the retail merchants, and they in turn have to do the best they can to collect them from their customers.

"What we have always desired, was a clear distinct Sales Tax Act, one that could be easily understood, and easily followed, and one that would not be applied to every small retail merchant in the country.

Withdrew Co-operation

"Before the late government placed the Sales Tax Act on the Statute Books, we approached them, as an association, and offered them all the assistance in our power to enable them to avoid any errors or difficulties as far as the application of the act to the retail trade was concerned. Our offer of assistance was not accepted, and those who drafted the act, and those who administrated the act, together with those who allowed it to pass through the House of Commons and the Senate, created indignation among those who were called upon and compelled to carry out and pay the tax, as it was found in many cases that it cost the small retail merchant more to keep track of the tax than the tax amounted to. This was the very thing we were endeavoring to avoid. When the present Government came into power a prominent delegation of retail merchants waited upon the Premier and upon those members of the Cabinet who have to do with the administration of the Act, and we pointed out to them some of the difficulties we had to contend with regarding its operation. We offered our association's services to the present government voluntarily and agreed to give them any information they might want regarding its operations on the retail trade, and we offered to have our solicitors prepare a draft copy of the necessary amendments to the act, so as to remove any further doubt or confusion that might exist in the act, and thus avoid any further litigation. Our offer was accepted, and our solicitor prepared the amendments, and we waited upon the Minister of Customs and Excise and gave him a copy of our amendments and explained the same to him. After the Budget was brought down we again asked permission to have our solicitor consult with the solicitor for the government, who was drafting the act, and point out to him the clouded and confused manner in which the act was drawn. This request was also consented to, and when the time came for the solicitors to meet, the department withdrew their consent, and the result is exactly what we expected, the introduction of an unintelligible piece of legislation, and more annoying to the trade than ever.

"Every retail merchant knows that the retail problem is a difficult one to understand, even for those who have had practical experience in it. Now nearly every retail merchant in Canada has to face legislation, and is asked to pay taxes under a measure that neither the government itself nor the officials of the department who have the administration of the same can understand or interpret.

"Is it any wonder that the retail merchants in all parts of Canada are aroused, and are determined to make public the manner in which they have been treated? The remedy is in our own hands, let us use it.

Some Confusing Clauses

"The following, in our opinion, are some of the contradictory and confusing clauses in this obscured and muddled piece of legislation:

"The act has been amended very often since it was first passed and no complete copy of the whole act has been printed or can be purchased, and before we could understand what the Act meant it was necessary for us to compile a copy so as to be able to find out its meaning.

"The original intent of the Act, as it was passed by Parliament, although very dense, was to have it apply to manufacturers, producers and importers only, and its application was not intended for retail merchants. Those who administered it, not knowing its intent and having no knowledge of the operations of the channels of trade, read into it all sorts of contradictory meanings and issued rulings, and each time the Act was amended it was made more confusing.

"Under Section 19 B.B.B. of the Act, after referring to the fact that an excise tax of two and one-quarter per cent. shall be imposed, levied and collected on sales and deliveries by Canadian manufacturers or producers, and wholesalers or jobbers, there is nothing whatever mentioned regarding retailers paying the

tax, only when they purchase from manufacturers or producers, or manufacture direct, and when retail merchants import direct, their tax shall be six per cent. on the duty paid value. Following this statement, there is a clause which states that the purchaser shall be furnished with a written invoice of any sale, which invoice shall state separately the amount of such tax. This is another indication that it was never contemplated that the tax should be placed on retail merchants.

Pay Tax on Goods When Manufactured

"In order to avoid the enormous cost of the collection of this tax, which would result from collectors calling upon all classes of small retail merchants who manufacture goods to the order of a customer, a clause was inserted in the Act which reads as follows:

> Provided further that the excise taxes specified in Section 19 B.B.B. shall not be payable on sales of goods made to the order of each individual customer by a business which sells exclusively by retail, under regulations by the Minister of Customs and Excise, who shall be the sole judge as to the classification of a business; and
>
> Provided that the tax as specified in this section shall be payable on goods manufactured for stock by merchants who sell exclusively by retail.

"Certain trades which have regarded themselves as retail merchants for years have been told that owing to the above exemption clause being placed in the Act they are to regard themselves no more as retailers, but as manufacturers, and that the clause regarding the making of goods to the order of a customer does not apply to them because the Minister has so declared; and the clause compels some classes of retail merchants to pay a sales tax on goods manufactured for stock and if they sell the goods manufactured for stock they must sell exclusively by retail. The Act does not say whether the goods are to be taxed on the price manufactured for stock or on the price sold by retailers, all pointing out that the original intention of the Act was not to apply to the retail trade, but the Department of Customs and Excise, not understanding the retail trade, became involved in the question as to who is a manufacturer and who is a retail merchant. So far the Department has ruled that florists, printers, confectioners, cake and pastry bakers, and furriers are all regarded as manufacturers. Blacksmiths and tinsmiths are regarded by the Department as retail merchants and do not come under the Act.

"It will be noticed that the sales tax which is paid by manufacturers to the Government is paid only when the goods are sold, not when they are manufactured. In the case of retail merchants who are designated as manufacturers, an attempt is being made to make them pay when the goods are made for stock and not when the goods are sold, and no reference whatever is made in the Act as to what price they shall pay the tax on, and the goods made by the retail merchant may remain on his shelves for years before a sale is made. This is another evidence of the discrimination that is made, and also further evidence that the original intention of the Act, which was that the tax should be applied at the source of supply, viz., the manufacturer, producer, and importer, has been departed from, and in so doing the Act is so complicated that no one, not even the courts, are able to state what its real meaning is.

Retailers Cannot Collect

"It must be borne in mind that there are a large number of goods manufactured in Canada, as well as in foreign markets, upon which the manufacturers fix the retail selling price. These prices are usually printed in catalogues, and, in a large number of cases, are printed on the packages and on the articles themselves. With the addition of the sales tax to the retail merchant's cost, and with the selling price fixed by the manufacturer, it means that the sales tax must come directly out of the retail merchant's profits, as it cannot in any way be added to the cost and collected from the customer. This is merely mentioned to show that retail merchants are more than shouldering their share of the sales tax, without having to be annoyed and harassed by collectors and auditors for the collection of the small tax on a few articles they may manufacture.

"Is it any wonder that retail merchants all over Canada are aroused by this stupid and muddled system of tax collection?"

Many Hardware Price Revisions In Maritimes

Bank Clearings, Lumbering Activity and Agricultural Reports Indicate Decided Turn for the Better in Trade—Tenders for Paint Called by Various Municipalities

ST. JOHN, N.B.—The St. John bank clearings continue to show an increase over last year, and there is no longer any doubt but that there is a turn for the better in trade, although merchants are not expecting a rapid recovery. Lumber is moving more rapidly this year, and the agricultural outlook is good. Salmon and mackerel catches have been large. During the last year a mining engineer has been prospecting in New Brunswick and as a result samples of gold quartz, sheet mica, graphite and blue and yellow clay have been sent to the Department of Mines in Ottawa to be assayed. Building permits in St. John for the first six months of this year totalled about a quarter of a million dollars. Several tenders for painting are being called for by towns in the maritime provinces for the painting of public buildings. Local dealers attribute this to the "Save the Surface" campaign, which has caused school trustees, councillors, etc., to realize the economy of keeping the city's buildings in good condition.

This week there has been several important reductions in hardware lines. Jobbers are quoting the trade game traps at a substantial reduction. Victors No. (0)—1.90; (11/2)—2.70; (2)—3.70; (3)—6.25; (4)—7.60; (91)—2.80; Star and Jump No. (0)—2.50; (1)—2.80; (1½)—4.05; (2)—6.25; (3)—8.45; (4)—10.00. Mrs. Potts Sad Irons have been reduced substantially, prices quoted this week are $1.75 in case lots against the former price of $2.60, and $1.85 in less than case lots against the former price of $2.70. These are the largest reductions that have been made in any hardware line recently, excepting perhaps the last reduction in aluminum ware, but stocks were pretty low.

Reduction in Cement

Cement is now being quoted as follows: F. O. B. cars (250 bbls.) $4.00 per bbl.; less than car load lots, $4.55 per bbl. The old price was $5.90 per bbl. less than car lots. This new price will no doubt have its effect on building activities, and considering that several large contracts have been let already, the various builders will reap the benefit. Bread mixers have also seen a good reduction, No. 4 being quoted at $31.00 and No. 8 at $41.00. There has been a slight reduction in the price of oil clothing, but not amounting to more than three to five per cent. Five and six inch stove pipe elbows are quoted at $2.12 net., and seven inch at $2.38 net. Blue vitrol in casks, nine cents, less than casks, ten cents. Arsenate of lead 39 cents; arsenate of lime 32 cents.

A large contract has been let by the New Brunswick Electric Power Commission for the clearing of a way for the transmission line from St. John to Moncton, and will employ a good deal of labor. The Provincial Minister of Public Works estimated the damage by the recent floods to the roads and bridges in the province at a sum of no less than $150,000, but the flood, however, quickly subsided, and the damage to the crops is not serious, being confined to small areas beside the St. John river along some parts of its course. The cut worm, potato bug and tent-caterpillar are more active this year, and the farmers are kept busy fighting them, resulting in a heavy demand for Paris green, etc.

New Policy on Vacation

During the past week St. John hardware merchants have been featuring lawn mowers, sporting goods and automobile accessories in their daily advertising. The vacation season is in full swing in the maritimes, and many of the houses are operating with about one-half of their regular staff.

Summer Tourists Getting on the Move

Ontario Motor League Advises Hardware and Metal that 117,000 Motor Tourists Expected in Canada From the United States this Summer—Will Require Many Auto Accessories and Other Hardware When Far From Home

EDITOR'S NOTE:—Hardware and Metal is advised by the Ontario Motor League that approximately 117,000 motor tourists are expected to visit Canada from the United States during this summer. This is based on the natural increase over past years and having in mind the volume of information asked for concerning touring conditions in Canada. Joined with the mass of Canadian motorists who spend holidays on tours there will be a big body of motorists continually on the move this summer. The hardwareman in a prominent location who does not take steps to secure some of the business which these tourists will transact is passing up a valuable opportunity.

PRACTICALLY every highway in Canada for the next three months will be crowded with tourists from the four points of the compass. This is the time of year when the lure of the open road has an irresistible appeal to motorists.

Each year sees this traffic growing and localities turning their thoughts more and more to its commercial possibilities. Motor camps for the accommodation of tourists are being established, but not in anything like the numbers the traffic would seem to demand. Activity in this connection is noticeable in Ontario and British Columbia. There are at least four camps in Ontario where motorists can pitch their tents and be accommodated with hot and cold water free of charge.

According to figures furnished by the Department of Customs over 93,300 cars entered Canada during the calendar year of 1920. Of these 1,800 registered for more than one month and 91,500 for a shorter period. Allowing an average expenditure of $15 per day, including gasoline and equipment charges, etc., for the first class of car and an average length of stay of thirty days, this traffic amounted to $810,000, while the second class of car, on a basis of an estimated expenditure of $25 per day for seven days, was $16,000,000, or $16,810,000 in all. That is, the motor highways of Canada brought in during 1920 a foreign revenue equal to the above sum.

Linking up closely with window displays of automobile accessories, camping equipment, etc., to interest summer motor tourists. W. H. Thorne & Co., St. John, N.B., devote one side of the most prominent showcase, near the store entrance to automobile accessories. It is realized that to get this business in competition with other dealers, the hardwareman must do everything possible to show the prospect that he can supply automotive equipment. This showcase revealing a complete range of up-to-date equipment and including a number of new lines of interest to those who drive cars sells a great deal of equipment to motorists throughout the year.

And Canada's resources in this respect have only begun to be developed. American citizens are finding in our great country a playground with unlimited possibilities.

Over and above the foreign tourists, thousands of Canadians take to the highways in search of pleasure, health and recreation. They motor north, south, east and west, for a radius of hundreds of miles and wherever they go they buy from somebody and somebody sells to them.

What It Means to the Dealer

What does all this mean to the hardware dealer? It may mean much or little, according to the dealer's own attitude. Some dealers have recognized the business potentialities of this tourist traffic and have increased their profits accordingly. But others are still overlooking this trade and conducting their businesses as if it didn't exist. True, they sell the odd spark plug to the transient motorist but it finishes at that.

The store situated on a popular and main highway has a strategic advantage over the store on a street less frequented by motorists. A good location is of great importance and simplifies the problem of the dealer desirous of catering to tourists, **but the dealer on the side street can do a great deal to put his service on the main highway and attract his share of the business.**

The first thing the dealer must do is to give the best possible service, charge fair prices and in every way do all he can to create confidence in his establishment in the minds of the motoring public. Some dealers have made a practice of overcharging tourists and think it does them no harm. But they forget that tourists are clubby people who like to foregather at the crossings and small villages to talk things over. In exchanging experiences of roads, hills, detours, etc., they are not likely to forget to mention the hardwareman who charged too much for that tire, or for putting in a new supply of oil, etc. You can bet when the other fellow passes through that man's town, he is not likely to buy the spare tire or extra spark plugs from the man who has the reputation of overcharging.

A Hardwareman Selects His Radio Stock

Personal Experience in Operating Radio-Phone Receiving Set Described as Best Method of Judging Requirements of Average Enthusiast — Standardization of Equipment Desired Before Handling on Wholesale Scale

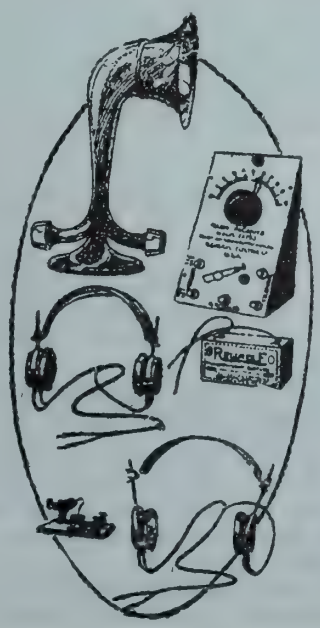
THAT extreme care should be displayed by hardware merchants when installing stocks of radio equipment, is the opinion of the manager of the retail department in one of Toronto's largest downtown retail hardware stores, as expressed to Hardware and Metal. One of the chief reasons for this was the fact that a great deal of equipment or parts are being placed on the market which hamper the retailer to some extent in this new field and which are difficult to sell. It was stated that the majority of radio amateurs have now passed from the elementary to the experimental stage, and generally know their requirements as to parts and repairs. To stock indiscriminately therefore, gives an experienced radio enthusiast the opportunity of choosing freely from supplies which often represent the investment of a considerable sum on the part of the merchant, a situation which leaves the unpopular and slow-moving lines on the shelves of the merchant.

In this particular store, it was noted that the small complete crystal sets, together with such accessories as copper wire, aluminum, binding posts, and miscellaneous items, comprised the chief stock. It was explained that no attempt had been made to get beyond this stage as they were awaiting the development of radio sets and equipment to the stage where they would be in a position to guarantee the supplies handled. This was expected to be in a comparatively short time, as so many experiments were being made at the present time, that it was considered improvements were bound to arrive.

Standardization Expected

When the radio-phone industry can be more or less standardized and the merchants can concentrate on a particular line and give satisfaction to their customers, it was thought that this class of equipment would be handled in a wholesale way. It was not considered feasible to job radio accessories at present, however, due to the miscellaneous types of both sets and parts on the market and the lack of standardization in the producing field.

"There are two distinct fields in the merchandising of radio equipment, which should be so classified by the hardware merchant. One is the city, or locality where a broadcasting station is close at hand, and the other where those 'listening in' are situated considerable distance from a transmitting centre such as the smaller towns and country districts. Dealers in cities like Toronto, are able to handle the smaller complete set with good success, because the radius required is comparatively small, from thirty to fifty miles. In the country, however, it was the more expensive and better developed equipment which was required, and here it was noted that the demand for minor sets has been subsiding."



Personal Experience Needed

That the amateur will frequently commence his experiments with a small set and gradually aspire to larger realms and improved equipment on a larger scale was admitted to be generally the case. From this situation, therefore, the conclusion was naturally made that some one in the store where a radio department was installed should be thoroughly conversant with the field, especially to the extent of having an operating a set, either at home or in the store.

"While no great knowledge of electricity or the basic principles of operation are required to successfully merchandise this line, yet experience was a great teacher in radio-telephony as well as in anything else. Therefore, to have the advantage of experimenting enables the merchant to keep pace with the progress in the industry and he will then be able to select a stock which will provide satisfaction to his clientele and profit for himself."

It was again admitted that the initial interest in radio supplies in this store was aroused through the numerous calls for copper and bronze wire, insulators, condensors, headsets, batteries and switches. Supplies of this nature had been followed by the complete sets of small radius, and while larger sets would be considered in the near future, their present efforts are concentrated on establishing such equipment as can be enthusiastically recommended to both dealers and merchants, from the viewpoint of satisfaction and service.

Retailers Openly Oppose Receipt Tax

Convention of Eastern Ontario and Ottawa District Branch R.M.A. Passes Resolution Authorizing Dominion Board to Fight Tax on Receipts—Many Merchants Unaware of Nature of Receipts To Be So Taxed

BROCKVILLE, Ont.—Two hundred retail merchants, representative of various lines of trade in Ottawa and many parts of Eastern Ontario, assembled in convention in Brockville, Ont., on Wednesday, afternoon unanimously endorsed the receipt tax resolution shown on this page. It was moved by A. D. Carscallen of Tamworth, and seconded by L. N. Poulin of Ottawa.

Thanks to the organizing ability of J. C. Campbell, secretary of the Eastern Ontario district, and to the valuable assistance rendered by the Brockville committee, the convention arrangements were carried out without a hitch. The attendance was good and the delegates entered enthusiastically and earnestly into the discussions. The chair was occupied by Henry Watters, president of the Eastern Ontario district association, and a lengthy but enlightening exposition of the Sales Tax Act was given by E. M. Trowern, secretary of the Dominion Board, Retail Merchants' Association of Canada.

In the evening a banquet was held in the town hall, and the business part of the programme was concluded Thursday morning.

The Brockville committee in charge of arrangements consisted of: A. M. Patterson, chairman; H. W. Gilhooley, vice-chairman; H. J. Muldoon, secretary, and William Rhoades, treasurer.

Let Businessmen Run the Country

The spirit manifested throughout the meeting was that the government should step aside and let businessmen run the business of the country. There was altogether too much interference with trade.

The delegates were welcomed by Mr. Patterson, who expressed the hope that the day was close at hand when every retail merchant in Canada would be identified with some branch of the R. M. A. He said it was in their interests to do so.

Mr. Trowern confined his remarks entirely to taxation matters. It was one of the most important and perplexing problems with which the association had to contend. The difficulty was that legislation was being introduced from time to time by men who knew absolutely nothing about business. In his opinion taxation should be simply to raise revenue, and for no other purpose. He said there were at present ten systems of taxation, all of which were tumbling over each other and costing the country thousands of dollars. There was not even a vestige of system about it. He compared the government plan with that of the Retail Merchants' Association, where one assessment was made for all purposes.

Mr. Trowern thought Canada was too sparsely populated to have any cumbersome system of taxation. The time had come when it was up to the retail merchants to stand up to the government and demand their rights. There was no use waiting for another change of government, for one party was as bad as the other. "I would tell the politicians to step aside," he said, "and leave the business of this country to businessmen."

"Whereas in the opinion of this convention the placing of stamps on all receipts of ten dollars and over for the purpose of raising revenue is an unnecessary and annoying arrangement and one that will fail to accomplish the object in view, we recommend that the tax be abolished, and request the Dominion Board to take the matter up with the Government."

Judges Cannot Understand It

The speaker then proceeded to show the density of the act. Even the judges could not understand it. He was prepared to give one hundred dollars to some charitable institution, if anybody could explain to him what the Sales Tax Act meant.

Reference was next made to the classification of certain retail merchants as manufacturers, and Mr. Trowern pointed out that it was only after a great struggle that the government was induced to exclude certain retailers from this classification. These included blacksmiths and tinsmiths, but there were still a number who were being unjustly placed under that classification, and therefore there was still a big fight ahead.

"I tell you," said Mr. Trowern, "that we have got to be consulted before the government puts over any more such freak legislation."

"It is not the people who are running this country, but the officials of the various government departments."

Receipt Tax

Following Mr. Trowern's address, there was a discussion of the receipts tax with the subsequent adoption of the resolution quoted above. From the discussion, it was seen that the delegates were very much at sea as to the government's intention in this regard. Some were under the impression that all retail merchants were obliged to give receipts whether they wanted to or not, and some could not make out, from the wording of the Act what a receipt constituted. Mr. Trowern said his impression was that a receipt was any slip of paper upon which an acknowledgment of purchase was made, whether it was only an ordinary scrap of paper or a regularly printed receipt.

Hardware and Metal's representative pointed out that the department had not yet made any hard and fast rules. He had been informed by a high official that it was the intention in the near future to draft regulations governing this section, and until these were forthcoming it was only guess work to say what would and would not happen.

However, it was the general opinion that it was a clumsy piece of legislation and should be struck off the statute books before it had any opportunity of doing the harm it was bound to do.

Last Minute Doings at Brockville

AS we go to press the following wire is received from Hardware and Metal's representative at the convention of Eastern Ontario retailers at Brockville.

Resolutions adopted on Thursday are as follows:—1. Request to the government to redraft the Sales Tax so its meaning will be better understood.

2. Convey to the government our regret that the legislation so carelessly drafted has been allowed to pass the House and Senate.

3. Request Dominion Board to have all advertisements referring to co-operative societies, farmers' clubs and chain stores carefully scrutinized and to prosecute firms using false and misleading advertisements.

4. Request Dominion Board to strongly oppose proposed bill which would prevent manufacturers fixing prices on their product. Most members favored price fixing by manufacturers as long as sufficient spread was allowed.

It was the unanimous opinion that the provincial legislature was attempting to obstruct retail merchants from carrying on their business in a legitimate, honest and straightforward manner.

Tools as Hot Weather Labor Savers

In a number of retailers' demonstrations which have been arranged recently in various parts of the country, tools have figured prominently in the windows of hardwaremen. The fact that there has been much new construction undertaken this year combined with the tendency of many persons to do some fixing up while on their vacation, makes it valuable to show tools at this time of year. An increasing trade in tools is being worked up among householders, and though the weather is warm there is much work undertaken at this time of year. Good tools might be featured as labor savers in the hot weather for they truly save much laborious work. Above display shows how Prichard's Hardware, Toronto, linked up with a retailers' pageant consisting of a parade and special "buy-at-home" effort, and many tools were sold from this effort.

DOMINION SHEET METAL CORP. EXTEND PRODUCING CAPACITY

Hamilton, Ont.—Dominion Sheet Metal Corporation Ltd., will have additional equipment in operation by August 1 which will enable the production of 30 tons per day more of galvanized sheets than at present, or an addition of 50 per cent. to production. This firm has been operating in full at the rate of 60 tons per day since March 1 and in view of the continued demand and the good crop prospects, the additions to equipment have been made. This will give this producer practically 2,000 tons per month or 24,000 tons production per annum.

Discussing the extensions A. T. Enlow, president, stated that this increase will probably curtail the volume of imported galvanized sheets as only limited production of the domestic article has enabled such import business to be conducted. Mr. Enlow attributes the active business in galvanized sheets to the fact that prices are lower and as a result the old time demand is beginning to reassert itself, and a fair reduction in freight rates will make business extremely active in this line.

UNVEILING AND DEDICATION OF LYSAGHT'S WAR MEMORIALS

Word is received by Hardware and Metal of an interesting function in England when S. R. Lysaght, of John Lysaght Ltd., represented in Canada by A. C. Leslie & Co. Ltd., Montreal, presided at a gathering of the staff of Messrs. Lysaght's Bristol Works in the main yard of the St. Vincent's Ironworks department for the dedication and unveiling of three memorials to employees who died during the war. The Archdeacon of Bristol officiated. S. R. Lysaght, who presided, was supported by Messrs. W. R., D. C., and H. R. Lysaght, H. G. Hill, W. Trimmer, S. A. Futnam, secretary, H. A. Hankey, A. Sharman, Mitchell and J. Sharman. In a fitting manner Mr. S. R. Lysaght referred to the splendid example set by the workmen in volunteering for war service, pointing out that when conscription came there were few men at Lysaght's to be enlisted.

BUSINESS MEN PLAN PICNIC

The Business Men's Association of Danforth Avenue, Toronto, of which J. C. McFadden, hardware merchant, is an official, are holding a monster picnic at Withrow Park on Civic Holiday, August 7. Last year this picnic was one of the biggest demonstrations held in the district and did much to further interest in local stores. It is expected that 30,000 people will attend the picnic this year and a big program of sports, radio concerts, etc., has been provided.

Increased Use of Labor-Saving Devices

THE OUTSTANDING need for labor saving devices and the increasing market for these devices is well indicated in some statistics which have just been compiled. On the basis of latest census returns it is shown that in ten years, during which our population greatly increased, cooks decreased in number 21.5 per cent., chambermaids 26 per cent.; maids of all work 20.5 per cent.; home laundry workers 25.7 per cent. and the home dressmakers 47.5 per cent. On the other hand the increases in the number of women employed in wage-earning occupations and in the professions has greatly increased, for instance the number of teachers has increased 26 per cent.

Both from the standpoint of labor saving machinery in the home curtailing the amount of drudgery incident to housekeeping and from the standpoint of production of labor saving machinery, these figures are significant. As the domestic passes there comes a bigger-market for labor saving machinery, such as vacuum cleaners, washers, small electric appliances, dish-washers, etc. Evidence that the increase in production of such machinery and appliances has increased in proportion is found in the fact that in the ten years in question the number of mechanical engineers increased 160 per cent.; machinists 83 per cent.; electricians 77 per cent. and technical engineers 53 per cent. It is evident that a fairly large number of these men are making home appliances. The rewards of household work were never so high as today but despite this labor saving devices are receiving a bigger call. The housewife's necessity has been the mother of invention in the field of labor saving devices and the improvement which has been made in such appliances has found for them a permanent and increasing market.

Canada's Iron Deposits

THE STATEMENT made a few days ago by Mr. Jones of the Algoma Steel Corporation, to the effect that pig iron could be produced from Canadian ore for $1.57 per ton less than from American ores introduces a subject of much interest to the metal industry in Canada. There are undoubtedly many problems involved such for instance as concentration, and it would seem necessary for the government to subsidize ore production until such time as an iron industry can be built up and private capital interested. One thing is certain, that Canada's iron resources are ample to warrant the encouragement of mining. The Loon Lake iron range has an estimated quantity of 25,000,000 tons of ore. The Mattewan and Kaministiquia ranges have 150,000,000 tons, the Atikoken range 25,000,000 tons, the Nipigon and Long Lake ranges 100,000,000 tons of magnetic ore. For some years mining men have endeavored to secure a small subsidy, for the cost of doing some concentrating of the low-grade ores. However, as long as ore can be obtained as cheaply as it is from the United States no action was thought necessary. However, U. S. deposits are said to be thinning out and the day may come before long when the U. S. industry will have to turn to Canada for iron ore as is the case now with pulpwood.

Licenses for Cheque Tax

MERCHANTS and business people generally will be interested in the circular that has been issued by the Department of Customs and Excise at Ottawa, relative to the increased stamp tax that comes into force on August the first. As amended on June 12, and previously referred to in these pages the stamp tax on cheques is now two cents for every unit of $50 up to $5,000, making the maximum tax $2.

According to the circular, embossed cheques will be issued to licensees subject to certain conditions. A licensee, for instance, will be required to keep an account in which shall be entered at the time each cheque is drawn particulars of the cheque, showing the serial number, the date of issue, the amount and sum due as excise tax thereon. A separate account, it is pointed out, should be kept for each bank or branch of a bank on which the licensee draws cheques. On or before the fifth day of each month the licensee must forward to the government the amount of the tax on all cheques for the preceding month. Embossed cheques cannot be cashed if drawn by other than the licensee.

The idea of the government appears to be that of convenience for merchants and business concerns. By the issuance of licenses people writing a large number of cheques in the conduct of their business will be saved the bother of affixing stamps to each one. Keeping monthly account of the amount expended in cheque taxes, and paying it at a fixed date each month, adherence to the stamp tax law will be greatly facilitated.

Nothing is said of any compulsion on the part of individuals to take out these licenses, and it would seem that doing so is entirely optional. According to a banking authority it is merely to make it easier for the large user of cheques, to carry out the new regulation. Retailers using a considerable number of cheques in the course of a month, it would seem, would be benefited by the license system. In this way they would know definitely their expense in this regard and be able to figure it accurately in the cost of doing business.

Canada's Iron Deposits

PUTTING yourself in the customer's place is a thing that a merchant or a clerk can very often do with a good deal of advantage to himself. Getting the customer's viewpoint will help one to increase service to the customer, and will result in cementing more closely the proper relationship that should exist between merchant and customer.

Realizing that he is the servant and the customer is the master of the situation, the merchant must be prepared to hear criticism and perhaps complaints, in a patient manner, and at times be open to a certain amount of senseless abuse, suspicion and discomfort at the hands of the public. He must learn to sink his feelings behind a stoical exterior and smile as pleasantly as if nothing had occurred to disturb his equanimity. A tactful control will win its own reward.

B. C. Retailers Meet in Convention

Merchants From All Over the Pacific Coast Province Gather in Victoria Where Work of the Past Year Is Reviewed, and Lines of Endeavor Outlined for the Next Twelve Months—Thirteen New Branches Added to R.M.A.

By Staff Correspondent of Hardware and Metal.

VICTORIA, B. C., July 19.—Delegates representing the thirty-three branches of the Retail Merchants Association of British Columbia gathered here last week to the number of nearly a hundred for the fifth annual convention of the association, when the president, J. T. Crowder, welcomed them on behalf of the executive of the association. For the first time since its establishment in this province, he said, the Retail Merchants' Association was able to speak with a voice which carries the weight of numbers, and the programme set before the members was one of far reaching influence on the destinies of merchandising in this province, and on the prosperity of the retail trade of British Columbia.

Secretary's Report

G. S. Hougham presented the secretary's report.

Referring to the period of industrial uncertainty which has passed since the convention last met in Duncan, a year ago, Mr. Hougham said that in Canada "the steady deflation of values, coupled with the change of government at Ottawa, involving uncertainty in the fiscal policies of the Dominion of Canada, plus widespread unemployment, has meant a testing time for business men which is not yet at an end."

He stated that the association in this province has been passing through a time of exceptional growth nothwithstanding. Last year at this time the membership stood at 882; at the end of June last it stood at 1,176, distributed in the membership of thirty-three branches, making a net increase of 294. Thirteen new branches have been added to the list during the year and other centres are in line for an organization at an early date. Changes had been made in the provincial office arrangements of the association, and the segregation of this office from the Vancouver branch had made it possible to give more attention to the outside branches than was formerly possible.

Dealing with the resolution which will be presented to the convention today, Mr. Hougham emphasized the importance of that covering the personal property tax. He stated that a campaign had been instituted against this tax by the executive of the association throughout the province.

Shops Regulations

Another important resolution which would concentrate the opinion of the members on political issues that affect the retailers in this province and which will be dealt with by the convention, Mr. Hougham pointed out, was that

J. T. CROWDER

dealing with amendments in the Shops Regulations Act, compelling places of business carrying more than one line of goods to segregate that portion of their goods which they could not sell after hours prescribed in the Weekly Half-Holiday Act.

Comment was made also on the action that had been taken and which was proposed by the executive regarding the standardization of trades. It was felt that some sort of recognized standard should be established to define retailers. Some effort along the lines of persuading wholesalers to sell only to retailers had been made during the year, and in one case the wholesaler had notified the association that they had ceased to sell to any but legitimate retailers.

Mr. Hougham stated what had been the action taken by the executive in co-operation with the various branches regarding the immigration policy of the country, and the exclusion of Orientals from British Columbia. He said that an opportunity had presented itself for the exertion of the influence of the organization when W. G. McQuarrie, K.C., M. P., presented his resolution to the House at Ottawa calling for total exclusion of Orientals entering Canada in future.

Other matters touched upon by the report were the necessity for amendments in the Bankruptcy Act and collective buying, and other important matters.

New business for the association's consideration was suggested along the lines of some method of keeping a record of the removal of householders from place to place for the protection of retailers extending credit.

An Indication of Service

Mr. Hougham said that the report as presented by him was a record of accomplishment of things attempted, but it was interesting also as an indication of service demanded by the membership in their respective trade sections and collectively. The programme as outlined is one that is constructive, he said, and is an answer to the criticism that the retail merchants are prone to offer something in their convention that is intangible and idealistic. The executive has recognized that the time has arrived when more attention should be given to practical service, because the foundation of the organization has now been laid and there is not the same need for attention being given to the adding membership to the branches.

The president, J. T. Crowder, in giving his report to the convention after that of the secretary, urged that a policy of rigid economy should be followed by the Provincial Government, and he proposed that a resolution on the subject should be brought before the convention. The resolution, which he read, was as follows:

"Be it resolved, that this meeting, having duly considered the grave financial position of the Province of British Columbia, pledges itself to support a policy of rigid economy, and to submit cheerfully to any inconvenience arising from the curtailment of all public services that the government may, in its wisdom, impose, and

"Be it further resolved, that this meeting absolutely condemns any representations to the government, involving additional expenditure of public funds, on the part of any city organization or community until such time as the finances of the province have been placed on a solvent basis."

Continuing his report, Mr. Crowder said:

Work for Sections

"Most of the R. M. A. activities in future should be conducted through the trade sections, functioning through a provincial chairman with a vice-chairman and possibly a second vice-chairman, in every locality for every trade section. The branches should continue to function by having as their officers the local vice-chairman, who could elect a presiding officer for the year. All expenses for local activities would be met by local provincial fees.

Protecting Retailers Against Freight Overcharges

Another Hardware Manufacturer Adopts Plan of Classifying Shipments According to Official Tariff and Noting Rate Applying on Bill of Lading—Affix Forms to Invoices and Bills of Lading.

BEARING out the action of other manufacturers for the protection of retailers in regard to freight charges, as outlined recently in Hardware and Metal, Thos. Davidson Mfg. Co., Ltd., Montreal, have made arrangements for the protection of retailers against overcharges on freight shipments. Discussing the subject J. Flack points out that since the inauguration of this service the Traffic Department of the firm has saved customers from making many overpayments on freight bills.

"We recognized the fact that railway companies are subject to the human equation and are just as liable to make as many mistakes in the application of rates as the ordinary person does in other things. To overcome this natural failing we always fill in on the copy of Bill of Lading the correct classification and freight rate applying on each line of goods shipped and also prove the authority for the application by giving number in the Official Tariff," said Mr. Flack.

This firm make use of two forms in the shape of stickers printed on green paper. The first of these forms is attached to the invoice and reads, "Recognizing the extreme importance of the application of correct freight rates on all outward shipments and desiring our customers to make our Service Dep't as effective as possible, we suggest that you carefully check and examine your freight expense bill before paying the charges demanded. For your guidance and protection you will find the correct freight rate as applied on the proper classification plainly shown on the copy of Bill of Lading which accompanies the attached invoice. The official authority for the classification and rate is also shown. Should discussion arise at destination as to the legality of the rates applied, communicate with our Traffic Service Dep't at once giving full particulars and the desired information will be forwarded promptly."

The form affixed to the Bill of Lading reads, "FREIGHT CHARGES. Do not pay higher rates than shown in the rate column on this Bill of Lading. Official authority for classification and rate is Tariff.—(C. F. C. 16.)"

The Bill of Lading lists the various products of the firm and provides three columns first Weight (subject to correction). Class or Rate and Check Column. Entries are made in these columns by the shipping department of the firm and it is then plain to the retailer just what his charges are and how these charges are arrived at with references to the official tariff.

Reduced Prices on Rope and Cordage

Pure Manila is Two Cents Per Pound Base Lower, Beaver or New Zealand Hemp, Sisal and Lathyarns One Cent Per Pound Less

FOLLOWING a fairly active season manufacturers and distributors of all kinds of rope and cordage, with the exception of cotton, announce a reduction of varying extent. Best manila rope is two cents per lb. base lower in price with the usual extras on smaller sizes. Beaver or New Zealand is one cent less with the same extras applicable, also sisal rope. The various lines of hemp rope have new lower net prices, the reduction on these varying from one to four cents per pound.

Manufacturers state that a fair season has been in evidence during the past months, and while there was room for further improvement, sales were ahead of last year. Now that the season is drawing to a close it was considered the most opportune time to adjust prices, stocks in the hands of both jobbing houses and retail merchants being usually at a low level after the busy months of spring and early summer. Dealing with costs of raw materials and causes for the present price decline, one local manufacturer described the undertone of the market as a little stronger at present than it was some weeks ago, but in an endeavor to reach as low levels as possible, and in the hope of placing the rope market on a steady basis during the ensuing months the present announcement was made. Hemp was on an easier trend up until a few weeks ago but has since stiffened a little. Jute has also slightly advanced in price recently, while manila has been quite steady for some months past.

Competition from overseas has also been a prominent factor in the market, shipments arriving at price levels that were lower than on the domestic product. It will be remembered that importation of binder twine early in the season from Ireland played an important part in the market for this product at that time.

MARITIME PRICES

(Continued from page 29)

found by one or two of the large organizations that it is better to let as many of the staff go away at one time as possible, and thus shorten the period of shorthandedness as much as possible. It used to be that a firm employing a number of salesmen would be shorthanded owing to vacations for several months, but under the new system about two months will give every employee his vacation.

Lumber Prospects Brighter

In a recent interview Senator N. Curry of Amherst, N.S., stated that prices for lumber had stiffened somewhat, and prospects were brighter in this line than they had been for two years. Stocks of lumber on hand at present date would not be over fifty per cent. of what they were a year ago, and in three months, time they would not be more than one quarter of what they were a year ago. The fishermen of Nova Scotia had had a most successful year, the mackerel catch alone being worth over $2,000,000. In the manufacturing lines there were to be seen indications of brighter days ahead. The car works of Amherst were not doing much, only the wheel shop being in operation. Woodworking factories are busy. Senator Curry stated that freight rates would have to be further reduced before the manufacturers of the maritime provinces could run their plants to full capacity, and that in his opinion the only way to bring down excessive freight rates was to bring down the high labor costs on the railways. He claimed that the mileage system of payment was responsible for making the average working day of a railroad man between four and five hours, and that it was very necessary for the economical working of the railroads that a man do a full day's work for a day's pay

B. C. RETAILERS

(Continued from Page 35)

"The work of the B. C. Board should be carried on by the provincial executive of five officers, assisted by a larger and advisory committee, consisting of provincial chairmen of trade sections or their alternatives, with these delegates so selected that each locality would be represented. This larger executive should meet five times a year if possible (say every sixty days, not including the annual convention). These meetings to be held at the provincial office. The provincial executive should have complete authority over all R.M.A. activities in this province, subject to the authority of the provincial board. The provincial executive officers should not hold office in trade sections or locals.

"The members of this association should hold themselves in readiness to assist in showing the Honorable Charles Stewart the conditions affecting the Oriental problem of B. C., or to co-operate with the provincial office as required.

"All Dominion board meetings should be held at Ottawa," said the speaker.

Events in the Trade

NEW FIRMS

Brantford, Ont.—West Brant Hardware has opened with an up-to-date store in West Brantford at 82 W. Colborne St., having a complete stock of general hardware, paints and oils, poultry supplies and sporting goods. A cash business will be done.

OPENS NEW HARDWARE

St. John, N.B.—While some merchants are talking about hard times, there is one St. John merchant who has seen fit to enlarge his business premises considerably. While passing down Charlotte Street, St. John, N. B., the representative of Hardware and Metal was attracted by a fine new store, occupied by W. B. McDonough, who conducts a hardware, plumbing and heating business. Mr. McDonough has recently moved into these premises from very small quarters, and hardware is a new line he has added to his former business. With the exception of some of the jobbing houses, who also conduct a retail business, the McDonough store is one of the largest and most up-to-date hardware stores in the maritimes, with large plate glass windows, polished floors, modern fixtures, steel ceilings, etc. One of the first things Mr. McDonough did when opening up his store was to put in a good stock of paints, and also to devote one of the large windows solely to paints and varnishes. He has put in a very good stock of general hardware, displayed in attractive style, and reports business active.

OBITUARY

J. B. A. Aubry, president of A. Aubry & Sons, Limited, tinware manufacturers, Montreal, died at his home in that city on Thursday of last week.

Mr Aubry entered the tinware business in 1887, at which time his father, Alphonse Aubry, was president of the firm. In 1908 his father retired and Mr. Aubry succeeded him to the position he held at time of death. He was a governor of Notre Dame Hospital, a member of the Chamber of Commerce, Board of Trade, Canadian Manufacturers' Association, Royal Arcanum and the Automobile Club of Canada. He is survived by his wife, three sons, and two daughters, also his father.

PERSONAL

Mr. Bass of the Williams Stove Lining Co., Taunton, Mass., called on the Montreal trade this week.

D. G. Carter has been appointed sales-manager of Lewis Brothers, Limited, Montreal. Although a young man Mr. Carter has had a wide experience in the hardware business, both wholesale and retail, recently holding the position of assistant sales-manager of the above firm. Under a new arrangement the sales department of this firm has been divided into two separate departments, and Mr. Carter will have charge of the trade of English-speaking communities, while D. Deschamps will supervise sales to French-Canadian territories. Mr. Deschamps was assigned to this post earlier in the year.

DOMINION INCORPORATIONS

The Whitecross Co. (Canada) Ltd., head office Montreal, capital $25,000 to manufacture rolled and drawn steel and iron wire, galvanized and barbed wire, cables, nails, rivets, netting, fencing and other wire products

Radio Manufacturers and Distributors Ltd., capital $250,000, head office Toronto, to manufacture and deal in electrical and radio apparatus.

ONTARIO INCORPORATIONS

A. Chown & Co. Ltd, head office Kingston, Ont., capital $200,000 to manufacture and deal wholesale and retail in hardware, auto accessories, etc. A. F. Chown, P. B. Chown, F. J. Pound, manager, are among the incorporators.

Kerr Hardware Ltd., head office Dundas, Ont., capital $40,000 to conduct wholesale and retail business in hardware, plumbing, etc.

Lighting Fixtures Ltd., head office, Toronto, capital $40,000 to manufacture and deal in electrical goods, radio supplies, etc.

S. C. JOHNSON CO. MAY ERECT NEW PLANT

Brantford, Ont.—The S. C. Johnson Company, Limited, varnish and wax manufacturers, of this city will probably erect a new $100,000 plant in the fall. Additions are now being made to the present factory at a cost of about $25,000. The improvements at the Johnson plant, along with the Scarfe varnish works here, will make Brantford an important varnish-making centre

FORD BRANCH IN CALGARY

Calgary.—The Ford Company have started the erection of a branch wholesale house in Calgary to cost $150,000. It will be a two-storey structure, with a full-sized basement, and will be built of reinforced concrete, faced with brick.

NEW REPRESENTATIVES OF BRIDGEPORT HARDWARE IN CANADA

The following firms are now representatives of The Bridgeport Hardware Mfg. Corp., Bridgeport, Conn., in various parts of Canada:—Western Canada, Sutherland Bros., Confederation Life Building, Winnipeg; Ontario, H. A. Harrison, 220 King St. W., Toronto; Quebec, Hubert B. Johnston, 92 Dominion Ave., Sherbrooke, Que.

NOW KNOWN AS FOWLER SPRING CO.

St. John, N.B.—G. Wilford Campbell has disposed of his interests in the firm of Campbell and Fowler, and the company has reorganized under the name of the Fowler Spring Co., Ltd., and will carry on the manufacture of automobile and truck springs. In the near future it will add the manufacture of bumpers. They are discontinuing the manufacture of axe and edge tool lines.

MT. DENNIS HARDWAREMAN ROBBED

Four brilliantly garbed gipsy women and a man, traveling in a touring car, visited Mount Dennis, Ont., and are now in jail on charges of alleged thefts.

At 10.30 the women called at Beattie's hardware store and requested to be shown some teapots. While three of the women were examining the various dishes, the fourth, it is alleged, concentrated her undivided attention on the cash register, which was open at the time. After leaving the store it was found that $13 was missing.

ANNUAL PICNIC OF N. SLATER CO. LTD.

Hamilton, Ont.—The third annual picnic of N. Slater Co. Ltd., to Wabasso Park, was a great success from every standpoint. There were nearly five hundred persons present and with such a gathering a splendid program of sports was conducted. It was noteworthy that the prizes given to the winning contestants were extraordinarily desirable.

At the first of these picnics, three years ago, insurance was presented to the employees who had been in the employ for a given length of time. This insurance varies from $500 to $3,000, according to length of service. This insurance scheme is continued; new employees qualifying from time to time. A handsome travelling bag was presented to the employee who has for these last three years planned the annual picnics. This was spontaneous on the part of the other employees.

Picnic of Toronto Hardware Trade

Big Program of Sports Consisting of Races, Ball Games, Contests, Etc., Provide Enjoyable Afternoon and Evening for Toronto Hardware Merchants and Travellers, Lady Folk and Children On Wednesday of This Week—Many Valuable Prizes Given Away

SPLENDID weather greeted the occasion of the seventh annual picnic of Toronto hardware merchants and travellers, held on Wednesday afternoon of this week, and the extensive program of sports was enjoyed to the full by the hardwaremen, and their wives, sweethearts, friends and children. The picnic was held in High Park, area 4, just off Bloor street, a huge banner indicating the spot to the early comers, and no one could miss the familiar faces after about 3 o'clock in the afternoon. There was a big parking space as well, many splendid cars were brought to the grounds during the afternoon and evening by the picnickers. It was also noticed that there was a fair sprinkling of auto trucks brought by some of those who has passenger cars as well, and someone whispered that these optimistic individuals had come well prepared to carry home some of the bulky and valuable prizes provided for the contests.

A crowd of about 350 had assembled before the picnic was over, and all agreed that it was one of the best affairs of its kind they had attended. Under the direction of a committee consisting of O. F. Morrison, John Caslor, A. Lake and F. Hutton a program consisting of twenty-one races, a lucky number contest and a baseball game was arranged.

Big Program of Races

The kiddies took part in the girls' and boys' races of various distances and many proud hardwaremen watched the struggle of their children for the honors in these contests. Prizes given to the children consisted of mouth organs, baseballs, pocket knives, roller skates, ice skates for the boys and child's sets, tennis racquets and balls for the girls.

A balloon race for ladies brought forth much skill resulting in a win for Miss MacDougall with Mrs. Jackson and Mrs. Leslie second and third respectively. A hair brush, tin of wax and a nail brush were given as the prizes.

This was followed by a race of 100 yards for hardware clerks, J. Edwards winning the first prize consisting of a reading lamp, Mr. Dilkes won second prize, a safety razor and Mr. Woolfe won third prize, a flashlight.

The single ladies race was won by Miss Mills who received a tennis racquet. Miss Smith was second and Miss Ross third, each winning a swimming tube.

The men's backward race resulted in many spills and when the dust was cleared away it was found that H. Joy won the first prize of a wallet, with T. Roberts second (shovel) and C. Munshaw third (pocket knife.)

The married ladies race was a great test of ability, the first prize of an aluminum tea kettle being won by Mrs. Edwards. Mrs. Pinkes was second (floor mop), Mrs. Walters third (preserving kettle).

The travellers race was won by Mr. Forbes, (hand saw), Mr. Lawford second (level), and Mr. Gillespie third (screw driver).

The sack race was won by R. Ibbotson (half gallon white enamel), J. Richards second (half gal. flat white) and G. Douglas third (half gal. varnish.)

The ladies ball throwing contest was won by Mrs. Wilson (can of wax) and Mrs. Turner second (can of paint.)

The men's ball throwing contest was won by Mr. Dilkes (can of enamel.)

The ladies boot and shoe race was won by Mrs. Mills (aluminum kettle); Mrs. Sallis second (moth bag) and Mrs. King third (swimming tube.)

Handicap Race

The hardware merchants' handicap race of 100 yards was very interesting Messrs. Atkinson, Good and Edwards coming in in that order. A valuable order by S. C. Johnson Co. was given as first prize, a Taylor Forbes Co. order second, a Gurney Foundry Co. order for third.

A race for hardware merchants and travellers over 45 years of age, at 75 yards resulted in a victory for E. McNichol (aluminum roaster), C. W. Robinson second (gal. of paint) and Mr. Christie third (moth bag).

A needle and thread race for married couples was won by Mr. and Mrs. Douglas (mirror) with Mr. and Mrs. J. Smith second (aluminum potato pot) and Mr. and Mrs. Rawlinson third (hair brush).

Herewith is shown a portion of the crowd of 350 or more hardware merchants and travellers with their sweethearts, wi through the medium of the Toronto Hardware and Paint Club at High Park on Wednesday afternoon of this week. they not only enjoyed the program of sports, contests, entertainment, supper and other refreshments, but were tickled picnic, everyone was in a sociable frame of mind and the whole affair was con

Cigar Smoking Race

An unusual feature was the cigar race of 50 yards, the cigar being smoked to the string. Mr. Hall won first prize (fishing rod), Mr. Gilby second (pocket knife) and L. Rush third (butcher saw).

The clothes pin race for merchants' wives and lady merchants was won by Mrs. Richards (set knives and forks) with Mrs. Godfrey second (glass centrepiece).

A ruling was made that only one prize be given to any one contestant and this resulted in a wide distribution of prizes.

A hearty supper was enjoyed, being provided in basket form by the ladies attending, after which a radio concert was enjoyed, by the courtesy of J. J. McWaters of the Canadian Radio Electric Co. A receiving set with amplifier attachments was set up to receive the concert sent out by a local newspaper thus bringing the marvels of modern radio-telephony more vividly to the notice of the merchants.

Baseball Game

When the weather cooled off in the evening the baseball teams representing the East End and the West End which had held a brief workout in the afternoon, locked horns in a gigantic struggle for supremacy. The East End team under the managment of J. Vernon, Wood, Alexander and James, consisted of N. Rush, Rush Bros., C. Pearsall, G. Ingram, W. Walker and Son; H. Lawford, Benjamin and Co., J. Randall, Sheet Metal Products Co., S. Samuels, Pearsall Hardware, and Fred Good.

The West End team under the management of J. Booth consisted of P. Ibbotson; V. Forbes, Thos. Davidson Mfg. Co., C. Munshaw, Messrs. Snell, Roberts, Edwards, A. Christie, C. Long, McClary Mfg. Co., and Suroff.

Many interesting situations arose during the contest and numerous supporters rooted themselves hoarse in cheering for the combatants. Much talent was displayed and the game finally resulted in a win for the West End by the score of 20 to 12. "King" Brandon scored the game.

After the baseball game a special contest was held for the distribution of the remaining prizes and many valuable articles were carried off.

JOHN CASLOR

For many years a familiar figure at Toronto hardware picnics, and who was prominent in the arrangements of this year's picnic on Wednesday last. This is the first portrait of Mr. Caslor taken in years and only Mr. Caslor's desire to stop Hardware and Metal from again running a cut taken from a group photo, which was the only recent picture of him available, influenced him in having a real picture taken. It must be admitted the other picture did not do him justice.

The starters for the races were N. Baden and B. Blackwell. The Glidden Co. with B. Cotten, K. Brandon and A. Lake acting as judges.

The firms donating prizes for the various contests at the picnic included the following.

Sanderson Pearcy Co., The Sherwin Williams Co., Gurney Foundry Co., Taylor Forbes Co., Imperial Oil Co., S. C. Johnson & Son Co., Ottawa Paint Co., D. H. Howden Co., Channel Chemical Co., E. T. Wright Co., Sheet Metal Products Co., Auto Strop Razor Co., Gillette Safety Razor Co., Toronto Plate Glass Co., A. Ramsay & Son Co., Stewart & Wood Co., Rice Lewis & Son Co., H. S. Howland & Son Co., Kasement Skreen Door Co., Northern Aluminum Co., Ever Best Aluminum Co., Dunlop Tire & Rubber Co., Gutta Percha & Rubber Co., Goodyear Tire & Rubber Co., Victoria Paper & Twine Co., Benjamin Moore Co., Imperial Varnish & Color Co., Wood, Alexander & James, George B. Cooke Co., Hobbs Mfg. Co., Boulton Paint Co., Lowe Bros. Co., McFarlane Mfg. Co., Canadian National Carbon Co., The Boeckh Company, Lyons & Marks, Soren Bros., Bird & Son Roofing Co., Burrowes Mfg. Co., Nerlich & Co., Brandram-Henderson Co., Thos. Davidson Mfg. Co., Henry Disston Saw Co., Canadian Oil Co., D. F. Jones Shovel Co., Lewis Bros. Co., Rubber-Set Co., McClary Mfg. Co., Pilkington Glass Co., Rochester Lamp Co., W. S. Hall Company, The Glidden Co., Ideal Aluminum Products Co., W. Walker & Son, Rae Machine Co., Heakins & Son.

WESTERN CANADA NOTES

D. McIver, sales manager of the G. F. Stephens & Co., Ltd., Winnipeg, is spending a few weeks at Minaki.

G. P. McLaughlin, sales manager of Marshall Wells Co., Ltd., Winnipeg, has returned to business.

S. H. Whyte, of the S. H. Whyte Manufacturing Co., Ltd., Winnipeg, is on a business trip to the east.

D. Burnet, of the J. H. Ashdown Hardware Company Ltd., Winnipeg, who has been ill in the hospital, is out of confinement. He is doing nicely but it will be about the first of August before he will be able to resume his duties again.

ves and kiddies who attended the seventh annual picnic of the Toronto Hardware Merchants and travelers as arranged Many old acquaintanceships were renewed among men in the trade, and judging by the smiles on those in the picture to carry home with them some of the valuable prizes given to the contest winners. A splendid day was provided for the ducted with great success, reflecting much credit on the committees responsible.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

SELLERS KITCHEN CABINET

D. Tieman, hardware merchant, Dashwood, Ont.—Can you tell me where the Sellers kitchen cabinet is manufactured?

Answer:—Messrs. G. I. Sellers & Son, Elwood, Indiana.

CLARK JEWEL OIL STOVE

Chas. W. Mullett, hardware merchant, Bancroft, Ont.—Can you inform me where I can procure repair parts for Clark's Jewel oil stove?

Answer:—The G. M. Clark & Co., Chicago, Illinois.

BOX STRAPPING

J. W. Rork, Norwood, Ont.—Can you give me the address of a firm that makes box strapping?

Answer:—The Acme Steel Goods, Montreal, Que.

TENT MANUFACTURERS

Messrs. John Fennell & Son, Kitchener, Ont.—Kindly advise where we can procure tents.

Answer:—Raymond Bros., London, Ont.; Grant Holden & Graham, Ottawa, Ont.; J. J. Turner & Sons Ltd., Peterboro, Ont.; The D. Pike Co., Toronto.

CHAMOIS AND SPONGES

A. Bernier, Ltd., 409 St. Paul St., Quebec City—Will you kindly advise where we can procure chamois skin and auto sponges.

Answer:—Messrs. Evans & Co., Montreal, Que.

HOOSIER KITCHEN CABINET

Messrs. W. Hanna & Company, Port Carling, Ont.—Can you tell us who manufactures the Hoosier kitchen cabinets?

Answer:—The Hoosier Kitchen Cabinet Co., Portage Ave., Winnipeg, Man.

TACKLE BLOCK PULLEYS

J. L. Demers, Thetford Mines, Quebec—Can you give us the names of Canadian manufacturers of wooden and steel tackle blocks pulleys?

Steel

Answer:—Canada Steel Goods Co., Ltd., Hamilton, Ont.; The Katie Foundry, Galt, Ont.; Beatty Bros., Fergus, Ont.; Bond Engineering Works, Toronto, Ont.; Canadian Allis Chalmers Ltd., Toronto, Ont.; The Herbert Morris Crane & Hoist Co., Niagara Falls, Ont.; Canadian Ingersoll-Rand Co., Montreal, Que.; Goldie & McCulloch Co., Galt, Ont.

Wooden

Canadian Fairbanks-Morse Ltd., Montreal; Dodge Mfg. Co., Toronto; Goldie & McCulloch Ltd., Galt, Ont.; E. Long Mfg. Co., Orillia, Ont.; Reeves Pulley Mfg. Co., Toronto, Ont.

McKENNA DEHORNERS

The Ontario Retail Hardware Association, Prescott, Ont.—Can you find out who is the maker of the McKenna dehorner?

Answer:—Dr. McKenna is now deceased. These products are being distributed by Messrs. J. F. Hartz, 24 Hayter St., Toronto.

POLO HORSE CLIPPERS

Messrs. J. Clark & Son, Sussex, N.B.—Can you advise where we may obtain extra cutter plates for a hand horse clipper with the word "Polo" stamped on the bottom plate?

Answer:—This is one of the Priest line of horse clippers, "Polo" being the trade name. It is manufactured by the American Shearer Mfg. Co., and the exclusive sales representatives are Messrs. Wiebusch & Hilger Limited, No. 110 Lafayette St., New York City.

WEIGHTS OF OILS

The O. S. Hunter & Co., Durham, Ont.—Kindly advise us the weights of lubricating oil, turpentine, coal oil and gasoline, linseed oil, per gallon.

Answer:—Lubricating oil, 9 lbs. per gallon; linseed oil, 9 lbs. per gallon; turpentine, 8.40 per; coal oil, 7.85 lbs.; and gasoline 7.85 lbs. per gallon.

BAGS FOR ORE SAMPLES

The Russill Hardware Co., King St. E., Toronto—Can you advise us the manufacturers in Toronto of bags for handling ore samples?

Answer:—John Leckie Ltd., Wellington St., Toronto; The D. Pike Co. Ltd., Toronto; Woods Mfg. Co. Ltd., Toronto.

STOVE MANUFACTURERS

Messrs. Loeppky Bros., Shaunavon, Sask.—Would you let us have several names and addresses of stove and range manufacturers, in Canada?

Answer:—Stoves and Ranges—The Hamilton Stove & Heater Co., Hamilton, Ont.; Thos. Davidson Mfg. Co. Ltd., Montreal; La Marre & Co., St. Remi, Que.; The Beach Foundry Limited, Ottawa, Ont.; McClary Mfg. Co. Ltd., London, Ont.; The Dominion Stove & Foundry Co., Penetang, Ont.; Clare Bros. Ltd., Preston, Ont.; The James Stewart Mfg. Co. Ltd., Woodstock, Ont.; The Empire Stove & Furnace Co. Ltd., Owen Sound, Ont.; The Doherty Mfg. Co., Sarnia, Ont.; Burrow, Stewart & Milne Co. Ltd., Hamilton, Ont.; The Enterprise Foundry Co. Ltd., Sackville, N.B.; Chas. Fawcett Ltd., Sackville, N.B.; Gurney Foundry Co. Ltd., Toronto; Findlay Bros. Ltd., Carleton Place, Ont.; D. Moore & Co. Ltd., Hamilton, Ont.; Tudhope-Anderson Co. Ltd., Orillia, Ont.; The Galt Stove & Furnace Co. Ltd., Galt, Ont.; The Happy Thought Foundry Co., Ltd., Brantford, Ont.; The Hall Zryd Foundry Co. Ltd., Hespeler, Ont.; The Harrison Stove Works, Harrison, Ont.

Stoves, Electric—Canadian Westinghouse Co. Ltd.; McClary Mfg. Co., London, Ont.; National Electric Heating Co. Limited, Toronto, Ont.; The Moffatt Stove Co. Ltd., Weston, Ont.; D. Moore & Co. Ltd., Hamilton, Ont.; The Canadian Edison Appliance Co. Ltd., Stratford, Ont.

Stoves, Oil—The Sheet Metal Products Co. of Canada Limited, Toronto; Thos. Davidson Mfg. Co., Montreal; Perfection Stove Co., Sarnia, Ont.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

4911. Binder twine.—A large Cork firm of hardware and general merchants, who in normal times import large quantities of binder twine, would prefer to buy the Canadian product rather than continue their present connection, and would like a direct connection with a manufacturing firm. No large present business anticipated owing to business conditions.

4912. Agricultural tools.—A large Cork firm would like to hear direct from Canadian manufacturers of hoes, rakes, and other agricultural tools. This firm have many other depots throughout Ireland.

4913. Binder twine, hemp, and manilla rope.—A large wholesale firm of many departments, with chief offices in Dublin and Belfast, will be glad to have quotations for binder twine, hemp, and manilla rope.

4914. Nails, rivets, bolts, wire.—A large wholesale firm of many departments, with chief offices in Dublin and Belfast, will be glad to have quotations for round and oval wire nails, shoe rivets, iron and brass, bolts and nuts, wire No. 6, black and galvanized, wire fencing, barbed wire.

4915. Enamelware, aluminium ware and washboards.—A large wholesale firm of many departments, with chief offices in Dublin and Belfast, will be glad to get quotations for enamelware, aluminium ware, and washboards.

4917. Woodenware.—A big Dublin firm are willing to receive quotations c.i.f. Dublin for pastry boards, washboards, clothespins, and chair-seats from Canadian firms who can compete with United States firms in quality.

4918. Hardware.—A high-grade Dublin firm of wholesalers and importers, who distribute all over Ireland, will be glad to have samples and prices from Canadian manufacturers of wire nails barbed wire, iron and brass shoe nails, galvanized barbed wire and fencing wire; expanded metal; asbestos cement, and tiles. Quotation c.i.f. Dublin only.

Twenty Years Ago

Following items reproduced from Hardware and Metal of June 14 and 21, 1902:

"At the eighty-fourth annual meeting of the shareholders of the Bank of Montreal, with Lord Strathcona and Mount Royal in the president's chair, Mr. Clouston, General Manager, in his address stated it is with the highest satisfaction and gratitude that we receive to-day the news of peace in South Africa."

"On Wednesday, June 18, John W. Richardson of the Canada Hardware Co. was married to Miss Martha D. Cleland, daughter of James Cleland manufacturer, of Montreal. The groom is one of the most popular members of the wholesale hardware trade of Montreal."

"The recently organized Toronto Branch of the Ontario Retail Hardware Merchants' Ass'n. held a meeting and decided to amalgamate with the Retail Merchants. Speeches were made by president E. R. Rogers of the Hardware association and the Secretary of the R.M.A."

"A resolution was passed by the R.M.A. of Halifax recommending that June 21 and July 1 be combined into one holiday to take effect in 1903, the holiday to be on the latter date. June 21 has always been recognized there as Natal Day."

"The Canada Paint Co., Ltd., is boasting that it will be represented at the Coronation. The explanation is that Lieut.-Col. Pellatt, the secretary of the company, is, as every Canadian knows, the commander of the Coronation Contingent."

"A number of the wholesale hardware houses in Montreal are now installing a long-distance telephone equipment. This will be a decided convenience for both the firms and their customers."

"The Montreal Retailers' Association has made a request that the $4 bills now issued by the Dominion Government be withdrawn from circulation."

"The Buffalo Forge Company have recently obtained a charter to do business in Ontario under the name of The Canadian-Buffalo Forge Co., Ltd."

"Sgt. Harry A. Lee mentioned in dispatches for gallantry in action in South Africa, is a brother of Thos. B. Lee, of Rice Lewis & Son, Ltd., Toronto."

"The premises of the Amherst Foundry and Heating Co., Amherst, N.S., suffered loss by fire.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

WHILE the actual number of changes made his week in the hardware markets are not as extensive as in other recent weeks, the lines which have undergone revision are important and therefore of much interest. Rope and cordage prices have declined, pure manila rope now being quoted at a reduction of two cents per lb. base. Beaver manila, New Zealand hemp, sisal rope and lathyarns show reduction of one cent per lb. base. Other lines listed among the reductions include bucksaws, including blades, rods and frames, packings. Galvanized sheets are holding at the reduction made last week and corrugated sheets though firm in tone are somewhat unsettled and a variation in prices is evident. Seasonable lines such as corn popers and huskers also declined in price this week.

Higher prices appear this week on copper and brass, and certain other iron and steel products are stabilized at the advance made last week. Certain lines of hardware such as lanterns are revised in price to take care of the Sales Tax which is no longer absorbed by those manufacturers.

After considerable speculation as to what further changes might be made in paint prices, it is evident this week that manufacturers have decided to forego their alleged intention to further advance prices and absorb the Sales Tax. There is an active sale for seasonal hardware such as vacuum bottles, harvest tools, glass ovenware, screen wire cloth, sprayers, paris green, etc., stocks of the latter now being rather low, due to the great number of insects prevalent on crops this year.

Montreal Markets

MONTREAL, July 20.—While the changes in prices are fewer in number on the current hardware market this week there are revisions made which are of particular interest to the trade. An important price decline is recorded on rope and cordage. Pure manila rope is reduced two cents per lb. base, and Beaver manila, New Zealand hemp, sisal rope and lathyarns show a reduction of one cent. per lb. base. Galvanized sheets still attract attention and the firm undertone, assisted by the shortage locally, has resulted in a price increase of twenty-five cents per hundred lbs. on all gauges of both English and American sheets. Corrugated sheets, although firm in tone, have again become somewhat unsettled and there is now a price variation among local distributors. The advance prices on bar iron and steel, announced in last issue, have not yet been adopted by all distributors, and certain jobbing houses are still quoting a price ten cents below. The undertone of the cotton market is still in a firm position but local quotations on cotton waste still remain unchanged.

NET PRICES ON EVEREADY WIRELESS BATTERIES

Montreal.

Jobbing houses now announce net prices on Eveready wireless batteries for use on wireless outfits. Following are quotations:

"B" BATTERIES—	
No. 765	1 35
No. 766	2 20
No. 767	4 70
"A" BATTERIES—	
No. WD 280	10 80
No. WD 40	11 30
WD 80	15 10

ROPE AND CORDAGE IS REDUCED IN PRICE

Montreal

A reduction of two cents per lb. on pure manila rope and one cent on Beaver or New Zealand hemp, sisal rope and lathyarns is announced. Pure manila is now quoted at 21 cents base, Beaver or New Zealand hemp at 19 cents base, sisal at 19 cents base and single lathyarn at 17 cts., with the usual advance of one-half cent for double. Other lines of hemp rope are at new lower net prices, varying on the different lines.

ROPE—

Pure manila, base	0 21
Beaver or British manila, base	0 19
New Zealand hemp, base	0 19

Above quotations are base prices, ¾ in. dia. and larger. The following advances over base are made for smaller sizes: ⅝ in., ½c.; 7-16 in., 1c.; ⅜ in., 1½c.; ¼ and 5-16 in., 2c.; 3-16 in., 2½c.

Lathyarn single, base	0 17
Lathyarn double	0 17½
Yacht marline, tarred	0 53
Halyards	0 46
Beaver halyards, white polished, ¾ in. basis	0 30
Hemp, deep sea line, base	0 46
Hemp, tarred ratline, base	0 39
Hemp, tarred bolt rope, base	0 41
Tarrerd marline and houseline	0 41

NOTE:—Shorter lengths than half-coils 2c. per lb. additional.

NO CHANGE IN CEMENT TRADE CONTINUES FAIRLY ACTIVE

Montreal.

The announcement of lower freight rates on Canadian railroads has apparently yet failed to make any impression on the cement market, no present indication of a revision said to be in sight. When the announcement of lower transportation rates was being awaited, it was stated in some quarters that the change would in all probability affect this product considerably, it being classed as one of the heavier commodities and freight charges an important factor in the marketing. Present demand for cement is reported fairly good with the continuation of active building construction, especially in the larger centres.

CEMENT—

Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.
Rebate of 20 cents for empty bags.

COTTON WASTES ARE FIRM BUT UNCHANGED IN PRICE

Montreal

Although higher prices have been announced on cotton wastes in other outside markets, local prices are still unchanged. The undertone of the mar-

ket continues firm but dealers anticipate little change in the immediate future, owing to this season of the year and present demand. Following are unchanged price levels:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

GOOD TRADE CONTINUES IN LEAD PRODUCTS

Montreal

There is no further change in the market for lead products since the advanced quotations on certain lines two weeks ago. Metals on primary market are still described as mostly firm, particularly spelter which continues in a very strong position. Tin and lead, although much quieter at the present time are both reported fairly firm. Current trade in the finished products is stated to be continuing fairly brisk for this season of the year and particularly in lines pertaining to building construction. Following are unchanged price levels:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 2½ lbs. sq. ft., lb.	0 10
Do., 4 to 8 lbs. sq. ft. lb.	0 09
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

CORRUGATED SHEET MARKET BECOMES UNSETTLED

Montreal.

Although the undertone in the market for corrugated sheets is firm owing to the strong tendency in flat galvanized sheets, this is apparently not sufficient to stiffen quotations on corrugated, nor to stabilize the market. The standard list, less 10 per cent. is still quoted by some firms, but lower prices are given on the 28 gauge and the 26 gauge in some qaurters. Local competition on these sheets has been keen all during the spring and summer months, but for a time the market became fairly steady insofar as prices were concerned owing to the continued advances in the sheet markets. This condition, however, has broken and a quotation of approximately 90 cents less is quoted on both the above gauges. With conditions such as they are on galvanized sheets, a shortage being noted especially on the best selling sizes, an improvement in the present situation is expected at an early date, as stocks in the hands of corrugated manufacturers are also reported as none too ample. Other gauges remain as formerly and following is standard list less 10 per cent.

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50
Less 10 per cent.	
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.	

SPASMODIC TRADE IN WASTE MATERIALS

Montreal.

Despite the advancing season and the warm weather, trading in scrap has continuèd in fair proportions, although of a spasmodic nature. Dealers this week report a little more activity than last week, particularly in iron and steel waste. Copper, which was the most active metal in past weeks, has fallen off considerably and little further activity is anticipated during the hot weather in the ensuing weeks. There is little or no change in quotations and following are dealers' nominal buying prices:

WASTE MATERIALS—	
Automobile tires	0 50
Rubber shoes	0 02½
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04½
Lead, tea	3 00
Light copper	0 08½ to 0 09
Heavy copper	0 11
Wrought iron R. rd., No. 1, per gr. ton	10 00
Malleable scrap (ton)	9 00 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	3 00
Boiler plate	8 00 9 00
No. 1 machinery cast	20 00 to 21 00

ASBESTOS PRODUCTS ARE IN GOOD DEMAND

Montreal.

Current quotations on asbestos products remain unchanged with the undertone of the market said to be somewhat improved owing to increased demand. Business is now described as fair, and greatly improved over the earlier months when building activities had not yet commenced in earnest. Unchanged prices are as follows:

ASBESTOS PRODUCTS—	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	60%
85% magnesia	45%
Boiler covering	$1.50 per bag
Asbestos sheathing	7 50 per 100 lbs.

TWENTY-FIVE CENT ADVANCE IN GALVANIZED SHEET PRICES

Montreal.

The firmer undertone in the sheet markets, assisted by a decided shortage on the local market, is reflected in quotations on galvanized sheets, and prices generally are advanced twenty-five cents per hundred lbs. on all gauges in both the Queen's Head and other brands. Stocks for some time past have been at a low level, and the loss of the boat load of English sheets last week further adds difficulty in replenishing. Deliveries from mills to the south have been backward for some weeks past, and little assistance can be given from this source owing to no signs of improvement in delayed shipments in sight. Mills are still busy with orders well ahead already on hand. Demand for galvanized sheets is continuing particularly brisk notwithstanding trade usually shows a slackening at this season of hot summer weather. Just how acute the shortage will become is hard to say, but it would appear that relief will have to come from mills on this side as the next shipment from overseas is not expected until the latter end of the month. Following are revised quotations:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 50
26 gauge	6 75	7 25
24 gauge	6 15	6 65
22 gauge	5 80	6 30
18—20 gauge	5 10	5 60
Other Brands—		
10¾ oz.	6 75	7 25
28 U. S. gauge	6 35	6 85
26 U. S. gauge	6 05	6 55
24 gauge	5 90	6 40
22 gauge	5 90	6 40
18—20 gauge	5 75	6 25
16 gauge	5 60	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	13 50
20 x 28 IC, 112s	14 00
20 x 28 IX, 112s	16 00
20 x 28 IXX, 56s.	9 25
20 x 28 IXXX, 56s	10 00
TERNE PLATE—

Welsh, polished, 60s.	7 50
Galvanizel, 52s	7 50
Galvanized, 52s	7 50

ADVANCE IN STEEL PRICES NOT GENERALLY ADOPTED

Montreal.

Last week the announcement was made by many distributors that the base price on iron and steel bars was advanced ten cents per hundred lbs., and quotations in many quarters now show the revision. However, these higher prices are not yet generally quoted and certain jobbing houses still give a price of $2.95 base. Whether the increase will be uniform in the near future is problematic but the opinion was expressed by one local distributor that with a firm undertone continuing in the steel industry it was altogether probable that the higher prices would be adhered to by all as replacement cost warranted the higher figure. On the other hand there is the slight reduction in freight rates to be considered, and while it was only a minor change it might be sufficient to offset the tendency for slightly higher prices at the

present time. Trade is described as being quite satisfactory considering the season of the year, although the usual summer slackening has been slightly noticeable during the past week. Following are quotations at the revision of last week:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 05
Refined iron	4 55
Irish finish machinery steel	3 10
Mild steel	3 05
Single reeled machinery steel	5 15
Band steel	3 40
Spring steel	4 65
Sleighshoe steel	3 05
Tire steel	3 25
Harrow tooth steel, per lb.	3 20
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 95
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

KEEN COMPETITION ON WIRE NAILS

Montreal.

Keen competition is again evident on the local market for wire nails. The stronger undertone in the steel industry generally reflected on this product during recent months, and even yet the tone of the market is described by manufacturers and distributors as steady to firm owing to conditions of production costs. However, in spite of this a quotation considerably less is given by certain firms to obtain business. Whether this condition will continue, and result in even lower quotations than are now given is hard to say, but hope is expressed than an improvement will be brought about in the very near future as present business offers little or no margin for those concerned. Trade is said to be continuing in fair proportions with building operations, especially in the larger centres.

FIRMER UNDERTONE CONTINUES ON STOVES AND FURNACES

Montreal.

The situation on stoves and furnaces appears to be about the same as it was last week. The undertone of the market is firmer, and while there is no present indication of a revision in prices, there is still a stiffening tendency owing to higher production costs. One manufacturer stated that in his opinion the trend is undoubtedly in an upward direction, whereas reduction in prices for fall trade appeared probable a little earlier in the season. Bookings were thought to be an important factor in the market at present and dealing with sales for future deliveries he stated that business was quite active in the city but in rural districts it was more or less backward to date. The chief reason for this is no doubt because many dealers carried over a greater number of stoves last year than usually and are now reluctant in their purchases until the earlier sales dispose of these. There has been a rumour on the local market to the effect that certain Eastern manufacturers had already contemplated revising prices but no definite information is available up to the present.

FIRMER TONES MAINTAINED IN INGOT METALS

Montreal.

Ingot metals have all maintained their firmer tone during the week although the disturbed conditions in the U. S. A. naturally have an unsettling effect. Certain metals have now had a fairly sustained advance and a slight re-action in the near future would not be surprising, especially if the railroad strike develops with its effect upon consumption.

TIN.—This metal has had a slight rise this week, London touching the highest point since early in the year, but temporary or not is hard to say. Consumption cannot be said to be very great and it is considered difficult to see how there can be any great advance. Locally consumption is still rather light with price slightly firmer at 36 cents.

COPPER.—The tone of the copper remains firm in the U. S. A. and while there is said to be no surplus of nearby copper it is probable that some of the new production will be on the market in August or September. Consumption continues good and export demand is reported as encouraging, although consumption in Canada is still below normal. Prices are a little higher, electro quoted at 18 cts., casting at 17½ cts.

SPELTER.—Spelter has been very strong both in Europe and the U. S. A. and 6 cents, East St. Louis has been paid for July, August metal. London is higher than since 1920 with every appearance that the highest point has not yet been reached. Increased production however is expected with the enhanced prices ruling and a re-action would not be surprising. Local market is firm with demand quite good at 8½ cents.

LEAD.—It is considered difficult to size up the situation on this metal as the market is very irregular. Demand has fallen off somewhat in the United States with a consequent sagging of prices, but London is quite firm with the market well over the £25 mark. Prices ruling on the local market are higher in sympathy with the tone in London but is not very heavy. Present quotation 7 cents.

ANTIMONY.—This metal is rather dull in New York with the market considered near the bottom, with no sustained demand to advance prices. The local market is quiet with prices unchanged at 6½ cts. for Chinese and 7½ cts. for high grade English.

ALUMINUM.—Aluminum remains very quiet on the local market with no new feature. Quotation is unchanged at 24 cents.

Scrap metal prices are unchanged while ingot metals are still reported with a firm undertone in most lines.

Toronto Markets

TORONTO, July 20.—Again this week hardware prices continue to fluctuate in both directions. Reductions are noted on rope and cordage which indicate a desire to stimulate business. Bucksaws including blades, rods and frames are reduced approximately twenty per cent. and following the reduction in cordage there are lower prices now prevailing on packings. On the other hand higher quotations are prevailing on copper and brass and the base price on bar iron and steel has been stabilized at an advanced figure. Owing to the adjustment of the Sales Tax prices on lanterns are advanced to the extent of 2¼ per cent. Sheet stocks are low, with prices on galvanized holding at last week's advance. While the holiday season trade in ingot metals is quiet, there are undoubted signs of recovery in spelter, tin and copper.

HIGHER QUOTATIONS ON COPPER AND BRASS

Toronto.

Due to the strength of the virgin metals and recent increases on primary markets, domestic prices on copper and brass products are advanced one cent per lb. all through the list. This affects sheets, rods, and tubing in copper and brass, the base prices being uniformly higher. For some time past the tendency has been towards a firmer basis, and manufacturers state that they are forced to announce the current change owing to recent upward developments in production costs. Current trade in all these goods is described as very fair, business generally having registered a marked improvement during recent weeks. Following are the revised quotations:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 26
Rods, base, per lb.	0 20

COPPER—

Rods, base, per lb.	0 29
Soft sheets, pain. 16 oz. and heavier	
Do., plain tinned 16 oz. and heavier, per lb.	0 37
lb.	0 30
Do., polished and tinned, 16 oz. and heavier, lb.	0 42
Tubing	0 30

REDUCED QUOTATIONS ON ROPE AND CORDAGE

Toronto.

Lower prices are now announced on rope and cordage, the reductions varying between one and four cents per lb. Best manila is down two cents bringing the new level to 21. Beaver and British manila show a revision of one cent per lb., making the new level 19 cents. Sisal rope and New Zealand hemp are

also reduced one cent, while other hemp cordage lines register a decline of between four and five cents per lb. This development is ascribed as resulting from the easier trend of primary markets combined with efforts on the part of cordage manufacturers to reach rock-bottom levels. The precedent set early in the summer when a substantial reduction in binder twine prices was announced, is now followed, and distributors state that improved current trading in rope and cordage is generally expected. Recent commitments have been more or less of a restricted nature, and the general market tone as a result has been quiet. Following are the new price levels:

ROPE—

Pure Manila basis	0 21
Beaver manila, basis	0 19
British manila, basis	0 19
New Zealand hemp basis	0 19
Sisal, basis	0 17
Single lath yarn, basis	0 17
Double lathe yarn	0 17½
Yacht marline, tarred	0 53
Halyards	0 46
Beaver Halyards, wht. pol. ¾ in. basis	0 46
Hemp, deep sea line basis	0 46
Hemp, tarred ratline, basis	0 39
Hemp, tarred bolt rope basis	0 41
Marline and Houseline	0 41

HIGHER PRICES ON BAR PRODUCTS NOW GENERAL

Toronto.

Local prices on bar iron and steel have now generally firmed up at the higher levels recently noted on the market, this change technically amounting to an advance of fifteen cents per 100 lbs in many quarters. The base quotation on bar products is now reported uniform at $3.15, whereas a variation from $3.00 up was previously in evidence.

Warehouses report that they are keeping fairly busy, trade being undoubtedly good for this time of the year. While there is no big business going, orders being small, yet there is said to be plenty to go round with the aggregate constituting a brisk turnover. Following are the revised local quotations on bar products:

IRON AND STEEL—

Mild steel bars, base	3 15
Mild steel bands 3-16 in. base	3 65
Bar iron, base	3 15
Angle iron, base	3 25
Horseshoe iron	3 75
Tire steel	3 35
Spring steel	8 00
Sleigh shoe steel	3 15
Hoop steel	4 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

SHEET DELIVERY SLOW: STOCKS NOW DEPLETED

Toronto.

While sheet prices are at present remaining at the revised levels quoted last week, quotations are undoubtedly on a very firm basis. More anxiety over supplies is now evident on the part of producers, this condition being occasioned by the low stocks on hand combined with the conjested condition of certain mills who have heavy obligations in the shape of orders. Deliveries from southern producing centres is described as getting more uncertain, and to this development is added the serious stage which the coal strike has reached, coupled with certain transportation delays. Reports from the south, however, indicate that general production has not been hampered to any extent, and is if anything slightly heavier in some quarters. Locally, the activity in sheets is being well maintained, with English galvanized becoming more popular in certain circumstances owing to delayed shipments. Following are average current quotations with the range between certain distributors on galvanized sheets:

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10

BLACK SHEETS—

18-20 gauge	4 80
16 gauge	4 15
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6 35
22 gauge	6 05	5 90
18 and 20 gauge	5 85	5 75

	Premier and	Apollo
10¾ oz.	6 40	7 10
U. S. 28 base	6 00	6 65
U. S. 26 base	5 70	6 35
22 and 24	5 55	6 20
18 and 20	5 40	6 05
16	5 25	5 90
12 and 14	5 10	5 75

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets. An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

LANTERN PRICES REVISED

Toronto.

In order to equalize prices from the manufacturer and jobber to the retail trade, in view of the policy of certain firms not to absorb any part of the Sales Tax, prices on lanterns are revised by the extent of the 2¼ per cent. Sales Tax this week, giving following quotations;

LANTERNS—

Short or Long Globe, plain	9 20
Do., Japanned	9 70
Dash Japanned	12 80
Do., Search (rend' reflec)	12 80
Little Bobs	2 15 4 30

F.o.b. Toronto, Hamilton, London, Montreal.

BUCKSAWS REDUCED 20 PER CENT

Toronto.

A reduction of much interest at this time of year is that on bucksaws, blades, rods and frames. This reduction amounts approximately to 20 per cent.

PACKINGS REDUCED IN PRICE

Toronto.

Following upon the reduction in cordage prices come reductions in packings. Present prices are as follows:

Fine Jute	0 15
Coarse Jute	0 11
Hemp	0 30
Square braided hemp	0 32
No. 1 Italian	0 35
No. 2 Italian	0 28

WROUGHT IRON PIPE IN FIRM POSITION

Toronto.

Wrought iron piping is still in a firm market position and while the recent downward revision in domestic freight rates on certain basic materials may tend to offset contemplated price advances, yet the general situation reflects the growing strength of manufactured steel products.

As a result of the rising costs of steel production, asking prices on many finished steel goods are more or less steadily advancing as the season progresses. Owing to the coal strike, production of certain lines has been somewhat restricted, more attention having been paid to heavy lines. This has given the market an appearance of exceptional snap. Pipe quotations continue at List No. 54.

TIN PLATE PRICES AT UNCHANGED LEVELS

Toronto.

Tin plate prices are reported steady at recently revised levels, with a brisk measure of operation now assured for mills by the current volume of bookings. It is noticeable that Welsh tin plate has recently been appearing on domestic markets in larger volume, and competition between Welsh and American producers has provided one of the features in this market during recent months. A recent announcement from Wales indicated that tin plate prices in that country were on the increase owing to higher production costs. Following are the average local quotations:

PLATES, CANADA—

Ordinary, 52 sheets	4 75
Do. 60 sheets	4 85
Blued and oiled, boxes, 52's	5 00
Do., Do., 60's	5 10

PLATES, COKE TIN—

IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50

PLATES, CHARCOAL TIN—

IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00

PLATES, TERNE—

IC, 14 x 20, 112 sheets	11 50

STEADIER TREND IN COTTON WASTE PRICES

Toronto

Although there is reported to be considerable firmness in the market for cotton wastes, quotations are remaining at unchanged levels and distributors are describing the present tendency as steady. Some higher prices on the raw cotton markets have recently been reported, but it is stated that such developments are not always reflected in cotton waste circles, at least not immediately afterwards. That some future changes may develop should the strength in the primary quarters be maintained for any length of time was however, generally admitted. Trade at present is stated to be moderate and in fair volume for this time of the year. Unchanged price levels are contained in the current quotation pages.

FIRM PRICES EVIDENT ON CORRUGATED SHEETS

Toronto.

Corrugated sheets are still remaining at the recognized price list and discount which has prevailed on the markets during the present season. While some change was more or less looked

for in an upward direction, owing to the reflection of steel developments in general, quotations remain steady. A brisk seasonal call is recorded, with the prevailing price levels described as considerably firmer than was the case during the earlier months of the year. The strength of primary steel markets continues in evidence, with such factors as the coal strike and railroad shopmen's walk-out in American centres contributing towards an uncertain future. Thus the lower freight rates on basic materials are lost sight of, although it is admitted in some quarters that it may tend to offset certain contemplated advances.

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 26 U. S. gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

IMPROVEMENT EVIDENT IN RANGE BOILER TRADE

Toronto.

Seasonal improvement is recorded in the range boiler market, the current demand for these products having recently increased in volume. While trade is still described as spasmodic by some distributors, others observe that business is up to expectations and establishes a marked improvement over conditions in range boilers apparent earlier in the season. No variation in prices has been announced since the issuing of the revised list with discounts. While sheet product prices have recorded several advances, this has had the effect of firming up the prevailing lists. It is noted, however, that the strength of the steel industry in general is now being reflected in quotations covering practically all finished steel products.

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 60
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.: Extra heavy, 40 per cent.

BETTER CALL FOR PIPE FITTINGS: PRICES STEADY

Toronto.

Since there has been a better call for pipe fittings, due to the increased activity in building circles, it is noticeable that discount levels have been decidedly more steady. Quotations on these products remain unchanged, the issuing of the revised price list with discounts on malleable fittings, constituting the last change with these levels still in effect. As indicated above, current trade is now on a more satisfactory basis, and while the improvement in trade circles is evident. Following are prevailing quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, mall.	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do., long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922. Discounts 70 and 5 per cent.

CONTINUED ACTIVITY IN TROUGH AND PIPE

Toronto.

Manufacturers and distributors of eavestrough, conductor pipe and similar products report general activity, with good prospects for a record volume of trade in these lines if the present movement continues for the balance of the season. Building activities on a more extensive scale than in the past few years has undoubtedly assisted in this direction. Prevailing price levels continue firm, but no changes have been announced. It was thought at one time that quotations would be revised upward, but while prices are reported as steady, no variations have been noted. The strength apparent in the steel industry and especially on such flat sheet products that enter into the production of trough and piping undoubtedly contributes toward the present undertone. Current quotations follow:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

	Per 100 ft
8 in.	$ 15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30

3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

BOILER TUBES NEEDED IN HEATING REPAIRS

Toronto.

Local distributors of boiler tubes point towards the firmness in the primary steel markets and the fact that southern producers have recently increased the quotations on tubing, as indicating a similar upward movement in the near future on domestic boiler tube prices. Current trade is also described as on a slightly improved basis, there being a certain amount of replacement and repair work to various heating plants, etc. going on during the summer months. Prevailing price levels, however, generally remain unchanged at the following average list, with business in these products stated as good for this season of the year:

BOILER TUBES—

	Seamless	Lapweld.
1 inch	$18 00	$.....
1¼ inch	20 00	.....
1½ inch	19 00	.....
1¾ inch	20 00	.....
2 inch	19 00	16 00
2¼ inch	22 00	19 00
2½ inch	25 00	19 00
3 inch	29 00	24 00
3¼ inch	34 00	26 80
4 inch	43 00	34 25

STRONG UNDERTONE IN LEAD AND ZINC GOODS

Toronto.

Lead and zinc products are reported quite firm in price, and since the upward revisions were announced two weeks ago, it is noted that the virgin metals have again advanced. Therefore, certain manufacturers and distributors generally look for additional higher levels in the near future on the finished goods, should the present strength be maintained in primary markets. Average prevailing quotations follow:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.		0 13
Lead Waste, pipe, list, per lb.		0 14
Do., over 8 in., list per lb.		0 15
Lead pipe is subjected to a discount of		10%
Lead traps and bends		15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb.		0 09
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly, lb.		0 22½
Do., wiping, lb.		0 21
Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

SOIL PIPE IN SEASONAL DEMAND: PRICES STEADY

Toronto.

Soil pipe and fittings remain very firm in price, with trading in these products described as good. The movement during recent weeks has been accentuated by the brisk activity in construction circles, and with home building generally continuing during the summer months, a seasonal volume of business in soil pipe is generally expected for the balance of the season. Quotations are reported steady and unchanged, with the following discounts at present governing the local market:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

SCRAP MARKET STILL IN QUIET POSITION

Toronto.

Trade in scrap materials continues of a moderate nature, the waste markets generally lacking animation, as was noted during recent weeks. Prices are generally being maintained at unchanged levels, with dealers basing future anticipations upon the sustained strength of the primary steel markets and the upward swing of production costs due to the coal and transportation difficulties in southern territories. Certain metals,

however, and also scrap rubber, continue very dull. Following are the usual averages for local dealers buying prices in fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	14 00	15 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 50
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

SIGNS OF RECOVERY IN INGOT MARKETS

Toronto.

Ingot markets are gradually showing sign of recovery, spelter, tin and copper again showing the way in this respect. Local tin prices are a little higher this week due to the moderate volume of current business combined with a slightly firmer condition at primary centres. The demand for spelter is brisk and the size of stocks is reported heavily reduced. Prices are heading towards the upward swing of the pendulum, which has been observed in ingot metals for some months past first in, one direction and then receding. The holiday season trade in ingot metals is light but firmness is evident in prices.

COPPER.—The statistical position of copper is reported as gaining strength, and prices at primary markets are described as firm and well sustained. Producers claim that current trading is somewhat restricted by the fuel and transportation outlook in the States, but domestic quotations remain steady to firm with business light. Local prices hover between 17 and 17½ cents.

TIN.—Local tin prices are quoted one cent per lb. higher, due to the signs of recovery at primary centres, with the upward trend in production centres. While the volume of trading is admittedly quiet, prices are firmer. Local quotations on ton lots are higher at 35½ cents, with less tons at 36 cents.

LEAD.—There is no appreciable weakening in this market, but business has undoubtedly assumed smaller proportions. The demand is restricted, it being stated that consumers have generally satisfied their requirements for the present. In anticipation of a recovery, local prices on less than ton lots have been advanced to $7.15. Reports from primary centres, however, indicate a listless market and the local average remains at 7 cents.

SPELTER.—The zinc market is described as strong and active, with prices considerably firmer owing to the large reduction in stocks recorded during last month. The current demand has been in excess of production records, and quotations are well-balanced with the local level at $7.25.

ANTIMONY.—This market is steady and inclined to be a little firmer. There is no marked activity to record, however, and domestic prices are unchanged at 6 to 7 cents.

ALUMINUM—The aluminum market remains quiet and dull, but previous levels continue unchanged. The local quotation hovers between 20 and 21 cents.

London Markets

LONDON, July 20.—Business here continues seasonably good. There is a steady demand for summer goods and stocks are getting rather low.

Several price changes go into effect here this week including new lower prices on turpentine and rope and new higher list on wood screws. Collections are reported as good.

EASIER PRICE LEVELS ON ROPE AND CORDAGE

London, Ont.

Reduced quotations have now been announced on rope and cordage. Best manila is lower by two cents per lb. while Beaver and British manila, lath-yarn, Sisal rope and New Zealand hemp all register a decline of one cent. Revised base prices follow:

ROPE—	lb. base
Pure Manilla	0 21
Beaver Manilla	0 19
New Zealand Hemp	0 19
Sisal	0 17

LATH YARN LOWER IN PRICE

London, Ont.

New prices announced on lath yarn show quotations one cent a lb. decline, giving a price of 17 cents a lb.

TURPENTINE PRICES DROP ANOTHER TEN CENTS

London, Ont.

A recession of ten cents per gallon has been announced by local distributors in the price on turpentine. Fluctuations have been recorded in quotations on southern producing centres, which have resulted in a variety of opinions regarding the trend of prices generally. Local stocks are described as still somewhat scarce. New price levels follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots	180
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

LOWER PRICE ON CORN POPPERS

London, Ont.

New prices on corn poppers are lower than previous quotation by about 10 per cent. Present prices as follows:

No. 7 x 2 qt. square $4.20 doz.
No. 2 x 1 qt. square $2.80 doz.

CORN HUSKERS LOWER

London, Ont.

Prices on corn huskers for this season are lower as follows:

No. P $1.70 doz.
No. 2,000 95c doz.
No. 2,100 85c doz.
No. 678 $2.75 doz.

NEW LIST INCREASES WOOD SCREW PRICES

London, Ont.

The new higher list on wood screws shown in last week's issue of Hardware and Metal is now in effect here, thus increasing prices.

PARIS GREEN STOCKS LOW

London, Ont.

Paris green is receiving an active sale and stocks are low. Present prices are as follows:—

½ lb. packages 40; I lb. packages 38, 25 lb. Drums 36, 50 lb. drums 34, 100 lb. drums 34, 250 lb. Kegs 32½, 600 lb. bbls. 32 per lb.

SEASONAL CALL NOTED FOR VACUUM BOTTLES

London, Ont.

A good summer sale is generally reported for Thermos bottles and luncheon kits, many merchants having featured these goods in their displays of seasonable goods and thus appealing to picnic and outing parties. Quotations continue unchanged at list less 25 and 10 per cent.

SEASONAL DEMAND FOR WHITE LEAD IN OIL

London, Ont.

An excellent sale for white lead in oil is still reported, with new higher price levels recently quoted now in effect. These quotations follow:

WHITE LEAD IN OIL—

	Tons Per 100 lbs.	Less Tons
Pure	13 55	13 90
Elephant	14 05	14 40

HAY FORKS AND HOES IN SEASONAL MOVEMENT

London, Ont.

Dealers generally report a brisk seasonal sale for harvest tools especially such products as hay forks and hoes. Quotations remain steady at list less sixty per cent.

POPULAR SALES IN GLASS OVENWARE

London, Ont.

Merchants record a brisk seasonal sale at present for glass ovenware. Prices are unchanged at the levels recently quoted of list less 33 1/3 per cent.

NAILS RETAIN SEASONAL VOLUME OF TRADE

London, Ont.

All through the summer months a brisk call for nails has been noted due to the activity in building circles. A fair movement is still in evidence at the following unchanged prices:

NAILS—	
Wire, base	3 65
Cut, base	4 35

Winnipeg Markets

WINNIPEG.—Price variations on current hardware markets include an advance in quotations on turpentine and new quotations are $1.85 per gallon. Linseed oil is ruling firm. List prices on lead pipe and waste appear with an increase of one cent per pound, and a revision is also made in the price of traps and bends. Soil pipe and fittings are in good demand and stocks are reported low. All lines of harvest tools and threshers supplies are showing an improvement in sales and stocks are reported low. As the hunting season is approaching, loaded shells are selling freely.

LINSEED OIL PRICE LEVELS REMAIN FIRM

Winnipeg.

Reports from the southern market state that linseed oil is ruling firm and prices are expected to go higher. The demand continues good. Flax seed will be only about 45 per cent. of the requirements, and this naturally necessitates the importation of quantities of foreign oil. Boiled linseed oil is quoted at $1.28 per gallon and raw at $1.25.

HIGHER QUOTATIONS APPEAR ON TURPENTINE

Winnipeg.

The tone of the turpentine market continues firm and export enquiries are reported. Prices have advanced 20 cents per gallon on the local market and the price recorded is $1.85 per gallon. Dealers claim that present quotations are more in comparison with the current cost of flax seed. There is a fair demand.

LEAD PIPE AND TRAPS HIGHER IN PRICE

Winnipeg.

Reflecting the firmness in the market of lead products there is an advance in the prices on lead pipe and waste. The demand for these goods is active and lead pipe is quoted at $12.51 per hundred pounds, and $13.41 for lead waste. Traps and bends are quoted at list price less 10 per cent.

FIRM TONE TO SOIL PIPE AND FITTINGS

Winnipeg.

The increased demand for soil pipe and fittings has brought stocks to a low level. A firm tone in this market is noted which attributed to the higher costs of raw material and an upward revision has been established on the local market.

SOIL PIPE—

2 inch	20%
3 inch	20%
4 inch	30%
5 and 6 inch	25%

FITTINGS—

2 to 3 inch	40%
4-5 and 6 inch	45%

HARVEST TOOLS AND THRESHERS SUPPLIES IN GOOD DEMAND

Winnipeg.

There has been a good demand for all lines of harvest tools and threshers supplies, and it is the general opinion that there will be a shortage of these lines. Wholesalers' stocks are getting low.

MIRRORS APPEAR ON LOWER PRICE LEVEL

Winnipeg.

Some lines of mirrors show a reduction in price.

	5x7	7x9	8x10
X. L.	$2.80	$3.90	$4.85

REVISED PRICE LEVELS ON MOP STICKS

Winnipeg.

Lower prices are now in effect on mop sticks. Following are the revised local quotations on these products.

MOPS—

	Per doz.
No. 10	2 40
Self Wringing	4 80

Cloths for self wringer mop, $2.20 per doz.

Hamilton Markets

HAMILTON, July 20. — Current hardware business is generally described as satisfactory, the volume of trade being larger than that recorded for similar periods last year. A slight easing off in the size of prevailing orders is reported from certain wholesale houses, a condition, which it is pointed out, can be frequently expected during the hot months. Business is stated to be good, however, with warm weather lines moving well, and bookings for early fall goods also coming to hand. On the other hand, many jobbers and retailers continue to report in an optimistic vein regarding both present trade and the outlook for the ensuing months, and while commitments are still of a limited nature, the aggregate is generally considerably above that of previous seasons.

Automobile accessories are selling well, and there is a good demand for tires, tubes and tire accessories. Spotlights, luggage carriers and motor-driven horns are selling well, also winged radiator caps. The paint business continues to be good both with painters and private users. Auto paints are in steady demand.

Dealers are experiencing difficulty in meeting the heavy demand for paris green, and one house has had to order shipments by express to meet requirements, on several occasions.

While the summer months are usually quiet periods in the steel industry, it is a noticeable fact this year the mills' report to be comfortably filled with business for July and August, and as far as their order books are concerned, should be able to maintain the current ratio of production without the incentive of additional sales of consequence. As far as the selling market is concerned, however, consumption may show a recession but replenishment of stocks continues to be a prominent factor, therefore, new business in iron and steel is less impressive. There is much pressure upon mills by steel buyers for better deliveries and this pressure seems to have increased somewhat up to date but it looks as if buyers simply want to be on the safe side, fearing a curtailment in production later on account of the coal strike.

Crop conditions are very satisfactory and business is reported fair by both wholesalers and retailers. Merchants, however, continue to buy in small quantities in order to meet their necessary requirements until the present crop is assured.

Wholesalers point out that distributing costs remain necessarily high, due to the prevalence of small and rush orders on the part of retailers generally, this custom serving to develop a false hum of activity in warehouses and shipping departments in many instances. During recent weeks, however, commitments are stated to be in larger volume, which has balanced this condition on a normal plane, as well as being indicative of the improved trade in retail circles and the restoration of confidence throughout the trade in general.

Pittsburg Markets

Steel Production.—Estimates recently made as to the rate of steel production must be revised materially. The publication not long ago of complete statistics of production in 1921 gives a fresh line on the proposition of the total output furnished by the 30 companies which make monthly returns of their ingot production, while the June report shows that there was an increase of less than one per cent. in the rate from May to June, whereas it was generally believed that there was a material increase. Increases were reported as various individual plants in June, and these increases no doubt did occur, but evidently there were decreases at other plants about which little or nothing was reported.

Revised estimates are that the annual rate of steel ingot production was 35,500,000 tons during April, 36,400,000 tons during May and 36,600,000 tons during June. The average rate during the first quarter of the year was about 26,800,000 tons a year, the average during the second quarter being about 36,150,000 tons, making an increase of 35 per cent. By another comparison, the actual production in the second quarter of this year was just about equal to the production in the entire second half of last year.

Thus there has been a great increase in production, at long range, but the production in the past few weeks has not represented any material increase and is about 10 per cent. less than recently estimated.

"Paint Protects the Nations' Taxable Wealth"

Construction Is Greatest Taxable Wealth in the Nation—Paint As a Building Material Has Many Advantages Over Other Kindred Materials—Government and Industrial Specifications Now Provide For Period Painting and Varnishing

EDITOR'S NOTE:—Building construction in local communities throughout Canada has always been looked upon by hardwaremen as an important source of business in paint and varnish as distinctly separate from the renewal work done each year. This year throughout Canada there is considerable building progress, and some pointers on the importance of paint and varnish to the building industry as given herewith by Ernest T. Trigg, President of the U. S. National Paint, Oil and Varnish Association, are of interest and assistance to hardwaremen in developing this branch of business:—

"A nation's great taxable wealth is its construction of various kinds. For several years prior to the war the annual addition to the nation's wealth through new construction was very great. Our construction development fell off tremendously during the period of the war and, in fact, since the war up to this year. The result was an accumulation of a great shortage throughout the country. A revival of construction has occurred this year—in fact, the amount of work under way in many communities is much in excess of the ability to produce. This is notably true insofar as the supply of skilled labor is concerned. For some weeks or months there have actually been conditions where employers in some building trades have been bidding against one another for such labor as was available.

"As to the direct relationship of our industry to construction; there is no industry other than our own, which has the ability to produce and furnish materials with which to protect, preserve and prolong the life of this great national wealth, and let me say here that while the products of our industry are considered a part of the great field of building materials, we nevertheless, enjoy a unique and especially favorable position as compared with other building materials in that, while the producers of other building materials such as brick, stone, lime, cement, lumber, slate, etc., have an opportunity to make one and the original sale only, our industry finds a customer in the new job at the time of its completion and that job or building is or should be forever after as long as it stands, a continuous and periodical customer of our industry.

No longer debate value of paint

"The inteligent and far-seeing work which the industry has done during recent years, in educating the public to the economic value of paint and varnish, is serving a most useful purpose. There is no longer the necessity for debate on the subject with thoughtful people. Recognition of the importance of paint and varnish in property conservation has been given in the freest and most practical way by not only private property owners but by substantially all of of our large industrial corporations, by public utilities, transportation companies, ship owners and operators, by our various municipalities and governments.

"By all of these, our government included, the specifications for new construction contain just as complete instructions covering the paint and varnish requirements as for any other element entering into them. Not only does this apply to new construction, but it is a regular part of the programme of upkeep that such construction shall, with sufficient frequency, be repainted and revarnished. This is done, not for the primary purpose of appearance or decoration, but for the more fundamental and thrifty purpose of protecting such property from decay and rust and thereby prolonging its life many fold. While referring to this fundamental function which we, in the industry, and a large percentage of the public, fully appreciate, I do not wish to slight or overlook the very great value to the public in its frequent use of paint and varnish from the standpaint of decoration or appearance, or price, no matter what term we use.

Value from decorative viewpoint

"I believe it is a fact that while the use of paint and varnish from a preservative standpoint has a tangible asset value, its use from the standpoint of appearance or justifiable pride has also a very great intangible value which cannot always be measured in dollars and cents. Without a doubt it enhances property values in the event of a desire to sell; it gives to local trades people and bankers greater confidence in the character of the property owner; it elevates the property owner and his family in the minds of others in the community and gives him and his children a better standing; it makes the property owner a better citizen, one who is more useful to himself and his community. At the risk of being considered too great an advocate of the frequent use of paint and varnish, I want to take this opportunity of suggesting that just as the property owner who keeps his property in excellent paint repair is an asset to his community, so is the property owner who allows his property to deteriorate, decay and gradually rot away, a liability.

"In saying this, I am not unmindful of the property rights bestowed upon individuals by our constitution, but I wonder if, without discussing legalities but thinking only in terms of moral rights—we haven't passed the stage of individualism which once existed and if, after all, there are not certain things which we owe to the community in which we live, the performance of which is essential to our proper community character? There are many unwritten rules which we all follow in our conduct with our fellow men—why should not the community code of ethics under which we live recognize the fact that it is a waste of wealth to the community for property to be neglected in its paint repair, and that such property—a house, if you please—made untenantable because of lack of paint attention, is depriving someone of the use of that property and hence is to the detriment of the public? I wonder, too, if we should not all be mindful of the fact that property well taken care of not only is of greater value itself, but its greater value is reflected

The Brush Department

Encourage Housewife's Fondness For Brushes

A Mania With Many Housewives Who Have Been Cultivated to the Use of Proper Household Brushes—Dividing Brush Customers Into Two Classes

DISCUSSING brush business with a Toronto hardware merchant this week the statement was made to Hardware and Metal that the modern housewife is very fond of using brushes and when once satisfied that certain types of brushes can greatly increase the cleanliness of her home and lessen the labor of cleaning, she becomes an enthusiastic hunter for anything new in this line of merchandise.

With this idea in mind this merchant divides his brush customers into two classes. The one class which he has not got interested in brushes and who frequently visit the store, the other class constitute the prospects who must be developed. For the former he has arranged a large table divided into sections in which the various sizes and grades of brushes are kept, each plainly price marked. One or two sample brushes in each section are taken out of their paper wrappers and are the ones to be sold. No stock of samples is kept merely for reference and to become shopworn. It is found that by the merchant showing reasonable care in attending to the brush stock customers are encouraged to give them better attention. For the prospects, the window displays are largely relied upon, suitable displays and attractive window cards being prepared with special reference to seasonable requirements. The idea of having specially designed brushes for cleansing inaccessible places was one of the best selling talks.

In selling brushes to-day perhaps one of the strongest points was said to be the sanitary talk. Brushes are almost universally used in or on soiled articles and the facility with which they may be cleansed, their ability to remove dust and dirt instead of spreading it around, and above all their cleanly and wholesome appearance, were said to be points used by this merchant in his advertising and sales talk on brushes.

SUMMER TOURISTS ON THE MOVE

(Continued from page 31)

The dealer must have some means of making it known to his public that he is a merchandiser of all the automotive equipment needed by tourists and campers. He can do this by window displays, newspaper advertising, road signs, and by letter. He can arouse interest among his local car owners in motor touring by letters and post cards pointing out the advantages of camping and a holiday on wheels, and offering to help in the preparation of trips. He can also attract the foreign motorist to his town by urging the local authorities to establish a camp-site where hot and cold water, free firewood, police protection, etc., would be provided. Once the dealer arouses his local motorists to the advantages of camping and motor touring, and persuades his townsfolk to establish a camping ground, a large field for automotive equipment sales has been opened up.

A Rest Room

If it is possible the dealer should arrange to install a rest room with washing facilities and advertise the fact that he has done so, by road signs at the main approaches where they will catch the eye of the tourist. These signs could also advertise that all motor accessories and the other accessories such as camp beds, water bags, thermos bottles, cigar lighters, luggage carriers, flashlights, tow lines, small tire repairing outfits, etc., which are needed by tourists and campers, are carried and immediately available at reasonable prices.

A very productive publicity scheme used by an Ontario dealer, is a printed card bearing full information regarding road conditions, beauty spots of the district, laws regarding lights, speed, etc., and information about hotels. These cards are distributed in the stores and hotels of the outlying villages and bring many an enquiring motorist to the dealer's door.

Another dealer has had a map made of his district showing all the roads and principal landmarks, and uses it, surrounded by his advertising material, in the form of a small card which is widely distributed. His advertising in the local paper carries the same copy.

This service is appreciated by motorists, who reciprocate by purchasing what they require from the dealer who has tried to make the going smoother for them. It doesn't matter where this type of dealer's store is situated, his service puts him on the main highway where motorists travel and that highway, called "Good Will," leads to his door.

This leads up to window displays, and attractive arrangement of goods. At this time of the year a good display of accessories will accomplish a great deal in inducing sales. Displays to be successful should have a seasonable appeal. It is not so necessary to advertise the fact you are carrying a full line of piston rings, spark plugs or other standard goods, as it is to let it be known you sell thermos bottles, spare tire covers, camp beds, flashlights and all the other devices incident to summer motoring and camping. Spark plugs are taken for granted, but the camping accessories are not. So in arranging your window display have in mind that you are appealing to people who are going to camp just as well as motor.

Some dealers go to the trouble and expense of arranging their window display to represent a camping scene or some other appropriate and suggestive display. Where this is practical it will be found to be worth all the trouble and expense expended. Whatever form of display the dealer prefers it should always be suggestive of the season.

Special Selling Ideas

Some dealers are moving large stocks of summer auto accessories by sending canvassers to summer cottage colonies for house to house sales effort. Others are making good use of lists of prospects secured through nearby automobile clubs, consisting of names and addresses of people in the territory that have written for touring information. The columns of the local newspaper which contain items telling of proposed automobile tours by townspeople is another good source of accessory prospects.

There are numerous ways in which the dealer can increase his accessory business this summer, if he will take time to consider and plan. The business is big and prospects are everywhere. If the dealer is sincere in his dealings with the motoring public, goes out half-way to meet the tourist and does all he can to serve him, advertises and merchandises his goods properly, this should be his biggest year in automotive equipment sales.

H. E. MIHELL SPOKE ON CANADIAN POSSIBILITIES FOR PAINT BUSINESS

In the report of the sales managers' conference of the paint and varnish industry at Buffalo, as reported in July 15 issue of Hardware and Metal, Mr. Reiffenstein, Brandram-Henderson Co., was credited with remarks concerning the possibilities for paint and varnish business in Canada, which were really made by H. E. Mihell, Imperial Varnish & Color Co., Toronto. The name of Mr. Reiffenstein was erroneously given in the report sent to Hardware and Metal by the officials of the U. S. "Save the Surface" campaign committee on which the article in our paper was based.

Boeckh's Brush News

Backed by a Real Guarantee

Backed up by a vigorous advertising campaign and a strong, money-back guarantee, our Hi-Gen-Ic Hand Brush, introduced a few weeks ago, is "getting across" in fine style all over Canada.

Our guarantee, for instance, inspires a prospective customer with complete confidence in the brush. It reads, "Buy a Hi-Gen-Ic Brush. **Use it for a week,** and if you do not find it just what you need, return it to the dealer from whom you bought it, and amount paid will be promptly refunded." That's a strong guarantee. We couldn't think of a better one.

We supply free to each merchant handling this splendid new line a very handsome plate glass miniature show case which holds six brushes. Conspicuously displayed on your counter this little case will catch the eye of every person who enters your store. Once seen, a Hi-Gen-Ic is nine-tenths sold.

The Hi-Gen-Ic Brush has a wealth of the strongest selling points. It is practically indestructible. Its bristles can never come out. The hardest wear and continuous sterilizing cannot harm it. It is absolutely sanitary, as it cannot collect dirt or impurities. Germs cannot collect in it; it cannot waterlog, foul or sour. It will keep the hands smooth, perfectly clean, healthy and always free of germs.

The great feature, though, is its beautifully polished aluminum back. There's no wood, nails, wire, twine or glue in the wonderful Hi-Gen-Ic. Just genuine bristles set in pure, rock-hard rubber and aluminum. Under average usage a Hi-Gen-Ic Brush should last ten years.

Weekly Paint Markets

MONTREAL, July 20.—Insofar as prices are concerned, the local paint markets are on a more settled basis than has been the case in recent weeks. Turpentine, which has featured the market by recording a rapid rise, has apparently settled at somewhat higher price levels than formerly. Although these market values might be considered high when compared with quotations ruling during the spring months, importers state that little recession for the present is expected owing to the prevailing conditions at primary centres. Linseed oil prices are again unchanged and the undertone of this product remains in a firm position. Although the season is advancing, demand has kept up in surprisingly good volume, and the question of seed supply from now until the new crop is still an important one in this market.

The trend of paint prices would seem to be settled, for the present at least. Although there was some uncertainty in this direction, and the question of either absorbing the total amount of sales tax or passing the entire amount on, the feeling is that nothing further will be done during the summer months. Manufacturers state that to absorb the total amount of sales tax a further increase in prices would be necessary owing to the cost of raw materials, but a further move in this regard is not thought advisable by most manufacturers.

NO FURTHER ACTION ON PAINT PRICES

Montreal.

The action on the part of paint manufacturers to increase prices on white lead, paint and varnishes, and absorb the 2¼ per cent. sales tax, thus placing them on the same footing as the jobbing houses, is apparently definitely decided upon. There was a certain amount of uncertainty in this connection immediately following the announcement of the revision, and the question of further advancing quotations and absorb the entire amount of sales tax, or else pass along the total amount, was discussed but it would now seem that the original plan will be most generally adopted for the present at least. One manufacturer has further advanced quotations on house, porch, deck and floor paint fifteen cents per gallon, but prevailing prices on this brand were formerly below levels generally given by other firms and the present change results in only a slight variation now existing. Higher raw material costs a said to be the obstacle in the way of total absorption and the slight increase made will only allow one half of the sales tax to be taken care of. One large manufacturer stated that in all probability no further action would be taken during the summer months, but the matter would be fully taken up later in the fall.

LINSEED OIL REMAINS IN STEADY POSITION

Montreal.

Current quotations on linseed oil remain unchanged with a steady to firm undertone still evident in the market. A quotation two cents less than that recorded below is given in one quarter, but generally this product is now on a fairly steady basis. Demand continues surprisingly good for this season, indicating that stocks are comparatively low. Adding also to the strong tendency is the question of seed supply from now until the new crop in the fall. Figures, now available, of warehouse stocks in Northwestern centres, show that only a limited supply is available for the balance of the present season. Local crushers maintain that a stiff market is altogether probable for the remainder of the summer. Following are unchanged local quotations:

LINSEED OIL—		
1 to 2 barrel lots, per gal.....	1 13	1 15
5 to 8 barrel lots, per gal.....	1 11	1 13

Less barrels, add 10 cents per gallon.

SLIGHTLY FIRMER TONE IN SHELLAC

Montreal.

The market situation on shellac is little changed, local quotations remaining at former figures with a variation noted among distributors. Following prices are most generally given, although some firms are maintaining price levels about twenty-five cents per gallon higher. Following a slightly easier tendency in recent weeks, the undertone of the market in primary circles is now described as firmer. Many importers feel that the question of supplies will in future be an important one, and a stiffer tone in the following months would not be surprising.

Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

TURPENTINE STILL REMAINS AT HIGHER LEVELS

Montreal.

Turpentine on the local market is on a more settled basis than it has been during recent weeks, although fluctuations are still apparent at producing centres in the south. Quotations are maintained at figures of last week, with the exception of firms who were formerly quoting $1.85, a reduction of five cents per gallon being made in these quarters.

Although the market for turpentine has risen in recent weeks to suprisingly high figures, importers are now fairly firm in their ideas and state that lower quotations to any extent in the immediate future are not looked for. Crop conditions in the south this season have been unfavorable and demand has been such that even now available supply is scarce. The market to-day is fluctuating almost from day to day, but the undertone seems strong owing to demand being fairly well maintained. It is also pointed out that present levels are a fair quotation for this product, and prices ruling earlier in the season were generally considered too low when compared with allied products. Present quotations are as follows:

TURPENTINE—	Imp.	Gal.
1 barrel lots	1 63	1 80
2 to 4 barrel lots, per gal. ...	1 61	1 78
Broken lots	1 73	1 90

Toronto

TORONTO, July 20.—The tendency reported among certain paint manufacturers last week to further advance paint prices and absorb the whole of the Sales Tax of 4½ per cent. is not being upheld and those that did revise prices announce that present quotations are stable for some time.

Turpentine remains very scarce among local dealers, and a considerable price range is still being quoted. Requirements continue to be in excess of supply and firmness is therefore expected to continue. A similar range is still evident in linseed oil prices with a firm market prevailing and a fair demand. The anticipated revision of brush prices has not materialized yet. Brush manufacturers report a firm market with a considerable shortage of short bristles. Considerable variation is evident in glass prices, extra discounts being given in many cases.

CALL FOR TURPENTINE NOW LESS URGENT

Toronto

The range in local prices on turpentine remains one of the chief factors in this market. Current consuming demand has fallen off somewhat during the last

TORONTO PAINT MARKETS

(Continued from page 52)

couple of weks, this tendency undoubtedly being due to the high price levels which the product generally attained. Prices at southern producing centres have been fluctuating more or less each day, and are now considered easier, with the volume of fresh receipts in excess of current sales and stocks consequently larger. Local distributors claim, however, that new shipments are somewhat difficult to secure and stocks are not considered large. That a firm tone will prevail throughout the turpentine markets generally for the balance of the season seems to be the general opinion, as producers point out that the world's needs are evidently larger than the available supply. Domestic prices continue to vary at the following levels:

TURPENTINE—		
1 barrel lots	1 70	1 80
2 to 4 barrel lots	1 69	1 79
5 gallon lots	1 85	1 95

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

SEED PRICES REFLECTED IN LINSEED MARKET

Toronto.

Quotations on linseed oil generally remain at unchanged levels this week, with the market tone steady to firm. A range in local prices, however, is still noted between the various distributors. The strength of the market is mainly attributed to the consuming interest in fair volume for this time of the year, combined with the support of the flax seed situation. Seed prices have been considerably firmer, and the quotations ruling on oil at the present time are generally considered as moderate in proportion to seed levels. That a shortage of seed, and consequently restricted output of linseed oil, may be apparent before the new crop becomes available in September, is suggested as a possibility in some quarters. While minor fluctuations may be apparent in both seed and oil prices, crushers point out that they do not expect costs to recede to any appreciable extent, and during the ensuing weeks, prevailing levels on linseed oil should be fairly well maintained.

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 15—1 20	1 18—1 23
3 to 4 barrel lots	1 14—1 19	1 17—1 22
6 to 9 barrel lots	1 12—1 17	1 15—1 20

NO IMPROVEMENT IN GLASS SITUATION

Toronto.

The current situation in the window glass market attracts more than usual attention due to the variance in price levels between local and eastern distributing centres. That many wholesale houses have been meeting the extra discounts quoted by certain distributors, is now generally admitted, while owing to the price advantage of this nature the territory where the lower scale of prices are obtainable is rapidly enlarging. From the position of losing orders owing to the strict maintenance of the $6.00 box list, many houses report being forced to offer discounts to hold trade. Certain other glass distributors, however, continue to report close adherence to the list given on the current market quotation pages, with the usual discount of five per cent. on lots of 25 cases or over. According to other reliable sources, a distinct range is evident in the quotations obtainable on the local market, and the opinion has been expressed that two distinct lists for domestic and imported window glass might possibly result.

SHELLAC MARKET STILL IN UNSETTLED STATE

Toronto.

The fact that prices on shellac were slightly easier during the last week or two, indicated that the scarcity of this product at primary centres was being relieved by fresh arrivals from Calcutta. It is now reported, however, that shipments during the month of June were below expectations, and while there has been a settlement of strike conditions in India which constituted one of the primary elements in preventing the transportation of shellac from the interior yet conditions of stocks is not considered as satisfactory. Shading of prices has not been so pronounced locally, and quotations have generally firmed up at the following levels:

SHELLAC	White	Orange
In bbls	5 35	4 85
Gal. jugs	5 65	5 15

VARIATION NOTED IN PARIS GREEN PRICES

Toronto.

Paris green is still reported as very scarce, and the situation on the local market is described as not so much a case of prices as a question of getting the goods. The recent two cent advance is still being quoted in several quarters but it is noted that the previous levels have again crept into the market. In many cases, therefore, buyers are apparently forced to pay two cents per pound higher than the following quotations, owing to lack of adequate supplies to meet the current brisk demand:

PARIS GREEN	100-lb. lots
½-lb. paper cartons, per lb.	0 40
1-lb. paper cartons, per lb.	0 38
½-lb. tins, per lb.	0 42
1-lb. tins, per lb.	0 40
25-lb. tins, per lb.	0 36
50 and 100 lb. drums	0 34
250-lb. kegs, per lb.	0 32½
600-lb. barrels, per lb.	0 32

BRUSH PRICES DEPEND ON BRISTLE MARKET

Toronto.

That the trade are more or less anticipating some revision in brush prices at an early date, is quoting the current situation in this market. Whether such changes will be upward or downward, however, cannot be ascertained at present. One manufacturer pointed out that should any revisions develop in quotations on their line of brushes, it would most likely be of an equalizing nature according to the trend of bristle prices and production costs, which would likely mean some prices going upward and others perhaps being reduced. The bristle market is generally described as firm, with little improvement noted in supply conditions, short sizes being particularly scarce. Manufacturers also point out that variations in production levels during the past twelve months have only been of a minor character. Black bristles have now become the primary article used in the manufacture of paint bristles, white bristles being still scarce in addition to being too expensive for commercial purposes. Certain grey bristles can still be secured, however. Producers are inclined to the opinion that the black bristle has come to stay and the fact that painters and private consumers have become more or less educated to its use, are factors offsetting the prevailing situation to some extent Therefore, even although European bristle markets improve in the future to such an extent that white bristles will again be available on a large scale, the dark bristle will likely retain the market for certain purposes.

PITTSBURGH MARKETS

(Continued from page 47)

The balance between production and consumption is not altered by the revision in estimates, as there had been no estimate of consumption other than that derived from shipments, but it looks easier for consumption to absorb the production than it did, and there is less prospect of consumers being overstocked. Scared by the coal strike, consumers might easily have piled up too much steel, then starting to liquidate if they saw the coal strike ended and prospects of there being unlimited supplies of steel. As matters stand, there is little prospect that it will be possible at any time this year to make steel at a much greater rate than of late.

"PAINT PROTECTS THE NATIONS'

(Continued from page 48)

to surrounding properties, while neglected buildings in like manner depreciate the value of adjacent properties? It is a fact that community-life rules recognize this principle in many directions.

"I sometimes wonder what men in other industries must think of the paint and varnish manufacturers of this country when they realize how relatively little of the possibilities for business which exist is being realized on. We, in our industry, certainly should know more about the economic value of the use of our products than anyone else, and I feel that continued failure on our part to enlighten the public as to their interest, is a reflection upon the good faith of the industry and an evidence of failure to serve where service is required."

You can avoid Complaints

about bristles flaring if you sell the

Best Brushes

Sell a professional or amateur Painter a Canada Solid Centre Straight Compressed Rubberset brush and you've made a permanent customer. Why? Because a brush made with our straight compression eliminates entirely bushing or flaring of the bristles—it gives the painter that perfect working brush he desires so much.

Our solid centre straight compressed brushes are made in Wall, Flowing, Oval, Chisel, Varnish and Paint Brushes—and are Rubberset.

Barrett Products get quick action

Dull Business hasn't got a chance
With Barrett Products in the store.
They kick the old boy in the pants
And send him howling out the door.

For Barrett Products know the way
To build up profits and good will.
They bring new business every day—
New dollars to the money till.

Careful buyers always use them—
They've earned their wide renown and fame—
First-time buyers always choose them
Because they bear the Barrett name.

Don't listen to Dull Business wail
That times are bad and trade is sick.
These Barrett Products never fail
To make the sales come fast and thick!

WE ARE so proud of our improved square track that we are emphasizing it particularly. There is not the slightest doubt of it pleasing the man that is hardest to satisfy.

No garage or barn should be built without a full equipment of wind-proof, bird-proof, storm-proof doors.

This new track is interchangeable with any square track on the market.

It is universal to all styles of doors in barns, garages, elevators or factories.

Order by Name
Sell by Name

When a name means easy sales and quick turnover, that name is no less valuable to the dealer than to the manufacturer.

During fifty years the names of these five brands have come to mean Standard Quality in files.

Cash in on that, Mr. Dealer! Stock one of these standard brands, and build up a big file trade.

TINKER TOM'S TALKS.

No. 368

65104

That's how many tons "Premier" Galvanized Steel Sheets we've made to July 1st, 1922.

We were handicapped by various causes through the years from 1915 to date and rarely have been able to operate 100%, but that's what we're doing this year.

THE WINNER

1st (Gold Watch)—E. A. WHITTEN (74,365 tons), of the Whitten Co., Ltd., Bracebridge, Ont.

2nd (Leather Bag)—A. MACNISH (76,638 tons), of A. C. Leslie & Co., Toronto.

3rd (Carving Set)—ALBERT LANE (76,650 tons), of Hdwe. Dept., Security Lumber Co., Vawn, Sask.

Congratulations—and thanks to all who sent in estimates.

TINKER TOM.

"Crown" Metal Shingles

You Can Safely Recommend them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece.

They are easy to apply and are very attractive in design.

For details and any information on any sheet metal problem, write

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

TORONTO JULY 22, 1922

HOW MANY CALLS SHOULD IT TAKE TO GET AN ORDER?

"That depends on circumstances," you say. "Quite true," but here are details of an incident that will interest you. (Names will be supplied on request).

A Toronto manufacturer's representative said: "I have been calling regularly for months on the — Hardware Co., and the — Wholesale Hardware Co., and did not even get a word of encouragement from them, although I sold most of the other jobbers. This week my company has received enquiries from both of these wholesale firms referring to the lines my company are advertising in HARDWARE AND METAL. I have since called and received orders from both of them. How do you explain it? Is this a reflection on my selling methods?"

We don't know why he did not get the orders in the first place. Perhaps the buyers were busy or worried and not in a receptive mood for suggestions. We do know, however, that every wholesale hardware buyer, over 90% of the retail hardware buyers rated in Dun's and Bradstreet's, 900 buyers for hardware sections of department or general stores, and 260 purchasing agents of railways, mines, government purchasing departments, and industrial concerns, read HARDWARE AND METAL advertising pages when in a receptive mood—when looking for new lines—new sources of supply. The two wholesale buyers mentioned above are only two of our 4,350 leading buyers who will study carefully the advertising pages of the 34th Annual Fall Buying and Directory Number to be issued on Aug. 19th. If you are not represented you will not be missed, but if your advertisement is there, **it will be read and re-read,** because this issue will be used as a Buyers' Guide and Reference Number during the Fall and Winter months.

Business is coming back strong. Are you sharing in it? Advertising in the Buyers' Guide will influence Fall and Winter orders. Send your reservation now. Date of issue, Aug. 19. Last form closes Aug. 16.

Greenings Cow Ties and Cattle Chains

The celebrated Greening Chain made from hard drawn steel wire gives maximum strength for weight of material used. All fittings being of proportionate strength there is no weak point. Strength, lightness and handsome appearance are Greening characteristics that make a sure appeal to your customers. Trace, post, halter and other chains of all descriptions. Order through your jobber or write us.

An attractive window display by Almy's Limited, Montreal, showing display card, recipe books and jars.

Cash in on the Fruit Crop

With "PERFECT SEAL," "IMPROVED GEM" and "CROWN" Jars

Here is an opportunity to bring new customers to your store and increase the trade of the old ones. The coast-to-coast advertising campaign of "PERFECT SEAL," "IMPROVED GEM" and "CROWN" jars starts week of Aug. 7th.

Tie up with the Dominion-wide advertising campaign by making a special window display. Your customers will read the newspaper advertisements and then look for the dealer who stocks these jars. If you display them prominently, the business is **yours.**

The display will bring them into **your** store and you can sell them, not only jars, but all the other requisites for canning.

A HANDSOME EIGHT COLOR DISPLAY CARD for use as window trim will be mailed to you together with pictures and diagrams of window dressing suggestions by Mr. Carroll, head window designer of Almy's store, Montreal, FREE OF CHARGE. Write for it on your letterhead. And write at once, the number available is strictly limited.

Window Dressing Competition

A first prize of THIRTY DOLLARS, second prize of TWENTY DOLLARS and FIVE PRIZES of TEN DOLLARS will be awarded for the best dressed window tieing up with this campaign. Pictures must be on glossy paper, at least quarter-plate size. Dress your window early, photograph it and stand in line for one of the prizes.

BRANDRAM'S *Genuine* B.B. WHITE LEAD

In the organic world an evolutionary process is said to be at work, ever developing the good and eliminating the unfit. Time is the great arbiter, the acid test, that infallibly detects the false, leaving the genuine untouched.

Nearly two hundred years ago a White Lead corrosion process was discovered by one of the founders of the House of BRANDRAM. This has been used continuously every since for the manufacture of a product of superb value, and to-day BRANDRAM'S GENUINE B. B. WHITE LEAD is being made on the original formula, the washing, pressing and grinding processes among others being facilitated, however, by the aid of modern mechanical methods.

In a very few generations the unworthy goes to the wall, but during ten generations BRANDRAM'S GENUINE B. B. WHITE LEAD has earned and still maintains a world wide reputation for its possession of the essential properties of White Lead in oil—excelling as it does in spreading and covering qualities and in durability.

Tested by Science's latest method, the Pfund Cryptometer, an instrument of mathematical precision — BRANDRAM'S GENUINE B. B. WHITE LEAD is proved to have greater hiding power than any other brand on the market.

Files Are Unique Among Tools

MOST good tools last a comparatively long time. A saw, a hammer, a chisel—each has a long life.

Files, by their very nature, must be frequently replaced. Hence, file users seek the best to avoid too frequent replacing.

All this means that if you stock one of these standard brands, you have steady, satisfied file customers. They give long, efficient service, and make firm friends.

Columbia "HOT SHOT"

Canada is Expecting the Greatest Harvest in Her History

More men and more machines than have ever before been used in a harvest will be employed to gather in this tremendous crop.

Every tractor and gas engine will need dry batteries and plenty of them. Here is a golden opportunity for you to sell Columbia "Hot Shot" dry batteries. Every farmer knows that the Columbia delivers the hottest sparks for the longest time, so your market is ready-made, waiting for you. Look to your stock. Order early from your jobber, and specify Columbias.

The wise dealer will make sure of his supply—and profits.

Then You Step Up And do the Selling

Any good hardware merchant can sell goods once he gets the customers into his store. It's the "getting them there" that counts.

What's the solution? Advertising!

Use space in your local paper to tell women what you've got and they'll come right around to your store to see for themselves. Then you step up and do the selling.

Attractively dressed windows catch the eye and buying interest of every person that passes. **But how about those who do not pass?** How are they to be reached? The only known way is advertising.

Our great advertising campaign is going splendidly and it's doing best in those towns where hardware merchants are "hooking on" to our ads or using our free cuts to advertise Diamond Ware or Pearl Ware.

Give advertising a good try out. It pays. Send to us for the cuts you'll need. Order one of our striking window trims, and a copy of our book of selling points entitled "Helping you to Make More Money." We can also supply you with price tags, giant ads, small window cards. All free, of course.

A Product Worthy of Its Name

The Braced Rail

"CANADA"

Flexible Steel Door Hanger

THE "Canada" flexible door hanger represents the acme of perfection in a hanger of this style. Running smoothly on anti-friction steel roller bearings, the "Canada" is ready for quick, easy action at all times. The "Canada" combines strength, durability and practicability in one, is easy to apply, and simple yet efficient in operation. The braced rail shown above is 1¼ in. by 3-16 in. and is available in lengths of 4, 6, 8 and 10 feet.

"Canada" hangers are neatly and conveniently packed, one pair in a box complete with bolts. This hanger has an especially strong appeal to farmers. The flexibility of the hanger makes it a favorite as doors cannot be damaged by high winds when "Canada" hangers are used.

If you are not selling this hanger, get a supply from your jobber at once or send us a trial order.

Bur-BANK Your PROFITS

Says the Wise Old Owl

There's a game I know
and it's lots of fun,
Making two blades grow
where there once grew one.
Seed well your field with
the two Gillettes—
The New Improved and the
Brownie Sets
'Neath window glass give
them light and sun
Profit by the spade-work
Gillettes have done,
With a Brownie Sale
water now and then,
And where one blade grew,
you will soon grow ten.

To Luther Burbank, wizard of the orchard and teacher of the art of growing two blades of grass where there once grew one, the Old Owl owes his inspiration.

The Burbank type of mind lives on results. Logically, it goes after success. Straight to the roots of things it dives. In science, art, politics or commerce, on a throne or in a hardware store, it will not be denied its "reason why" results.

To the disciple of Burbank the two Gillette razors are a delight. They grow blades. Blade sales are profits—perennial profits—born to be born again. And both grow the same blades. It's a three-to-one shot—the New Improved, the Brownie or Blades—and few indeed are the opportunities he misses.

The Brownie Gillette has opened up a market new and separate from your old $5.00 one. And a Brownie buyer is always your prospect for the New Improved. Meantime, he is buying blades from you and you are Bur-BANKING your profits.

REX —

A Complete line of BROWN & SHARPE MICROMETERS

AT A LOW PRICE

To supply the need for highly accurate, inexpensive measuring instruments, we announce Rex Micrometers. The high Brown & Sharpe accuracy you have always known is now available to every shop at a low price.

Note these features—Every Rex Micrometer from No. 59, measuring 0 to 1 in., to No. 88, measuring 23 in. to 24 in., has a Clamp Ring. The rectangular shape of the Rex frames gives greater measuring capacity than frames of the circular type. Anvil, spindle, and other parts are similar to the regular Brown & Sharpe Micrometers, and means are provided for adjustment for wear.

Our advertising on this Rex line emphasizes two points: 1—Rex Micrometers have the high Brown & Sharpe accuracy mechanics regard as standard. 2—These highly accurate tools are available at a low price.

Be ready to supply the demand for these high-grade, inexpensive tools. Take full advantage of our announcements. Stock up at once—your first customers will tell others that you carry Rex Micrometers.

Descriptive circulars in three colors are ready for distribution.

A New Millers Falls Tool

Ratchet Screw Driver No. 63

THIS new Millers Falls Screw Driver will score instantly with every mechanic who sees it and handles it. He will like the way it looks and the way it works. He will recognize at once that here is a tool that will do everything required of it.

The ratchet, which is the principal working part of the tool, is of simple construction, and for this reason unusually strong. It operates smoothly, noiselessly and without friction. Almost impossible for it to get out of order.

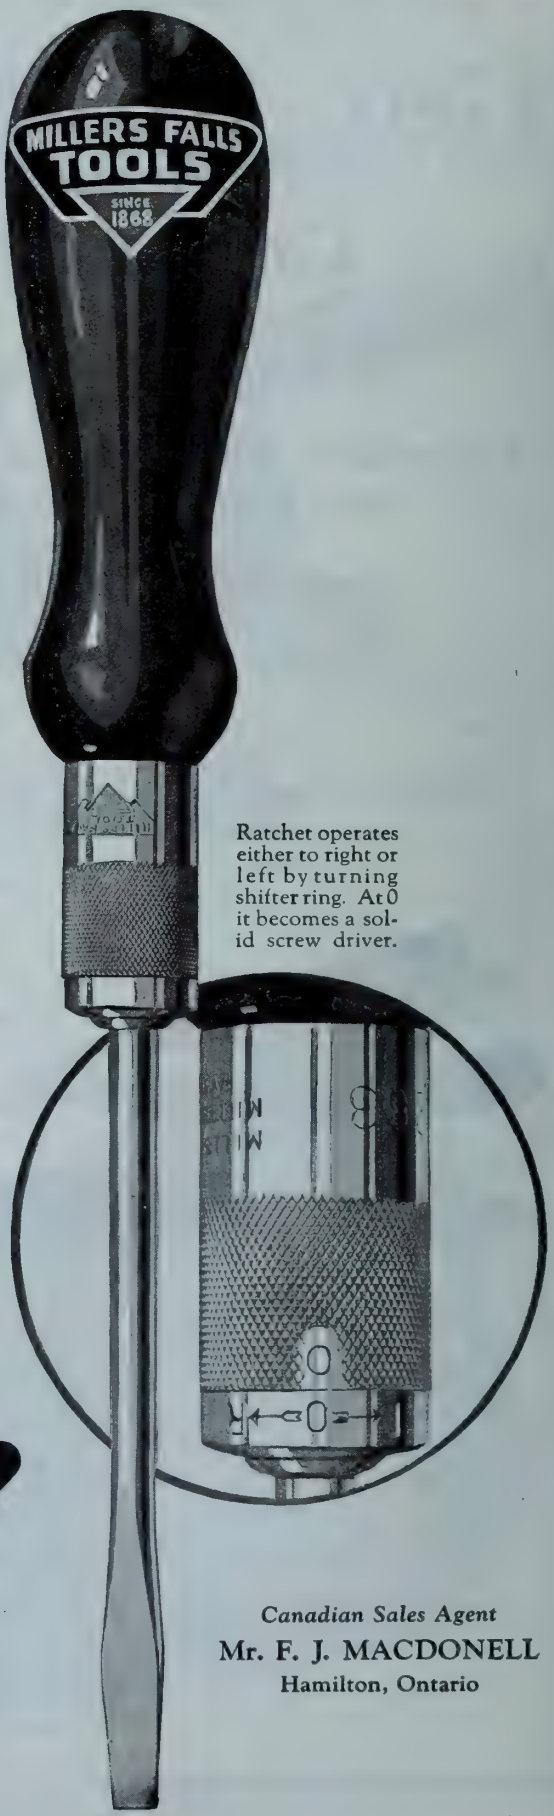
Ratchet pawls are tool steel. Ratchet springs—spring steel. Ratchet frame—cold rolled steel. Blade—highest quality screw driver steel, hardened and tempered.

Handle—hardwood, highly polished. Shaped to conform to hand. Thumb rest at lower end.

Exposed metal parts polished and nickel plated.

Lengths: 3 in., 4 in., 5 in.

In stock for immediate deliveries. You are bound to do a good business on this compact, strong, well-balanced, handsomely finished tool. Place an order now and watch 'em go.



Ratchet operates either to right or left by turning shifter ring. At 0 it becomes a solid screw driver.

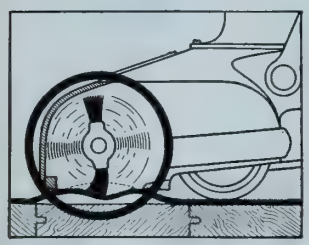
Five out of every seven wired homes in your locality, it may be safely estimated, are reached regularly by Hoover national advertisements

Hot Weather Will Help You to Sell Hoovers



The Hoover Brush Beats as It Sweeps

(Another Patented Hoover Feature)

MOST electric cleaners have brushes. Some are stationary; some are slowly revolved by the carrier wheels as in a carpet-sweeper; some are motor-driven. The latter are of two types, those which merely sweep and those which beat as well as sweep the rug. This second and the only effective type is covered by a Hoover patent, issued April 3, 1917. The air suction of The Hoover lifts the rug and brings it into contact with the Hoover Brush, whose soft hair tufts, as they sweep the rug crest free of clinging litter, also depress it. Air suction again immediately lifts the rug. Repeated over 1,000 times a minute, this vibrates embedded dirt to the surface. Air suction carries off the beaten-out and swept-loose dirt into the dust-tight bag. Over eighteen patents now protect The Hoover. Other applications for patents are pending.

When Old Sol sizzles overhead, pity the woman who has no Hoover!

It becomes twice as hard for her to house-clean. The heat soon fags her out. Yet the sight of dirt everywhere forbids her to rest.

Could there be a better time to interest her in a Hoover?

Many dealers have found that the hot weather offers them a splendid opportunity. August is frequently made a Hoover campaign month.

Remember, too, that fall, with its traditional house-cleaning upheavals, is in the offing, and that it is not too early to lay your plans now for that great Hoover selling season.

Get into immediate touch with us. Consider at once the Hoover Authorized Dealership. Only a small investment and a small space in your store are required. Every assistance known to us is given you to help you succeed.

On the famous Hoover Co-operative Plan, our trained sales organization will even co-operate with you to the extent of securing leads, demonstrating, selling, delivering and servicing Hoovers.

Building the best cleaners, aggressively advertising them, and intelligently assisting dealers to sell them, have made the Hoover Company the largest seller of electric cleaners in the world.

The Authorized Hoover Dealership can be made as valuable an asset to you as it is to so many other merchants. When will you discuss the subject with our representative?

A Three Hundred Thousand Dollar Trainload of A B C Electric Washers!

Sets a New World's Record. Another Example of A B C Popularity Everywhere

The unrivaled values offered by the latest model A B C Electric Washers have captured the continent! Dealers are breaking all records in many localities, both in Canada and the States. They report that the A B C is the best selling line of washers on the market.

As a result, A B C's are not only being ordered by carloads, but by solid trainloads, too!

Consisting of 35 cars loaded with considerably more than 2,000 A B C's—three hundred thousand dollars' worth—the latest trainload left Peoria on July 1st. *This was the largest shipment of washers ever made in the entire history of the industry.*

It went to A. A. (Washer) Wilson of Los Angeles. For years he has retailed and distributed the A B C Line in Southern California. Mr. Wilson operates eight retail stores himself.

A short time previous, another trainload was shipped to the Morton Electric Company, retailers and distributors of A B C's at St. Louis, Mo.

These trainload shipments clearly indicate what veterans in the business think of the A B C.

And the A B C is meriting such faith. Just recently, to cite one example, 706 A B C's were sold in thirty days at Philadelphia, by a single dealer.

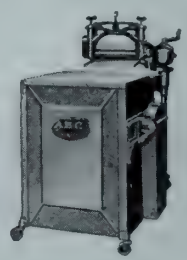
If you want to get into the washing machine business *right*, investigate the A B C Line.

It includes the three popular types—dolly, oscillating and reversing cylinder. The price range, $72 to $200, provides a washer for every prospect's purse. It is a line upon which to concentrate.

Get our proposition at once. You can bank on it as a winner! Liberal profits. Real co-operation. Wire or write today.

A B C "Alco" (dolly-type) Washers. Single and double tub. Power and electric.
$72 to $138

A B C Oscillator, full 6-sheet size, heavy copper tub. Greatest value ever offered in an electric oscillator.
$135



A B C Super Electric Washers, full cabinet models, are the finest washers on the market.
$170, $200

All prices quoted are retail, except in B. C. and the Maritimes

"Cold Pack" Process

One Size Only

Home Preserving and Canning Outfit

Comprising one 18-quart Enameled Cook Pot with Wire Rack to hold six 1-quart jars, which lifts out bodily without fear of breakage.

SPECIAL FEATURES

Size of cook pot (In Enameled Ware—The Clean Ware) Top 13 inches. Depth—9¾ inches. Fitted with Enamel Cover.

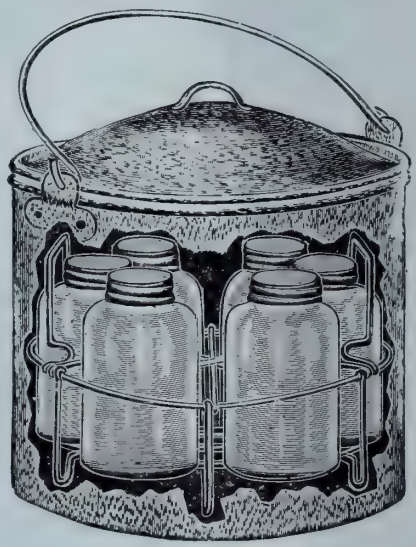
1. The jars are kept above the floor of the boiler, allowing free circulation of the hot water and preventing the bottles from cracking.

2. Each single jar can be removed separately without interfering with the others.

3. Six one-quart jars of either fruit, vegetables or meat can be handled and operated at one time.

4. When not in use as a canner, the large enameled round kettle can be used for other cooking requirements.

5. It represents a plain, strongly-made, efficient kitchen tool which increases the efficiency of the cook, and tends to improve the flavours and food values of the varied products which can be prepared in the canning way.



This Simple Equipment makes Canning a Joy Instead of a Task

Fruit juices, marmalades, jellies and all preserves, vegetable or fruit, are greatly improved if canned in the cold pack way. The fresh, garden taste has not been destroyed, the natural color of the fruit is preserved, and none of the food value is lost. Everything is evenly and perfectly cooked. The use of this outfit makes home canning certain of success. An attractive, bright colored tag is attached to each rack, giving full instructions as to how it is to be used and operated.

These outfits are supplied in two colors. **COLONIAL (Grey) and PREMIER (Blue)** with white lining.

A complete equipment in any brand of Davidson's PREMIER Enameled Ware makes housework easy at preserving time.

Let us have your enquiries.
Prompt shipment guaranteed on early orders.

Introducing

OUR NEW PREMIER KNIGHT

Every progressive dealer who stocks a kitchen range of any sort appreciates the superiority of the Davidson "PREMIER" line; because his first consideration is quality and workmanship and his next consideration is the ever-growing profits which result from increased sales.

This is to introduce our new line—the

PREMIER KNIGHT

whose chief merit lies in its economy of fuel consumption and cost. The "PREMIER KNIGHT" is a handsome, well constructed range of standard size, suitable for the average home—thoroughly reliable and attractively priced. This

ALL-STEEL KITCHEN RANGE

has all the points of superiority which characterize the various Davidson Ranges. White enamelled panels or tiled back and oven door, nickel plated trimmings. It is made in the square shape only, 36½ in. long by 27 in. wide, and is constructed to burn coal, coke or wood. A roomy oven has braced bottom to prevent warping—fire box has cast lining and duplex two-piece grates—one side for coal and coke and turned over is suitable for temporary summer grate for wood. Cast iron fire door and ash-pit door, both heavily nickelled. "Premier Knight" can be supplied with or without high shelf and Persian Closet. A thoroughly competent and reliable grate, yielding even combustion of coal and maximum heat for cooking. Well insulated and well ventilated, ensuring quick baking. Prompt shipment guaranteed on early orders.

Write for Catalogue A-2 "Davidson's Stoves and Ranges," featuring other Premier Stoves—"Marathon," "Leader," "Argus," "Royal," "Chieftain."

The Truth About Roofing

This notice is not in any way an advertisement of our products and is published in the belief that it will be of value to all those interested in prepared roofings and will be heartily endorsed by our competitors or in other words by all manufacturers of this material.

Since our entrance into the roofing industry we have earnestly and honestly tried to tell the truth and to sell our products for just what they were, but we have been constantly hindered by ridiculous and harmful statements made by those who, while selling roofing, know nothing of its make up, and who hide their ignorance by loud voiced statements and a fancy display of advertising, labelling, etc. We want to believe that this is the result of ignorance and not malicious falsehoods. However, one or the other has brought about a pitiful situation and we propose to use the most powerful weapon man is given—the truth—to right what is unquestionably a great wrong.

Space will not permit us to tell you what you have right to know, therefore in a few days you will receive from us the first of a series of letters on this subject. It may seem long, but read it, and help us to clear up this awful situation.

Please understand our campaign is not directed against the other manufacturers, but rather against those distributors who, in ignorance or otherwise, have blinded the consuming public.

The trouble has been brought to a head by a recent roofing advertisement appearing in a trade paper and this will be subject of our first letter.

If our letter is not in your hands within a week it is the fault of our mailing list — Please notify us at once.

Better Business Is Coming

LIGHTNING

GEM

BLIZZARD

Be Wise In Time

Better business is coming to the merchant who has the goods on his shelves, ready to hand out to the customer when he (or she) is in a humor to buy.

Don't get caught, be wise in time. Avoid the painful necessity of passing up good business to your competitor.

The time to order our Freezers is NOW. They are always in demand. They sell on a reputation established by more than 30 years of high-class service, and their future performance keeps them sold. So there you are—quick sales and permanent net profits.

Hadn't you better get busy with your jobber at once? We are all ready to serve you. Let's get together.

Sell Iver Johnson shotguns this fall

A good gun at a low price

Iver Johnson Champion Single and Hammerless Double Barrel shotguns have for years been favorite items with a large number of dealers throughout the country.

Probably the chief reason is that Iver Johnson makes good, accurate, serviceable guns that can be sold at a low price. That means volume business instead of occasional sales.

Iver Johnson shotguns "stand up" well, give real service and satisfaction, and build good-will for the dealer who sells them.

Because of the familiarity of the public with the name Iver Johnson—due to continuous national advertising of revolvers and bicycles—when you show a shotgun and say that it's an Iver Johnson the sale is half made.

Stock the line of revolvers, too—calibres 22, 32, 38, and 32 special, 6 shot. Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Round out your line with Iver Johnson Truss-Bridge Bicycles. Strong, speedy, easy-riding, durable.

FREE! Three interesting booklets, also complete dealer information. Send at once for one or all of these booklets.

Strikes Contain Serious Possibilities

Little Surplus Coal Held By Producers in Canada and Operations May Have To Be Curtailed—Priority Schedule Puts Eastern Manufacturers in Fifth Place—No Rush Yet to "Get Under Cover" —Another Advance on Bar Iron—More Labor Efficiency in Steel Industry

Based on interview of Hardware and Metal with G. SPENCE, General Sales Manager The Steel Co. of Canada, Hamilton

EDITOR'S NOTE.—The strike of coal mine operators and of certain branches of railwaymen in the United States, with threatened extension into Canada, has brought about a condition in the iron and steel industry of both countries which threatens to have serious results if continued. In the following article some insight is given into the possibilities involved in the situation from the standpoint of the industry in Canada and the probable effect upon the hardware trade:

DISCUSSING the effect of the railway and coal strikes upon the iron and steel industry, G. S. Spence, General Sales Manager The Steel Company of Canada Ltd., Hamilton, Ont., pointed out to Hardware and Metal that the present situation, if continued, involved serious possibilities. Very little surplus coal is said to be held by mills in Canada. Some buying in this district has been of coal from Kentucky while the Algoma Steel Corporation and buyers at the head of the lakes have been purchasing coal from West Virginia. Shipments from both of these producing points have recently been interfered with by the railway strike.

While governmental control of coal production and distribution in the United States might help the situation in some regard, Mr. Spence stated that the U.S. government has prepared a priority schedule which classes manufacturers in fifth place. Hospitals and such institutions come first in receiving any available coal and points at the head of the lakes come in third place owing to the fact that the freezing of the lakes in the late fall would render the transportation problem much more acute if delayed. By this plan the Algoma Steel Corporation would get prior status to producers in this part of the country.

Concerning the reports that Nova Scotia coal mines might supply Eastern Canada producers Mr. Spence stated that there was strong possibility of a strike in those mines about August 15 and that therefore it would be unlikely that much coal would be forthcoming from there. The tendency would be to accumulate supplies in the meantime.

No Rush to Get Under Cover

Though the situation involves possibilities of curtailed production of iron and steel products, and difficulties of distribution, it was pointed out that there has been no definite tendency yet among buyers to "get under cover." Immediate business was said to be active, and quite up to normal. Little booking business is being taken and mills are not encouraging it owing to the uncertainties involved.

Meanwhile prices on iron and steel products are firm, with another advance of ten cents per cwt. on bar iron and steel this week. As yet this is not extended to other products. Mr. Spence pointed out that there is practically no pig iron being offered in the United States and as result of the fuel situation and the fact that some U. S. mills are banking fires, pig iron has advanced.

Speaking of conditions in the industry in the U. S., Mr. Spence stated that the ratification of the merger of Bethlehem Steel Corporation with the Lackawanna Steel Co., and of the Midvale Steel and Ordnance Co., with the Republic Iron and Steel Co. and the Inland Steel Co., cleared the air perceptibly and business men would welcome the news. It was stated that this decision would do much to clear the air in this industry and stabilize business. The need for such mergers was said to lie in the necessity for more economy in operation. The nature of the operations of these mills was such that when merged they could conduct business on a more economical basis. Some suspicion had prevailed that the merger was to create something resembling a trust.

GEORGE SPENCE

General Sales Manager The Steel Company of Canada, Ltd., Hamilton, Ont.

Mr. Spence stated that the present production of the company's mills was quite normal, compared very favorably with production in recent years and was ahead of the immediate pre-war period. Agricultural machinery manufacturers were said to be displaying confidence in business realizing that despite some slightly unfavorable crop reports from certain parts of the country that many farmers are in need of implements and are up against the necessity for purchasing new equipment. Other lines of industry also reflect activity judging by their buying of iron and steel. Sheet production is limited at this time of year owing to the extreme heat, and the workmen's production per capita is naturally less in the hot weather than at other times of year. But taking the

(Continued on page 56)

Maritime Wholesale Hardware Reports Bigger Turnover Than In Year 1921

May and June Show Big Increases in Trade and Figures Compare Favorably With Record Years—Summer Vacationists Bring Considerable Trade—Much Ammunition Being Ordered

ST. JOHN, N.B.—In a recent interview, J. W. Harrison, sec.-treas. of W. H. Thorne & Co., Ltd., said, "The value of our wholesale trade in May was almost as large as in May 1921, and as prices were lower it means that the turnover was really larger. In June the value as well as the turnover was larger than in the corresponding month last year." This means that conditions show continued improvement. Mr. Harrison referred to the movement of lumber and its beneficial effect on the financial position of those in the trade. The demand for fish had improved and this meant more money. Line fishing in the bay had caused a steady run on the firm's supply department of late. Mr. Harrison added that there had been a good demand for fishermen's sporting goods. Among others an American en route to Newfoundland had called to place a good order on the recommendation of a friend who had been down this way. The trade in automobile accessories is good and there is a steady demand for builder's supplies. With good weather the farmers should be in good shape, and by the end of the year trade should take a more decided turn. Prices are stiffening in most lines. The trade will reap some benefit from reduced freight rates. Payments keep up fairly well.

This week has seen a reduction in the price of Black Diamond files, they are being quoted as follows: Mill. 6 in. $2.10—7 in. $2.34—8 in. $2.58—9 in. $2.94—10 in. $3.36—Half round smooth, 6 in. $4.26—8 in. $5.34—10 in. $6.24—12 in. $8.34—Flat Bastard, 5 in. $2.34—10 in. $4.20—12 in. $5.82—16 in. $10.68—Slim Taper, 4½ in. $1.38—5 in. $1.50—5½ in. $1.74—6 in. $1.86—Square Bastard 12 in. $6.12—14 in. $8.34—16 in. $11.22—Half Round Bastard, 6 in. $3.66—7 in. $4.20—8 in. $4.50—16 in. $12.36. This reduction represents about seven and a half per cent.

There has also been a new price on cordage, as follows: Best Manilla, 2¼ and larger, coils, 21c—2 in. 21½c—15th, 18th, 1½ and 1¾ 22c—12th, 22½c—6th and 9th, 23c—6th fine, 23½c. Best manilla bolt rope 5c over best manilla. Beaver manilla 2¼c and larger 19c—2 in. 19½c—15th, 18th, 1½ in. and 1¾ in., 20c—12th, 20½c, 6th and 9th, 21c. Sisal 17c basis. Spunyarn tarred balls is quoted at 39c, and Marlin balls at 41c. Lath ties single 17½c, double 18c. Fish ties 18c. Russian rope tarred, 2¼ and up 39c, 2 in. 39½c, under 2 in. to 15th, 40c—12th 40½c—6th and 9th, 41c. Sash weights are quoted at 4c per lb.

The trade received a visit from Harold Ferry this week, representing Sargent and Co., and James Moir, representing Corbin Cabinet Lock Co. Mr. Ferry reported that although there was no big rush of business, owing to the fact that building operations had not yet got back to normal, his records showed a considerable improvement over last year.

Expect Good Trade in Ammunition

Maritime province jobbers are now receiving large shipments of ammunition, and are evidently confident that there will be a good demand this fall. There are many tourists at the present time in the Maritimes, and their presence is always noticed first by the sporting goods houses. The American visitors are good spenders as a rule, and seldom seem to bring all of their requirements with them, buying a very large portion from the dealers in various towns throughout the provinces. In many cases they buy their whole outfits after they have crossed the border.

TO INVESTIGATE OPENINGS FOR TRADE WITH MEXICO

Ottawa.—The Canadian Government will shortly appoint a Trade Commissioner to report upon and investigate openings for Canadian trade in Mexico. The Order-in-Council containing the authority for appointments says: "Mexico offers a field for organizing and extending healthy trade relations between that Republic and Canada."

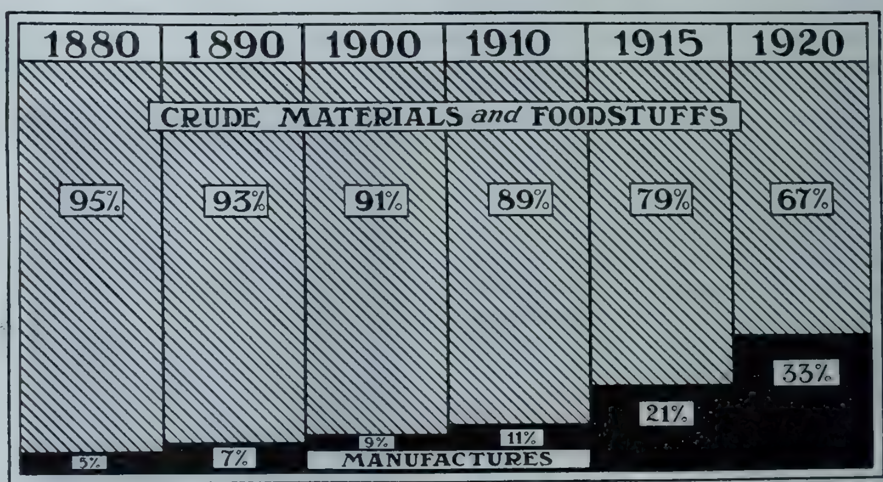
TO GET TRADE FOR DOMINION

Ottawa.—Hon. J. A. Robb, Minister of Trade and Commerce, leaves this week for England on a mission designed for the development of trade between Canada and European countries. The policy of the Government contemplates commercial relations with every country willing to trade with Canada, and Mr. Robb will look into the situation generally and consult with the commercial agents overseas. He will also inquire into the desirability of co-ordinating the trade agencies and immigration offices.

EXPORT MANAGERS' COURSE ARRANGED AT UNIVERSITIES

The University of Toronto and McGill University, at the request of and in co-operation with the Department of Trade and Commerce, have arranged a special course for export managers, providing sufficient support is forthcoming from Canadian manufacturers. The course at the University of Toronto will commence on Monday, January 15, 1923, and will continue for two weeks; that at McGill is expected to begin on January 29. In content the course will be both theoretical and practical. Lectures will be given on International Trade, Trade Cycles and Currents, Economic Geography and Transportation, and there will also be instruction and demonstrations in documentation, shipping for export, etc. Full details will be announced in the autumn.

Growth in Canada's Exports, 1880-1920



THE graph herewith records the increase in the percentage of Canada's exports of manufactured products in periods from 1880-1920. Exports of crude materials and foodstuffs are represented by the shaded lines; manufactured products by the heavy black. The significance of the percentages shows that they indicate a steady and rapid increase in the growth of the exports of Canadian manufacturing industries. In 1880 ninety-five per cent. of our exports consisted of raw materials and foodstuffs and 5 per cent. of manufactured goods. This proportion has steadily altered until in 1920 raw products were represented by 67 per cent. of the exports, while exports of manufactured products had increased to 33 per cent.

Starting on Capital of $250 in 1902 Hardwareman's Turnover is $175,000

Business is Thoroughly Departmentized and Senior Clerk Responsible for Buying and Sales Plans—Competition Brings Many Novel Ideas—Doubles Sport Goods Dep't After a Year—Now Selling Electric Appliances on Basis of Mid-Summer Saving of Manual Labor

STARTING twenty years ago on a capital of $250 and now enjoying a hardware business having a turnover of approximately $175,000 a year has been the experience of the firm of Brousseau and Frere of 320 St. Paul St., Quebec City. The commencement was made in one small room on the same street, while to-day the firm occupies three buildings, having a staff of thrty-five employees, and are leaders in the merchandising of hardware, sporting goods, electrical fixtures and appliances, plumbing and heating work, sheet metal work, and builders' supplies.

It is but natural to assume that the methods by which this firm has built up such a turnover will be of much interest to other retailers. In the first place the business is thoroughly departmentized as far as buying, management and selling is concerned. Shelf and other hardware occupy one section with a counter running the full length on one side only, leaving as much of the stock exposed for personal inspection, as possible.

Tools are found in a separate department with fitted work benches for the various trades. Care is taken to keep the tool stock in the best of shape at all times and the tools are placed where they may be closely inspected. It is realized that the mechanic knows a good tool when he sees it and does not have to be "sold" to the same extent as buyers or other hardware lines.

Double Sport Goods Department

Sporting goods, electrical fixtures and plumbing supplies occupy another separate department, tiled bathrooms being fitted up with all fixtures as indicating the appearance of complete sets when installed.

Each department is under the direct control of a senior clerk and his success depends upon the extent of the profit in his department. He is responsible for the buying and for the selling plans. It is found that this system of competition between department managers creates many original ideas and keeps enthusiasm high at all times. Many of the store's best sales plans have evolved from this condition.

Sporting goods are a prominent item in the store's trade. Quebec is an active centre for various sports, particularly that of skating, snowshoeing, ski-ing and sleighing in the winter, and hunting and fishing in the summer. These sports are taken up each in turn and a little in advance of their particular season the senior clerk in each department is busy arranging his selling plans to get the "jump" on other stores. An effort is made to contract for team outfits. The salesmen of this department take an active part in sporting affairs themselves and are therefore always ready to advise on prospects and to know what to talk and display in season. Sporting goods were put in stock just a year ago and by following the plans outlined the business has been so successful that Mr. Brousseau intends to double the size of that department this fall.

Getting action into a display of flashlights and batteries by erecting a model lighthouse with periodically flashing light brought good results for Brousseau & Frere, Quebec City, particularly when lines shown in the window were plainly price marked.

An Expert Window Dresser

One of the staff, M. A. LaFrancois, is an expert window dresser. Mr. Brousseau figures that much of the overhead expense of the business can be lowered by increasing the volume of turnover through the medium of window displays of seasonable lines. Mr. Francois believes in getting action into the displays and also is an exponent of the principle of showing prices in all displays. Attention is drawn to the illustration of a window display of flashlights and batteries as shown in this article. Here some originality is seen in the arrangement of an illustration of a rocky coast with the ocean breaking upon it and the lighthouse dominating the whole arrangement. This lighthouse was lighted at night with a periodic flashing light resembling real lighthouses. This action brought much attention to the display. In the window were shown a wide range of flashlights and batteries each with prices plainly marked.

Electric Appliances Lighten Summer Labor

In connection with other electrical goods such as washing machines, vacuum cleaners, irons, toasters, grills, etc., it is found that making a seasonable appeal is influential in selling them. For instance in June and September the appeal is to people buying shower and wedding gifts; early in the Spring it is to lighten the labor of Spring housecleaning; in the cold weather to take care of the laborious household work which follows the use of heavier clothing, floor coverings, draperies, etc. Just at this time when the weather is warm there is an important appeal on the basis of saving the heavier labor of sweeping rugs and of doing washing by the hand process. Even at this time of year there is much

washing to do in order to keep whitewear looking its best. This is a point which is made use of in the advertising and selling talk.

While believing that window displays must be applied to practically all lines of hardware to sell them, Mr. Francois beieves that particularly in those lines which are sold in other retail stores as well, but which really are a part of the retail hardware stock, it is necessary to take every step to see that the public are acquainted with the fact that the hardwareman can supply their requirements.

Some original drawings and well painted cards frequently add much to the appearance of the manufacturers' literature supplied for window dressing, and give it a distinctive appearance. An example of this is seen in the original sketch appearing above the lighthouse in the picture.

Mr. Francois not only takes care of the window displays but supervises all the store displays in the various departments.

A considerable amount of contracting

E. G. BROUSSEAU
President Quebec Builders' Exchange and head of hardware firm of Brousseau & Frere, Quebec.

business is done by this firm. When Hardware and Metal visited the store a contract of $15,000 for the Housing Commission had just been completed covering builders' hardware, sheet metal and plumbing work, and a $24,-800 contract for a building at Ste. Anne de Beaupre is now being worked on. In all contract work whether electrical, plumbing or heating, every job is planned and blue printed before work is commenced.

In fixing prices Mr. Brousseau makes use of various price services and claims they pay for themselves every two weeks.

About eighty per cent. of the business of this firm is credit, but it is noteworthy that by following out a system of close checking of accounts and quick following up, the number of bad accounts is reduced to a minimum and very few have been lost.

While turnover dropped off to $140,-000 in 1921, prospects are that if the latter months of the year show as good return as the first half, that a turnover of approximately $175,000 will be done.

Oppose Minimum Wage Act on Clerks

Retailers Decide Minimum Wage Act Should Be Confined to Hearing of Complaints from Clerks and Not Dictate Salaries—Chain Store Advertising Untruthful—Protect Retailers in Anti-Price-Fixing Legislation

By special representative of Hardware and Metal

Editor's Note;—The first part of the proceedings at the convention of the Eastern Ontario and Ottawa District branch of the Retail Merchants' Association in Brockville, Ont., was outlined fully in last week's issue of Hardware and Metal, with a brief summary of the doings in the final sessions. Herewith is the full discussion of several important points which took place near the conclusion of the convention.

BROCKVILLE, Ont.—The first annual summer conference of the Ottawa district and Eastern Ontario retail merchants, was concluded on Thursday. Considering the time of the year, and the numerous other counter attractions, the attendance was encouraging. The most noticeable feature was the intense interest displayed by the delegates throughout the proceedings.

The conference opened the eyes of the officials to the lack of understanding which exists in regard to the present net-work of taxation. The address given on the Sales Tax, at the opening session, by E. M. Trowern, secretary of the Dominion Board, and the discussion which followed, was invaluable to the delegates.

The hospitality shown by the Brockville merchants, and the general spirit of good fellowship which was in evidence at all times, together with the beneficial discussions during the business sessions went to make the conference a complete success.

Chain Store Advertisements

The Thursday morning session opened with the introduction of a resolution calling upon the Dominion Board of the Retail Merchants' Association, to have all advertisements referring to co-operative societies, farmers' clubs and chain stores carefully scrutinized and to prosecute those firms whose advertisements were false and misleading. The resolution charged that a number of these concerns were endeavoring to secure custom by false representation of the manner in which they were conducting their business.

Mr. Trowern stated that certain of the chain stores, were professing to do what they well knew they were not doing. Chain store advertisements contained the information that a certain product they sold, in some cases was imported directly from the producers in far away places. "This is not true and I am going to make it my business to give the public the real facts," he said.

"Such advertising leaves the impression that the wholesale house is not necessary," said Mr. Trowern, "and moreover it aims a blow at we retailers who are endeavoring to do business in an honest manner. If there is a place in the communuity worth preserving, then it is up to us to preserve it."

Anti-Price-Cutting

The provincial government's anti-price fixing bill came in for some discussion and a resolution was adopted requesting the Dominion Board to use every effort to see that the retail merchants were properly protected and safeguarded and to strongly oppose any legislation that tended to interfere and obstruct retail merchants from carrying on their business in a legitimate, honest and straightforward manner.

It was pointed out by the chairman that the proposed legislation to prevent manufacturers fixing prices on their products was a dangerous and unwarranted interference with the trade and commerce of Canada. The delegates were informed that the government had appointed a special committee to report on the bill and to hear the views of those interested.

"This proposed legislation restricts all arrangements that might be made between manufacturers and wholesalers and wholesalers and retailers," said

(Continued on Page 52)

Hardware Turnover Nearly up to 1920

J. Fennell & Son, Kitchener, Ont., Adopt Stimulating Measures Which Have Given Greater Hardware Turnover This Year Than Last and Nearly Touching Record Year—New Premises Offer Better Display Facilities

Store front of the new store recently occupied by J. Fennell & Son, Kitchener, Ont. Mr. Hymmen, in charge of the window dressing, believes in linking up displays of seasonable lines with other effort, hence this display of tools and garden requirements. Improved window display facilities have helped hold trade though the store has moved to a new locality.

"THIS has been the most active building year which Kitchener has experienced and the sale of tools and builders' hardware has been correspondingly large," stated Mr. Fennell of J. Fennell & Son, Kitchener, Ont., to Hardware and Metal, on a recent visit of inspection of the new store now occupied by this firm.

Mr. Fennell, sr., has been in the hardware business for a great many years, his son having been actively engaged with the firm for the past thirty-five years. Dealing with the builders' hardware business, Mr. Fennell pointed out that he gets the bulk of this trade by going after contractors in an aggressive manner. He gets early knowledge of new construction under way and finds that the principle of "the early bird catches the worm" applies very much in securing this business.

Through stimulative measures in all departments this firm has been able to maintain business at a good rate of turnover. The sales for the Saturday prior to the recent visit of Hardware and Metal nearly constituted a record in the history of the firm for one day. The turnover this year so far is greater than last year despite the decline in prices, and it is pretty well up to the turnover record of 1920.

Better Display

To some extent the increase in business may be due to the fact that better store premises are now occupied. The store illustrated herewith has just been opened recently offering more room and better display facilities than was the case in the old premises. While a move from one locality to an entirely new one might seem disastrous to some firms which depend on a local connection, the Fennel firm is so well known that there was no difficulty in keeping a connection.

"Business brings business," states Mr. Fennell, "and after the ball is started rolling it generally gathers momentum rather than slowing up, providing prices and variety of stock are favorable to the customer."

Mr. Fennell has always made it a point to keep his stock well assorted according to local needs, and to buy in sufficient quantity to get any advantage of special prices on larger quantities, and this advantage is passed on to the customer. The whole idea has been a large turnover and profits have been maintained by achieving this large turnover with a smaller margin.

Discussing conditions in general and their effect on the hardware business, Mr. Fennell states that industrial conditions in Kitchener are unusually good, owing to the comprehensiveness of its products. A wide range of articles are made in Kitchener and this has maintained industrial operations on a greater scale than would be the case were they restricted to a few lines.

No Excuse for Hardwaremen

But taking the country as a whole Mr. Fennell contends that the hardware business stands second only to the jewelry business from the standpoint of profitable trade and it can be developed fearlessly despite conditions, providing due attention is given the question of buying and sales methods.

"Good clean competition makes the trade keen and as the hardware stock is not so subject to style changes, the hardwareman has everything in his favor for pushing forward to a revival of business and a return of normal trade," states Mr. Fennell.

The window displays in this store are depended on to some extent for developing trade in seasonable lines, as shown by the displays of tools and garden requirements arranged in the windows at the time the picture was taken as shown herewith. Mr. Hymmen is in charge of the window dressing.

50,223 TONS OF BINDER TWINE USED IN CANADA

A statistician figures that there are 45,000,000 acres of grain harvested in Canada annually. Estimating on the basis of 2½ pounds of binder twine used per acre, the total amount of twine used would be 50,223 tons.

Canadian binder twine manufacturers are now doing an export business with Ireland, Algiers and other foreign markets. The Canadian manufacturers have been doing business in Ireland for a considerable time, and there has been a steady growth in the amount of twine sent to that market.

TORONTO, SATURDAY, JULY 29, 1922

A Good Barometer of Business

A STUDY of the Trade and Commerce reports of Canada, particularly the report just issued covering the period of twelve months to the end of June last, presents some very interesting facts concerning the import and export of hardware and metals. Our total imports and exports are each about three hundred thousand dollars in value less than in the same period in 1921 and exports are slightly in excess of imports. Our imports from Germany during that year were valued at $1,962,598, an increase over last year. Imports from Australia and Mexico also show considerable increase, while imports from United Kingdom, United States and most other countries are less.

Going into details, it is evident that whereas imports of common window glass declined considerably, plate glass imports increased. Total imports of aluminum, brass, clocks and watches, electric apparatus, iron, etc., show considerable decline in 1922 compared with the same period in 1921. Imports of hardware and cutlery were about two million dollars less in value compared with last year. Imports of passenger vehicles increased while fewer freight vehicles came in.

Imports of nuts increased in value as did crude petroleum, turpentine and scrap iron, while imports of tires, tin, silver, nickel-plated ware, tools, tubes, pipe, fittings, resins, and binder twine reflected a decrease, the latter only a slight falling off.

Declines in value of exports of various hardware lines included binder twine, paint, varnish, metals, (total) including aluminum, copper, insulated wire, pig iron, rolled products. An increase in value of exports is noticed on brass, scrap iron, passenger automobiles, lead, zinc and oilcake.

These figures give a very significant indication of the trend of business, showing that certain natural products of Canada are in increasing demand while requirements of other products are not quite up to normal.

In connection with German products, it is noteworthy that the monthly reports show a very great falling off in value of cutlery from January to June of this year, thus indicating that either such imports were being entered from other countries or that the German product now on the market here was entered for consumption over six months ago.

Some Dates to Keep in Mind

RETAILERS should keep in mind the fact that the stamp taxes on cheques, etc., come into force on August 1. This is also the date for certain reductions in freight rates on basic commodities as dealt with recently in Hardware and Metal. The tax on receipts does not come into effect until January 1 next.

In connection with the stamp taxes, these apply on all bank cheques, receipts for money paid by a bank chargeable against deposit, express money orders or travellers' cheques and postal money orders. If the amount does not exceed $50 the tax is two cents. If the amount exceeds $50 but not $5,000 for every $50 or fraction thereof of money involved the tax is 2 cents. If the amount exceeds $5,000 the tax is $2. In connection with cheques, regulations have been made governing the issue of embossed cheques. On bills of exchange, promissory notes, bank overdrafts, etc., the same tax applies. Promissory notes payable on demand and given to the bank for an advance by the bank bear only one stamp of two cents. On each despatch or message by cable or telegraph the tax is three cents. These are some points for retailers to watch carefully after August 1.

Watching for Developments

MANY FACTORS were just coming to light showing considerable improvement in conditions in the iron and steel industry of this continent when strike conditions loom up to mar the outlook. The steel output of Canadian mills last month was the biggest during the current year with the exception of February. Pig iron production in that month showed an increase of twenty-three per cent. over May. The report of the United States Steel Corporation for the second quarter, just issued, shows pronounced improvement with earnings of eight million dollars more than the previous quarter.

In Canada this improvement too is noticed, steel mills operating pretty well to normal capacity on immediate business though the tendency toward booking is still absent. However mills are so busy that they are not encouraging booking, particularly in view of the present outlook. Prices are very firm on iron and steel products with another advance on bar iron this week as result of the fuel shortage. Greater efficiency in labor is assisting in keeping steel prices within reasonable bounds, it being stated to Hardware and Metal that in one mill the production of steel to-day by the open hearth process was equal to the production of both processes during the war.

Already some shortage is noticed, particularly in pig iron, resulting in a sharp advance this week. There is said to be practically no pig iron offered on the market to-day. The coal strike and threatened extension of the railway strike presents a serious situation for manufacturers, and little relief for this class can be secured through the medium of the priority schedules prepared which place manufacturers in the east in fifth place. There is little tendency yet to "get under cover" in view of the possibilities involved, but the situation is being watched with much interest.

Do Not Misrepresent

MISREPRESENTATION never pays. This is a truism whether it is applied to the individual, the man in business, the manufacturer or in fact to anyone. J. T. Crowder, president of the British Columbia branch of the Retail Merchants' Association, in addressing a gathering of the Kiwanis Club in Victoria, B.C. the other day cited the experience of a British trade representative when travelling through South Africa at one time. He had purchased a five cent lead pencil, and proceeded to sharpen it, only to find that the lead did not extend far into the wood. He tried the other end of the pencil and found the same fault, and so took the pencil back to the merchant who had sold it to him. He learned that the article was a product of Japan. Later the trade representative was sent through the Empire, speaking on trade matters, and he never lost an opportunity to tell about the pencil, and thus through the dishonesty of a Japanese manufacturer, great damage was done to the reputation of Japan.

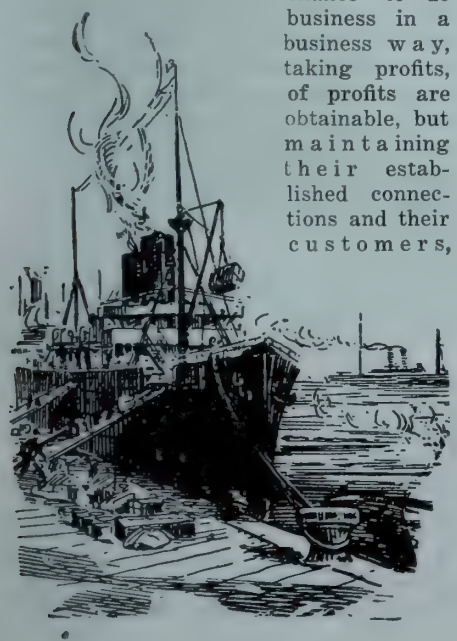
Developing Our Export Customers

Minister of Trade and Commerce Appeals to Manufacturers for Effective Co-operation—Rule of Trade That Where Sales Increase Your Purchases Also Grow—Canada Has 50 to 75 First Class Customers in Foreign Markets

By HON. J. A. ROBB, Minister of Trade and Commerce

THE Department of Trade and Commerce was created and designed to help trade either within or without Canada. The measure of the usefulness of that Department of Government Service will be in proportion to the help given and the encouragement offered by fellow Canadians interested and employed in the production, the manufacture, the transportation and the distribution of Canadian products. Having worked as a producer, as a manufacturer and as a trader, always willing to trade wherever and whenever there was a profit, experience has taught me that every branch of service from producer to consumer has its risks, sometimes a profit, other times a loss. A good, healthy, profitable trade is not built up in an afternoon.

Every successful trader knows that profitable trade is not built up by governments alone—even as good a government as we now have can accomplish little without support, the co-operation of the wide-awake, bright, brainy business-men of Canada, and so hope to be useful in developing Canadian trade at home and abroad. You ask me, "What is our policy, what is to be the policy of the Department of Trade and Commerce?" Well, I am Scotch, and a Scotchman always answers a question by asking another. What policy do you want us to pursue? Do you want government agents to attempt to handle your business at home and abroad, or do you want the government to stand out of the way and give Canadian business men a chance to do business in a business way, taking profits, of profits are obtainable, but maintaining their established connections and their customers,



through the uniform good quality of Canadian products? If that is to be the policy, then I venture to believe that Canadian export trade will grow from year to year and then eventually Canada will win out even against hostile tariffs. We may as well face the issue and at once admit that the Great War for freedom and the rights of small nations has not only burdened the taxpayers of the world with enormous debt, and governments and people with extravagant habits, but has also fostered a spirit of tariff warfare throughout the world, which must, I imagine, like all other wars, run its course.

TRADE OF CANADA BY PRINCIPAL COUNTRIES

Note: Countries arranged in order of importance of Total Trade in 1921.

	1914 (pre-war)		1921	
	Imports for Consumption	Exports of Canadian Produce	Imports for Consumption	Exports of Canadian Produce
United States	$396,302,138	$163,372,825	$856,176,820	$542,322,967
United Kingdom	132,070,406	215,253,969	213,973,562	312,844,871
Italy	2,090,387	514,660	1,745,330	57,758,343
France	14,276,535	3,632,444	19,138,062	27,428,308
Belgium	4,490,476	4,269,394	4,693,368	40,252,487
Cuba	3,952,887	1,915,414	30,743,239	6,573,768
Netherlands	3,015,456	3,985,987	4,237,791	20,208,418

Foreign Countries	464,667,152	192,945,922	974,156,194	785,711,482
Total	619,193,998	431,588,439	1,240,158,882	1,189,163,701

New U. S. Tariff

Recently some of our good customers have revised the customs tariff, apparently with a view to reducing trade with their own best customers. They may temporarily disturb Canadian trade, but they cannot discourage nor destroy Canadian enterprise.

It is a rule of trade that wherever your sales increase, your purchases also grow, so that as sure as night follows day, if and when a country puts up extreme tariff barriers, hindering necessary purchases, that country places a stumbling-block against its own trade, fostering discontent among its own people.

We, in Canada, have little right to complain if other countries place a prohibitive tariff against our products, but we have a right to try and find markets for the products of our country, to seek out the best and most profitable markets, to give preference to those who give preference to us, and, like any well managed business, to secure as many good customers as we can. The world is large; Canada has great resources and is geographically and favourably located to trade either with the Eastern or Western world or with the great countries to the South.

Transportation

Perhaps I may say a word regarding our transportation system. We have lots of it—and yet there is in some sections of our country an agitation for an extension of railways, and the opening of other channels of transport. That I shall not now attempt to discuss, but may I suggest this—if Canada is to compete with other nations in the markets of the world, we must be prepared to carry Canadian products at as low rate of freight, and with as good despatch as any other country. Canada has the railway lines—Canada has ships. Surely Canada should carry from Canadian ports Canadian exports at as favorable rates as that offered at any other ports.

Linking up all the forces and all the interests of Canada, so that each will have a personal—yes, if you wish to put it that way, a selfish interest, for the promotion of more work, more traffic, more business, for Canada all linked together and all working together would

(Continued on Page 56)

Events in the Trade

BUSINESS CHANGES

Prescott, Ont.—W. S. Glassford has disposed of the hardware business recently purchased from W. F. Macpherson, to Mr. Hammer, Westport. Mr. Glassford is leaving for Beaverton in the near future to join his family, who left some weeks ago.

FIRE LOSS

Ottawa, Ont., McKinley and Northwood, hardware, suffered fire loss.

For over six hours firemen fought a blaze in a two-story galvanized iron building owned by A. R. Clarke & Company, Toronto, which was gutted, with a loss estimated to the police at $32,000. The building was used by the company for preparing hides to make into gloves. Firemen believe the outbreak of the fire was caused by a gasoline explosion in one of the tanks.

OBITUARY

The death occurred in Montreal of William Drysdale, who for many years was a manufacturers' agent in this city for various hardware lines. About one year ago Mr. Drysdale retired from active business through ill health, and from that time until his death his illness gradually became worse.

PERSONAL

E. W. Long, representing the Dominion Battery Co., Ltd., was in St. John last week.

Robert Hobson, president of The Steel Company of Canada, Ltd., Hamilton, is at present on a visit to England. He is expected to return early in September.

Walter T. Newman, formerly of B. & S. H. Thompson Co., Ltd., and the British Smelting & Refining Co., has joined the Canada Metal Co. organization as sales manager, in succession to Mr. Crow.

Colin Carmichael, representing Canadian Oil Companies, Ltd, in an interview with Hardware and Metal, stated that business was very satisfactory. Mr. Carmichael added, however, that it was necessary to work harder than before, but hard work was showing its results in business.

G. R. Marshall of G. Reginald Marshall and Co., and representing the British and Colonial Trading Co., Sheffield, England, will visit Canada toward the end of August with a view to obtaining agencies for the British Isles and buying suitable household goods. Mr. Marshall is the son of George A. Marshall, proprietor of the Perfection Sanitary Brush Co., Toronto, which will be the headquarters of Mr. Marshall jr. while in Canada.

APPOINTED AGENTS FOR THREE BIG LINES

The Smith Stewart Co., London Loan Bldg., London, Ont., have been appointed agents, east of Winnipeg, for Utica Drop Forge Co. line of nippers and pliers; Lawson Mfg. Co., Chicago, Ill., line of spring hinges, garment fixtures, etc., and Bergman Tool Co. line of tools. Representatives of the company will call on the wholesale hardware trade at all places east from Winnipeg to the maritime provinces.

NORTH TORONTO BUSINESS MEN HAVE BIG PARADE

North Toronto Business Men's Association held a gala day on Wednesday, including a motor parade to Exhibition Park, for a picnic. A committee composed of the chairman, James McFadyen and S. B. McMurtry looked after refreshments and A. J. Frost headed the sports committee. The Marshal of the parade was Tom Ferguson. All prizes were donated by local merchants or wholesalers.

CLAYTON AND LAMBERT MFG. CO. SALESMAN HONORED

Chas. A. Bower, representing the Clayton and Lambert Mfg. Co., Detroit, Mich. for twenty years, traveling from coast to coast, explaining and demonstrating the features of the C. & L. line of gasoline fire pots, torches and brazing fires, was recently honored at an informal dinner given by the management to 125 members of the office and factory heads of departments and a gold watch was presented to him by the company and a shrine pin by his fellow workers in the organization.

ALGOMA STEEL PLANT TO GET BIG ADDITION

Saulte Ste. Marie, Ont.—Construction will be commenced shortly at the steel plant of the Algoma Steel Corporation here of a building adjoining the merchant mill for heat treating splice bars. The bars will, in the tempering process, be heated and quenched in oil. The work will cost in the neighborhood of $50,000, it is understood, and the plant is expected to be ready in October. The contract has not yet been let for the erection of the building.

PICTURES OF TORONTO HARDWAREMEN'S PICNIC

Some enquiries have come to Hardware and Metal for pictures of the picnic of the Toronto Retail Hardware Dealers and Travellers as illustrated in last week's issue. These and any other enquiries which may come from those desiring panoramic prints will be turned over to the photographer to be filled. Address your enquiries to the Editor, Hardware and Metal, 153 University Ave., or telephone.

WINNERS IN WEIGHT GUESSING CONTEST

In the weight guessing contest conducted by the Dominion Sheet Metal Corporation, Hamilton, Ont., as to the weight of Premier galvanized sheets made by this firm since its commencement up until July 1, 1922, the following were prize winners:—E. A. Whitten, The Whitten Co., Ltd., Bracebridge, Ont.; A. Macnish, A C. Leslie & Co., Toronto; Albert Lane, Hardware Dept. Security Lumber Co., Vawn, Sask.

The correct number of tons was 65,104. The first prize was a gold watch valued at $50, second prize a leather bag valued at $25 and third prize a carving set.

KINGSTON ACTIVE CENTRE FOR AUTO ACCESSORY TRADE

Kingston, Ont.—This city, which has a population of 23,000, offers an exceptionally good market for automotive equipment advertisers. Statistics show that from Jan. 1921, to June 1st, 1921, 2,262 licenses were issued. For the same period of this year, 2,465 were issued. They were subdivided as follows: pleasure cars, 2,245; motor trucks, 178; motorcycles, 42; the increase over 1921 was 203, and licenses are still being issued.

OF INTEREST TO COMMERCIAL TRAVELLERS

Bathurst, N.B. — Ground has been broken this week for the erection of a new seventy-five room hotel to be built by John P. Leger. This will be good news for commercial men, as accommodation in the Maritimes is not as good as it might be from the hotel standpoint and their association has for several years been urging the erection of modern hotel to meet the increased demand.

OXYGEN PRODUCERS CONSOLIDATE

The consolidation is announced of the manufacturing and distributing resources of the Dominion Oxygen Company, Limited, and the National Electro Products, Limited. The business is henceforth to be conducted under the name of the Dominion Oxygen Company, Limited, now operating oxygen plants at Montreal and Toronto, and acetylene plants at Merritton, Winnipeg and Shawinigan Falls. In addition the company conducts oxygen and acetylene distributing stations at Hamilton, Windsor and Quebec. It is understood that W. J. Cluff and associates, of Toronto and Montreal, who founded the National Electro Products, Limited, several years ago, will retain their relationship with the oxygen industry through their interest in the consolidated companies.

PUBLICITY ASSOCIATION AMONG HARDWAREMEN

St. John, N.B.—The St. John city council has voted for a bond issue of close upon $54,000 for the paving of one of the city squares. There are two hardware stores in this location, and the merchants are looking for a big increase in business when the new paving is finished. Better business has always followed the paving of a thoroughfare in this city, as there always is a tendency on the part of the householders to make a corresponding improvement in their properties, both by painting and repairing, and in many cases vacant lots are built upon. One of the last streets to be paved was Prince Edward street, and this street is now dotted all along with newly painted residences and stores, which, without the paving would in all probability never have been touched for some years. Some time ago, about thirty of the merchants on this street formed a publicity association, and purchased a full page in one of the local newspapers which they divided up among themselves for several issues of the paper, causing a good deal of comment from the citizens, and was the means of attracting valuable attention to the stores of the merchants taking part in the campaign.

W. H. Thorne & Co., Ltd., have been running a special sale of aluminum six quart preserving kettles for $1.59 each, and a one quart aluminum saucepan for .39. Emerson & Fisher, Ltd., are pushing thermos bottles, and T. McAvity & Sons, Ltd., are using large space in the local papers advertising refrigerators. D. J. Barret and Phillip Grannan, Ltd., are making a drive on furnaces, pointing out the necessity of having installations made now ready for the winter. Emerson & Fisher, Ltd., have also been pushing haying tools in their newspaper advertising.

Imports From Germany Now Very Light

German Wares Now Being Shown in Some Stores Imported Over Six Months Ago—Imports Practically Nil From January to June of This Year

THAT GERMANY has been making a determined effort to regain a favorable position in the Canadian cutlery market is gleaned from a study of the import figures since the close of the war.

Very few German cutlery items found their way into Canada after the armistice until October, 1920, when the trade revived considerably. During that month the cutlery imports from Germany totalled slightly over $23,000 in value, the biggest item being razors of all kinds, represented in value by $6,418. From that time on, the trade was fairly steady until the latter half of 1921, when the general trade depression set in and imports from all sources fell off heavily.

The crest of the German cutlery importations was reached in May, 1921, totalling approximately $37,000. In that month Canada imported $18,528 worth of knives of all kinds; $8,753 worth of razors; $7,864 worth of scissors and shears; $1,312 worth of steel knives and forks, and $1,664 worth of all other cutlery.

Compared with the above are the following figures for June this year: Steel knives and forks, $55; knives of all kinds, $28; razors, $48; scissors and shears, $118; all other cutlery, $414.

The importations from January to June this year have been practically nil. In view of this fact it would appear that the bulk of the German wares being exhibited in store windows and on store counters were imported more than six months ago.

The most active period was between October, 1920 and November, 1921, the monthly trade with Germany during that period being fairly heavy.

Dominion Board R.M.A. Convention Coming

To Be Held in Halifax August 8 to 12—Will Discuss Legislative Matters Before Next Session of Parliament—Don't Want Fixing of Retail Prices Dealt With By Government

THE 17th annual convention of the Dominion Board, Retail Merchants Association of Canada, will be held in the Halifax hotel, Halifax, N. S., August 8 to 12. Delegates from every province will be present and some very important resolutions will come before the meeting.

This is a delegate convention made up of accredited representatives from every province in the Dominion, consisting of representatives from each section of the retail trade, as well as representatives appointed by each provincial board.

The main object of this convention is to review the work that has been done by the Association during the year and to take up all matters that will be dealt with during the coming year. In this way an opportunity is given the delegates to discuss all legislative matters before they are presented to the Dominion House.

The officers of the Dominion Board form the Dominion Executive Council, and consist of one elected delegate from each province, together with the Dominion secretary, making ten in all.

Taxation Matters

Some very important questions will come before the convention this year, chief among them being the manner in which the present government is interpreting the Sales Tax Act; the tax on receipts, and other matters of immediate and outstanding interest. The proposed bill to prevent manufacturers fixing retail prices for their products will receive attention. The reason the Dominion Board is taking the matter up is owing to the fact that if the bill should become law, no manufacturer in the province of Quebec, or any other province in the Dominion could send goods into Ontario, having fixed retail price, as the proposed bill calls for the confiscation of all articles so sent in.

Principle of Fixing Prices

"Retail merchants generally feel that the question of fixing retail prices is one that should not be dealt with by a farmer government whose chief business at the last session of the federal house was to secure the legal right to form wheat boards in the various provinces, with the object of fixing wheat prices," said Mr. E. M. Trowern, secretary of the Dominion Board. "We feel that if the principle of price fixing on wheat is a right one, the same principle should be allowed in connection with all other commodities. Retail merchants are not objecting to the farmers forming a wheat board, but they strongly object to the farmers endeavoring to prevent manufacturers fixing retail prices. We are entirely in accord with the fixing of prices, so long as the prices fixed are fair and equitable."

The convention will open Tuesday morning when President J. A. Banfield will deliver his annual address. The Halifax retail merchants have made extensive preparations for the reception of the delegates.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

IDEAL OAK HEATER

Messrs. Gibb, Brown & Odell, Limited, Hanna, Alta.—Will you kindly advise where we can secure repairs for the Ideal Oak heater?

Answer.—This line is handled by the Record Foundry Company, of Moncton, N.B. This firm is represented in Western Canada by R. R. Kinread, of 52 Albert Street, Winnipeg.

MAGIC COOK STOVE

Gibb, Brown & Odell Limited, Hanna, Alta.—Will you kindly advise us where we can procure repairs for the Magic 4-hole cook stove?

Answer.—The McClary Manufacturing Company, Bannatyne Avenue, Winnipeg, Man. The head office is in London, Ont.

ICELESS REFRIGERATORS

D. Mistel, Rodney, Ontario.—Kindly advise where we can procure an iceless refrigerator.

Answer.—The Toronto Laundry Machinery Company, 1951 Dundas Street West, Toronto, Ont.

CANADA STOVE & FURNITURE

J. E. Gelineau, Chute a Bloudeau, Ont.—Would you please give me the address of the Canada Stove & Furniture Company?

Answer.—This firm is located at Ville St. Laurent, Quebec. They also have a branch office at 104 Delorimier avenue, Montreal, Quebec.

ENTERPRISE OAK STOVE

Messrs. Bonthron & Drysdale, Hensail, Ontario.—Will you kindly advise us where we can get repairs for the Enterprise Oak stove?

Answer.—The Enterprise Foundry Company, Sackville, N.B.

MORRILL HAND PUNCHES

The MacDonald Wire Goods Company, Drummondville, Que.—Can you give us the address in the United States of the makers of the Morrill hand punches?

Answer.—No doubt you refer to Charles Morrill, Inc., 100 Lafayette Street, New York City, U.S.A. They also have a factory at Pawtucket, R.I.

SHELLAC CROCKS

The Maritime Paint & Chemical Company, Moncton, N.B.—Would you be kind enough to give us the name of the manufacturer of one gallon and half gallon crock jugs to hold shellac?

Answer.—These jugs can be obtained from the following companies: The Toronto Pottery Company, Toronto, Ont., and the A. W. Pratt Co., 81 Victoria Street, Toronto, Ont.

RUBBER BATHING CAPS

Edwin Chown & Son, Kingston, Ont.—Do you know of any concern in Canada manufacturing rubber bathing caps?

Answer.—The Canadian Consolidated Rubber Company, Limited, Montreal, Que.; Eisman & Company, Toronto, Ont.

SUPER CEMENT

G. A. Bullied & Son, Hardware, Coe Hill, Ont.—Would you kindly inform us where we can obtain super cement?

Answer.—This is now being sold by the Super Cement Company, Mount Dennis, Ontario.

ONE MINUTE WASHER

Wm. Lawrie, Hardware Merchant, Forest, Ont.—Will you kindly inform me where I can get repairs for the one minute washer?

Answer.—The One Minute Manufacturing Company, Newton, Iowa, U.S.A.

SILOS

Frank Defoe, Esq., Hardware Merchant, Madoc, Ontario.—Kindly supply me with the names and addresses of some manufacturers of silos.

Silos—Metal

The Canadian Des Moines Steel Co., Limited, Chatham, Ont.

The De Laval Company, Limited, Peterborough, Ontario.

MacKinnon Steel Company, Limited, Sherbrooke, Quebec.

Ontario Wind Engine and Pump Company, Limited, Toronto, Ontario.

Silos—Wood

Adirondack Silo Company of Canada, Limited, Montreal, Quebec.

Farmers' Silo Company, Markham, Ont.

VULCANIZING MACHINES

The George Taylor Hardware, Limited, Timmins, Ontario.—Can you give us the name of a manufacturer of vulcanizing machines, for making repairs on rubber boots and shoes?

Answer.—The Canada Vulcanizing and Equipment Company, of London, Ontario.

CIDER PRESSES

Messrs. Dimock & Armstrong, Windsor, N.S.—Can you give us the name of a Canadian manufacturer of cider presses?

Answer.—The London Foundry Company, London, Ontario; Hergott Bros., Mildmay, Ontario; W. R. Perrin Limited, Toronto, Ontario.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3667. **Refrigerators.**—A firm of Canadian agents located in Barbados, but who cover the whole of the West Indies, desire to obtain an agency for refrigerators. Catalogues and price lists would be required.

3668. **Electrical goods.**—The manager of a large foundry in Barbados would like to be put in touch with a Canadian house supplying electric lighting plants for individual homes, and also general electrical goods.

3671. **Wire nails, rivets, bolts, etc.—A** firm of Canadian agents at Bridgetown, Barbados, would like to obtain a Canadian connection for the supply of wire nails, rivets, bolts, nuts, etc.

3682. **Hardware.—A** Glasgow firm of jobbers who say their imports from Canada are increasing as they discover new sources of supply, are in a position to compete with present American suppliers, and are open to consider any Canadian proposition put before them from manufacturers or exporters of small tools, machine tools, enginers' equipment, colliery furnishings; general ironmongery, iron and steel products and machinery; agricultural and mechanics' tools and wood manufactures.

3684. **Wire.—**One of the largest engineering firms in Johannesburg are requesting quotations for bare copper wire, tin copper wire, copper bus bar, and rods.

3685. **Dairy machinery and material.—A** Johannesburg firm of dairy suppliers who have good connections throughout the Union, are open to purchase dairy machinery and material of all kinds for dairy plants.

3686. **Toys and fancy goods.—A** London firm are open to represent Canadian manufacturers of toys and fancy goods as selling agent on a commission basis.

4819. **Copper and Brass.—**Copper and brass sheets, ingots, and bars are required by a firm in Sweden.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of June 28, July 5 and 12, 1902:

"The Canadian commercial agent in Trinidad states that for the year ending March 31, Canada exported to the West Indies goods valued at $98,-958, an increase of $32,715 over the previous year. He is of the opinion that the visit to the islands of the president and secretary of the Canadian Manufacturers' Association will be productive of much good."

(This item is interesting in view of the subsequent growth of Canada's trade with the West Indies and the recent visit of officials of the C. M.A. to stimulate this trade.)

"Alexander Gibb has just become western representative of Campbell Bros., St. John, N.B., manufacturers of axes, hatches, etc." (An announcement appeared in last week's issue of Hardware and Metal concerning a change in the firm of Campbell & Fowler.)

"E. S. Cooper, of Galt, Ont., for many years associated with Goldie & McCulloch Co. as salesman, has gone to Winnipeg to join James Burridge forming the firm of Burridge & Cooper, who will carry a large stock of the product of Goldie & McCulloch for the western trade."

"The Halifax agency of the E. B. Eddy Co., Ltd., has been elevated to a branch. John Peters is retiring owing to poor health and J. T. Sheriff becomes manager."

"Work is being commenced by Messrs. Wm. Mackenzie and D. D. Mann on the new railway they are to build between Halifax and Yarmouth, N.S."

"Rosser McClure, who has been Canadian manager for S. F. Bowser & Co. for the past three years, leaves to introduce Bowser oil tank in Great Britain and Ireland."

"Daniel Morrison, traveller for Rice Lewis & Son, Ltd., was presented by the employees with a cabinet of cutlery on the occasion of his marriage."

"B. S. Leak and W. R. Tait, both representatives of Lewis Bros. & Co., Montreal, in the northern territory, have just returned from their wedding trips."

"Thos. Davey, manager for John Lysaght Ltd., in Melbourne, Australia, passed through Canada last week en route to England."

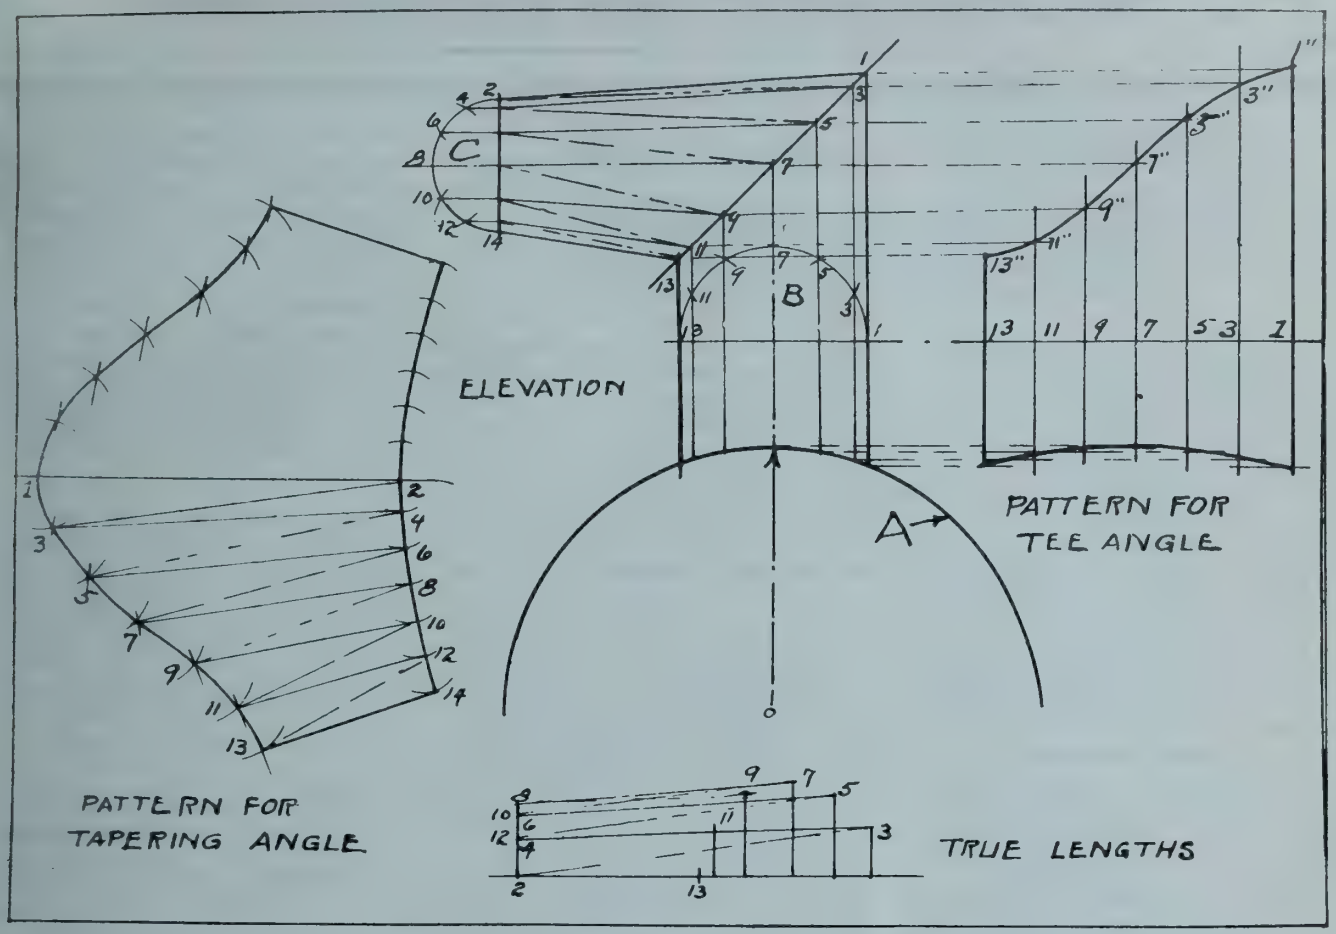
"The saw works of Shurly & Dietrich, manufacturers of saws and iron and brass bedsteads, Galt, Ont., have been burned."

"The annual excursion of the Gurney Foundry Co. employees was held to Niagara Falls on July 11, on the steamer Garden City."

"E. Cameron & Co. will shortly open their new hardware store on the London House corner, Charlottetown, P. E. I."

Patterns for Tapering Elbow Tee on a Cylinder

Written for Hardware and Metal by O. W. Kothe, Principal St. Louis Technical Institute, St. Louis, Miss.



Patterns for Tapering Elbow Tee. on a Cylinder.

OUR working drawing shows main cylinder A to which a tee is attached and on this tee a tapering elbow is constructed.

Now the main feature of this design is not so much practicability as for instruction.

Many workmen feel that in attaching a tapering elbow to a cylindrical tee or elbow section, the common sweep method may be applied.

To be sure, it can be applied and the workman will make something but it is not probable that any decent fit will be made.

The reason is found in the change in diameters in the tee as it narrows down to the base.

Observe that the diameters of cylinder in point 3 and in point 11 are the same as well as in point 5 and point 9.

But now in considering the taper as a true part of a cone, we might be able to maintain the diameter in point 7, but then the increasing of the diameter on the heel will make the distance greater in point 5 and point 3 and hence this portion of the elbow will telescope outward over the cylinder.

Then the throat owing to the receiving of the lines, the diameters of taper will be smaller in points 9 and 11, so that here the cylinder will be greater in diameter than the taper, and we have a telescope again but where the tee fits over the taper.

To overcome this, the tee must be laid out by triangulation so that the diameters of the tee are built to the sectional lines of B.

Then you will have a true fitting and correctly treated.

To start this working drawing first draw the section A and after that draw center elbow for tee in elbow, also describe section B and divide in equal parts and then draw angle.

Now from each point in section the miter line 1-13 on a 45 degree B, draw lines to intersect the tee A and the miter line in points shown.

This will enable drawing the taper with a C, and building your lines to those in the miter line as shown.

After this, we project the tee picking the girth from B and projecting the lines as shown.

Now the girth for the taper along the miter must be picked from spaces as 1″-3″-5″-7″, etc., the reason being that these 2 edges fit together and they must be of the same girth.

After this develop the diagram of true lengths for the taper and lay out the pattern for tapering angle the same as has been explained from numerous other articles along this line.

QUEBEC MERCHANTS CONVENTION

Montreal.—The Annual Convention of the Provincial Board of the Retail Merchants' Association of Canada, Inc. will be held in Quebec on Monday, July 31, and Tuesday, August 1. Questions of interest to the retail trade and measures for the benefit of those engaged in it will be discussed. Sessions will open on July 31st with registration at 9.30 a.m. and at 10 a.m. the formal opening ceremony will take place when an official welcome will be given by the Mayor of Quebec, and another welcome will be extended by the president of the district, M. J. Savard, to which City Alderman J. E. Sansregret and other delegates will reply. The afternoon of July 31st will be spent in touring the annual banquet will be held. trip around the harbor and to the Quebec Bridge. At 8 o'clock the same evening the annual banquet will be held. Business sessions will occupy the attention of the delegates throughout the second day.

For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

Conflicting Trade Tendencies in B.C.

Good Crops in Some Districts, Much Loss From Forest Fires in Others—Okanagan Fruit Crop is Good and Mining is Proceeding Actively—Camping Equipment in Good Demand

CONFLICTING circumstances have tended during the last week or so to cause a certain amount of unsteadiness in the British Columbia hardware situation. In some districts with good crops in sight retailers are inclined to fill up their depleted shelves, but in others continued excessive heat with unusual lack of rain, and general fires which have caused thousands of dollars damage to timber, have tended to depress the trade in general.

It is now an assured fact that the apple crop of the Okanagan will this year approximate 85 per cent. of 1921 which was the largest on record. This has had the effect of inducing hardwaremen in the valley to bank on the fall returns as it is considered most unlikely that this season will be a repetition of last as far as marketing is concerned, when the returns were far from satisfactory.

Another district which is sending in a regular volume of orders is the Cariboo where mining is going on steadily with favorable results. New stores have been opened up and thus far, most are doing well. The Nanaimo section of the province is also improving to some extent due to the resumption of operations on full time of several mines which had been operating only three days a week. The remainder of the country districts are on the slow side.

While many lines have relapsed into their regular midsummer dullness, the camping season and tourist traffic from the south, has resulted in good business in frying pans, rough cutlery and the usual lines of a camper's outfit. Several of the stores have featured this trade and it has brought them good returns.

Collections, if anything, are a little tighter than usual. Some of the retailers are backward and they, in turn, say that money is decidedly scarce, if prompt payment of their customers may be taken as a criterion. In the upper country money is showing signs of easing but on the coast a close watch is being kept on all tardy accounts.

While the reduction in freight rates is gladly welcomed on the coast the hardware end of the manufacturing trade, in company with other trades, is not satisfied with the cut announced from Ottawa. They have expressed the opinion that British Columbia should not give in until the discrimination of the mountain scale is entirely wiped out. To that end, they are prepared to fight the case to the limit, submitting further concrete examples showing how it is impossible for B. C. heavy goods manufacturers to compete with manufacturers in the east.

WESTERN CANADA NOTES

J. Delmo, blacksmith at Kendal, Sask., is adding hardware.

D. D. Rolston of Smithers, B. C., has opened up a retail hardware store.

Roland, Man.—M. J. Harn has opened an up-to-date hardware store here.

F. H. Gould, has joined the sales staff of Wood Vallance Limited, as accessory salesman.

Smoke and water occasioned considerable damage to the tinsmith shop of Walter Wilson at Victoria.

T. L. Waldon, general manager of the Marshall Wells Company, Limited, has returned from a business trip.

Merchants in Scotsguard, Sask., observe Wednesday half holiday during June and July and operate on standard time.

J. G. Beatty, has joined the sales staff of Wood Vallance Limited, Winnipeg, and is covering the Prince Albert territory.

R. W. Smith of the National Standard Company of Niles, Michigan, is on a business trip to Winnipeg. W. Bruce Campbell represents this firm in the West.

H. L. Huyck, of Swift Current, Sask., who represents Wood Vallance Limited, in that district, is reported on the way to recovery from an automobile accident which happened recently.

J. J. Sullivan, who covers the Prince Albert district in the interest of Wood Vallance, Limited, has suffered a stroke of paralysis. Latest reports are that he is making rapid recovery.

The Premier Rubber Co., Ltd., of Canada has been organized in Vancouver with Walter R. Dockrill, John F. Keen, Fred. A. Harding, J. Duff Stuart, R. G. Edwards Leckie, John E. Leckie and Alex. Henderson as the principals.

Marshall Wells Company, Limited, wholesale hardware dealers held their annual picnic on Saturday, July 29th, at Selkirk. A large number of the staff attended and a good list of sports was run off. An enjoyable time was participated in by all of the staff who attended.

New Westminster.—The city council has awarded a contract to the Vancouver Engineering Works for 8,400 feet of 24-inch steel pipe at a price of $30,976, this being lowest of a large number of tenders. The contractors agree to deliver in twenty-three weeks. The pipe is to be used in repairing the water system destroyed in the spring freshets.

WESTERN HARDWAREMAN BELIEVES IN ADVERTISING

Kindersley, Sask.—Robert Gillespie, hardware merchant, is more convinced than ever that it pays to advertise. Last week Mr. Gillespie advertised an aluminum ware sale, which was announced to commence on Saturday. Hardly had the paper been circulated in the different homes when the Gillespie hardware was besieged with eager purchasers, anxious to get a piece of aluminum ware at the reduced price of one hundred and fifty-nine cents, and by night the few odd pieces left on the bargain counter were hardly noticeable.

OBSERVANCE OF CIVIC HOLIDAYS

Tillsonburg, Ont.—Monday, August 7. Held first Monday of August each year.

Welland. Ont.—Wednesday, August 2.
Mitchell, Ont.—Monday August 7.
Toronto.—Monday August 7.
London.—Monday, August 7.
St. Catharines.—Monday, August 7.
Peterborough.—Monday, August 14.
Toronto.—Monday, August 7.
Niagara Falls.—Monday, August 7.
Owen Sound.—Monday, August 7.

Subscribers are kindly requested to send in the date of their Civic Holiday if it does not appear above.

Assess Themselves to Fight Orientals

B.C. Retail Merchants to Collect Tax of $2 Per Member—Want All Wholesalers to Have Licenses—Harvey Murphy of Nanaimo the New President

Reported especially for this paper by WALTER F. ING

VICTORIA, B. C.—Reference was made in last week's issue to the annual convention of the Retail Merchants' Association of British Columbia and particularly to the president's and secretary's reports.

Between fifty and sixty delegates were in attendance, together with their wives, as well as a number of other retailers from different parts of the province. Delegates were registered from the following places and districts:

Vancouver, Victoria, New Westminster, Nanaimo, Chilliwack, Duncan, Hope, Spuzzum, Princeton, Kamloops, Ladner, North Vancouver, Enderby, Vernon, Kelowna, Cranbrook, Esquimault, Trail, Revelstoke.

Provincial President Jos. T. Crowder, of Vancouver, occupied the chair, and with him were Harvey Murphy, Nanaimo, 1st vice-pres.; G. H. Jacobson, New Westminster, 2nd vice-pres; D. Kent, Vancouver, treasurer.

Liquor Resolution Turned Down

Many important resolutions were before this convention for consideration, including a strongly worded resolution calling for the prohibition of the sale and importation of intoxicating liquors in British Columbia, this resolution being presented by the Grocers' Section of The Greater Vancouver District, on the ground that it was diverting an enormous amount of money from the regular business channels to be used for the purchasing of whiskey, etc. This resolution was turned down on the ground that the question was a moral one and one which the Retail Merchants' Association had nothing to do with.

Other resolutions placed before the convention from the different branches of the province were as follows:

Transient traders, peddlers and agents.

Cartage charges by wholesalers and manufacturers.

The Sales Tax and its collection.

Oriental exclusion—to assess all members in B C. the sum of $2.00 to carry on the fight. (Approved.)

To amend the Weekly Half Holiday Act, preventing auction sales on any holiday or half-holiday—referred to executive.

The Lord's Day Act—to have jurisdiction of same placed entirely in the hands of Provincial Legislature. (Lost.)

Peddlers' Licenses—to compel municipalities to collect before peddlers start business.—Referred to executive.

Wholesalers selling to consumers—against any wholesale firm selling to any person, firm or corporation other than persons, firms or corporations buying for the purpose of re-sale. (Approved.)

A resolution to the effect that no wholesaler shall sell to any person, firm or corporation without a license, such license to be issued by Federal Government. (Referred to incoming executive.)

Resolution to permit jewellers to sell articles left for repairs and not called for within a limited time. (Approved.) This resolution to be made the subject of a Bill to be presented at the next session of the B.C. Legislature.

A resolution covering removal of goods by householders, compelling moving and express men to keep record and report. (Referred back).

A resolution to the effect that only those persons entitled to vote at municipal elections be permitted to sign petitions for presentation to city or municipal councils, particularly in reference to the closing of stores. (Approved).

A resolution to make it impossible for druggists to do business in lines of goods handled by other stores who are compelled to close on a half-holiday. (Referred to incoming executive for action if found advisable.)

Premier Oliver One of Speakers

The speakers at the convention lunches and dinners, which were held in the Dominion Hotel, included Premier Oliver, who spoke on the freight rate fight being put up by British Columbia; Dean Miller of the University of Washington, on the "Economics of Distribution," and Dr. W. J. Hindley, of Spokane, who spoke at the official convention banquet, and who is the educational director for the State of Washington, for the State Retailers' Association. He took for his topic, "Who is responsible for the present merchandising problems?"

The New Officers

The election of executive officers for the ensuing year was as follows:

Harvey Murphy, Nanaimo, president; D. H. Kent, Vancouver, 1st vice-pres.; Harold Kent, Victoria, 2nd vice-pres.; A. P. G. McDonald, New Westminster, 3rd vice-pres.; T. F. McDowell, Vancouver, treasurer; Jos. T. Crowder, past president, was elected as representative for B. C. on the Dominion Executive Council.

Kamloops presented an invitation for the next convention to be held in that city, which was referred to the incoming executive and which will in all probability be chosen for the next meeting place.

The Four Outposts Which Protect Your Profits

ONE of the most valuable helps which Canadian hardwaremen can take advantage of will be the specific data concerning plans for **selling more hardware and making more profits,** as outlined **by Frank Stockdale**, one of the foremost retail merchandising experts on this continent, in a special article written exclusively for Hardware and Metal and which will appear **in the Annual Fall Number on August 19.**

A leading Canadian retail hardware firm which had a personal application of the selling methods outlined in this article states **"we compliment you for the clever, business-like way in which you showed us how simple the application of your system was."**

Every Hardware and Metal reader can have access to this fountain of valuable data by studying this article.

Watch for the August 19 issue.

New Hardware Goods

Offered to Canadian Hardwaremen

WISS PRUNING SHEARS

J. Wiss and Son Co., of Newark, N. J., are introducing to the market a new pattern pruning shears, No. 209. The makers describe this as a high quality pruning shear, the blade having a good bevel, and being set to give powerful

leverage. Other features pointed out by the makers are the knurled handles to prevent slipping, the blued finish, the polished head, and the provision of steel clip for holding the tool in closed position when desired. The full length of this product is nine inches.

REX MICROMETERS

A recent announcement by the Brown & Sharpe Mfg. Co., of Providence, R. I., introduces their new line of Rex micrometers. The Rex line is furnished for either English or Metric measure, and includes 24 different sizes of micrometers to take measurements up to 24 in., or 600 mm. These micrometers are regularly furnished with a clamp ring which clamps the spindle and preserves the setting.

A feature pointed out by the makers is the rectangular shape of the frame. These give large measuring capacity. Holes are used in the larger sizes to lighten the frame. The anvil, spindle,

and other parts, are similar to the parts of the regular B. & S. micrometers, and means are provided for adjustment for wear of measuring surfaces and screw. In the larger sizes, Rex micrometers are furnished in wooden cases. The accuracy of these tools is pointed out by the manufacturers. An attractive circular describing this new Rex line is obtainable from the above mentioned company.

NON-TILTING PAINT POT

This product is the device of the Industrial Metal Ware Manufacturing Co., of Cincinnati, Ohio. The Jud-way non-tilting paint pot is equipped with one half section compartment, and two section compartments, which the makers point out affords the equivalent of three ordinary paint pots. It is equipped with brush clips to fasten the brushes to the side of the color compartment to which they belong, in order to prevent the

THE LOCK BAIL

brush falling into the paint, or outside of the pot. The locking bail, and the paint pot strainer, are other features of this product. The paint pot strainer is equipped with No. 16 brass wire gauze, being designed to telescope the paint pot to a depth of one inch from the top, through the provision of clips extended over edge of the pot.

HYRATE VOLT CHECKER

The hyrate volt checker has recently been added to the list of electrical equipment manufactured by the Service Station Supply Co., Detroit, Mich. This is a volt meter with a zero centre scale, reading to three volts on either side. It is equipped with two side spikes and a convenient handle. It is pointed out by the makers that having stationary prods and zero center scale, only one hand is necessary to make reading with the Hyrate volt checker, thus leaving the other hand free to record same. Another feature is its ability to promptly find "polarity." This can be readily determined as the needle swings to the negative post.

KRAEUTER BATTERY TOOL

A new plier designed for handling storage battery cells and plates has been placed on the market by Kreauter and Co., of Newark, N. J. This tool bears some resemblance to a webbing or auto fabric plier. The jaws are two inches wide in order to distribute the pressure over a large area, and thus mini-

mize the danger of distorting the walls of the battery cells to be removed. The makers also point out that deep corrugations are cut across the gripping surfaces to prevent slipping. One of the handles is hooked at the end, so that a lifting force may be applied. This plier is made of tempered aluminum bronze forgings.

NEW MANICURE SCISSORS

A new pattern in manicure scissors has been designed by the J. Wiss and Son. Co., of Newark, N. J. This product is described as a strong manicure scissors, with full nickel plated curved blades, with jointless pattern. The makers point out that the elimination of the usual joint, makes it possible to use extra large watch screws of hardened steel, which prevent the blades from working loose. The manufacturers also state that this patent was developed especially for professional manicurists. The curved points are extra sharp. The full length is 3¾ inches.

RADIO PLIER PANEL

An attractive wooden panel board, on which are mounted an assortment of pliers especially selected for radio work, has been placed on the market by Kraeuter and Co., Newark, N. J. The manufacturers state that these panels were produced to meet a demand for

pliers suitably designed for the special requirements of radio enthusiasts.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THE CURRENT developments in the hardware markets again attract specific attention and once more emphasize the importance of careful consideration to primary elements in both production and distribution as affecting prevailing quotations. Advanced price levels appear this week on bar iron, copper and brass rods, cut nails, pig iron, ingot spelter, tin and lead. Declines are recorded on buck saws and extra blades, Buffalo wagons and sleds, the Banner line of ash sifters, the Hudson make of apple parers, and split rivets. Other developments of importance are the anticipated downward revision in prices on roofings and building papers, the recognition of uniform discount levels on window glass, and the probable effect of the continued coal strike and rail transportation difficulties on the steel industry.

The announcement from certain large American steel producers that they will be forced to close down unless a settlement in the coal strike is reached in the immediate future comprises one of the primary elements in the steel trade. The upward climb of prices is expected to continue as a result of these conditions. It is noted that in addition to the shortage of coal, there has developed a scarcity of cars at mill centres as a consequence of the railroad labor troubles. Domestic producers state that they are not yet seriously affected, but are admittedly watching the situation with marked interest owing to the question of deliveries. The coal shortage is also stated to be affecting some domestic manufacturing concerns whose stocks of fuel have been depleted through delayed shipments and also on account of capacity operation.

Ingot metals have developed a stronger tone, with spelter, lead and tin featuring the upward movement, each having recorded slight price advances. The surplus stocks of non-ferrous metals have now generally been taken care of and a little better demand on both primary and domestic markets has resulted.

Galvanized sheets are still reported scarce, delayed deliveries and higher prices being considered possible if the current trend remains. A firm situation is evident in soil pipe and fittings, owing to rising production costs coupled with steady seasonal trade. An open market is now prevailing on heavy corrugated sheets, quotations on 24 gauge and heavier sizes being made according to specifications and delivery, as was the case earlier in the season. While the strength of the sheet market and the higher prices on flat galvanized served to firm up the corrugated market, the falling off in trade combined with keen competition, are cited as the causes for the resumption of former conditions.

The fact that U.S. rail difficulties have already delayed shipments of turpentine from southern producing centres, has produced an unsettled feeling on domestic markets regarding the trend of future prices owing to scarcity. Present stocks are described as low and with the continued tie-up in the railroad service from Savannah and other points, the difficulties attending delivery of fresh supplies are liable to increase to the point where domestic holdings will be at a premium.

Montreal Markets

MONTREAL, July 27.—Price revisions again feature the current hardware markets, an advance in quotations on cut nails being one of the outstanding changes. These are now quoted twenty-five cents per keg higher. Another important revision is announced on bar iron and steel, the second price advance in the last three weeks now being given. This again reflects the firm trend in the steel industry, which is further strengthened by reports from mills to the south that unless a settlement is reached almost at once many producers will be forced to close down. This tendency is also reflected in the sheet markets, galvanized sheets in particular continuing in a strong position. Local stocks of this product are still at a low level, dealers awaiting shipments from the English market. Reduced prices are given on both buck saws and extra blades. Price-shading on wire nails continues quite common. Ingot metals are again reported firmer, this improvement causing a stronger tendency in lead and zinc products.

CUT NAILS ARE ADVANCED 25 CENTS PER KEG

Montreal.

Quotations on cut nails are increased twenty-five cents per 100 lbs., and are now quoted at $4.65 base.

EASIER PRICES ON BUCK SAWS AND EXTRA BLADES

Montreal.

A reduction of approximately 20 per cent. is made in quotations on both wood buck saws and extra blades.

ANOTHER TEN CENT RISE IN STEEL PRICES

Montreal.

Current quotations on the various grades of bar iron and steel are further advanced ten cents per hundred pounds this week. This revision marks the second increase in prices in the past three weeks, and reflects the steady upward trend in the steel industry. There is still a variation in quotations among local distributors but with the stronger tone continuing it is expected that price levels will reach a more uniform basis within the near future.

More recent developments in the steel industry relative to the coal strike, such as the announcement from some of the largest American corporations that unless a settlement in the strike is reached within the very near future they will be forced to close, now attracts attention. In discussing the situation with local distributors it is pointed out that a much firmer tone will likely continue and if production is curtailed in Southern steel plants it is only a question of time until

this is reflected locally. Domestic producers are now watching developments with interest.

Following are average prevailing quotations:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

NO IMPROVEMENT IN WIRE NAIL SITUATION

Montreal.

There has been little improvement in the local market for wire nails during the past week and keen competition is still evident, with prices very unsettled. One local jobber stated to Hardware and Metal that at the present time there is no price on wire nails, each day during the past week bringing out a new lower quotation. The base price of $3.65 is given, and apparently this quotation is more general than any other. The undertone of the market remains firm and is further strengthened by reports of the coal strike reaching serious proportions in the near future. Another indication of the strong tone in products of this nature is the advance of twenty-five cents per keg on cut nails this week. Although there is no present indication of a price settlement, some action is expected in the hope of stabilizing the market in the near future.

PIPE FITTINGS RECORD VERY LITTLE CHANGE

Montreal.

Demand for pipe fittings continues in fair proportions, trade showing a slight improvement in the past few weeks. Quotations on the different lines are unchanged and the market is described as steady at the following quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersunk	30%
Bushings cast	32%
Do., malleable	32%
Unions	47%
Flanged unions	30%
Flanged fittings	30%
Dart unions, black,	33-1/3%
Dart unions, galvanized	13%
Nipples, ⅛ to 4", close and short	60%
Do., long	65%
Do., 4½ to 8", close and short	50%
Do., long	55%
Couplings, 4" and under	30%
Do., 4½" and larger	10%

MALLEABLE FITTINGS—

Piece list effective June 1st, 1922. Discount 70-5 per cent.

NO CHANGE RECORDED ON COMPRESSION GOODS

Montreal.

With the undertone of the market for the various lines of brass valves and bibbs remaining quite firm, there is no change made in prevailing prices. Manufacturers of these goods state that although higher price levels were thought likely owing to recent increases in costs of raw metal, it was decided to maintain present quotations for the immediate future at least. There is still a fair amount of business owing to activities in building circles, and following are present discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N. P. "P" and "S" traps	40%

Roofing and Building Papers May Be Reduced

Raw Material Costs Remain on a Fairly Steady Basis—Reduction in Prices Considered Probable in Near Future According to Manufacturer—Increased Efficiency of Labor and Higher Production Have Assisted in Lowering Costs

A REDUCTION in prices of various lines of roofing and building papers seems altogether likely in the near future. Although information given by different manufacturers to Hardware and Metal with regard to the probable trend of these products was of a rather conflicting nature, especially on the question of present cost of production in comparison with that of December last when the last revision was made, it is understood that present prices will come in for discussion at an early date, and much the same action taken as that of December is expected by one large manufacturer. It is generally claimed that raw materials have shown very little recession in prices since the beginning of the year and for this reason another producer stated that although roofing prices are usually taken into consideration after the active months of spring and early summer, there was little room for a lowering in quotations at the present time. However, it is pointed out that the cost of producing has fallen owing to the increased efficiency of labor, thus allowing higher production which has been required in past months of this year. Trade during this time has increased and manufacturers have been able to show an increasing profit on their lines. A reduction in prices now would be warranted more because of this factor than any other.

It will be remembered at the close of last year the manufacturers stated that in making a reduction in many of their lines it was hoped that the new prices would bring about a stabilized condition for some months hence. The reduced quotations allowed little or no margin of profit at the time but manufacturers had anticipated the probable trend of their cost of producing for the months following and had named price levels which would leave only a reasonable profit if lower raw material prices ruled.

A price reduction at this time, in the opinion of this manufacturer, would again allow dealers to work on a stabilized market for their fall trade, and not be hindered by an uncertain situation which is neither beneficial to manufacturers nor to merchants.

He felt that they both had gained by the action taken at the close of last year and there was no reason why this condition should not again prevail for this fall's business.

SOMEWHAT BETTER TRADE IN RANGE BOILERS

Montreal.

Business in range boilers has recorded a slight improvement in recent weeks and present trade is said to be quite seasonable. Building operations are demanding supplies of this product and sales are expected to continue in fair volume during the remainder of the summer and early fall. Owing to the continued firmer tone in galvanized sheets there was a feeling among the local trade that galvanized products in general would perhaps stiffen in price. A local manufacturer stated that while undoubtedly the undertone of the market was strengthened by the trend of flat sheets, there was no direct indication that prices would show a revision. Following are list prices and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
13 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent. Extra heavy, 40 per cent.

ENGLISH MARKET GOVERNS LOCAL SHEET SITUATION

Montreal.

Galvanized sheets are still the outstanding factor in the sheet markets, and while quotations remain at recently revised levels, the undertone of the market is still very firm. This tendency is

further strengthened by the more serious effect the coal strike is likely to have on the steel industry in general. Distributors point out, however, that although the American markets will in all probability firm up considerably in the following weeks, this centre will have the English market to look to and the future price trend will depend largely on the situation overseas. With regard to a more serious shortage on sheets if the coal strike continues, one local distributor stated that he did not think this would reach the acute stage in this locality owing to comparatively easy access to the English market. The undertone in the market for tin plate and Canada plate is steady, but there is the absence of the strength evident in galvanized sheets. Earlier fall bookings on the latter product are expected to commence early next month. Prevailing prices are as follows:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 50
26 gauge	6 75	7 25
24 gauge	6 15	6 65
22 gauge	5 80	6 30
18—20 gauge	5 10	5 60
Other Brands—		
10¾ oz.	6 75	7 25
28 U. S. gauge	6 35	6 85
26 U. S. gauge	6 05	6 55

Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

SOIL PIPE QUOTATIONS FIRM BUT UNCHANGED

Montreal.

Quotations on both soil pipe and fittings remain unchanged with current trade described as quite satisfactory for this season of the year. There has been an improvement in the movement of these products since building commenced in the early summer months and this is being well maintained up to the present. Dealing with the firming tendency in iron and steel products generally owing to the continuation of the coal strike, a local manufacturer stated that up to the present the effect of this had only been sufficient to bring the market on a firm basis, but if a settlement was not soon in sight it would undoubtedly have a more direct bearing on both of these products. Following are unchanged discounts:

SOIL PIPE—	
2 and 3 inch	10%
4 inch	45%
5 and 6 inch	40%
8 inch	20%
Fittings—	
2 and 6 inch	50%
8 inch	20%

FIRMER TENDENCY IN TROUGH AND PIPE

Montreal.

There is still a good amount of activity among manufacturers and distributors of eavestrough and conductor pipe, and if the present movement continues during the remainder of the summer a record season is promised. With the stronger tone in galvanized sheets, and the present shortage on the local market, manufacturers of these products describe the market as decidedly firmer, which tendency is further augmented by prevailing business. List prices and discounts are as follows:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in,, $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70|10 per cent.

Conductor Pipe, Round, Plain and Corrugated, per 100 ft.; 2 in.. $18.40; 3 in., $22.30; 4 in. $29.60; 5 in., $40.00; 6 in. $49.00.

Discount 70|10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.
2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in, $29.00.

Discount 60 per cent.

METAL MARKETS REFLECT ON LEAD PRODUCTS

Montreal

Practically all metals on primary markets are recorded with a stronger tendency, and further advances in prices are given on some lines. This firmer tone continues to reflect on lead and zinc products, the trend of spelter being of particular interest at the present time. Quotations on the finished products are unchanged, but if the strength continues in primary circles, further advances in the near future would not be surprising. A fair volume of business for this season is reported at the following quotations:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 2½ lbs. sq. ft., lb.	0 10
Do., 4 to 8 lbs. sq. ft. lb.	0 09
Cut sheets ¼c. lb. extra, and cut sheets to size. ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

IMPROVEMENT NOTED IN CORRUGATED SHEETS

Montreal.

The continued stronger tendency in the market for flat galvanized sheets and the shortage of stocks on the local market have already improved the situation on corrugated sheets. An unsettled feeling has recently been apparent notwithstanding the undertone has been firm. Price-shading has been quite common, especially on the lighter gauges. Manufacturers and distributors now report an improvement and with a firmer tone continuing prices should reach a uniform level with even higher prices probable.

REPORTED UNEASINESS IN CRUDE OIL MARKET

Montreal.

Recent reports on the crude oil situation in the United States refer to an unsettled feeling among producers because of certain companies quoting below present market values. During the past two weeks an easier tendency has crept into the market and it is stated that more oil was being offered to refineries than the latter required. This condition is the reverse of that existing previously when refineries were report- to have paid premiums because of scarcity. In speaking with local refiners on the question little information could be gained, although it was admitted that crude oil is now on a little easier trend. Quotations on the various lines of oils and greases remain unchanged and gasoline prices continue at recent revision.

STRONG UNDERTONE IN WROUGHT PIPING

Montreal.

Wrought iron and steel piping prices are unchanged with the market still in a strong position. Manufacturers of this product state that they are watching recent developments in the steel industry generally, realizing that a continued stiffening tendency is altogether probable considering the more serious effect the coal strike is bound to reflect if a settlement is not reached. It is pointed out that the American pipe market is also very firm with mills behind in deliveries, but up to the present there is no definite indication that a revision in prices will be made.

STRENGTH STILL EVIDENT IN INGOT METALS

Montreal.

The firmer tone evident in the ingot metal markets during the past few weeks is again well maintained, tin copper and spelter showing a fair amount of strength at the present time. Tin continues to advance on the London market although present quotations are higher than at any time since early in the year. Copper is quiet both on domestic and other markets but the undertone is steady to firm. Spelter, which was the strongest metal on the list one week ago, continues on its upward climb and is now quoted at over six cents, East St. Louis. It is stated that this metal is now affected by the prolonged coal strike, although otherwise the market appears to be in a healthy position.

Toronto Markets

TORONTO, July 27.—The upward trend to hardware prices is still in evidence, many revisions of this nature being recorded this week. Copper and brass rods are again increased in price, while owing to the rise in pig iron of $2.00 per ton, a further corresponding increase of ten cents per 100 lbs. is considered imminent on bar product quotations. Ingot metals are also developing a firmer trend, spelter, lead and tin all registering varying gains in price. These developments are countered on the other hand by changes of a downward nature, Buffalo wagons and sleds being revised on the larger sizes, while wood buck saws and extra blades are lowered approximately twenty per cent. Declines in quotations on roofings and building papers are reporting pending, while prices on heavy corrugated sheets are again more or less nominal, an open market prevailing on 24 gauge and heavier, quotations being made according to specifications and delivery as was the case earlier in the season. Galvanized sheets remain an outstanding factor in the steel market, the upward trend being still further strengthened by the more serious effect the coal strike and rail transportation difficulties in the States are having upon the industry in general and deliveries in particular.

MAY BE DECLINES IN QUOTATIONS ON ROOFINGS

Toronto.

That there is considered to be strong possibilities of lower prices on roofings and sheathings in the near future, was the viewpoint expressed to Hardware and Metal by a local distributor of these products. Although no announcements have been made by manufacturers of roofings since the prevailing levels were put into effect some eight months ago, yet the trend towards easier price levels on such lines is described as being generally looked for in distribution circles. Any changes that may develop in prices on papers, however, are not expected to be of a marked extent, as it is generally considered that quotations on these products represent levels in comparison with prevailing production costs. That roofing prices may be subject to early declines, however, is more or less looked for, as outlined above.

GALVANIZED SHEETS NOW REPORTED SCARCE

Toronto.

The situation in galvanized sheets is reported as attracting more attention each successive week, supplies becoming scarcer owing to the delayed deliveries coupled with the current rate of demand. The effect of the railroad and coalminers strikes in the south as regards reducing the volume of steel production, is becoming more pronounced. Consumers generally are, therefore, more concerned over delivery, than prospects for future conditions. The situation has admittedly grown more serious as affecting the steel industry in general, and in certain quarters sheet prices have been withdrawn and a higher sheet market is predicted in southern centres.

Domestic producers of galvanized sheets are planning for increased capacity, it being generally recognized that limited production of the domestic article has resulted more or less in a greater call for the imported product. Plant operations to the full extent have been recorded since March, and commencing in August, a fifty per cent. increase in output is expected.

Local quotations remain firm at the following levels:

BLUE ANNEALED SHEETS—	
10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10
BLACK SHEETS—	
18-20 gauge	4 80
16 gauge	4 15
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	**Queen's Hd.**	**Fleur-de-lis**
28 gauge	7 25	7 00
26 gauge	7 00	6 75

COAL SUPPLIES PIVOT OF STEEL MARKETS

Toronto.

Local prices on bar iron and steel are generally remaining at the $3.15 base recently adopted, and all eyes are naturally turned to the coal situation as the pivot of future developments in the steel industry. During the present week, the local bar product market has been somewhat quieter, but fair conditions prevail. One distributor stated that the whole thing rests on the coal supply as with the apparent difficulties of coal shipments materializing during the ensuing weeks, the market may fall dead if no remedy is found. However, a hopeful outlook is being maintained in local warehouse circles, importations of coal from Britain being considered as a leading factor in the situation.

With the steel market quiet, and likely to stay quiet, according to precedents, during August, the chief interest is as to the market for the late months of the year. Among sellers, predictions are made freely that buying will be resumed after the vacation period. Among buyers, hopes appear strong that conditions will continue good, but no certainty is expressed. In many quarters a note of warning has been sounded, that market activity will depend largely upon prices and may be interfered with if sellers continue to push their recently acquired advantage over buyers. Some of the references are in rather strong language, a possible "buyers' panic" being mentioned, the idea being that if this should develop there would be a vigorous effort to liquidate stocks again. These warnings have been making more or less impression on many sellers and in general the market presents a more moderate aspect. Basis prices are very firmly maintained but on the whole there is less disposition to quote extra prices.

IRON AND STEEL—	
Mild steel bars, base	3 15
Mild steel bands 3-16 in. base	3 65
Bar iron, base	3 15
Angle iron, base	3 25
Horseshoe iron	3 75
Tire steel	3 35
Spring steel	8 00
Sleigh shoe steel	3 15
Hoop steel	4 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

COPPER AND BRASS RODS AGAIN ADVANCED

Toronto.

Prices on copper and brass sheets have again undergone some revision, the higher prices announced last week being still further advanced in the case of copper and brass tubing, but declining one cent per lb. on copper sheets. These further changes have been announced by manufacturers and distributors who state that in adjusting their cost basis, the current revisions are being passed along, according to the prevailing tendency. Market tone is described as fairly strong, with the call for these products moderately satisfactory for this season. Current quotations follow:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 20
COPPER—	
Rods, base, per lb.	0 28
Soft Sheets, plain, 16 oz. and heavier,	
Do., plain tinned 16 oz. and heavier,	
Do., polished and tinned, 16 oz. and per lb.	0 29
per lb.	0 36
heavier, lb.	0 41
Tubing	0 32

BIG INCREASE IN GASOLINE CONSUMPTION

Toronto.

Gasoline and oil quotations remain unchanged this week, the higher levels recently announced still being in effect. That production of gasoline has been of record volume has been the general impression throughout the trade, based upon refinery records, and this in turn has given rise to the thought that quotations would remain on comparatively unchanged levels. The recent upward revisions, however, indicate that such reserve supplies of gasoline are being rapidly depleted by the increasing consumption of the product and new records in this respect are considered likely to be established this season. The large increase in the number of automobiles used in Canada for both pleasure and business purposes, has been substantiated by the spread of the touring habit at this time of the year, with its consequent heavier call for "gas" and opportunities for accessory trade.

NOMINAL PRICES ON HEAVY CORRUGATED

Toronto.

Unsettlement in corrugated sheet price levels is reported from various market quarters, the shading of nominal quotations on the heavier gauges having again appeared. This condition prevailed during the early part of the season, but owing to the strength in the flat sheet markets and the higher prices on same, the general tone of corrugated naturally improved and steady prices have been in effect. Now that the call for corrugated sheets however, is slackening, keen competition has resulted in shading being reported in certain quarters. On the 24 gauge and heavier, an open market prevails, no prices being regularly quoted. The situation is firm on the lighter gauges, however, these being generally scarce with purchasing on a hand-to-mouth basis. Following is the prevailing nominal list:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 26 U. S. gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

BUCK SAW QUOTATIONS TWENTY PER CENT LOWER

Toronto.

A reduction of approximately twenty per cent. has been made in quotations covering wood buck saws and extra blades. The Prince Rupert line, are now priced at $16.65 per dozen, and the Happy Medium at $12.30. Arrow Head are also quoted at $16.65 per dozen, and it is stated that corresponding changes have been made in lines by other manufacturers.

Advance in Base Quotation on Cut Nails

Price Now $4.60 Base, an Increase of Twenty-Five Cents Per Keg—Rising Costs of Steel Products, Combined With Heavy Call for Nails Due to Building Activities Among Reasons for Upward Climb in Price

An advance of twenty-five cents per keg has been announced in prices on cut nails, the base price now being $4.60 f.o.b. Montreal. This change in an upward direction was more or less expected by the trade, the stronger tendency in these markets having been pointed out in recent issues of Hardware and Metal. The new level is effective from July 21.

Business in nails, both cut and wire, is maintaining a steady volume, the marked activity in construction circles having its natural effect in the seasonal movement of nails and other building products. A remarkable gain in strength together with firmer prices, however, has been the result of increased demand for finished steel products during recent weeks, a condition which has been accentuated by the complex situation in the steel industry due to the southern coal and rail strikes.

Manufacturers and distributors of cut nails state that the rising production costs force the higher price levels. In making the new quotations effective, due consideration has also been given to the trend of southern primary markets, where the boom in dwelling house construction has created an unusually heavy call for nails. Domestic prices on wire nails remain unchanged at $3.65 base.

FURTHER RISE IN BAR IRON PRICE EXPECTED

Another ten cent advance per 100 lbs. on bar products is reported as imminent, due to the further rise of pig iron prices this week. This advance of $2.00 per ton brings the local pig iron price to $32.65, and reflects the stiffening of costs throughout the steel industry on this continent, due to the combination of coal strike and transportation tie-up in American markets, in conjunction with seasonal demand at production centres. The present local base price on bar iron is $3.15, and should the additional advance made by producers be passed on by the jobbers, it would bring the average level to $3.25.

LARGER SIZE WAGONS SHOW PRICE DECLINE

Toronto.

The Canadian Buffalo Sled Co., line of wagons and sleds have been revised, a reduction of around ten per cent. having been noted in some of the larger sizes. It is stated that this downward revision does not affect the smaller models. The disc and spoke wheel types are now selling at similar levels.

INGOT METALS NOW DEVELOP STRONGER TONE

Toronto.

The ingot metal markets have generally developed a stronger tone, the surplus stocks of non-ferrous metals having been taken care of, and a little better demand consequently resulting. Spelter has again advanced in price, the local level having reached $7.75. Lead is also steadier and a little firmer at $7.25 while tin has been fluctuating with the net result being a slight increase to 36 cents.

COPPER.—Copper is again generally quiet. Consumers remain conservative in their commitments and requirements for the next few weeks are reported well covered. Reports from southern markets indicate that the future outlook is clouded by the traffic congestion, and the shortage of fuel following the coal miners' strike. It is pointed out that no lasting improvement in fundamental conditions can be expected until the transportation and coal elements are settled. Producers claim that the statistical position of copper remains strong and prices are being fairly well maintained. Local levels are unchanged at 17 cents.

TIN.—This metal has been fluctuating more or less, but the net result is an upward trend to prices on primary centres. Trading is however, dull, and the local market shows very little activity, but in spite of this quotations have advanced to the level of 36 cents.

LEAD.—This market is again reported steadier. Following the slackness in demand recently recorded, it was felt in some quarters that easier prices would prevail, but quotations have generally been maintained both on primary and domestic markets. Current business is described as satisfactory. Local price levels remain firm at $7.25.

SPELTER.—The upward trend of spelter continues and the general disposition of many sellers is now to withhold offerings in expectation of higher levels being reached. A brisk call for zinc in galvanizing purposes has been recorded. As the rise in spelter has been more or less rapid, however, reports from primary centres indicate it is reasonable to expect a little slackening. Local quotations have firmed up to the $7.75 level.

ANTIMONY.—This market continues to be ruled by fluctuations owing to the general demand remaining quiet. Prices show very little change and there is no variation noted in the outlook. The local price hovers between 6 and 7 cents.

Steel Production Now Threatened By Strike

Reports From United States Steel Centres State That Many Steel Plants Will Be Forced to Close Unless the Coal Strike is Settled Within the Very Near Future

THE prolonged coal strike in the United States combined with car shortage and transportation difficulties, will, according to latest reports from American steel centres, have a more serious effect on the steel industry within the next few weeks, and unless some settlement is reached almost at once many steel plants will be forced to close down. At the present time operations among some of the steel plants have fallen off, and the continuation of this condition, which is bound to follow, is now causing grave concern at certain corporation headquarters. Officials of one of the largest corporations stated that they had banked fires and discontinued production at two of their largest furnaces this week. This is very serious.

Up to the present the effect of the coal strike on the steel industry has been great, but not of a serious nature. It has been sufficient to cause a continuous gradual stiffening of prices, but has not injured production to any great extent. Stocks of coal on hand have been gradually dwindling and certain mills have been recently using other fuel where possible. With a serious turn in the situation now apparent, steel prices will be watched with interest in the following weeks. Just how soon domestic prices will be affected is considered problematic, but the trend of the steel market in general is undoubtedly on a much firmer basis than formerly.

London Markets

LONDON, July 27.—Hardware business in this district continues seasonably good. Orders are numerous and fairly heavy. Stocks are low and the carry over to next summer season will be light.

Price changes are light this week. They include a twenty per cent. reduction for buck saws, and new lower prices on Banner ash sifters for the coming season. Prices are very firm for most lines.

BUCK SAW PRICES TWENTY PER CENT. LOWER

London, Ont.

A twenty per cent. reduction has been announced in quotations on buck saws for the coming season. Following are the revised levels:

BUCK SAWS—	Per Doz.
Happy Medium	$12 30
Prince Rupert	16 65
Arrow Head	16 65

REDUCED QUOTATIONS ON BANNER ASH SIFTERS

London, Ont.

New lower prices for Fall delivery are now quoted on the Banner line of ash sifters. The No. 2 size is priced at $2.65 each, while the No. 3, is now $1.95.

APPLE PARERS ALSO AT EASIER PRICE LEVELS

London, Ont.

Prices on the Hudson make of apple parers are lower this season, the new prices being $14.85 per dozen.

CUT NAILS ADVANCED TWENTY-FIVE CENTS KEG

London, Ont.

An advance of 25 cents per keg is now in effect on cut nails. This change brings the prevailing quotation to $4.60 base. Current trade in nails, both cut and wire, is reported good. New levels follow:

NAILS—	
Wire, base	3 65
Cut, base	4 60

SPLIT RIVET PRICES NOW REGISTER DECLINE

London, Ont.

Quotations on split rivets have also been reduced this week. The new price levels on the No. 9 assorted is $1.05 per dozen packages.

BRISK TRADE RECORDED IN CUTLERY PRODUCTS

London, Ont.

Recent price revisions to lower levels on pocket cutlery lines, scissors, table cutlery and carvers, are credited with having stimulated current sales in these goods.

CALL FOR TURPENTINE NOW LESS URGENT

London, Ont.

The range in local prices on turpentine remains one of the chief factors in this market. Current consuming demand has fallen off somewhat during the last couple of weeks, this tendency undoubtedly being due to the high price levels which the product generally attained.

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

SPRAYERS SELLING WELL

London, Ont.

A seasonable demand for sprayers is apparent at following prices for Eureka Planter sprayers:—Tin No. 112, $5.50 each, Glass jar, No. 113, $8.00 each, Glass jar, No. 114, $9.00 each; Continuous tin No. 115, $10.00 each; Continuous galvanized, No. 116, $10.50 each; Compressed Air, Galvanized, No. 110, $7.00 each; Compressed Air, brass, No. 111, $10.00 each.

SEASONAL CALL NOTED FOR LINSEED OIL

London, Ont.

A good seasonal demand is reported for linseed oil, with prices locally unchanged at the following levels:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

CROQUET SETS AMONG SEASON'S POPULAR LINES

London, Ont.

Dealers report that croquet sets are proving popular sellers this season. Following are the prevailing prices on this line.

CROQUET SETS

No. 6-4 ball, $2.15 set; No. 7-4 ball, $2.75 set; No. 5x-8 ball, $5.50 set; No. xA-8 ball, $3.75 set.

EXCELLENT SALE FOR AUTO TIRES AND TUBES

London, Ont.

An excellent sale is noted this season for automobile tires and tubes. Recent lower prices are reported to have stimulated trade in these lines.

Winnipeg Markets

WINNIPEG.—New price lists on wood screws constitute one of the premier changes in the current hardware market. Increases on cotton twine have also been recorded. Several lines of household aluminum ware are showing a slight reduction. Cow bells and buck saws show lower quotations. The tone of the linseed oil market continues firm due to the continued strength in flax seed. Turpentine is ruling firm with no change in local prices.

LINSEED OIL PRICES ON STEADY BASIS

Winnipeg.

The undertone of the linseed oil market continues firm, reflecting the continued strength in flax seed. Consumption of linseed oil is heavy as the painting season is now at its height but requirements are well taken care of. Boiled linseed oil is quoted at $1.28 per gallon in barrel lots with raws at $1.25.

RUBBER LAWN HOSE NOW SELLING FREELY

Winnipeg.

A good volume of sales is reported for rubber lawn hose and these products are experiencing a seasonable movement at unchanged prices.

GOOD MOVEMENT NOTED IN LOADED SHELLS

Winnipeg.

Due to the heavy rains this year re-

ports are arriving from the country districts to this effect that sloughs are full of ducks and as many merchants are looking forward to the hunting season, the demand for loaded shells has shown a decided improvement.

TURPENTINE REMAINS FIRM ON PRIMARY MARKETS

Winnipeg.

Turpentine on primary markets continues firm, and it is reported that buyers are purchasing in small quantities to meet their necessary requirements. Quotations on turpentine are $1.85 per gallon.

FIELD HOES AND HAYFORKS NOW ACTIVE

Winnipeg.

Field hose, hay forks and other lines are experiencing a good seasonable demand. Quotations remain unchanged.

COTTON TWINE PRICES SHOW AN ADVANCE

Winnipeg.

Cotton wrapping-twine has advanced five per cent. and new prices are as follows:

3 ply in balls, per lb.	0 54
4 ply in balls, per lb.	0 57½
3 ply in cones, per lb.	0 50
4 ply in cones, per lb.	0 54

NEW PRICE LIST ON WOOD SCREWS

Winnipeg.

New price lists on wood screws, both bright and brass have been issued by the manufacturers. The trade discounts are the same with increases on the smaller sizes and in many cases larger sizes showing reduction.

LOWER QUOTATIONS ON COW BELLS

Winnipeg.

Lower quotations have been announced on Holstein cowbells, and wholesalers are now revising their prices on same.

ALUMINUM WARE GOODS SHOW LOWER PRICES

Winnipeg.

Wholesalers announce that slight downward revisions in prices are now effective on household lines of aluminumware. The reduction varies from five to ten per cent. on the various lines.

BUCK SAWS AND PARTS SHOW BIG DECLINE

Winnipeg.

A discount of 20 per cent. has been announced on buck saws and buck saw parts. Hack saws and blades show a reduction of 10 per cent.

STOCKS OF PARIS GREEN AT LOW LEVELS

Winnipeg.

Owing to the heavy demand this year for Paris green spot stocks are reported scarce.

PARIS GREEN—

½-lb. per lb.	44½
1 lb. per lb.	42½
25 lb. drums, per lb.	40½

Hamilton Markets

HAMILTON, July 27.—Brisk trading in summer goods, together with many bookings for early Fall goods coming to hand, are constructive features in the current hardware markets. Although many wholesalers are carrying on with depleted staffs, owing to vacation period being at hand, there is not so much talk of the summer dullness this year which has characterized trade circles in past seasons. Business is admittedly of a lesser volume than a few weeks ago, but the prevailing ratio is described as very satisfactory in many quarters. Certain retailers report that trade is dull, while other have stimulated conditions by special sales, taking advantage of the vacation period to push seasonable goods, and other preparations for renewed activity in the Fall months.

After considerable speculation as to what further changes might be made in paint prices, it is now evident that manufacturers have decided to forego their alleged intention to further advance prices and absorb the Sales Tax. There is an active sale for seasonal hardware such as vacuum bottles, harvest tools, glass ovenware, screen wire cloth, sprayers, Paris green, etc., stocks of the latter now being rather low, due to the great number of insects prevalent on crops this year.

Cordage manufacturers state that a fair season has been in evidence during the past months, and while there was room for further improvement, sales were ahead of last year. Now that the season is drawing to a close it was considered the most opportune time to adjust prices, stocks in the hands of both jobbing houses and retail merchants being usually at a low level after the busy months of spring and early summer.

It is noted that domestic producers of galvanized sheets are extending their capacity and planning to increase production by fifty per cent. With the additional equipment in operation, it is reported that ninety tons of galvanized sheets per day will be the total output. The outlook in sheet prospects is described as very good, as it is reported that the current demand has been far in excess of domestic production, thus resulting in a heavier call for the imported products. The active business at present noted in galvanized is attributed to the fact that prices dropped considerably from the war-time levels, combined with the fact that the market is also reflecting the present strength of the steel industry in general. As a result of these conditions, the old-time demand for galvanized sheets has been evident in many quarters, and lower transportation costs together with increased consuming interest should place the volume of future business on a more satisfactory plane.

Pittsburg Markets

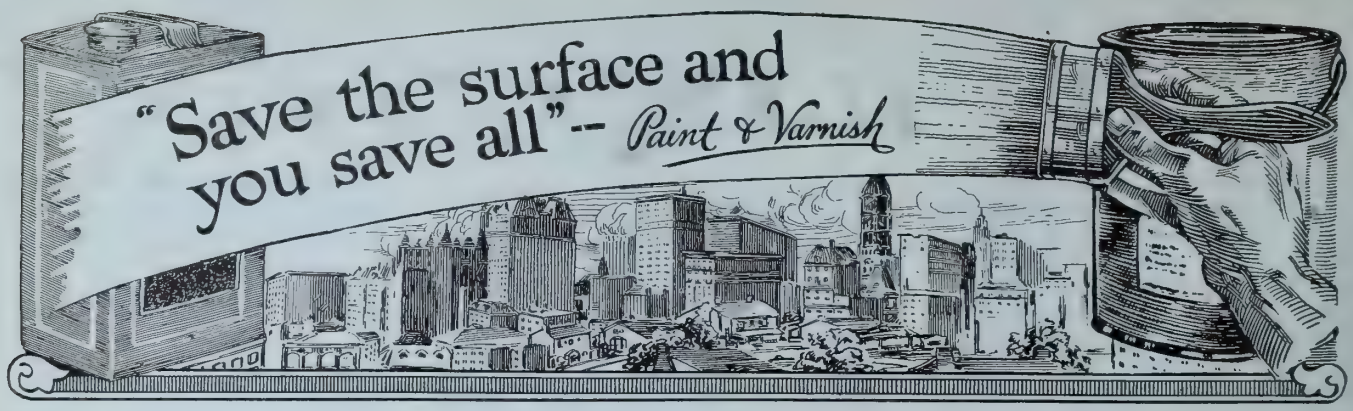
PITTSBURG, July 27.—The transportation situation has caused a material drop in pig iron and steel production, as foreshadowed in this report of a week ago. About the middle of June congestion reached considerable proportions on the railroads serving coal fields in West Virginia and Kentucky, on which the steel industry has been depending much more than usual, on account of the strike at the union coal mines, and various non-union strikes, including those in the Connellsville region.

The general strike of railroad shopmen which started July 1 tied up the movement of southern coal almost completely, as to its coming north across the Ohio river, and slowed down various other roads, even including at least one that taps the Connellsville region. Of course, the coal strike is important, in making the iron and steel industry short of coal, but to get the perspective one must remember the coal strike started April 1 and the shopmen's strike July 1, so that the coal strike is between three and four months old while the shopmen's strike is between three and four weeks old

The later is the more important factor. The iron and steel industry got along fairly well the first three months of the coal strike, increasing its production, as in both May and June production of steel ingots was at a rate of about 36 1/2 million tons a year, while the rate at the end of March was about 35 million tons a year and the rate last December had been only 20 million tons.

Furnaces Blown or Banked

The Republic Iron & Steel Company had been operating three blast furnaces at Youngstown, and has had to bank two of these in the past week. It had started its Bessemer steel making department July 5, after an idleness since last September, and has had to close it. The open-hearth department continues as formerly. La Belle Iron Works has blown out the one furnace it was operating, and Trumbull-Cliffs at Warren, O., serving the Trumbull Steel Company, Cleveland, has banked a furnace. The McKinney Steel Company, Cleveland, has banked a furnace. Practically all of this is due to curtailment of supplies of coal at by-product plants that had been using Kentucky and West Virginia coal largely if not wholly. The by-product plants at Buffalo have been getting short of coal. Some of the furnaces in that district are running with slack draft and it is probably only a matter of days until some of them will have to bank or blow out. Cherry valley, a merchant furnace at Leetonia, O., (Mahoning valley) went out a few days ago.



Arranging a Midsummer Sale of Paint

While the Family is on Vacation is a Good Time to Have Both Exterior and Interior Painting and Varnishing Done—Auto Painting Offers Opportunities—Conference With Salesmen to Imbue Them With Stimulating Ideas—Preparing for Fall

IN THE HOT weather months of midsummer some merchants are apt to think their customers are lethargic, particularly as regards such a matter as painting. If this is really the case the merchant adopting the same attitude will not help matters any. On the other hand the merchant who keeps constantly after business and shows that he does not regard the midsummer months as an off season will do much to guide many others along the same line of thought and the result will be to keep business active in the hot weather.

As particularly applied to paint there are wonderful possibilities involved in summer painting, and many factors which make startling appeals to the imagination. A hardwareman recently seen by Hardware and Metal who has some unique ideas in planning sales stimulation in the paint department in the midsummer months is responsible for the ideas outlined herewith.

The hardwareman who will begin each day this summer by saying to himself "I will make to-day my best day" and bend all energies toward making good, will find at the end of the day that his cash register shows an increase over the corresponding day last year. Even though he does not reach the goal set in his early morning resolution, he will have done much to keep up the standard of his 1922 sales activities to the point where he can confidently say he has done his bit toward achieving the trade's objective this year.

Profits From Sales

Men in all lines of business are interested in profits, for profits are the very life blood of their commercial activities. Profits can come only from sales, and if a man is to keep up his profits during the summer, he must keep up his sales. To do that he must be as active as he is in other seasons of the year. If weather conditions tend to hinder him, he must call upon his surplus energy and throw them into the front line trenches of his defense against the attacks of the "Summer Slump" bugaboo and his cohorts.

In no business or trade should the "Summer Slump" bugaboo be more completely overpowered than in the paint and varnish business, for there are any number of painting jobs and consequent paint sales that are open to the aggressive painter or dealer at this season of the year.

Paint While the Family's Away

A good share of the prospective paint purchasers in the summer time are householders. While the folks are away on their vacation trip, "dad" will doubtless take advantage of their absence to touch up the porch furniture, have the kitchen floor revarnished, the bathroom enameled, or have the painter put a "tiffany" finish on the walls of the downstairs rooms and hallways. The kitchen furniture or the breakfast set may also come in for a coat or two of enamel or varnish.

Another contact that should be formed with the buying public is through the painting of automobiles. This painting job has been taken out of the seasonal class and is being done in summer in as many cases as in the spring. Every automobile owner has a pride in his car which makes him a prospective buyer of paints if it is pointed out to him that his car is beginning to look shabby and that a coat of paint will make it shine like his neighbor's new one.

Of course, there are still the possibilities of the many painting jobs and paint sales on the public buildings of the community and if the paint man has not already procured this business in his territory, there is still time to get after it and cash in on it during the summer months.

Use Lots of Advertising

In carrying on his summer campaign, the paint man will find it to his advantage to use plenty of newspaper advertising. An attractive series of advertisements pushing only those lines most suitable for summer selling, and if feasible, offering some special inducement to folks who will visit his store, should be laid out in advance, and all other sales activities co-ordinated with the advertising. This co-ordination can best be obtained by getting the same attractive features into window displays—by linking them up with the advertisements and changing them at the same time the advertising copy is changed.

Another point is to organize a special conference with the sales people to imbue them with the same spirit as is conveyed by the advertising and the window displays and to make suggestions as to what lines to push and the possibilities for companion sales particularly applicable to summer selling.

Personal solicitation also has a distinct part to play in making the most of summer sales possibilities, and it is here that the energy expended brings its reward to the paint man in increased sales and increased profits.

In a sentence then, here's the message to dealers who would increase their sales this summer. "Increase your energies, make the most of every sales possibility, and do more advertising and personal soliciting."

Time to Plan for Fall

In addition to his efforts toward making this summer profitable, every painter and every dealer should begin to lay plans for his fall selling activities. The hot months are good months in which to line up fall business, for it really is in

Country's Prosperity Should Help Paint Sales

George Henderson, President Brandram-Henderson, Ltd., in Vancouver, Speaks of Definite Progress Made in Each Province—Good Prospects for Fall Paint Business

VANCOUVER, B.C.—"For the first time in two years one is justified in expressing optimism as to the business outlook," stated George Henderson, of Montreal, president and general manager of the Brandram-Henderson Company, Montreal, on his arrival in Vancouver. He gave interesting facts to support his opinion.

"The apple crop in Nova Scotia is so well advanced that nothing can now interfere with an exceptionally fine harvest," he said. "In New Brunswick the foreign demand for lumber is so great that for the first time since 1914 a cut on the pre-war scale is being planned. Logs that have been lying at the mills for two years are all sold.

Quebec is Prosperous

"In Quebec general business is prosperous and the hay crop, which failed last year and dealt the habitant a severe blow, is going to break all records this summer.

"In Ontario the Niagara fruit crop is away above the average and the general crops through the western portion of the province, beans, peas, potatoes, and so on are remarkably generous.

"As for the prairies it will be no news that every condition is favorable for a splendid crop this year, but you never can tell until the end of July what may happen. There have been good rains, however, and no adverse conditions so far.

Building is Active

"The eastern cities are also enjoying great building activity. Thousands of new buildings are under way in Montreal, Toronto, Ottawa, Hamilton and the other chief industrial cities of eastern Canada."

Mr. Henderson stated that the paint and varnish industry had been assisted during the past two or three years of the general depression by the remarkable results attendant upon the "Save the Surface" campaign.

"During the war the paint industry was exceedingly prosperous due to the amount of new shipping and railway cars and other war material under construction. For the first year after the war the general fictitious prosperity was reflected in our business and just as things began to go flat we launched our conservation programme, not as an expenditure but as an economy. As a consequence we have been saved from any slump. I have never known a co-operative industrial slogan to catch on so well as 'Save the surface and you save all.' It is a household expression now."

Mr. Henderson is president of the Canadian Paint, Oil and Varnish Association and chairman of the "Save the Surface" campaign committee. He goes to Portland to attend a Western convention of paint men subscribing to the "Save the Surface" campaign. "I expect to take a number of the Vancouver paint men with me to that meeting," he said.

Mr. Henderson spent some time seeing the city in company with George E. Smith, B. C. manager for the Brandram-Henderson Co., and of the Pacific White Lead Company of Industrial Island, a subsidiary concern.

OPPOSE MINIMUM WAGE ACT ON CLERKS

(Continued from Page 32)

chairman Watters.

"Are we all in favor of price fixing?" asked a delegate.

"I think we are, providing that in each case a proper spread is provided for," replied the chairman.

Favor Price Fixing

Mr. Trowern said he thought the manufacturers could be relied upon to strongly oppose the bill.

There was considerable discussion regarding the operations of transient traders, hawkers and peddlers, which culminated in the adoption of a resolution requesting the legislature to give a clearer definition of these classes in order that prosecution might be facilitated. Mr. Trowern pointed out that many years ago he had expressed dissatisfaction with it and had attempted on many occasions to have it changed, but had not been successful.

"The principal fault with the act," said Mr. Trowern, 'is that it will never be made to work satisfactorily in all sections of the province. Certain regulations will have to be made for certain districts, because we find that whereas there are some districts where the transient traders are welcomed with open arms, there are others where they are not wanted at all."

Minimum Wage Act

A resolution protesting against the proposed extension of the Minimum Wage Act for clerks was passed with little discussion, the association stating that while no objection was taken to a minimum wage board, it was felt that its functions should be confined to the hearing of complaints from those clerks who felt they were not receiving proper attention, and the board should in no manner dictate to the merchants what salaries they should pay. There should be no interference with the principle that all clerks be paid according to their ability to earn, and not by any fixed scale made either by the government or by trade unions.

The delegates were tendered a banquet by the Brockville merchants on Wednesday evening, which proved to be a delightful affair. Short addresses were delivered by chairman Henry Watters, E. M. Trowern, Hugh Macdonald, mayor of Renfrew; L. N. Poulin, Ottawa; provincial secretary Millar, the latter giving a brief but interesting resume of recent provincial legislation.

Those who attended the conference were: Howard Ransom, Wales; S. G. Eamon, Ornsbruck Centre; R. R. Drysdale and A. MacDonald, Lanark; I. S. Church, Arnprior; T. A. Wright, Perth; R. Hawkins, Smiths Falls; J. Regan, Ottawa; Clarence A. Miller, Ottawa; I. Karrelakos, Perth; S. Kiggins, Ottawa; H. H. Buck, Sydenham; A. E. Warren, North Augusta. H. D. Cameron, Cumberland; J. A. Wright, Ottawa; H. S. Moffatt, Jaspar; W. A. Bell, Delta; L. L. Dunning, Cumberland; R. D. Cheney, Mountain; Wm. Waddell, Almonte; M. J. Thomas, Ottawa; A. R. Holmes, Winchester; J. R. McGillis, Mountain; T. Bowman, Ottawa; John Patterson, Ottawa; G. A. Coons, Winchester; J. G. Rath, Tweed; Edward Reilly, Brockville; H. Johnston, Ottawa; J. C. Allan, Ottawa; Omer Maheu, Embrun; P. A. Gagne, South Indian; E. Trudeau, Stoco; B. G. Crabtree, H. Porteous and A. E. Kelly, Ottawa; J. H. Kidd, Burritt's Rapids; A. H. Jarvis, J. A. Walsh, E. A. Stephens, T. H. Kennedy, H. Armstrong and J. H. Trowbridge, Ottawa; W. Baird, Carleton Place; H. Miller, Russell; R. W. Vont, J. W. McEwen, L. M. Wiseman, Geo. A. Wright, A. M. Patterson, G. C. Howison, L. A. Stagg, Geo. R. Quarmback, J. V. Markey, H. B. Coates, O. R. Craig, E. Venney, F. I. Ritchie, D. M. Bissell, G. R. Johnston, S. M. Adams, A. Rubino and H. W. Gilhooley, all of Brockville; T. W. Collins, Ottawa; R. J. Best, Kingston; J. W. Shier, Tamworth; A. D. Carscallen, Tamworth; W. S. MacDowall, Almonte; W. H. Hasley and T. D. Cowan, Ottawa; W. W. Taber, Carleton Place; J. L. Rochester, Ottawa; L. Beatty, Westboro; C. S. Beal, Ottawa; N. W. Beach, A. A. Cassellman and G. Boyd, Winchester; H. Phillips, J. A. Chevrier and A. Dover, Cornwall; G. W. Steacy, Lansdowne; T. J. Doneher, Carswall; George Green, Ottawa; M. M. McGuire, Spencerville; M. McKerracher, Ottawa; J. H. A. Pilgrim, Montreal; A. J. Abernethy, Kingston; T. J. McAlpin, Marysville; J. Hayes, Lonsdale, as well as the officers and speakers already mentioned.

ARRANGING MIDSUMMER SALE OF PAINT

(Continued from Page 50)

July and August that the impetus for the fall selling campaign originates. It is well to plan ahead on this business, as this Fall promises to be exceedingly prosperous for everyone in the paint and varnish industry, especially in view of the prospects for a live "Get ready for the Indoor Months—Clean Up and Paint Up" Campaign in many communities during this season. This campaign, by the way, from the present outlook, will be greater than any ever carried on before in the fall.

All this has been dealing with the work connected with increasing summer sales and with the preparation for the fall campaign. There is another feature which can go a long way toward increasing efficiency in any business man be he painter or dealer.

Take a vacation. Get away from your business. Hike out into the country. Get back to nature or play for a few weeks somewhere. You'll come back then with plenty of pep for your fall activities and with a new insight into the possibilities for increased business.

Barrett Roofings, Cements Industrial Paints etc.

Powerful Advertising for Quality Products

THROUGH 1922—all over Canada—millions of advertisements will point out the economy, the reliability, the superiority of Barrett Roofings, Cements and Specialties.

Such a powerful sales-making force is bound to bring new customers to Barrett dealers everywhere.

But that's only half the story. Barrett Roofings and Specialties stand head and shoulders above any similar goods—once a man buys them he buys again and again. For Barrett customers are always satisfied customers.

The biggest profits are made by dealers who carry a complete stock of Barrett goods. *You* should have every one of these popular, fast-selling products on hand.

Weekly Paint Markets

Montreal

MONTREAL, July 27.—Current quotations in the paint market this week show very little change, but attracting attention is the situation on window glass and the probable trend for fall business. In recent weeks this market has been more or less unsettled and a distinct variation in prices has appeared between the local market and other Western centres. Locally prices are unchanged and according to importers there is little probability of quotations being increased in uniformity with other domestic markets. On the other hand, there is a feeling that easier prices are altogether probable for the fall trade, considering the present situation in Belgium. Jobbing houses are now looking on imports and it is reported that even lower prices than those prevailing are given on these orders. There is still an easier tone in the Belgium market, greatly assisted by the lower value of the franc.

Linseed oil and turpentine prices remain at last week's figures, the former product still recorded in a firm position owing to the trend of flax-seed and turpentine is said to be fairly firm at the moment. Local turpentine stocks are now quite ample for present requirements and demand is somewhat less during the past week. Whether an easier tone will creep into the market for this product in later weeks is said to depend on demand at producing centres, which has also shown a slight slackening during the past week.

The only development in paint and varnish prices, relative to absorbing the Sales Tax deals with sales from the manufacturer to the jobber. Producers now announce that in future jobbing houses will be relieved of this tax, an allowance being made to cover the amount.

SOMEWHAT SMALLER DEMAND FOR TURPENTINE

Montreal.

Local quotations on turpentine are unchanged again this week, although there is still the wide range in prices among distributors. Demand on the local market now reflects the usual summer slackening, this tendency becoming more apparent each week. Stocks are in ample position and one local importer stated that with plenty of turpentine on hand they were now awaiting developments at producing centres before further purchases were made. In the South a fairly good demand is still in evidence, although the buying interest is not as intense as was a few weeks ago. Requirements during the whole of the past season have been much greater than they were last year, and with new receipts continually being bought up at the moment, this product has maintained a firm attitude all during spring and early summer months. Future demand now governs the situation, according to importers, and a falling off in world requirements in the ensuing week may result in a slightly easier market for fall trade. At present, however, the market is described as fairly firm at the following prices;

TURPENTINE—	Imp.	Gal.
1 barrel lots	1 63	1 80
2 to 4 barrel lots, per gal.	1 61	1 78
Broken lots	1 73	1 90

STEADY UNDERTONE STILL APPARENT IN LINSEED

Montreal.

The linseed oil market is again described as steady to firm, with quotations among the various jobbing houses on a more uniform basis. There is still a strong undertone in the flax-seed market, and local crushers maintain that this position will in all probability continue until the new fall crop. On the other hand, demand, although described as quite normal for this season of the year, has fallen off considerably during the past week and with the usual quieter weeks of summer ahead, little assistance towards a firm market can be expected from this direction. Following are unchanged price levels:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	1 13	1 15
5 to 8 barrel lots, per gal.	1 11	1 13

Less barrels, add 10 cents per gallon.

MAY BE LOWER GLASS PRICES FOR FALL

Montreal.

With the time for fall backings on window glass now at hand, the current situation in this market continues to attract attention. The domestic market some time past has been far from settled, and in recent weeks there has been a distinct variation between local prices and quotations given in other western markets. While certain distributors have claimed that the $6.00 list less 15 per cent. such as is now quoted locally, is a very low price considering replacement cost, other jobbers are apparently willing to take orders at this figure, and even slightly lower, for imports on future delivery. It is reported that import orders are now being taken for September deliveries at a lower figure than the present stock price. The Belgium market continues on an easier trend, assisted by the lower value of the Belgian franc. Importers are of the opinion that with this source of supply on its present trend there is little possibility of local prices being increased to those appearing at other domestic centres, but on the other hand there is a likelihood of even lower prices for fall.

NO FURTHER CHANGE IN ROSIN PRICES

Montreal.

There is still a firm tendency in the rosin market and prices remain at higher levels recently announced. Following are prices quoted:

ROSIN—			Less
G., medium grade	7 75	9 25	10 75
Water white	9 75	11 25	12 75

PAINT JOBBERS RELIEVED OF SALES TAX

Montreal.

The most recent development in the paint trade, following the announcement by manufacturers that they would allow the retail dealer one-half the amount of sales tax, deals with the jobbing houses, who will in future be relieved of the 2¼ per cent. tax which they were formerly asked to pay. Manufacturers in making the allowance stipulate that jobbing houses must charge the merchant the 2¼ per cent., such as the producer is now doing.

From the standpoint of the jobber it was claimed that the margin of profit in handling paint, varnishes and sundry lines was not sufficient to allow them to pay the manufacturer 2¼ per cent. All tax collections from sales must be turned into the government, so that they were forced to pay the manufacturer out of their profit, or in other words out of their own pocket. The present amount of sales tax was considered too high for this to be done.

To the retail dealer this announcment makes no change from the former arrangement. He will pay the 2¼ per cent. tax whether the purchase is made from producer or jobber. With all obstacles apparently now cleared, paint and varnish prices are again on a steady to firm basis, with little further development expected until later in the fall at least.

CARTER'S GENUINE DRY RED LEAD

Give Your Customers

—A lead paint that's pure, uniform and economical.

—A lead paint that's made from the very best Canadian pig lead.

—A lead paint that affords the best and most durable protection against rust or corrosion.

—The best and most satisfactory lead paint you can give them—

Carter's Genuine Dry Red Lead

Carter's Genuine Dry White Lead, Genuine Orange Lead and Litharge are the finest quality obtainable. Write for prices and particulars.

Toronto

TORONTO, July 27.—The announcement of generally recognized discounts on window glass constitutes the premier development in the local paint markets this week. Other factors of note are the possibilities of an acute shortage of turpentine due to the U. S. railroad tie-up delaying shipments from southern producing centres, and the decision of paint manufacturers to absorb the 2¼ per cent. sales tax on invoices to wholesalers, thus placing jobbers and producers on an equal basis as regards charging the retail merchant 2¼ per cent. sales tax. Formerly the jobbers were placed in the position of only collecting 2¼ per cent. from the retailer, which was turned over to the government, while they also had to pay the manufacturer a similar amount on their purchases, which sum was a distinct loss and it was generally thought placed them at a disadvantage. This decision in no way affects the merchant only in respect to the knowledge that on all paints, varnishes and sundries, from whatever source, the manufacturer is absorbing half the sales tax.

The new discounts on window glass merely bring into official recognition levels at which glass has been selling locally for some weeks past. The previous unsettlement in this market has been duly noted in Hardware and Metal, the primary cause being the announcement of discounts by certain eastern distributors which forced competition throughout the local field. The opinion is expressed in certain quarters that a more reliable market should be in evidence for fall trade now that a settlement has been reached.

ANNOUNCE DISCOUNTS ON WINDOW GLASS LIST

Toronto.

A discount of ten per cent. on window glass in lots of less than 25 cases, and of fifteen per cent. on lots of 25 cases or over, is the decision reached in regard to the unsettlement recently apparent in this market. For some time past a discount off the box list has been quoted at eastern distributing centres, with the natural result that shading to meet these lower levels was more or less a common development on the local market. Now that a uniform decision has been reached, the opinion is expressed that this will materially help to give a staple tone to the glass market and also prepare the ground for fall trade. While eastern quotations are still slightly lower than the new official levels given above, one distributor stated that the bridging of the gap was a step in the right direction as the variance in quotations merely resulted in unsettling the market generally.

That present indications pointed towards lower prices on window glass for the fall trade was the opinion expressed to Hardware and Metal. In this respect, it was pointed out that there is an easier trend to the Belgian market and such a condition has been recently assisted by the lower value of the mark. Whether Montreal distributors will increase discounts now that the local price level has been announced, is stated as depending upon future primary conditions. The ten per cent. off the $6.00 box list merely brings into official recognition the average level at which glass has been recently selling.

UNCERTAINTY OVER FUTURE TREND OF TURPENTINE

Toronto.

The feeling in the local turpentine market is one of uncertainty, as the transportation difficulties in the U. S. have already begun to delay shipments from southern producing centres. Local prices remain at unchanged levels and although trading is described as quiet, the condition of stocks show no improvement and continue low, due to the conditions described above. That the American railroad shopmen's strike is bound to tie up shipments of turpentine from Savannah and other points for the next few weeks, was the opinion expressed to Hardware and Metal by a prominent local distributor. It was also considered that quotations for the near future are almost liable to do anything, especially if the local shortage becomes acute. As regards the prospects for fall supplies of turpentine, that of course depends upon the duration of the transportation difficulties and the degree of acuteness with which they affect this industry. Following are unchanged quotations:

TURPENTINE—

1 barrel lots	1 70	1 80
2 to 4 barrel lots	1 69	1 79
5 gallon lots	1 85	1 95

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

JOBBERS WILL ALSO BE RELIEVED OF SALES TAX

Toronto.

In connection with the subject of paint manufacturers absorbing some portion of the sales tax, it is now announced that producers of paints, varnishes and sundry lines have decided to relieve the wholesaler from paying the 2¼ per cent. sales tax on invoices from the manufacturer to the jobber, and thus the latter houses will be placed on an equal footing with the manufacturers and charge 2¼ per cent. to the retailer, instead of the full amount of 4½ per cent.

Under the former arrangements, jobbers explained that they were in the position of turning over to the government the 2¼ per cent. sales tax which they collected from the retail merchant, and thus were forced to pay the other 2¼ per cent. to the manufacturer out of their own pockets. It is stated that this arrangement in no way affects the retailer, as manufacturers in making such an allowance have stipulated that jobbing houses merely collect 2¼ per cent. on sales to the dealer, as the producers are now doing.

DEVELOPING EXPORT CUSTOMERS

(Continued from page 35)

forge a chain strong enough to put Canadian trade out of the rut, create avenues of industry, develop new channels of trade and help to provide work for all willing to work. No one Department of Government, indeed no government, can bring this about without the co-operation and support of a United Canada.

What is the use of our immense undeveloped resources, in agricultural lands, in forests, in minerals, coal, iron, copper and precious metals, in fisheries, and in great water powers throughout two-thirds, or more, of our provinces? What's the good of it unless developed and thus give employment to the citizen and revenue to the nation. Only thus can we hope to encourage greater immigration, doubling our population, and so reducing our per capita debt one half.

Is not increased immigration one of the great problems Canada faces today; to maintain satisfied and contented our own people, and encourage development that will bring to our provinces, and to each province, the people best suited for conditions in that province, a selected and intelligent class of immigration. We must have a policy that will enable the immigrant who becomes a Canadian citizen to obtain work, to live cheaply and well, to produce economically, so he can meet world competition, export the surplus product of his labor, bringing back the profits, and so become a prosperous and contented citizen helping to build up a greater Canada.

STRIKES OFFER SERIOUS POSSIBILITIES

(Continued from Page 29)

situation as a whole it was pointed out that there is much more efficiency in labor now than during the war and immediately after.

"We now get as much production on our open hearths alone as on the two systems combined during the war," said Mr. Spence.

Stocks of iron and steel in the hands of retailers and wholesalers were said to be light, and the mills are of course carrying little or no surplus, mills running to normal capacity to take care of immediate requirements. Curtailment of production would therefore be felt keenly. The stringency may necessitate some further price revisions but it was stated this would depend largely on developments in the United States where the first serious effect of the strikes will be felt.

Shipments of structural steel and other products of the U. S. mills coming into Canada are already being affected by the railway strike. Mr. Spence pointed out that the situation was just as serious from the standpoint of anthracite coal users as with those burning bituminous coal.

TWO BEST SELLERS

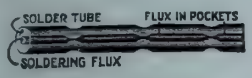
CROWBARS

Per 100 lbs.—Montreal, $7.75; Toronto, $8.00; London, $7.75

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Chicago Solder Co.

Sells all Year 'round The "SELFBLO" Torch

No pumping
No priming

Your customers just fill both barrels with denatured alcohol, touch a match to the wick and "it blows itself." In twenty seconds there's a flame of 1,400° heat.

It's new, and needed by every electrician, radio fan, housewife and tinkerer.

Retails at $2.50

and gives a handsome profit to dealers. If your jobber can't supply you write to Walkley, Moncur & Co., 416 St. James St., Montreal.

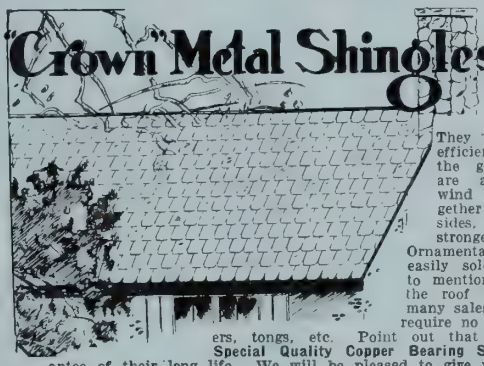
Lynn Mass.

"Crown" Metal Shingles

Will Outlast Them All



They are being used where efficiency in roofing is of the greatest concern. They are absolutely storm and wind proof. Locked together securely on all four sides, they make the strongest roof on the market. Ornamental in design; they are easily sold and you have only to mention the ease with which the roof can be laid to make many sales. Point out that they require no solder, mallets, seamers, tongs, etc. Point out that they are made from **Special Quality Copper Bearing Shingle Plate**, a guarantee of their long life. We will be pleased to give you further details or any advice on sheet metal work—write us.

TINKER TOM'S TALKS.

ANNOUNCEMENT!

We have found the demand so great for our Made-in-Canada Sheets that we are installing additional machinery and on August 6th will have a producing capacity of

100 TONS PER DAY

"Premier" Galvanized Steel Sheets.

Canada's first and best Galvanized Steel Sheet. Made of the finest Open Hearth Steel with a uniformly heavy coating British Columbia High Grade Zinc (100% pure).

Toncan Metal (The Better Iron Sheet).

This is a Pure Iron Sheet to which is added a Copper Alloy and the combination means unequalled durability and satisfaction where corrosive conditions prevail.

"Premier" Copper Alloy Sheets.

Our regular Premier Sheet with Copper Alloy sold at a slight advance only—gives splendid working quality and extra durability.

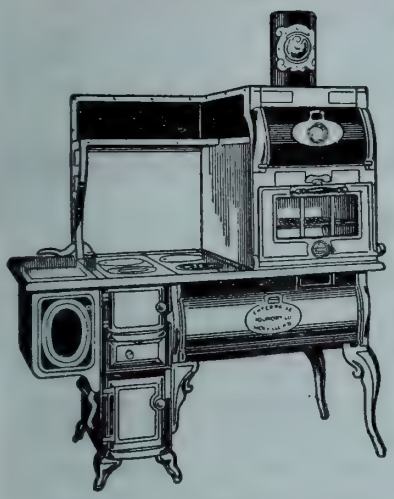
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



"Perfect" Double High Oven
Over 20,000 Satisfied Users

ENTERPRISE

Ranges, Stoves and Heaters

Delight Customers with their Service-giving Qualities

That there are 20,000 satisfied users is surely convincing proof of the popularity and quality of Enterprise Ranges. It has been received and acknowledged as the last word in service built ranges and its popularity is still growing. Customers do not buy a range every week, but the dealer will find his stock moving fairly fast the way the experienced housewives continue to recommend Enterprise Ranges to their friends.

Write to-day for the Ashdown catalogue giving complete information of the Ashdown lines of ranges, of note for service and sales; "Perfect," "Monarch," "Ideal," "Domestic," "Oak Heaters" and "The Open Franklin."

CALGARY WINNIPEG SASKATOON

Here's the degree of faith we have in

NORTH STAR BATTERIES

Any North Star dry cell or multiple that fails to give the user entire satisfaction will be replaced by us without charge or questioning.

Every North Star battery passes our most rigid inspection before leaving the factory and is therefore full powered and dependable.

The demand for North Stars makes them profitable to sell. Experienced battery users prefer them for their superior qualities. Let your customers know that you sell North Star Batteries.

Your jobber can supply you.

WHY
Do You Import Bar Iron?

Our goods have a reputation in the Canadian market, thoroughly established for the last twenty years.

And compare favorably in quality with most imported brands, yet are considerably lower in price and close to hand.

You can get quicker delivery from us.

Copy of tests made by Strength of Materials Laboratory prove our claims as to quality.

Discards Reduced to a minimum

When you stock

STILL'S HANDLES

Every hardware man knows that his profits on handle sales can be greatly reduced if a portion of his stock is not saleable. You can eliminate these losses by selling "Still's Handles." We are handle specialists, and for your protection we stamp our name on all handles.

Losses on discards are reduced to a minimum when you stock "Still's" line of pick, axe, sledge, hammer, cant hook and peavie handles.

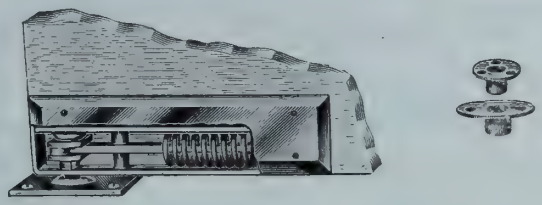
No. 800 Surface Floor Hinge



A ball-bearing hinge that gives long service

NOT the heaviest but the strongest. Greater strength and longer service are built into the Lawson No. 800 Ball Bearing Surface Floor Hinge. All parts subjected to wear, such as cam rollers and pins, plunger, center guide roller and main pintle, are hardened by special process. Write to-day for catalog, prices and terms.

Puts the Joy in Outdoor Life

For campers, motorists, prospectors or for those going yachting this

"Monitor" Coal Oil Stove

is what they need.

This is a "roarer" type. Made with fixed legs or collapsible. Burning coal oil it has the advantages of safety, cleanliness, greater heat and less odor than gasoline. Capacity 2¼ pints.

Also made with Silent Burner.

"MONITOR" coal oil stoves, furnaces, blow lamps, brazing lamps.

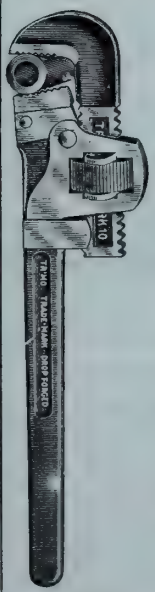
British Manufactured

TRIMO

THE WORD TRIMO



Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

Pipe Wrench — Nut Wrench

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

Manufactured in Canada

Sales Prove Your Wisdom

in buying right, and those dealers who stock up with VIKO Aluminum Ware have their wisdom proved by sales.

VIKO Aluminum Ware is in demand all over Canada, for its durability and beautiful finish.

We can make you prompt shipments from our large stocks in Montreal.

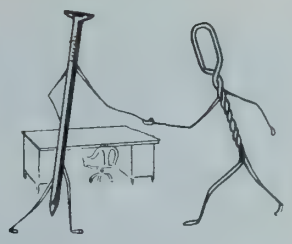
Alex. McArthur & Co.,
LIMITED

82 McGill St., MONTREAL

THEY MUST HAVE THE BEST



"These big Box Nail users find it profitable to use Laidlaw Box Nails, because they are the best. "Let's go for a drive, B.T."

"I can't, W. N., I'm going to be tied."

--THE--

Laidlaw Bale Tie Co., Ltd.

Head Office and Works:

HAMILTON, ONTARIO

Say "Laidlaw Products" to your jobber.

Increase your Summer Sales

There is no better line that you can display to bring you daily sales, than these Three-ply Veneer Chair Seats.

They are made in a pleasing variety of patterns, carefully shaped, corners rounded, edges smoothed and sand papered, and fastened with genuine water-proof cement.

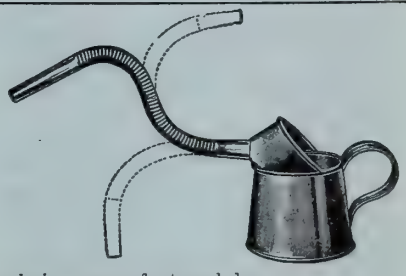
They will not warp, curl, crack or come apart. Even the severest weather changes will not affect them.

A splendid profit in each sale.

Canadian Veneering Company, Inc.

Acton Vale Que.

The "All-Way" Flexible Spout For Oilers



is now being manufactured by

E. T. Wright Co., Limited, Hamilton, Can.

who have acquired the patents, dies and goodwill of the

ALL-WAY OILER MFG. CO.

and can supply the following equipped with the

ALL-WAY FLEXIBLE SPOUT,—

No. 05	1 pint	Aut.	Combination	Measures	and	Funnels
No. 010	1 quart	"	"	"	"	"
No. 020	2 quart	"	"	"	"	"
No. 040	4 quart	"	"	"	"	"
No. 705	1½ pint	Coppered	Mowing	Machine	Oilers	
No. 133	1/3 pint	Coppered	Heavy	Steel	Oilers	
No. 135	1/3 "	"	"	"	"	
No. 139	1/3 "	"	"	"	"	
No. 143	1/2 "	"	"	"	"	
No. 145	1/2 "	"	"	"	"	
No. 149	1/2 "	"	"	"	"	
No. 3124	1 pint	Coppered	Engineers'	Oilers		
No. 3125	1½ "	"	"	"		
No. 3126	2 "	"	"	"		

The "All-Way" Flexible Spout is well known for the great advantages it possesses over the rigid spout. It enables oil to be distributed in places inaccessable to the rigid spout, does not interfere with free flowing of oil, prevents waste, and is absolutely tight against leakage. The tube is asbestos packed, and is fitted with a cleaning device.

The prices of "All-Way" products under the new ownership will remain unchanged.

Previous users and prospective buyers of the "All-Way" Spouts and Oilers are requested to communicate with

E. T. Wright Co., Limited

EVERY MacLean Circulation Salesman (excepting resident Local Agents who would be personally known to you) is provided with an Authorization Card such as this:

This is the Home of
THE MACLEAN PUBLISHING COMPANY
143-153 University Avenue, Toronto

The Largest Organization of its Kind in the British Empire

This is to certify that

.....

is authorized to take subscriptions until

APRIL 30, 1922
(New Card Given Each Month.)

to our publications mentioned on the back of this credential, at the regular subscription rates.

NOT GOOD AFTER ABOVE DATE

E. B. Hargrave

Circulation Manager.

ALWAYS demand to see this card before giving either a new or a renewal order to any MacLean publication.

This is the protection we offer you against the Menace of the Fake Agent. By looking for this card you are protected.

AND if anyone unable to produce this card attempts to sell you a subscription or make collection for your present subscription, please telephone or wire us at once and we will not only appreciate your action, but we will gladly pay all charges in connection with the call.

Our whole object is your protection, but we can not help you unless you help us. And don't forget that we will gladly pay any expenses.

HOW MANY CALLS SHOULD IT TAKE TO GET AN ORDER?

"That depends on circumstances," you say. "Quite true," but here are details of an incident that will interest you. (Names will be supplied on request).

A Toronto manufacturer's representative said: "I have been calling regularly for months on the — Hardware Co., and the — Wholesale Hardware Co., and did not even get a word of encouragement from them, although I sold most of the other jobbers. This week my company has received enquiries from both of these wholesale firms referring to the lines my company are advertising in HARDWARE AND METAL. I have since called and received orders from both of them. How do you explain it? Is this a reflection on my selling methods?"

We don't know why he did not get the orders in the first place. Perhaps the buyers were busy or worried and not in a receptive mood for suggestions. We do know, however, that every wholesale hardware buyer, over 90% of the retail hardware buyers rated in Dun's and Bradstreet's, 900 buyers for hardware sections of department or general stores, and 260 purchasing agents of railways, mines, government purchasing departments, and industrial concerns, read HARDWARE AND METAL advertising pages when in a receptive mood—when looking for new lines—new sources of supply. The two wholesale buyers mentioned above are only two of our 4,350 leading buyers who will study carefully the advertising pages of the 34th Annual Fall Buying and Directory Number to be issued on Aug. 19th. If you are not represented you will not be missed, but if your advertisement is there, **it will be read and re-read,** because this issue will be used as a Buyers' Guide and Reference Number during the Fall and Winter months.

Business is coming back strong. Are you sharing in it? Advertising in the Buyers' Guide will influence Fall and Winter orders. Send your reservation now. Date of issue, Aug. 19. Last form closes Aug. 16. Early forms closing now.

Time to Sort Up On Fall Goods

Unless you watch the calendar pretty carefully you run the risk of being short of goods when the Fall season begins. Take our advice and sort up now—this week. Check over your stove pipes, elbows and angles, thimbles, chimney collars, dampers, stove boards, coal hods, stove shovels, furnace scoops, ash sifters, snow and general purpose shovels, Hot Blast heaters, lanterns, Puritan Heaters and other fall lines.

While you are at it go over your Diamond Ware and Pearl Ware, Hot Galvanized Ware, Lumino Ware, Japanned Ware, Tin Ware and other lines. Nobody knows how early the Fall buying season will open and it's far wiser to be on the safe side with a stock that will take care of the demand.

Place your order with our traveller or write us direct.

This is the
"Neglected Inch"
—the inch between the furniture and the floor

They Now Buy Casters by Name

BASSICK CASTERS are rapidly supplying the long-felt need as represented by the "Neglected Inch" illustrated above. The moment your customers know that you carry Bassick Casters which eliminate the scarring of their hardwood floors and stretching and tearing of their rugs, you've made a sale of casters. And you've made a good friend of your customer.

The progressive dealer who carries Bassick Casters, and gives this line the attention that it warrants, has found that it is a money-making proposition, easy to handle, quick to turn over, and profitable to sell.

Your jobber knows the Bassick proposition. Ask his salesman the next time he calls.

Canadian Sales Agent:

DAVIDSON'S Stoves and Ranges MADE IN CANADA THE SEAL OF DURABILITY

"Cold Pack" Process

One Size Only

Home Preserving and Canning Outfit

Comprising one 18-quart Enameled Cook Pot with Wire Rack to hold six 1-quart jars, which lifts out bodily without fear of breakage.

SPECIAL FEATURES

Size of cook pot (In Enameled Ware—The Clean Ware) Top 13 inches. Depth—9¾ inches. Fitted with Enamel Cover

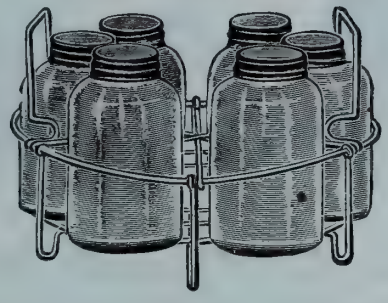
1. The jars are kept above the floor of the boiler, allowing free circulation of the hot water and preventing the bottles from cracking.

2. Each single jar can be removed separately without interfering with the others.

3. Six one-quart jars of either fruit, vegetables or meat can be handled and operated at one time.

4. When not in use as a canner, the large enameled round kettle can be used for other cooking requirements.

5. It represents a plain, strongly-made, efficient kitchen tool which increases the efficiency of the cook, and tends to improve the flavors and food values of the varied products which can be prepared in the canning way.



This Simple Equipment makes Canning a Joy Instead of a Task

Fruit juices, marmalades, jellies and all preserves, vegetable or fruit, are greatly improved if canned in the cold pack way. The fresh, garden taste has not been destroyed, the natural color of the fruit is preserved, and none of the food value is lost. Everything is evenly and perfectly cooked. The use of this outfit makes home canning certain of success. An attractive, bright colored tag is attached to each rack, giving full instructions as to how it is to be used and operated.

These outfits are supplied in two colors: **COLONIAL (Grey) and PREMIER (Blue)** with white lining.

A complete equipment in any brand of Davidson's PREMIER Enameled Ware makes housework easy at preserving time.

Let us have your enquiries.
Prompt shipment guaranteed on early orders.

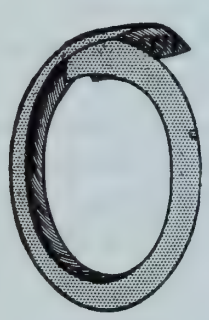
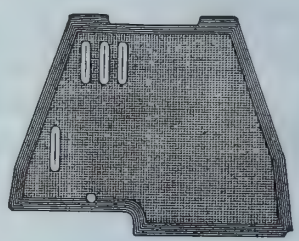
TRADE MARK GP BRAND

"GUTTA PERCHA" ACCESSORIES

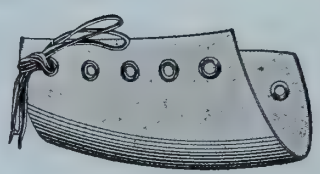
Not only Because of their Exceptional Merit but Because the Name and Brand are Made Familiar by Continuous Advertising



Reliners



Heatproof Mats (for Fords)



Lace-on Boots

Sealtite Patches

As a merchant you are well aware of the comparative ease of selling a familiar, well-known brand. It is natural for people to feel more favorably disposed toward a brand with which they are familiar than toward a strange name and product.

When you put a "G.-P." product before your customer, he recalls his agreeable experience with other products bearing the "G.-P." trade-mark so familiar in scores of advertising mediums. The familiar, friendly trade-mark helps your salesmanship and closes the sale quickly, without argument. This speeds the turnover of your invested capital, keeps down selling cost, and increases your annual net profit.

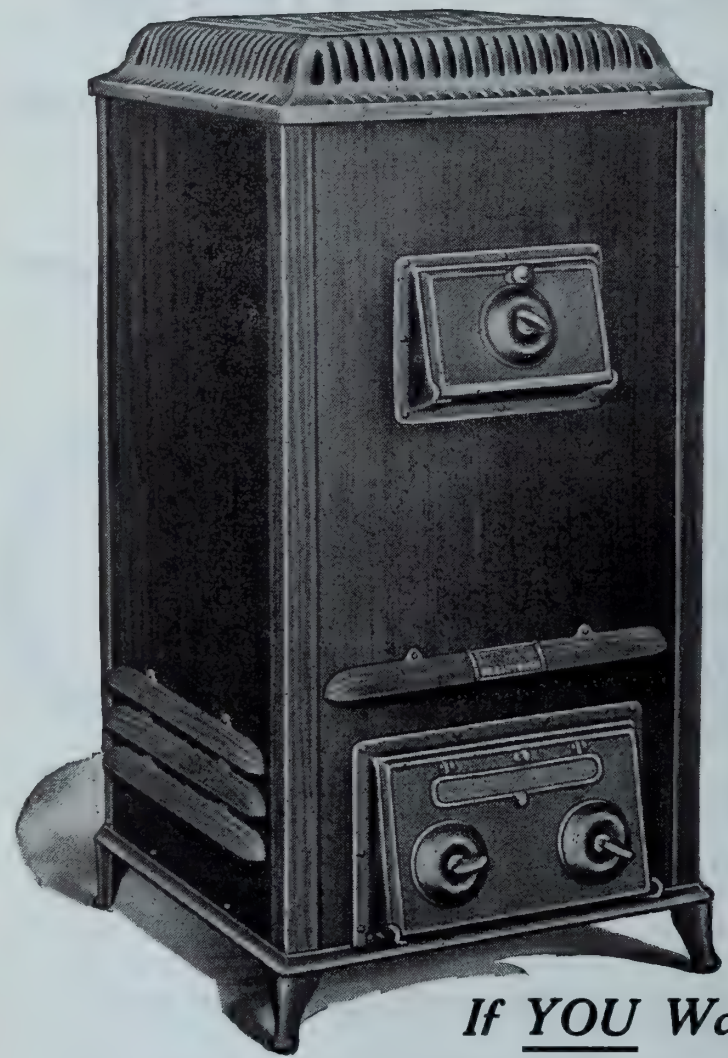
It's a Furnace—not a Stove

SOUVENIR SUPER-HEATER

SUPPLANTS OLD METHODS OF HEATING MEDIUM-SIZED HOUSES



The Souvenir Superheater is one of the greatest achievements ever known in the history of stove building. It is built on an entirely new principle, and is not a stove, but a practical and efficient warm air furnace that heats 3 to 6 connecting rooms. Looks like a costly mahogany cabinet; adds charm to a well furnished room. Supplants all old time heaters. Consumes little fuel and sells at sight.

Who'll Meet The Demand In Your Town?

A LARGE AND PERMANENT DEMAND FOR THE SOUVENIR SUPERHEATER IS ASSURED

Owners of small and medium sized houses and bungalows will welcome this furnace. It means comfort to them at low cost. It is also ideal for heating stores, offices, halls, etc.

If YOU Want the Agency

write or wire us to-day—because we will appoint one dealer **only** in each town.

Our dealers get real co-operation, too. We advertise extensively and mail attractive folders to prospective purchasers. Now is the time to be lining up fall sales. A Souvenir Superheater on your floor will sell itself many times over. It will burn soft coal, hard coal or wood and in the event of a coal shortage this winter, of which there is every indication at present, the Superheater will keep the house warm and comfortable with a minimum of coal or with wood alone if necessary.

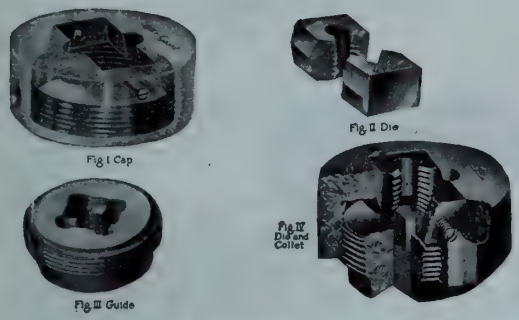
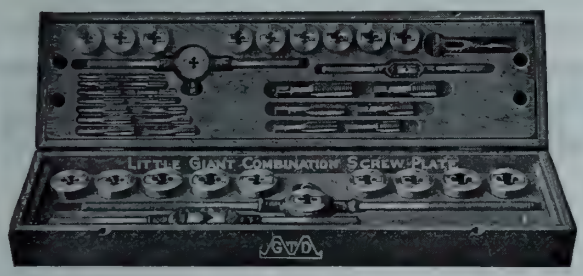
Little Giant

SHOULD BE ON YOUR SCREW PLATES



"Little Giant Die and Collet"

Every genuine **"Little Giant"** Screw Plate has a **"Little Giant"** Die in its collet for every cutting size. The illustration above shows the superior construction of the **"Little Giant"** Die. Notice its reversible feature, the double bevel on the die, which allows the user to thread through the guide or from the face of the collet as desired.



A **"Little Giant"** Screw Plate is a set of threading tools which are a source of satisfaction to the owner. Every part is well-made, accurate and enduring. The set is put in a varnished and oiled hardwood box which will last indefinitely.

"The sort of threading tools that make friends."
